SCHOOL ADDITION—1 story and base, reinforced concrete \$150,000. Seattle, Wash. Architect, Edgar Blair, 1426 Jackson street, Seattle. Owners, City of Seattle. An addition 90 by 175 feet will be made to the Green Lake District School. The ground floor will contain class rooms and a large auditorium. Basement has been arranged for boys' and girls' gymnasium. Construction will be fireproof. Plans provide for steam heat, a modern system of ventilation and program clocks. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be opened on April 7th.

LODGE HALL AND STORES—3 story and base, brick and steel, \$35,000. Port Angeles, Wash. Architect, Francis W. Grant, Globe Block, Seattle. Owners, Naval Lodge B. P. O. E. The building will be erected on a corner site, covering an area of 80 by 100 feet. The first floor will contain a number of stores. Upper two floors will be arranged for the lodge rooms, library, smoking rooms, offices and banquet room. Interior will be finished in pine and hardwood. Plans provide for steam heat and a hot water supply. There

will be a large stone fire place. Exterior of the building will be faced with pressed brick. Working drawings are nearly complete and figures will be called for as soon as these drawings are finished.

Where Will San Francisco Put The Immigrants?

Dr. Parker to Speak Tonight at City Planning Exhibit.

Dr. Carlton H. Parker, Secretary of the State Immigration and Housing Commission, will deliver the principal address this evening at the City Planning Exhibit at 1055 Market Street, opposite Jones, at 8:15. The subject of this address will be "Where Will San Francisco Put the Immigrants?"

This is a problem which has more bearing upon the growth of San Francisco in the next ten years than any other single matter of its development. Dr. Parker has obtained through his official position many facts and statistics regarding the number of immigrants that may be expected to enter this port beginning early next spring with the opening of the Panama Canal. The problem is so imminent and so serious to the people of this city that it must be properly dealt with and the discussion this evening will deal with possible solutions of the distribution of this vast horde of foreigners expected.

Dr. Parker is expected to make an important pronouncement in this regard.

Tomorrow night Governor Johnson is expected to speak. His subject will be "The Future of San Francisco Harbor."

Wednesday will be Panama-Pacific Exposition Day. At 8:15 P. M., Dr. Frederick V. Fisher, chief of the Lecture Bureau, will give an address, illustrated with slides upon "Planning and Building a Small Sized City—The Exposition."

Thursday at 3:30 the Commonwealth Club will hold a special City Planning meeting at the Exhibit. The evening address will be announced later.

Friday will be Woman's Day, with the program in charge of the Civic Center, and the California Club. Dr. Werner Hegemann, of Berlin, noted City Planning Expert, will deliver an address at 3:30 P. M.

Mr. James D. Phelan will speak Friday evening at 9:15 on "San Francisco and the Trouble it can Save by Planning Ahead."

Saturday will be Merchant's Day. The program is being arranged by the Chamber of Commerce and other commercial bodies, promising discussion of San Francisco's most important civic improvements.

Sunday will be Labor Day, with a program arranged by representatives from the several labor bodies. This will be the last day of the Exhibit, which closes at 10 P. M. and will go to Los Angeles and other cities.

Many of the ninety odd improvement associations of the city are arranging special meetings at the Exhibit where they can discuss in the body their own problems with the solutions of the 200 most progressive cities of the world

pictured before them.

President J. M. Kepner of the Civic League of Improvement Clubs, who returned yesterday from two weeks in Los Angeles, is today calling a conference of the officers of the Association to see how the clubs can get the most out of this great lesson in civic achievement. So much that it is vital to San Francisco is shown that Mr. Kepner feels that not a single improvement club member can afford to miss it and special notices are being sent out describing the importance and urgency of this City Planning Exhibition.

SUN MINES GOLD.

The discovery of gold in Candle on Johnny Bull Hill, Alaska, was one of the most peculiar in the annals of gold mining in the North. Under a layer of ice twenty feet in thickness, was found a layer of gravel containing gold in workable quantities.

To get this gold the rays of the sun are utilized. An overburden of a foot or two of moss and muck is sluiced off with water and the mass of ice exposed to the action of the sun. The sun, during the long arctic days of midsummer, does rapid work in reducing the sheet of ice to the level of the gravel body which underlies it. Then sluice boxes are arranged along the slope of the gravel bed, and the water dammed. When there is enough water, it is turned on the gravel to wash it into the boxes. The gold separated, the waste gravel is then washed down into the tailing piles minus its golden load. —Technical World Magazine.

MUTUAL HIT HARD.

Northwestern of Seattle Gets Wallop on California Business.

The Northwestern Mutual Fire Association of Seattle, which invaded California a couple of years ago with offers of insurance at cut rates, suffered a heavy loss on its California business during 1913. According to the concern's sworn annual statement filed with the California Insurance department the losses for the year amount to 63 per cent of its net premium receipts. This is 13 per cent higher than the regular insurance companies' average for the year and bears out the general prediction that the company's methods would sooner or later bring disaster. The practice of the company to cut rates to secure California business pointed out by insurance men as one sure to bring trouble, and if persisted in, will bring about its collapse.

Statements Confict.

The Northwestern was caught on some heavy losses in California last year, individual fires costing the company many thousands of dollars. In the Smith lumber plant fire, which proved a total loss, the Northwestern issued its policy for \$48,000 at a cut rate. The concern afterwards claimed that it had re-insured all but \$13,000 of this sum, but its annual statement fails to substantiate this claim. According to the annual statement, the entire re-insurance premiums reported in California totaled \$2840.15, while insurance men state that the premium for re-insurance on the Smith lumber loss, as claimed, would more than total the sum mentioned, leaving no re-insurance for any other of the California risks.

BOOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

“KINNEAR”

The ONLY Door

You Buy for UTILITY

that INCLUDES

FIRE PROTECTION

KINNEAR STEEL ROLLING DOORS are designed to afford fire protection and for the closure of all openings in which ease and speed of operation and economy of space are considerations. They are adaptable to all classes of new or old building construction and by their use make possible the closing of very large openings which could not otherwise be conveniently covered.

Recent great conflagrations have fully vindicated the claim of the “KINNEAR” STEEL ROLLING DOOR to pre-eminence as a fire-stop. Placed side by side with various other forms of fire retardants it has in every case remained in place even after the others were destroyed.

We will consider ourselves favored if allowed to explain and make quotations on any constructions meeting your definite needs.

We have just received from the press a new Handbook on Steel Rolling Doors and Shutters illustrated only with California Installations.

Editorial Comment.

Business activity assumes periods of activity and periods of comparative quiete. Sometimes it is hard to account for the reasons for it. Many are advanced but it depends upon the point of view as to how the matters are looked at. At present there seems to be comparative inactivity in business circles all over the world.

Inactivity here is accounted for by the action of the present administration in reducing the tariff and in the adjustment of banking interests relative to the adoption of the new currency measure. But this would hardly account for the depression of foreign markets and the inactivity that obtain there.

However, things here seem to have taken an upward trend. As the year advances business enterprises should begin to assume a normal growth. The trouble has been that a lot of industries have been existing on abnormal privileges and have been paying dividends on watered capital. When it comes to a proper adjustment somebody must be squeezed and the eradication of the disease always causes the patient to feel worse.

The current number of the Technical World Magazine has an article on the secession of Irving J. Gill, Los Angeles architect, from the conventional forms of modern dwellings. It lays emphasis on the fact that he has practically eliminated wood in his construction and that he has cheapened construction in eliminating all the more or less conventional forms. For instance, his residences are constructed of concrete or hollow tile. Wood floors, wainscoting, base boards and even the picture molding is eliminated. So that a building results that is extremely simple in its designs and furnishings and is most sanitary and economical in its upkeep.

Mrs. Millie Brown has been found not guilty of the crime of murder by a jury in the Superior Court of Alameda county, California. Her defense was insanity and the verdict finds her insane at the time the crime was committed.

There can be little doubt that the fact that she was a woman had a great deal more to do with the failure to convict than the fact that she was insane. Her justification for the crime committed was a great deal more than that of the Alexander woman who was acquitted in a San Francisco court.

Helpless women should be protected by mankind and by the courts as well. But the failure of justice where women have committed positive crimes cer-

tainly does not deter the criminal element among women which everybody must admit exists in a far less degree than among men.

As among criminals so in the divorce courts. As a rule women get the best of it no matter what the condition may be. And this is due to the newspapers and the maudlin sentiment that is fostered by the yellow journals, the problem plays and the moving picture melodrama. Just now there seems to be a reaction setting in and a tendency to get back to normal conditions.

The federal government, having control of the Panama Canal Zone, is now arranging a workmen's compensation plan for employees in the canal and railroad work.

This is another interesting experiment in connection with the government's ownership and operation of the "utilities" in the canal zone. The efficiency of the government as an employer and a dispenser of justice certainly should be aided by having no interest to consider aside from its own and its employees.

It is a remarkable thing that all the stand-pat politicians are howling to high heaven about the repeal of the Monroe Doctrine and that Hearst and all his allies are beating the tom-toms and invoking the curses of all the ancestral deities upon the heads of Wilson and Bryan. For these men have been practically strong for our tradition. They have stood for the spirit of the Declaration of Independence throughout every vicissitude of their political life. And now that they control the policy of our government it is a patent fact that their action in asking for the repeal of the canal tolls is actuated by motives that are to them entirely sufficient.

Hearst quotes Senator Penrose as saying the repeal measure will be beaten in the Senate. The Chronicle says that the senate will obstruct the passage of the measure. And so on throughout the line the people who are opposing the measure are those who have opposed every reform attempted by the administration.

In the Baltimore convention, as everybody knows, Bryan upset Hearst's scheme to nominate Clark and broke the Ryan, Belmont, Underwood combination and nominated Wilson. Hearst is the same as he always was, a dog in the manger seeking to create any kind of disturbance possible. We may or may not believe in the repeal of the canal tolls provisions. Let the matter be threshed out in Congress. So long as we are convinced that the people in charge are acting in good faith it is evident that we have nothing to fear as to results.

The Democracy Of Business.

Remarks of Louis D. Brändels, Boston, Mass.

Reprinted from the Nation's Business.

I had hoped to participate in a discussion of the pending trust legislation, but a hearing before the Interstate Commerce Commission in the Advance in Rates case prevented my hearing what had been said by most of the speakers, and it would obviously be improper for me to attempt to refer to them and to what they may have said, when I know so little what it was.

I want, however, to say this: The program of President Wilson is not a program of free and unrestricted competition, but it is a program of regulating competition instead of regulating monopoly. This, too, should be remembered as coming from President Wilson: He laid down in his message to Congress certain broad lines upon which, in his opinion, the trust legislation should proceed, and it was then stated at the same time that the bills that were introduced were not the administration bills, but were bills of certain members of Congress or of committees which the public, business men and others had called upon them to present.

As far as I myself am concerned, while I unqualifiedly commend each of the provisions contained in the President's message on this subject, I find very much in the bill that needs amendment and correction; and I may say that I have found that those who have these bills under consideration, including the gentlemen who have prepared them, have the greatest desire to get such aid as they may get from those who speak with a view to perfecting them, pointing out their errors and pointing out the end which the administration has in mind can be accomplished.

The details of those bills are matters which are altogether too complex and cover altogether too much ground for me to take up here, but there are one or two others that hit one or two other precise points that I want to call your attention to in this connection, and the first is this:

Transportation preferences as Affecting Equality.

No one can possibly approach the subject of trusts, the subject of equality of opportunity to our business men, of which the trust problem is but a part, without realizing this great problem. Transportation is one of the privileges which places the greatest restraint in favor of a few upon a large number of the American business men. It has been said sometimes that you cannot follow up an industrial monopoly today without finding that some unjust and preferential transportation privilege accounts in large measure for the power possessed. That, obviously, was the case with the Standard Oil Company. It is obviously, also, the case in large measure with the Steel Corporation; and it has been true of a very large number of the other corporations.

Privilege, preference, discrimination in favor of very large and powerful interests in the transportation field have been the main causes of the overwhelming growth of a few concerns as compared with the struggling growth of many others.

This trust problem—and by that I mean the problem of giving to American business men an equal opportunity—cannot be solved unless there be a complete divorce of transportation from industry. We undertook a few years ago, in the Hepburn Act, to prevent the railroads from owning industries, from owning mines and manufactures, and in that way getting a preferential position which the ordinary shipper was not able to meet. The Act was narrowly construed by the Supreme Court, but even if the fullest and most generous construction had been given to it, it would not have been adequate, because it is not only important that the railroads should not control mining and other industries, but that the industries should not control railroads; and, equally, that there should not be a holding company controlling both industries and railroads in the same interest. Therefore, legislation affecting this result is absolutely essential to the giving of equality of opportunity to American business men.

While legislation is necessary, the Interstate Commerce Commission has recently taken a very important step in that direction. Within a fortnight it has rendered its decision in the Industrial Railroads case which marks an epoch in American transportation. It has declared that the great industries owning for their own convenience as a plant facility industrial railroads shall no longer stand in a preferential position as against the smaller shipper who has not such industrial railroads.

Before that decision the basis of the facts which led to that decision was that the great industries owning these industrial railroads were receiving as a part of the freight rates, important services free—services so great in the aggregate, that it was estimated that the illegal allowances granted to these industrial and the illegal services aggregated, in this Eastern Official Classification Territory alone, \$15,000,000; and when we consider that the whole amount which is supposed to be involved in this 5 per cent advance in freight rates is only about \$50,000,000, you will realize how important is that preference enjoyed by the great industries. There is now a proceeding before the Interstate Commerce Commission calling for a consideration of questions quite similar in principle to those involved in this case—services which are granted by railroads free, in addition to the line haul, to certain industries, mainly, the larger industries—not secretly, not in any sense illegals as to create in any way a moral taint, but actually rendered under cir-

cumstances that only the large interests can avail of.

Today we have been discussing at great length before the Interstate Commerce Commission what is called the "Trap" or ferry car service, granted free to those who have spur tracks to their industries. Under that the large shipper who not only has a spur track but who deals in such large quantities that he may send to the freight houses for trans-shipment at one time 10,000 pounds of freight in less than carload lots to be trans-shipped in less than carload lots gets what is equivalent to his truckage free, whereas all the smaller shippers must bear the truckage charge, heavy though that may be.

That is but one of many industries which, the investigation of the Interstate Commerce Commission has disclosed, is receiving, owing to the circumstances under which it operates, from the railroads a service very much greater than the smaller shipper receives—receiving free a service which the great mass of shippers cannot participate in at all. And just as in the Industrial Railroads case it appears that those special services and allowances have been depleting the revenues of the railroads to the extent of \$15,000,000, so those very services granted to individual circumstances as only the larger shippers can be taking from the railroads a very huge revenue in the aggregate.

When we come to consider this broad question of equality of opportunity which, for short, is sometimes called, rather inaccurately, "the trust problem," we must bear in mind this feature, that there is going on in the railroad world today a discrimination against the small man that has nothing to do directly with his efficiency. He may be ever so efficient, but if he is small, if he is unable to ship in large enough quantities to avail, for instance of this truckage service, his competitor, who is big, gets an advantage which, in the aggregate, is very big against him, and he moves on, not through superior efficiency, but through a preference that is given him; and in the course of that preference you are taking from the railroads a very large revenue.

Those questions must be considered when you come to deal with the broad business problems to which the present administration is so earnestly directing itself.

Advantages Lying in Great Industries.

There is one other feature in regard to this matter that I venture to call to your attention. I understand that Secretary Redfield has spoken about the relative efficiency of the large and small plant. It seems to me that the limit of efficiency in business is reached at a fairly early stage; that the disadvantages of size outweigh in many respects the advantage of size; but there is one respect in which the great industry has an important advantage. That is in the collection, the

getting of knowledge, the collection of data in regard to trade, that knowledge for which great concerns extend their bases of inquiry all over the world; and they have great capacity in the different parts of this country to know the state of the market, to know what is being done, to know what are the possibilities of trade, and also in their work through the laboratory. Laboratories are maintained, and they can be maintained only by great concerns.

That gives a perfectly legitimate advantage to the great industry—one for the pursuit of which our great captains of industry are to be commended.

We must also remember that we are working here in America upon the problem of democracy, and we cannot successfully grapple with the problem of democracy if we confine ourselves to political democracy. American development can come on the lines on which we seek it, and the ideals which we have can be attained, only if side by side with political democracy comes industrial democracy.

It is the relatively small man who pre-eminently needs the aid and the solicitous care of industry and of government. We have, gentlemen, to bear all the time that democratic view in mind, and to bear in mind that education does not end with the common school, nor does it end with the university. We are beginning throughout the country to talk now of vocational training. But where shall vocational training end? Not merely with the training of the individual for the bit of work that he is to enter into. That training must continue throughout life, and that training must extend to every part of his business life.

In what is perhaps the greatest department of our business—in the business of farming—we have come to recognize that fact, possibly because the need of greater efficiency in farming is more marked than it is anywhere else; but the Government has undertaken, with the good will and to the gratification, I believe, of every citizen, to give to the humblest farmer an opportunity to acquire the best knowledge which America affords. Through the agricultural experiment stations of state and nation, through the great work of our Department of Agriculture, we are undertaking to advance in every possible way the efficiency of the farmer.

The Government recognizes its duty to give to the farmer the opportunity of education. By giving him on the one hand, all the knowledge of the state of the market which can be obtained, and giving him, on the other hand, the best results of all the research that we know. What better could the Government of this country do than to extend to business that care and solicitude and aid which it shows in the case of the farmer? To make it affirmatively the business of the Government to extend to the manufacturer throughout this country the opportunity of knowing about his particular line of manufacture the best that can be known, because every man among us who is adopting any process in business which is not the best is guilty of a waste from which all of us are suffering. The best that there is, the

most advanced knowledge in every department of business, is that to which every American citizen, every American business man, ought to be entitled, and more.

Why should not we recognize in the great realms of business those principles which have been the common property of the most advanced thought? Every man in the medical world glories in having given to the world something which advances medical science. Every man in the field of architecture glories when he can give to the world something that advances architectural science. You will find exactly the same thing in almost every department of engineering. Why should it not be so in business? Is there any lack of opportunity for competition, honorable competition, in the field of engineering or of architecture or of medicine? They can play the game wherever a man can see it.

There need be no secrets when it comes to the question of advancing the art to which man devotes himself. And the same is absolutely true of business and will be recognized as true of business as soon as men come to recognize that business is one of the noblest and most promising of all professions. And in the carrying out of this idea of advancing business, of putting business into its proper place among human activities, the Government of the United States may play a great part. I look forward to the Trade Commission which we are about to establish as an instrument which will be of inestimable advantage to the business and the future of America by making the common property and the common knowledge of American business men the best that has been done and is being done in every department of business throughout the world.

Firms dealing with special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 5 story and base, brick and base, brick and steel. Cost not stated. Architect, W. G. Hind, 46 Kearny street, S. F. Owner, Mr. Redmond Payne. The building will be erected at the northwest corner of Sacramento and Jones streets. The building has been designed for a high class of tenants, the suites ranging from five and six rooms to twelve rooms. The first, second and third floors will each contain two apartments of five and six rooms, while the fourth and fifth floors will each contain one twelve-room suite. The building will occupy one of the choicest sites on the hill commanding a full view of the entire bay and the greater portion of the city and Alameda and Marin County shores. There will be a complete steel frame and exterior walls of brick faced with tapestry brick. Special trim will be used in the larger suites as desired by the tenants who have already leased. Solid mahogany of the Louis XIV style will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Segregated figures are being taken.

SAN FRANCISCO—Apartment house, 7 story and base. Class A construction. Cost not stated. Architects, Wilks Polk & Co., Merchants' Exchange Bldg., S. F. Owner, John W. Proctor. This building will be erected on the south side of California street west of Mason and will have a complete steel frame, brick exterior walls and metal lath and plaster interior partitions. There will be but fourteen apartments, two to the floor, but each apartment will have five or six rooms with two and three baths. Interiors will be finished to suit the tenants who will lease for long terms. Plans also provide for steam heat, freight and passenger elevators and dumb waiters, hot water system and vacuum cleaning. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are now being prepared.

SAN FRANCISCO—Apartment house, 8 story and base, reinforced concrete. Cost not stated. Architect, none. Owner, P. H. Bosworth, 110 Jessie street, S. F. The building will be erected at the northwest corner of Broadway and Florence street, and has been designed to contain a total of 24 suites arranged in four rooms each. All apartments will have private baths and wall beds. Interior finish will be of pine and hardwood veneer. There will be steam heat and elevator service, a hot water supply and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with glazed tile. Plans are complete and the owner is taking segregated figures.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete \$25,000. Architect, L. M. Hansman, Sharon Bldg., S. F. Owner, I. S. Foorman. The building will be erected on O'Farrell street east of Jones, and has been designed to contain a store on the first floor and nine apartments of three rooms and bath on the upper four floors. Interior will be finished in pine with some elm panels and hardwood floors. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. All apartments will be equipped with wall beds and will have private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Marble and tile entrance will be used. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

SAN FRANCISCO—Apartment house, 7 story and base, steel and brick. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Bush street west of Stockton and will cover an area of 40 by 91 feet 8 inches. There will be a total of 72 rooms arranged in 36 apartments of two rooms and bath each. Interior finish will be largely of pine. All suites will have

wall beds and private bath rooms. Plans provide for steam heat, elevator service and a hot water supply. Metal window frames and sash and a vacuum cleaning system are also specified. Exterior of the building will be faced with pressed brick and terra cotta trimming. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$24,000. Architect, E. H. Denke, 1317 Hyde street, S. F. Owners, Max and Dora Kolander. The building will be erected at the southeast corner of Franklin and Sacramento streets, covering an area of $3\frac{1}{4}$ by 79 feet. There will be a total of nine apartments of three and four rooms finished in pine and gum with some hardwood floors. Plans provide for steam heat and a hot water supply. All suites will have wall beds and private baths. Portable vacuum cleaners will be installed. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are complete and figures will be called for shortly.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected at the southeast corner of Fillmore and Page streets and will cover an area of 30 by 81 feet. The first floor will contain a store besides the main entrance. Upper floors will be arranged for a total of seven apartments of three and four rooms. Interior finish will be of pine and elm with some oak floors. There will be steam heat and open fire places. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be covered with rustic and pressed brick veneer. Plans are nearly complete and the work will be done by Day Labor. The architects will purchase all materials.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$40,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, C. Lange. The building will be erected at the corner of Grand avenue and Park View, and has been designed to contain a number of two, three and four room suites, all of which will have private baths and wall beds. Interiors will be finished in pine and redwood with some elm panels. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Portable vacuum cleaners will be installed. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken by both the architect and owner.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$10,000. Architect, none. Owner, J. P. Beckett, 2635 Channing Way, Berkeley. The building will be erected on East 23rd avenue near 17th street, and will contain three and four room apartments. Interior finish will be of pine and redwood with some oak floors. There will be a central heating system and hot

water supply. Bath rooms will have tile wainscot and composition floors. All suites will be equipped with wall beds. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Apartment house, 5 story and base, Class C construction, \$100,000. Architect, C. H. Barrett, 381 Bush street, S. F. Owner, Mrs. J. H. Morton. The building will be erected at the northeast corner of Geary and Polk streets, covering a large ground area. A number of stores will occupy the ground floor while upper floors will be arranged for two and three room apartments with private baths. Interior will be finished in pine and hardwood veneer. Plans provide for steam heat, a hot water supply, vacuum cleaning system and elevator service. All suites will have wall beds. Bath rooms will be finished in tile with composition floors. Entrance will be finished in marble. Stores will have patent fronts. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Working drawings are complete and figures will be taken at once.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick. Cost not stated. Architect, Elmore R. Jeffery, Citizens' National Bank Bldg., L. A. Owner, William Duehring. The building will be erected at the corner of 16th and Georgia streets on a lot 50 by 90 feet. There will be a total of 42 rooms arranged in two and three room apartments with private baths and wall beds. Interior finish will be of pine throughout. All bath rooms will have composition floors and tile wainscot. Plans provide for steam heat and hot water supply. Exterior of the building will be faced with pressed brick.

LOS ANGELES, CAL.—Apartment house, 3 story and base, Class C construction. Cost not stated. Architect, C. F. Skillings, Garland Bldg., L. A. Owner, Mrs. Mundy. The building will be erected on a 45 by 70 foot lot located at the corner of 23rd and Hope streets. The plans provide for a total of 38 rooms, which will be arranged in two and three room apartments. All suites will have wall beds and private bath rooms. Interiors will be finished in pine and redwood with some elm panels and hardwood floors. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Garrett & Farrell, Currier Bldg., L. A. Owner, H. A. Pierce. The building will be erected at the corner of 51st and Moneta avenue, and has been designed for five stores on the first floor and a total of 25 apartments of two and three rooms on the upper floors. Interior finish will be of pine throughout. All apartments will have wall beds and private bath rooms. Plans provide for steam heat, a hot water supply, vacuum cleaning and wall beds. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Ex-

terior of the building will be faced with pressed brick. Plans are being prepared.

SACRAMENTO, CAL.—Apartment house, bungalow type, 1 story frame. Cost not stated. Architect, none. Owner, A. Hollenbeck, 1631 K street, Sacramento. The building has been designed after the bungalow style and will contain four, four room apartments with baths. Interiors will be finished in pine and redwood with some oak floors. A central heating system will be installed. Bath rooms will have tile wainscot and composition floors. Automatic water heaters are specified. Exterior of the building will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SEATTLE, WASH.—Apartment house, 4 story and base, brick and steel, \$35,000. Architect, V. W. Voorhes, Elitel Bldg., Seattle. Owner's name withheld. The building will be erected at the corner of 4th avenue and Bell street, and will contain 40 rooms arranged in two and three room apartments. All suites will have wall beds and private bath rooms. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. A central heating system, probably steam heat, will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SEATTLE, WASH.—Apartment house, 3 story and base, brick, \$35,000. Architect, Frank H. Fowler, Central Bldg., Seattle. Owner, D. O. Boyd. The building will cover an area of 73 by 120 feet, and has been designed to contain 35 suites of two and three rooms. Interior finish will be largely of pine with some hardwood floors. All apartments will have wall beds and private bath rooms. Plans provide for steam heat and a hot water supply. Bath rooms will be finished in tile with composition floors. Entrance will have tile and marble wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, Class C construction, \$15,000. Architects, Noonan & Murphy, Douglas Bldg., L. A. Owner's name withheld. Contractors, Noonan & Murphy, Douglas Bldg., L. A. Contract price, \$45,000.

BRIDGES AND DAMS.

SAN FRANCISCO—Wharf extension, pile construction. Cost not stated. Engineer, Assistant State Engineer Jerome Newman, Ferry Bldg., S. F. Owners, State of California. At the last meeting of the State Board of Harbor Commissioners it was voted to extend Meigs' Wharf a distance of 400 feet in the direction of the Presidio. The new portion of the wharf will be used by the army transports and the Union Oil shops. Construction will be of creosoted piles. Bids will be called for as soon as working drawings can be completed.

SAN FRANCISCO—Furnishing cement. Cost not stated. Engineer, Assistant State Engineer Jerome Newman, Ferry Bldg., S. F. Owners, State of California. Bids opened at the last meeting of the State Board of Harbor

Commissioners for furnishing 50,000 barrels of cement resulted in two bids of \$1.64 per barrel and one of \$1.90. No award has yet been made. A list of these figures will be found under the heading of San Francisco in this issue.

SEATTLE, WASH.—Dock, reinforced concrete, \$300,000. Engineer, Engineering Department Standard Oil Co., Standard Oil Bldg., S. F. Owners, Standard Oil Co. The work will consist of the construction of a 175-foot dock on the east side of East Waterway. A corrugated iron shed will also be constructed. Plans are now being prepared and figures will be called for shortly.

NAPA, NAPA CO., CAL.—Bridge, reinforced concrete, \$25,000. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, City of Napa. Engineers Leonard & Day have been commissioned to prepare plans for a reinforced concrete bridge to be erected on East First street in the city of Napa. The work will cost in the neighborhood of \$25,000 and working drawings will be complete in about 10 days. The bridge will be 150 feet long and 60 feet wide. Borings are now being made to determine the nature of the foundation soil.

CHURCHES.

SAN FRANCISCO—Church restoration, brick and steel, \$80,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Patrick's Church. The present building located on the north side of Mission street between Third and Fourth streets is to be completely rehabilitated. Included in this work will be brick and concrete work, structural steel, plastering, carpentry, mill work and art glass. The old tower will be restored and a set of chimneys installed. Plans are complete and figures are now being taken. Father Rodgers is in charge of the work.

RIVERSIDE, RIVERSIDE CO., CAL.—Church, 1 story and base, reinforced concrete, \$25,000. Architect, T. Franklin Power, Higgins Bldg., L. A. Owners, Roman Catholic Church of Riverside. The building has been designed in the Spanish Renaissance style and will have a seating capacity of 700 people besides the Sunday school rooms. Interior finish will be of pine and redwood with ornamental plaster. Marble and art glass work are called for. Exterior of the building will be faced with cement plaster. Father Holm is in charge of the work. Plans are still in the preliminary stage and further mention will be made of the work.

FACTORIES & WAREHOUSES.

SEATTLE, WASH.—Warehouse, 4 story and base, reinforced concrete, \$200,000. Architect, Port of Seattle Commission, Central Bldg., Seattle. Owners, State of Washington. The warehouse will be erected on Whatcom avenue between Seacey and Lander, and will cover an area of 78 by 138 feet. Construction will be fireproof. The building will be equipped with all modern conveniences and is to have fireproof doors, metal window sash and frames. Plans are complete and figures are being called. Bids will be opened on April 15th. Alternate bids may be submitted on plans prepared

by the bidders and accomplishing the purpose of the design furnished by the Port of Seattle Commission.

FIRE HOUSES.

BERKELEY, ALAMEDA CO., CAL.—Fire houses, 3 2 story and base, frame, \$5,000 each. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. All bids received some time ago for these buildings have been rejected as plans were slightly changed after the bidders started to figure the work, and the City Attorney fears that contacts would not be binding. New figures will be advertised for within a few days. Further mention will be made of the work at that time.

FLATS.

SAN FRANCISCO—Flats, 4, 2 story and base, frame, \$4,500 each. Architect, Edward F. Helms, 5th avenue and California street, S. F. Owner, O. E. Anderson. These buildings will be erected on the east side of 15th avenue between California and Lake streets. Each of the houses has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine, redwood and some elm panels. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will have composition floors and tile wainscot. Exteriors will be covered with cement plaster on metal lath with pressed brick bases. Plans are in the hands of the owner and work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,500. Architect, none. Owners, C. J. and W. J. Keenan, Grove and Masonic avenue, S. F. The building will be erected on the east side of Masonic avenue near Grove street and will be similar in design and construction to several other flat buildings erected in the same neighborhood by Keenan Bros. There will be two flats of five and six rooms. Interiors will be finished in pine and redwood with oak floors in the principal rooms. Open fire places and tile mantels will be used in the living rooms. Baths will have tile floors and wainscot. Exterior of the building will be covered with shiplap and a brick veneer base. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,000. Architect, Edward F. Helms, 5th avenue and California street, S. F. Owner, L. F. Peterson. The building will be erected on the west side of 11th avenue near Fulton street and has been designed to contain two modern flats with garage in the basement. Each flat will contain six rooms and bath. Interior finish will be of pine and redwood with some elm panels and hardwood floors. Open fire places and tile mantels will be used in the living rooms. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with cement plaster and shiplap. Plans are being prepared and when complete the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none.

Owner, G. Peterson, 551 12th avenue, S. F. The building will be erected on 11th avenue, covering an area of 25 by 57½ feet. There will be two modern flats of five and six rooms. Interior finish will be of pine throughout. Hardwood floors will be used in the living and dining rooms. Open fire places and tile mantels are specified. Automatic water heaters will be installed in the bath rooms. Exterior of the building will be covered with cement plaster and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, \$40,000. Architect, none. Owner, G. P. W. Jensen, 320 Market street, S. F. The building will be erected at the corner of Bush and Polk streets, covering a considerable ground area, and has been designed for a commercial garage. Besides the storage space the building will contain office, machine shop and repair department. Interior will be finished in pine. Steel roof trusses and metal window sash and frames will be installed. Exterior of the building will be faced with cement plaster. Plans are in the hands of the owner, who is a well known contractor, and he will do the work by Day Labor.

Co. low on the hydraulic wheel press. A complete list of the bids will be found under the heading of San Francisco in this issue.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,500. Architect, none. Owner, Paul Gerson, 216 McAllister street, S. F. The dwelling will be erected in Jordan Park on Commonwealth avenue between Euclid and Geary, and has been designed for a seven-room house with two baths. Interior finish will be of pine with some hardwood veneer and oak floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner who is taking figures on the work.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owners, Harvard and Hill, 20 Franklin street, S. F. The dwelling will be erected on 25th avenue near Irving and will be similar to several other houses erected by the same owners. Interior finish will be largely of pine. Some oak floors will be used. There will be a large open fire place in the living room and a tile mantel. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,500. Architect, Edward F. Helms, 5th avenue and California street, S. F. Owner, Mr. H. Judell. The dwelling has been designed for a seven-room house and will be erected on Jackson street. Interior finish will be of pine with some hardwood veneer. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composi-

tion floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on 16th avenue north of California and will contain six rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. A large open fire place will be a feature of the living room. Mantel will be of tile. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,000. Architect, H. H. Gutterson, 50 Post street, S. F. Owner, Mrs. W. Shipman. The dwelling has been designed for a seven-room house with bath and sleeping porch and will be erected in St. Francis Wood. Interior finish will be of pine, redwood and some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residences, 2 story and base, frame, \$3,000 each. Architect, Edward F. Helms, 5th avenue and California street, S. F. Owner, O. E. Anderson. These dwellings will contain five and six rooms and will be erected on the east side of 10th avenue between California and Lake streets. Pine and redwood will be used for interior finish. All houses will have open fire places and tile mantels in the living rooms. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be specified. Exterior will be covered with cement plaster on metal lath, rustic and shingles. Plans are now being prepared and when complete the work will be done by Day Labor. Materials will be purchased by the owner.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on the north side of California street near 16th avenue and will contain six rooms and bath. Interior finish will be entirely of pine or redwood. Oak floors will be used in the living room, dining room and reception hall. There will be a large open fire place and tile mantel. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, Theo Fenn, 749 61st street, Oakland. The dwelling has been designed for a six-room house with

bath and sleeping porch and will be erected on Boulevard near 54th street. Interior finish will be of pine and redwood with some hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. A. Kruse. The dwelling will be erected in Thousand Oaks, and has been designed to contain seven rooms and bath. Interior finish will be largely of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Frederick Townsend. The house will be erected in the Northbrae Tract and has been designed to contain seven rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room and kitchen will have tile wainscot. A composition floor will be used in the bath room. An automatic water heater will be specified. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architects, Mitchell & Hodges, Bankers' Investment Bldg., S. F. Owner, A. Meehan. The dwelling will be erected on Russell street near Claremont and has been designed for a twelve-room house with three baths and sleeping porch. Interior finish will be of pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Automatic water heaters will be specified. A garage will also be erected on the property. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, James W. Plachet, Acheson Bldg., Berkeley. Owner, Joel Hildebrand. The dwelling will be erected on Le Roy street near Buena Vista Way and has been designed for a six-room house with bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and re-

ception hall. There will be furnace heat and one large open fire place. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the architect is now taking figures.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, George Anderson, 6046 Lawton street, Oakland. Owner, L. J. Jenks. The house has been designed for a seven-room dwelling and will be erected at the northwest corner of Woolsey and Benvenue streets. Interior finish will be largely of pine with some white enamel and hardwood veneer. Oak floors will be used in the principal rooms. Bath room will have tile floor and wainscot. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owners, MacArthur Bros. 1560 Fell street, S. F. The dwelling will be erected on 5th avenue south of Cabrillo, and has been designed to contain five rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster and a brick veneer base. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$10,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Mrs. Brunner. The dwelling has been designed for a ten-room house and will be erected on 16th avenue near California. There will be a garage in the basement. Interior will be finished in pine with some elm panels and hardwood floors. Bath room will have tile wainscot and composition floor. An automatic water heater is specified. There will be furnace heat and open fire places. Mantels will be of tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$30,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Mr. Moore, of the Moore-Watson Co. The dwelling has been designed for a fourteen-room house with several baths and sleeping porch. A garage will also be erected on the lot. Interior of the dwelling will be finished in pine, redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system and hot water supply. Vacuum cleaners will also be installed. There will be several large open fire places with tile or brick mantels. All bath rooms will be finished in tile. Exterior of both the house and garage will be covered with cement plaster on metal lath. A red clay tile roof will be used. Plans are being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$12,000. Architect, Charles Mau, Macdonough Bldg., Oakland. Owners, Misses Mary and Margaret Dunn. The dwelling will be erected at the northeast corner of Bellevue and Van Buren streets, and has been designed to contain twelve rooms, three baths and sleeping porch. Interior finish will be of pine, redwood and hardwoods. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for this week.

SAN FRANCISCO—Residences, 2 2 story and base, frame, \$2,000 each. Architect, E. J. Spence, 537 25th avenue, S. F. Owners, Spence and Fearick. These two houses have been designed for six-room dwellings and will be erected on 15th avenue south of Anza. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places in each living room with tile mantels. The wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exterior will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners who will do the work by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$2,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, C. C. Adams. The dwelling will be erected in Waterside Terrace and has been designed to contain seven rooms and bath. Interior finish will be largely of pine with some redwood and oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$1,000. Architect, A. Lacy Worswick, 700 Octavia street, S. F. Owner, A. Lacy Worswick. The dwelling will be erected on Stow street near Wayne and has been designed for an eight-room house with bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, Albert Schroeffer, Foxcroft Bldg., S. F. Owner's name withheld. The dwelling will be erected on Ryala avenue near Martin and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An auto-

matic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, J. B. Morton. The dwelling will be erected in the Country Club Heights and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story, attic and base, frame, \$30,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, John Spohn. The dwelling has been designed for a fourteen-room house with several baths and a sleeping porch, and will be erected on a corner lot. A garage will be erected in the rear. Interior of the house will be handsomely finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. All bath rooms will have tile floors and wainscot and will be equipped with showers. Automatic water heaters and portable vacuum cleaners will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are now being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, P. Lindblad. The dwelling has been designed for a seven-room house and will be erected on Crofton avenue near Boulevard Way. Interior of the house will be finished in pine with some elm panels and beam ceilings. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater is specified. Bath rooms will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

The following Day Labor jobs are reported as about to be started in Sacramento: Sacramento Home Builders, Forum Bldg., 1 story, five-room cottage, \$2,000; Palm Iron Works, 15th and R streets, 1 story, frame cottage \$1,600, and W. D. McKay, 3029 E street, 1 story, five-room cottage, \$2,500.

SEATTLE, WASH.—Residence, 2 1/2 story and base, tile, \$30,000. Architect, Carl Gould, Boston Bldg., Seattle. Owner, J. H. Bodell. The dwelling will be erected on Harvard Boulevard, covering and area of 40 by 62 feet with a wing 25 by 35 feet. There will be in the neighborhood of twelve rooms, several baths and a garage. Much landscape work is also contemplated. Interior of the dwelling will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat and a hot water supply. Portable vacuum cleaners are also specified. Bath rooms will have tile wainscot and composition floors. Exterior of the dwelling will be covered with cement plaster. Plans are complete and ready for figures.

BRENTWOOD, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame, \$25,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, C. Stephens. The house has been designed in the classic style and will contain sixteen rooms and three baths. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Plans provide for steam heat and a hot water supply. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

HOLLYWOOD, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame, \$25,000. Architect, Arthur S. Heineman, Fernando Bldg., L. A. Owner, Mrs. Russak. The dwelling will cover an area of 80 by 60 feet and will contain fifteen rooms, three baths and sleeping porches. A garage will also be erected on the property. Interior will be finished in pine and hardwood. There will be a central heating system, probably furnace heat, and open fire places. Mantels will be of tile. Hardwood floors will be used in the principal rooms. Bath rooms will have tile wainscot and floors and will be equipped with showers. Considerable art glass and ornamental grilles will be used. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base, brick and concrete. Cost not stated. Architect, Albert Pissis, Flood Bldg., S. F. Owners, City and County of San Francisco. Bids opened for the construction of the Oriental School at the last meeting of the Board of Public Works show Elmer Carlson low on the general construction. While no contracts have been awarded the work

will probably go to the several lowest firms. A complete list of all bids will be found under the heading of San Francisco in this issue.

Bids were opened at the same meeting for glass and glazing of skylights and pent houses on the roof of the Academic building. Polytechnic group. The California Plate and Window Glass Co. were low at \$1,220.

SACRAMENTO, CAL.—School, 1 and 2 story, reinforced concrete. Cost not stated. Architects, Shea & Lofquist, Fankers' Investment Bldg., S. F. Owners, City of Sacramento. Plans are now nearly complete for the second school to be erected in Sacramento from plans by the same architects. As soon as working drawings can be completed bids will be called. Further mention will be made of the work.

STOCKTON, SAN JOAQUIN CO., CAL.—Academy, 2 story and base, brick and steel, \$70,000. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, St. Agnes Academy. The building has been mentioned here several times before. Plans are complete and now in the hands of the contractors for figures. Bids will be opened on April 12th. The building has been designed to contain class rooms, dormitories, dining rooms and chapel. Interior will be finished in pine with some maple floors. Plans provide for steam heat and a hot water system and vacuum cleaning. Exterior will be faced with pressed brick.

STOCKTON, SAN JOAQUIN CO., CAL.—School addition, 1 story, brick and concrete. Cost not stated. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, City of Stockton. An addition of four rooms is to be made to the North School. Plans for the work are complete and now out for figures. Bids will be opened on April 8th. Plans can be secured from the architects. The work includes a steam heating system, modern plumbing and ventilation.

WILLOWS, GLENN CO., CAL.—School, 2 story and base, reinforced concrete, \$50,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Willows School District. The building will contain eight class rooms, assembly hall and study rooms. Construction will be of the semi-fireproof type. Interior finish will be of pine with maple floors in the class rooms. Plans provide for steam heat, vacuum cleaning system and program clocks. Modern school plumbing will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on April 18th. Separate bids are being taken for the general construction with an alternate proposition, heating and ventilating, plumbing, vacuum cleaning and program clocks.

FRESNO, FRESNO CO., CAL.—Advisory architects to the Board of Education. Architects Coates & Traver, advisory architects to the Fresno Board of Education, have opened offices in the Rowell Bldg., Fresno, and would like to receive samples and catalogues from the trade. Any expense attached to the delivery of these catalogues may be collected at the San Francisco office of the architects in the Addison-Head Bldg.

SAN FERNANDO, LOS ANGELES CO., CAL.—School addition, 2 story and base, brick and frame, \$25,000 to \$30,-

000. Architects, Austin & Pennell, Wright & Callender Bldg., L. A. Owners, San Fernando School District. The new portion of the building will contain eight class rooms which will be finished in pine with maple floors. The present heating system, steam, will be extended into the new portion of the building. Exterior will be faced with red pressed brick. Plans are being prepared. Further mention will be made of the work.

LOS ANGELES, CAL.—Mission school, 3 story and base, brick. Cost not stated. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, Christian Women's Board of Missions of Indianapolis. The building will be erected on Wall street. The first floor will contain the chapel, offices and class rooms. Second floor will contain 20 private rooms with baths and the third floor will be arranged for six apartments of three rooms each. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. A general contract, except the heating, will be awarded. Plans are complete and new figures are being taken.

Contracts Awarded.

STOCKTON, SAN JOAQUIN CO., CAL.—School, 2 story and base, reinforced concrete, \$50,000. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, Stockton School District. Contractors, O. B. Ackerman & Son, Oakland. Contract price, \$68,400. A complete list of the figures received for this work appears under the heading of Sacramento, Stockton and Northern California in this issue.

SEWERS, STREET WORK AND WATER SYSTEMS.

CALIFORNIA—State Highway work. Cost not stated. Engineer, Austin B. Fletcher, State Highway Engineer, Forum Bldg., Sacramento. Owners, State of California. Plans and specifications have been completed for state highways in Siskiyou (8 miles), Shasta (9.9 miles), Tehama (8.8 miles), Butte (11.2 miles), Glenn (7 miles), and Sonoma (4.5 miles). Bids for this work will be opened on April 27th at 2 p. m. An official proposal appears in another column of this issue. Further information may be obtained by addressing Wilson R. Ellis, Secretary State Highway Commission, Forum Bldg., Sacramento.

CALIFORNIA—State Highway work. Cost not stated. Engineer, Austin B. Fletcher, State Highway Engineer, Forum Bldg., Sacramento. Owners, State of California. Bids were opened at the last meeting of the State Highway Commission for highways in the following counties: Santa Clara, El Dorado, Merced, Tuolumne, Mendocino and two pieces in San Diego. A complete list of all bids received will be found under the heading of San Francisco in this issue.

STORES.

SAN FRANCISCO—Stores and lofts, 2 story and base, brick. Cost not stated. Architects, Rouseau & Rouseau, Monadnock Bldg., S. F. Owners, Eisenbach Co. The building will be erected

on the south side of Sutter street east of Jones and has been designed to contain two stores on the first floor and lofts above. Interior finish will be of pine throughout. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are being prepared.

OAKLAND, CAL.—Offices, 3 story and base, brick and steel, \$50,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owners, San Francisco-Oakland Terminal Railway. The building will be erected at the corner of 22nd and Grove streets, and has been designed for use as the company's administrative headquarters. Interior finish will be of pine and hardwood veneer. There will be steam heat, a hot water supply and vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

FRESNO, FRESNO CO., CAL.—Stores and offices, 4 to 6 story and base, brick and steel, \$125,000 or more. Architect, Eugene Mathewson, Fresno. Owner, L. L. Corey. This building will be erected at the corner of J and Fresno streets, having a frontage of 77 feet on one street and 150 feet on the other. Construction will be of the Class A type throughout with a complete steel frame, brick exterior walls and concrete floors. Interior partitions will be of metal lath and plaster. There will be six stores besides the office entrance on the first floor. Upper floors will be arranged for a large number of modern offices. Interior finish will be of pine and hardwoods with some metal trim. Plans provide for steam heat, oil burning equipment, vacuum cleaning system and metal window sash and frames. Patent store fronts and marble wainscot are also specified. Two elevators will be installed. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared and figures will be called for shortly.

LONG BEACH, LOS ANGELES CO., CAL.—Bank and offices, 5 story and base, brick and steel. Cost not stated. Architects, Kremple & Erkes, Henne Bldg., L. A. Owner, William Prestin. The building will be erected at the corner of Pine avenue and Broadway, covering an area of 50 by 150 feet. While plans have been prepared for a five-story structure, it is possible that only three stories will be erected at this time. The first floor will contain three stores and a banking room, occupied by the Marine Commercial and Savings Bank. Twenty offices have been provided for on each of the upper stories. There will be steel frame and brick exterior walls. Interior partitions will be of metal lath and plaster. Elevator service, special bank fixtures, vaults and metal window sash, and frames are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SEATTLE, WASH.—Stores and offices, 22 story and base, steel and reinforced concrete, \$150,000. Architect, E. W. Houghton, Collins Bldg., Seattle. Owner, C. H. Jones, representing Chicago capital. The building will be erected at the northeast corner of Second avenue and Marion, covering an area of 168 by 122 feet. The interior first floor, except that portion devoted to the entrance, will be occupied by a

high class moving picture theatre. Upper floors will contain a total of 420 offices. Construction will be fireproof throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Interior of the theatre will be handsomely finished in ornamental plaster. Metal trim, hardwoods, marble and tile will be used for finish throughout the office portion of the building. Basement of the building will be occupied by a cafe. The plans provide for seven passenger elevators, steam heat, hot water system, vacuum cleaning and mail chutes. Exterior will be faced with marble and terra cotta. Plans will be ready to submit to the owners inside of two weeks. Further mention will be made of the work.

THEATRES.

BERKELEY, ALAMEDA CO., CAL.—Theatre, 2 story and base. Class A construction, \$70,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, The Bishop Co. The building will be erected at the corner of Grove and University avenue and will contain one store besides the theatre. Construction will be fireproof with a steel frame, reinforced concrete or brick walls and metal interior partitions. The main auditorium will have a seating capacity of 1,000 people. Interior finish will be of pine and ornamental plaster. There will be steam heat and a modern system of ventilating. Exterior of the building will be faced with pressed brick and terra cotta. Plans are also being prepared for other similar buildings to be erected in the interior valley towns.

OAKLAND, CAL.—Theatre, 2 story and base, Class A construction, \$80,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, The Bishop Co. The building will be erected at the northwest corner of 14th and Harrison streets and will contain one store besides the theatre. Construction will be fireproof throughout. The main auditorium will have a seating capacity of 1,200 people. Interior finish will be of pine and ornamental plaster. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared. Several other similar buildings will be erected by the same owners in interior valley towns.

PORTLAND, ORE.—Theatre and offices, 4 story and base, reinforced concrete, \$100,000. Architect, Aaron Gould, Henry Bldg., Portland. Owner, Melvin G. Winstock. The building will be erected at the corner of Park and Stark streets, covering an area of 160 feet square. There will be eight stores besides the theatre on the first floor. Upper floors will each contain 20 modern offices. Construction will be fireproof throughout. Interior finish will be of pine and hardwood, marble and tile. The theatre will have a seating capacity of 2,000 people. Plans provide for steam heat, elevator service, patent store fronts, metal window sash and frames and vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans will be out for figures within two weeks.

Contracts Awarded.
SEATTLE, WASH.—Theatre, 3 story and base. Class A construction, \$80,000. Architect, H. Ryan, Northern Bank Bldg., Seattle. Owners, Blaine Estate. Contractor, H. D. Stewart, American Bank Bldg., Seattle. Contract price, \$80,000. Note: The contractor is now taking subbarges on the work.

SEALED PROPOSALS.

STATE OF CALIFORNIA, DEPARTMENT OF ENGINEERING, CALIFORNIA HIGHWAY COMMISSION NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until the time herein-after noted, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Until 2 o'clock p. m., April 27, 1914.

Siskiyou County from Hernbrook to the Oregon Line (II-Sis-3-C), about 8 miles in length, to be graded.

Shasta County from La Moine to Hazel Creek P. O. (II-Sha-3-D), about 9.9 miles in length, to be graded.

Tehama County from the southerly boundary to Corning (II-Teh-7-A), about 8.3 miles in length, to be built of Portland cement concrete.

Butte County from Linde Channel to the northerly boundary (III-But-3-D), about 11.2 miles in length, to be built of Portland cement concrete.

Glenn County from Grapit to the northerly boundary (III-Gle-7-C), about miles in length, to be built of Portland cement concrete.

Sonoma County from the northerly boundary to Cloverdale (IV-Son-1-A), about 4.5 miles in length, to be graded.

Plans may be seen and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to each blank form of proposal, for directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

**CHARLES D. BLANEY,
CHARLES F. STERN,**

California Highway Commission,
AUSTIN B. BLANEY, Highway Engineer.

WILSON R. ELLIS, Secretary. (*)

Rec'd March 25, 1914.

PROPOSALS FOR ARCHITECTURAL TERRAZZO COFFRA WORK.

PURSUANT to Resolution No. 7423 N. S., passed March 16, 1914, the Council of the City of Oakland will receive bids for furnishing of all the labor, materials and workmanship required in connection with the construction, erection and finish of the Architectural Terrazzo Setting in the Auditorium, located on Twelfth street, between Fallon street and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City of Oakland, the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bid for Auditorium," addressed to the Content and delivered to the Auditor or his agent, with said Council, while in session, between 11 o'clock a. m. and 12 o'clock, Noon, Pacific Time, on the 18th day of April, 1914, at the room of the Council in the City Hall, 14th and

Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, and all said plans and specifications reference is hereby made.

The Contract for the furnishing of all the labor and materials entering into the construction, erection and completion of the Architectural Terrazzo and Setting, all as indicated on the Plans and Drawings, and as called for in the specifications is to be let or awarded as a separate contract.

The Contractor will be required to begin work within five (5) days from the execution of the contract, unless otherwise notified in writing by the owner for contract, and to fully complete the entire work in accordance with the requirements of the agreement, plans, drawings and specifications, and to guarantee the entire satisfaction of the Commissioner of Public Works and the Council, on or before one hundred (100) working days from and after the beginning of the work.

After the award and upon the execution of the agreement, the contractor shall, at the same time, execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the City the faithful performance of the contract and to the satisfaction of twenty-five per centum (25%) of the amount named in the agreement. He shall likewise execute and deliver at the same time another and similar bond to protect any and all persons performing labor upon or furnishing materials to be used upon the said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

A bound set of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgments and specifications will be furnished to each contractor at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after March 17th, 1914, within a reasonable time after application, and upon a deposit of twenty-five dollars, which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition, and complete set of plans and drawings required for the work will be furnished each applicant; additional copies will, however, be furnished, provided the applicant pays the cost of reproduction, such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements necessary to explain and make definite and complete the forms of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved by the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the deposit of the bidder as required by Section 126 of the Charter.

FRANK M. SMITH, City Clerk.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C. March 25, 1914. Sealed proposals will be opened in this office at **3 P. M., May 6, 1914,** for the construction complete (including mechanical equipment, interior lighting fixtures and approaches) of the United States Post Office at Grass Valley, Cal. The building is of the second and third class, with a ground area of approximately 4,450 square feet; stucco facing; slate roof, nonfireproof construction. Drawings and specifications are on file in the room of the custodian of site at Grass Valley, Cal., or at this office, in the discretion of the Supervising Architect, O. WENDEROFF, Supervising Architect. (*)

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed bids will be received by the Board of Trustees of the Patterson Union High School, Patterson, Stanislaus County, California, on the 14th of April, 1914, up to 2 o'clock p. m. of the said day, for furnishing the labor and material to construct a new Union High School Building in said District, on the site provided for same, on the west line of 7th street, bounded on the north by H street and on the south by J street.

The plans and specifications for the said proposed new Union High School Building are on file in the office of Dr. A. M. Field, Clerk of the above Board, in Patterson, California, and also in the office of Henry C. Smith, authorized architect, 783 Market street, San Francisco, California, where copies of same may be obtained by bidders on deposit of the sum of Twenty-five Dollars (\$25.00). Reference is hereby made to such plans and specifications for mode of bidding. Blank forms for bidding will be furnished by Clerk or architect upon application.

Each bid must be accompanied by a certified check or bidder's bond for ten per cent of the amount of the bid, said check or bond to be made payable to Dr. A. M. Field, Clerk of the Board of Trustees of the Patterson Union High School District. The Board reserves the right to reject any and all bids.

All general bidders will be allowed to retain the plans and specifications for six (6) consecutive days in which to prepare figures, but arrangements may be made by payment of \$10.00 to retain same until opening of bids, which amount will be deducted from the deposit of \$25.00 when the plans and specifications are returned. DR. A. M. FIELD, Clerk.

President of the Board of Trustees of the Patterson Union High School District, Patterson, Stanislaus Co., California.

STATE OF CALIFORNIA.
DEPARTMENT OF ENGINEERING.
CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received in the office of the California Highway Commission, 516 Forum Bldg., Sacramento, Cal., until the time hereinafter noted, at which time they will be publicly opened. Bids for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Until 2 o'clock P. M., April 13, 1914

Solano County from Benicia to a point $2\frac{1}{2}$ miles south of Cordelia (H. Sol-7-A), about 5.1 miles in length, to be built of Portland cement concrete.

Alameda County from Hayward to Valle Vista School (CV-Ala-5-C), about 3.1 miles in length, to be built of Portland cement concrete.

Alameda County from Hayward to Oakland (CV-Ala-5-D), about 5.1 miles in length, to be surfaced with asphaltic concrete.

Kern County from the northern corner of Dearborn (Ker-4-P), about 12.4 miles in length, to be built of Portland cement concrete.

Ventura County from Sea Cliff to the westerly county boundary (CV-Ven-2-F & G), about 5.1 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contracts and specifications may be obtained, at the said office and they may be seen at the office of the Division Engineer in charge of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full instructions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all

bids or to accept the bid deemed for the best interest of the State.

CHARLES D. BLANEY,
NEWELL D. DARLINGTON,
CHARLES F. STERN,
California Highway Commission
AUSTIN B. FLETCHER,
Highway Engineer.

WILSON R. ELLIS, Secretary.
Dated: March 13, 1914.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McLURE, State Engineer, Capitol Building, Sacramento, California, up to an including 12 o'clock noon, Tuesday, April 14th, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the construction and erection of the elevator work of the building known as the Female Building, at the Stockton State Hospital, Stockton, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.
Cash, a bidder's bond, or a certified check, in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five Dollars (\$5.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids, and to waive any informality in any bid received.

All bids must be addressed to W. F. McLURE, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposals for Elevator Work Stockton State Hospital, Stockton, California."

(Signed) W. F. McLURE,
State Engineer. (*)

SALE OF U. S. NAVAL VESSELS.—Sealed proposals will be received at the bureau of supplies and accounts, Navy Department, Washington, D. C., until 12 o'clock, noon, May 14, 1914, when they will be publicly opened for the purchase of the following vessels: U. S. S. Manila, at navy yard, Mare Island, Cal., appraised value \$10,000; U. S. S. Rogers, at Mare Island, Cal., appraised value \$2,000. The Manila will be sold for cash to the highest bidder and the Rogers to the bidder offering the highest price above the appraised value. Forms of proposal and bond and information concerning the vessels and the terms and conditions of sale may be obtained upon application to the bureau of supplies and accounts. JOSEPHUS DANIELS, Secretary of the Navy.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Thursday, April 23, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor and doing the work required for the construction and erection of a building to be known as Ward 25, Stockton State Hospital, Stockton, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Ward 25, at the Stockton State Hospital, Stockton, California."

(Signed) W. F. MCCLURE, State Engineer. (*)

PROPOSALS FOR BUILDING.

BUILDING.—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly enveloped on the outside of the sealed envelope "Proposals for Additions to Brick Dormitory, Santa Fe Indian School, New Mexico," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m., April 15, 1914, for furnishing materials and labor for the construction of additions to girls' brick dormitory at the Santa Fe Indian School, New Mexico, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at the office of the paper or periodical in which this advertisement appears, the U. S. Indian Affairs Bureau, San Francisco, Cal., and at the Santa Fe Indian School. For further information apply to the superintendent of the Santa Fe Indian School, Santa Fe, New Mexico. CATO SELLS, commissioner.

PROPOSALS FOR GRANITE OR LIMESTONE WORK.

PURSUANT TO Resolution No. 7645 N. S., passed March 16, 1914, the Council of the City of Oakland will receive bids for the construction of the material labor and workmanship required in connection with the construction, erection and finish of—A—Granite Work and Setting of the Auditorium, 10-

cated on Twelfth street, between Fallon street and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes, endorsed "Bids for Auditorium," addressed to the Council and deposited by the bidder, or his agent, with said Council while in session, between 11 o'clock a. m. and 12 o'clock, Noon, Pacific Time, on the 13th day of April, 1914, in the room of the Council in the City Hall, 14th and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of Edwin J. Donohue, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

The Contract for the furnishing of all the labor and materials entering into the construction, erection and finish of—A: Granite Work and Setting, or B: Limestone Work and Setting, all as indicated on the Plans and Drawings and as called for in the specifications, is to be let or awarded as a separate contract.

The Contractor will be required to begin work within five (5) days from the execution of the contract, unless otherwise notified in writing by the owner or architect, and to fully complete the entire work in accordance with the requirements of the agreement, plans, drawings and specifications prepared therefor to the entire satisfaction of the Commissioner of Public Works and the Council, on or before seventy-five (75) working days from and after the beginning of the work.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the City the faithful performance of the contract, and in an amount of fifty per centum (50%) of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all persons performing labor upon or furnishing materials to be used upon the said work, and in an amount of fifty per centum (50%) of the amount named in said agreement.

A bond set of the forms of pro-

posal and of the required affidavits, agreement, bonds, acknowledgments and specifications will be furnished to contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after March 17th, 1914, within a reasonable time after application, and upon a deposit of Twenty-five (\$25.00) which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of plans and drawings required for the work will be furnished each applicant; additional copies will, however, be furnished, provided the applicant pays the cost of reproduction; such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted by the bidders, and to accept the lowest bid of the bidder as required by Section 126 of the Charter.

FRANK M. SMITH, City Clerk.

lect, Edward F. Helms, 5th avenue and California street, S. F. Owner, Mr. H. Judell. The dwelling has been designed for a seven-room house, and will be erected on Jackson street. Interior finish will be of pine with some hardwood veneer. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE — 2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on 16th avenue north of California and will contain six rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. A large open fire place will be a feature of the living room. Mantel will be of tile. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$6,000. San Francisco. Architect, H. H. Gutterson, 80 Post street, S. F. Owner, Mrs. W. Shipman. The dwelling has been designed for a seven room house with bath and sleeping porch and will be erected in St. Francis Wood. Interior finish will be of pine, redwood and some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES — 8, 2 story and base, frame, \$3,000 each. San Francisco. Architect, Edward F. Helms, 5th avenue and California street, S. F. Owner, O. E. Anderson. These dwellings will contain five and six rooms and will be erected on the east side of 15th avenue between California and Lake streets. Pine and redwood will be used for interior finish. All houses will have open fire places and tile mantels in the living rooms. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be specified. Exteriors will be covered with cement plaster on metal lath, rustic and shingles. Plans are now being prepared and when complete the work will be done by Day Labor. Materials will be purchased by the owner.

RESIDENCE — 2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on the north side of California street near 16th avenue and will contain six rooms and bath. Interior finish will be entirely of pine or redwood. Oak floors will be used in the living room, dining room and reception hall. There will be a large open

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to locality. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE — 2 story and base, frame, \$6,500. San Francisco. Architect, none. Owner, Paul Gerson, 216 McAllister street, S. F. The dwelling will be erected in Jordan Park on Commonwealth avenue between Euclid and Geary, and has been designed for a seven-room house with two baths. Interior finish will be of pine with some hardwood veneer and oak floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner who is taking figures on the work.

RESIDENCE — 2 story and base, frame, \$3,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owners, Havard and Hill, 20 Franklin street, S. F. The dwelling will be erected on 25th avenue near Irving and will be similar to several other houses erected by the same owners. Interior finish will be largely of pine. Some oak floors will be used. There will be a large open fire place in the living room and a tile mantel. Bath room will have the wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$3,500. San Francisco. Archi-

fire place and tile mantel. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

PRIVATE CONCESSION BUILDING—Frame and plaster. Cost not stated. San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mr. McConnell. Architect Edward T. Foulkes has been commissioned to design several private concession buildings to be erected by Mr. McConnell at the Panama-Pacific Exposition. These structures will be of frame and plaster and will represent a considerable investment.

STATE EXHIBIT BUILDING—Frame and plaster. Cost not stated. San Francisco. Architect, M. E. Metzinger, Dayton, Ohio. Owners, State of Ohio. Architect M. E. Metzinger has been commissioned to prepare plans for the Ohio State Building to be erected at Panama-Pacific Exposition. These plans are well advanced and bids will be called for shortly.

STATE EXHIBIT BUILDING—Frame and plaster. Cost not stated. San Francisco. Architect's name not given. Owners, State of Illinois. Plans for the Illinois State Building have been approved and will be forwarded to this city shortly. It is planned to have the building under way by May 15th. The building will be a three-story structure, 95x135 feet, and will cost between \$90,000 and \$100,000.

APARTMENT HOUSE—5 story and base, brick and steel. Cost not stated. San Francisco. Architect, W. G. Hind, 46 Kearny street, S. F. Owner, Mr. Redmond Payne. The building will be erected at the northwest corner of Sacramento and Jones streets. The building has been designed for a high class of tenants, the suites ranging from five and six rooms to twelve rooms. The first, second and third floors will each contain two apartments of five and six rooms, while the fourth and fifth floors will each contain one twelve-room suite. The building will occupy one of the choicest sites on the hill commanding a full view of the entire bay and the greater portion of the city and Alameda and Marin County shores. There will be a complete steel frame and exterior walls of brick faced with tapestry brick. Special trim will be used in the larger suites as desired by the tenants who have already leased. Solid mahogany of the Louis XIV style will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Segregated figures are being taken.

APARTMENT HOUSE—7 story and base. Class A construction. Cost not stated. San Francisco. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, John W. Proctor. This building will be erected on the south side of California street west of Mason and will have a complete steel frame, brick exterior walls and metal lath and plaster interior partitions. There will be fourteen apartments, two to the floor, but each apartment will have five or six rooms with two and three baths. Interiors

will be finished to suit the tenants who will lease for long terms. Plans also provide for steam heat, freight and passenger elevators and dumb waiters, hot water system and vacuum cleaning. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are now being prepared.

APARTMENT HOUSE—6 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, none. Owner, P. H. Bosworth, 110 Jessie street, S. F. The building will be erected at the northwest corner of Broadway and Florence street and has been designed to contain a total of 24 suites arranged in four rooms each. All apartments will have private baths and wall beds. Interior finish will be of pine and hardwood veneer. There will be steam heat and elevator service, a hot water supply and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with glazed tile. Plans are complete and the owner is taking segregated figures.

APARTMENT HOUSE—5 story and base, reinforced concrete. \$25,000. San Francisco. Architect, L. M. Hausman, Sharon Bldg., S. F. Owner, I. S. Foorman. The building will be erected on O'Farrell street east of Jones and has been designed to contain a store on the first floor and nine apartments of three rooms and bath on the upper four floors. Interior will be finished in pine with some elm panels and hardwood floors. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. All apartments will be equipped with wall beds and will have private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Marble and tile entrance will be used. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

APARTMENT HOUSE—7 story and base, steel and brick. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Bush street west of Stockton and will cover an area of 40 by 91 feet 8 inches. There will be a total of 72 rooms arranged in 36 apartments of two rooms and bath each. Interior finish will be largely of pine. All suites will have wall beds and private bath rooms. Plans provide for steam heat, elevator service and a hot water supply. Metal window frames and sash and a vacuum cleaning system are also specified. Exterior of the building will be faced with pressed brick and terra cotta trimming. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame. \$24,000. San Francisco. Architect, E. H. Denke, 1317 Hyde street, S. F. Owners, Max and Dora Kolander. The building will be erected on the southeast corner of Franklin and Sacramento streets, covering an area of 39½ by 79 feet. There will be a total of nine apartments of three and four rooms finished in pine and gum with some hardwood floors. Plans provide for steam heat and a hot water

supply. All suites will have wall beds and private baths. Portable vacuum cleaners will be installed. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are complete and figures will be called for shortly.

APARTMENT HOUSE—3 story and base, frame. \$30,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected at the southeast corner of Fillmore and Page streets and will cover an area of 30 by 81 feet. The first floor will contain a store besides the main entrance. Upper floors will be arranged for a total of seven apartments of three and four rooms. Interior finish will be of pine and elm with some oak floors. There will be steam heat and open fire places. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be covered with rustic and pressed brick veneer. Plans are nearly complete and the work will be done by Day Labor. The architects will purchase all materials.

APARTMENT HOUSE—5 story and base. Class C construction. \$100,000. San Francisco. Architect, C. H. Barrett, 381 Bush street, S. F. Owner, Mrs. J. H. Morton. The building will be erected at the northeast corner of Geary and Polk streets, covering a large ground area. A number of stores will occupy the ground floor while upper floors will be arranged for two and three room apartments with private baths. Interior will be finished in pine and hardwood veneer. Plans provide for steam heat, a hot water supply, vacuum cleaning system and elevator service. All suites will have wall beds. Bath rooms will be finished in tile with composition floors. Entrance will be finished in marble. Stores will have patent fronts. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Working drawings are complete and figures will be taken at once.

WHARF EXTENSION—Pile construction. Cost not stated. San Francisco. Engineer, Assistant State Engineer Jerome Newman, Ferry Bldg., S. F. Owners, State of California. At the last meeting of the State Board of Harbor Commissioners it was voted to extend Meigs' Wharf a distance of 400 feet in the direction of the Presidio. The new portion of the wharf will be used by the army transports and the Union Oil ships. Construction will be of creosoted piles. Bids will be called for as soon as working drawings can be completed.

FURNISHING CEMENT—Cost not stated. San Francisco. Engineer, Assistant State Engineer Jerome Newman, Ferry Bldg., S. F. Owners, State of California. Bids opened at the last meeting of the State Board of Harbor Commissioners for furnishing 50,000 barrels of cement resulted in two bids of \$1.64 per barrel and one of \$1.90. No award has yet been made. A list of these figures will be found under the heading of San Francisco in this issue.

CHURCH RESTORATION—Brick and steel, \$86,000. San Francisco. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Patrick's Church. The present building located on the north side of Mission street between Third and Fourth streets is to be completely rehabilitated. Included in this work will be brick and concrete work, structural steel, plastering, carpentry, mill work and art glass. The old tower will be restored and a set of chimes installed. Plans are complete and figures are now being taken. Father Rodgers is in charge of the work.

FLATS—4, 2 story and base, frame, \$4,500. San Francisco. Architect, Edward F. Helms, 5th avenue and California street, S. F. Owner, O. E. Anderson. These buildings will be erected on the east side of 15th avenue between California and Lake street. Each of the houses has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine, redwood and some elm panels. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will have composition floors and tile wainscot. Exteriors will be covered with cement plaster on metal lath with pressed brick bases. Plans are in the hands of the owner and work will be done by Day Labor.

FLATS—2 story and base, frame, \$4,500. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, Grove and Masonic avenue, S. F. The building will be erected on the east side of Masonic avenue near Grove street and will be similar in design and construction to several other flat buildings erected in the same neighborhood by Keenan Bros. There will be two flats of five and six rooms. Interiors will be finished in pine and redwood with oak floors in the principal rooms. Open fire places and tile mantels will be used in the living rooms. Baths will have tile floors and wainscot. Exterior of the building will be covered with shiplap and brick veneer base. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, Edward F. Helms, 5th avenue and California street, S. F. Owner, L. F. Peterson. The building will be erected on the west side of 11th avenue near Fulton street, and has been designed to contain two modern flats with garage in the basement. Each flat will contain six rooms and bath. Interior finish will be of pine and redwood with some elm panels and hardwood floors. Open fire places and tile mantels will be used in the living rooms. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with cement plaster and shiplap. Plans are being prepared and when complete the work will be done by Day Labor.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, G. Peterson, 351 12th avenue, S. F. The building will be erected on 11th avenue, covering an area of 25 by 57½ feet. There will be two modern flats of five and six rooms. Interior finish will be of pine throughout. Hardwood floors will be used in the living

and dining rooms. Open fire places and tile mantels are specified. Automatic water heaters will be installed in the bath rooms. Exterior of the building will be covered with cement plaster and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

GARAGE—2 story and base, reinforced concrete, \$10,000. San Francisco. Architect, none. Owner, G. P. W. Jensen, 320 Market street, S. F. The building will be erected at the corner of Bush and Polk streets, covering a considerable ground area, and has been designed for a commercial garage. Besides the storage space the building will contain office, machine shop and repair department. Interior will be finished in pine. Steel roof trusses and metal window sash and frames will be installed. Exterior of the building will be faced with cement plaster. Plans are in the hands of the owner, who is a well known contractor, and he will do the work by Day Labor.

HOSPITAL—2 story and base, reinforced concrete, \$55,000. San Francisco. Architect, John Baur, Sharon Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Geary and Wood streets and has been designed for a private institution containing two small wards and twelve private rooms. Interior finish will be of pine and hardwood with considerable tile. There will be steam heat, a hot water system and modern hospital plumbing. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SCHOOL—2 story and base, brick and concrete. Cost not stated. San Francisco. Architect, Albert Pissis, Flood Bldg., S. F. Owners, City and County of San Francisco. Bids opened for the construction of the Oriental School at the last meeting of the Board of Public Works show Elmer Carlson low on the general construction. While no contracts have been awarded the work will probably go to the several lowest firms. A complete list of all bids will be found under the heading of San Francisco in this issue.

Bids were opened at the same meeting for glass and glazing of skylights and pent houses on the roof of the Academic building, Polytechnic group. The California Plate and Window Glass Co. were low at \$1,220.

CONCRETE TROLLEY POLES—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. All bids received for this work have been rejected by the Board of Public Works and new figures are being called. The total amount of the contract approximates \$30,000. Both plain and ornamental trolley poles will be required. Bids will be opened on April 15th. Plans and specifications can be secured from the City Engineer.

MUNICIPAL CAR BARN—Machine shop equipment. Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids received for furnishing machine shop equipment for the Municipal Railroad show the Pacific Tool and Supply Co. low on the 36-inch drill and the California Press Mfg. Co. low on the hydraulic wheel press. A complete list

of the bids will be found under the heading of San Francisco in this issue.

RESIDENCE—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owners, MacArthur Bros., 1560 Fell street, S. F. The dwelling will be erected on 5th avenue south of Cabrillo, and has been designed to contain five rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster and a brick veneer base. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$10,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Mrs. Brunner. The dwelling has been designed for a ten-room house and will be erected on 16th avenue near California. There will be a garage in the basement. Interior will be finished in pine with some elm panels and hardwood floors. Bath room will have tile wainscot and composition floor. An automatic water heater is specified. There will be furnace heat and open fire places. Mantels will be of tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES—2, 2 story and base, frame, \$2,000 each. San Francisco. Architect, E. T. Spence, 537 25th avenue, S. F. Owners, Spence & Feerick. These two houses have been designed for six-room dwellings and will be erected on 19th avenue south of Anza. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places in each living room with tile mantels. The wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners who will do the work by Day Labor.

HOTEL—15 story and base. Class A construction, \$190,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on a lot 46 by 90 feet located on the west side of Powell street north of Post and will be fireproof throughout. There will be a complete steel frame with brick exterior walls, concrete floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Plans show a total of 140 guest rooms, all of which will have private baths. Interior of the building will be finished in pine and hardwoods with some metal trim, metal window sash and frames. There will be steam heat, elevator service, a hot water supply and vacuum cleaning system. Bath rooms will have tile floors and wainscot and will be equipped with showers. A large and handsomely finished lobby, offices and lounging room will occupy the first floor. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

STORES AND LOFTS—2 story and base, brick. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Elsencbach Co. The building will be erected on the south side of Sutter street east of Jones and has been designed to contain two stores on the first floor and lofts above. Interior finish will be of pine throughout. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are being prepared.

Harbor Commission
Open Bids For Cement

Two Firms Submit Same Figure For
Furnishing Fifty Thousand Barrels.
One Other Figure.

The State Board of Harbor Commissioners opened bids Thursday afternoon for furnishing the state Harbor Commission with 50,000 barrels of Portland cement f. o. b. cars of the Belt Line Railroad at San Francisco. Two of the bids submitted were for \$1.64 per barrel. No award was made and the matter will be settled on Saturday. The following bids were submitted:

Furnishing Cement.	
Per Bbl.	
Cowell Lime & Cement Co.	\$1.64
Pacific Portland Cement Co.	1.64
Santa Cruz Portland C'm't Co	1.90

City Bids Opened.

Board of Public Works Opens Bids For
Oriental School and Work at the
Polytechnic School.

The Board of Public Works opened bids at their Wednesday afternoon meeting for the construction of the Oriental School, a two-story building, designed by Architect Albert Pissis, and to be erected on the south side of Washington street, between Powell and Stockton streets. Separate bids were taken for the general construction, two propositions, for the brick work, heating and ventilating, plumb-

ing and gas fitting and electric work. Elmer Carlson submitted the lowest bids on both propositions for the general construction; O'Connor & Collins were low on the brick work; Peterson-James Co. were low on the heating and ventilating; Charles Wright was low on the plumbing and gas fitting and the Butte Eng. & Elec. Co. were low on the electric work.

General Construction, Oriental School.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, Theo. Penn, 749 61st street, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch and will be erected on Boulevard near 54th street. Interior finish will be of pine and redwood with some hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot.

Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame. Cost not stated, Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. A. Kruse. The dwelling will be erected in Thousand Oaks and has been designed to contain seven rooms and bath. Interior finish will be largely of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have the wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame. Cost not stated, Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Frederick Townsend. The house will be erected in the Northbrae Tract and has been designed to contain seven rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room and kitchen will have the wainscot. A composition floor will be used in the bath room. An automatic water heater will be specified. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architect.

RESIDENCE—2 story and base, frame, \$10,000, Berkeley, Alameda Co., Cal. Architects, Mitchell & Hodges, Bankers' Investment Bldg., S. F. Owner, A. Merene. The dwelling will be erected on Russell street near Claremont and has been designed for a twelve-room house with three baths and sleeping porch. Interior finish will be of pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in the Automatic water heaters will be specified. A garage will also be erected on the property. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated, Berkeley, Alameda Co., Cal. Architect, James W. Pritchard, Jackson Bldg., Berkeley. Owner, Joel Hildebrand. The dwelling will be erected on Le Roy street near Pienua Vista Way and has been designed for a six-room house with bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and one large open fire place. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are com-

plete and the architect is now taking figures.

RESIDENCE—2 story and base, frame, \$4,000, Berkeley, Alameda Co., Cal. Architect, George Anderson, 6946 Lawton street, Oakland. Owner, L. J. Jenks. The house has been designed for a seven-room dwelling and will be erected at the northwest corner of Woolsey and Benvenue streets. Interior finish will be largely of pine with some white enamel and hardwood veneer. Oak floors will be used in the principal rooms. Bath room will have the floor and wainscot. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—3 story and base, frame, \$10,000, Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, C. Lange. The building will be erected at the corner of Grand avenue and Park View, and has been designed to contain a number of two, three and four room suites, all of which will have private baths and wardrobes. Interiors will be finished in pine and redwood with some elm panels. There will be steam heat and a hot water supply. Bath rooms will have the wainscot and composition floors. Portable vacuum cleaners will be installed. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken by both the architect and owner.

APARTMENT HOUSE—2 story and base, frame, \$10,000, Oakland, Cal. Architect, none. Owner, J. P. Beckett, 2635 Channing Way, Berkeley. The dwelling will be erected on East 25th avenue near 17th street, and will contain three and four room apartments. Interior finish will be of pine and redwood with some oak floors. There will be a central heating system and hot water supply. Bath rooms will have the wainscot and composition floors. All suites will be equipped with wall beds. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

HOTEL—3 story and base, frame, \$35,000, Oakland, Cal. Architect, none. Owner, Edward Olsen, 977 Day View, Oakland. The building has been designed for a rooming house containing 50 rooms and several public baths, and will be erected on 8th street near Jefferson. Interior finish will be of pine and redwood. Plans provide for steam heat and a hot water supply. All bath rooms will be finished in tile and will have composition floors. Exterior of the building will be covered with brick veneer and rustic. Plans are in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$30,000, Piedmont, Alameda Co., Cal. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Mr. Moore, of the Moore-Watson Co. The dwelling has been designed for a fourteen-room house with several baths and sleeping porch. A garage will also be erected on the lot. Interior of the dwelling will

be finished in pine, redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system and hot water supply. Vacuum cleaners will also be installed. There will be several large open fire places with tile or brick mantels. All bath rooms will be finished in tile. Exterior of both the house and garage will be covered with cement plaster on metal lath. A red clay tile roof will be used. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$12,000, Oakland, Cal. Architect, Charles Mau, Macdonough Bldg., Oakland. Owners, Misses Mary and Margaret Dunn. The dwelling will be erected at the northeast corner of Bellevue and Van Buren streets, and has been designed to contain twelve rooms, three baths and sleeping porch. Interior finish will be of pine, redwood and hardwoods. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for this week.

RESIDENCE—2 story and base, frame, \$3,000, Alameda, Alameda Co., Cal. Architects, Elsie Planners, 1814 5th avenue, Oakland. Owner, C. C. Adams. The dwelling will be erected in Waterside Terrace and has been designed to contain seven rooms and bath. Interior finish will be largely of pine with some redwood and oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have the floor and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000, Oakland, Cal. Architect, A. Lucy Worswick, 700 Octavia street, S. F. Owner, A. Lucy Worswick. The dwelling will be erected on Stow street near Wayne and has been designed for an eight-room house with bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have the wainscot and composition floor. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,000, Oakland, Cal. Architect, Albert Schroeder, Foxcroft Bldg., S. F. Owner's name withheld. The dwelling will be erected on Ryala avenue near Martin and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, J. B. Norton. The dwelling will be erected in the Country Club Heights, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story, attic and base, frame, \$30,000. Piedmont, Alameda Co., Cal. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, John Spohn. The dwelling has been designed for a fourteen-room house with several baths and a sleeping porch, and will be erected on a corner lot. A garage will be erected in the rear. Interior of the house will be handsomely finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. All bath rooms will have tile floors and wainscot and will be equipped with showers. Automatic water heaters and portable vacuum cleaners will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are now being prepared.

RESIDENCE—2 story and base frame, \$5,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, P. Lindblad. The dwelling has been designed for a seven-room house and will be erected on Crofton avenue near Boulevard Way. Interior of the house will be finished in pine with some elm panels and beam ceilings. Hardwood floors will be used in the principal rooms. There will be furnace heat and open places. Mantels will be of tile. An automatic water heater is specified. Bath rooms will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

FIRE HOUSES—3, 2 story and base, frame, \$5,000 each. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. All bids received some time ago for these buildings have been rejected as plans were slightly changed after the bidders started to figure the work, and the City Attorney fears that contracts would not be binding. New figures will be advertised for within a few days. Further mention will be made of the work at that time.

OFFICES—3 story and base, brick and steel, \$50,000. Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owners, San Francisco, Oakland Terminal Railway. The building will be erected at the corner of 22nd and Grove streets and has been designed for use as the company's administrative headquarters. Interior finish will be of pine and hardwood veneer. There will be steam heat, a hot

water supply and vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

THEATRE—2 story and base. Class A construction, \$70,000. Berkeley, Alameda Co., Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, The Bishop Co. The building will be erected at the corner of Grove and University avenue and will contain one store besides the theatre. Construction will be fireproof with steel frame, reinforced concrete or brick walls and metal interior partitions. The main auditorium will have a seating capacity of 1,000 people. Interior finish will be of pine and ornamental plaster. There will be steam heat and a modern system of ventilating. Exterior of the building will be faced with pressed brick and terra cotta. Plans are also being prepared for other similar buildings to be erected in the interior valley towns.

THEATRE—2 story and base. Class A construction, \$50,000. Oakland, Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, The Bishop Co. The building will be erected at the northwest corner of 14th and Harrison streets and will contain a store besides the theatre. Construction will be fireproof throughout. The main auditorium will have a seating capacity of 1,200 people. Interior finish will be of pine and ornamental plaster. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared. Several other similar buildings will be erected by the same owners in interior valley towns.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

BRIDGE—Reinforced concrete, \$25,-
000, Napa, Napa Co., Cal. Engineers,
Leonard & Day, Rialto Bldg., S. F. Own-
ers, City of Napa. Engineers Leonard &
Day have been commissioned to prepare
plans for a reinforced concrete bridge
to be erected on East First street in
the city of Napa. The work will cost
in the neighborhood of \$25,000 and
working drawings will be complete in
about 10 days. The bridge will be 150
feet long and 60 feet wide. Borings are
now being made to determine the na-
ture of the foundation soil.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

ADVISORY ARCHITECTS TO THE BOARD OF EDUCATION—Fresno, Fresno Co., Cal. Architects Coates & Traver, advisory architects to the Pres-

ton, San Joaquin Co., Cal. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, City of Stockton. An addition of four rooms is to be made to the North School. Plans for the work are complete and now out for figures. Bids will be opened on April 8th. Plans can be secured from the architects. The work includes a steam heating system, modern plumbing and ventilation.

STORES AND OFFICES—4 to 6 story and base, brick and steel, \$125,000 or more. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson. Fresno. Owner, L. L. Corey. The building will be erected at the corner of J and Fresno streets, having a frontage of 77 feet on one street and 150 feet on the other. Construction will be of the Class A type throughout with a complete steel frame, brick exterior walls and concrete floors. Interior partitions will be of metal lath and plaster. There will be six stories besides the office entrance on the first floor. Upper floors will be arranged for a large number of modern offices. Interior finish will be of pine and bardwoods with some metal trim. Plans provide for steam heat, oil burning equipment, vacuum cleaning system and metal window sash and frames. Patent store fronts and marble wainscot are also specified. Two elevators will be installed. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared and figures will be called for shortly.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

APARTMENT HOUSE—Bungalow type, 1 story, frame. Cost not stated. Sacramento, Cal. Architect, none. Owner, A. Hollenbeck, 1631 K street, Sacramento. The building has been designed after the bungalow style and will contain four four-room apartments with baths. Interiors will be finished in pine and redwood with some oak floors. A central heating system will be installed. Bath rooms will have tile wainscot and composition floors. Automatic water heaters are specified. Exterior of the building will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SCHOOL—1 and 2 story, reinforced concrete. Cost not stated. Sacramento, Cal. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. Plans are now nearly complete for the second school to be erected in Sacramento from plans by the same architects. As soon as working drawings can be completed bids will be called. Further mention will be made of the work.

ACADEMY—2 story and base, brick and steel, \$70,000. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, St. Agnes Academy. The building has been mentioned here several times before. Plans are complete and now in the hands of the contractors for figures. Bids will be opened on April 12th. The building has been designed to contain class rooms, dormitories, dining room and chapel. Interior will be finished in pine with some maple floors. Plans provide for steam heat and a hot water system and vacuum cleaning. Exterior will be faced with pressed brick.

SCHOOL ADDITION—1 story, brick and concrete. Cost not stated. Stock-

ton, San Joaquin Co., Cal. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, City of Stockton. An addition of four rooms is to be made to the North School. Plans for the work are complete and now out for figures. Bids will be opened on April 8th. Plans can be secured from the architects. The work includes a steam heating system, modern plumbing and ventilation.

SCHOOL—2 story and base, reinforced concrete, \$50,000. Willows, Glenn Co., Cal. Architect, W. H. Weeks 75 Post street, S. F. Owners, Willows School District. The building will contain eight class rooms, assembly hall and study rooms. Construction will be of the semi-fireproof type. Interior finish will be of pine with maple floors in the class rooms. Plans provide for steam heat, vacuum cleaning system and program clocks. Modern school plumbing will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on April 18th. Separate bids are being taken for the general construction with an alternate proposition, heating and ventilating, plumbing, vacuum cleaning and program clocks.

POST OFFICE—1 story and base, semi-fireproof construction. Cost not stated. Grass Valley, Nevada Co., Cal. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans for the construction of this building have been forwarded to the west and are now in the hands of the contractors for figures. Bids will be opened on May 6th. The building will cover approximately 4,450 square feet of ground area. Interior finish will be of pine with some hardwood. There will be steam heat and modern plumbing and electric work. Exterior will be faced with pressed brick. An official proposal appears in another column of this issue.

RESIDENCES—1 and 2 story, frame. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: C. C. Henderson, 795 East Anderson, 1 story frame cottage, \$2,000; Jerome Ingalls, 321 West Park, 1 story frame cottage, \$1,800; George E. Lewis, 1344 East Anderson, 2 story frame dwelling, \$2,000; A. H. De-Combe, 1316 East Lindsay, frame residence, \$2,000.

RESIDENCES—1 and 2 story, frame. Cost not stated. Sacramento, Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: Sacramento Home Builders, Forum Bldg., 1 story five-room cottage, \$2,000; Palm Iron Works, 15th and R streets, 1 story frame cottage, \$1,600 and W. D. McKoy, 3029 E street, 1 story, five-room cottage, \$2,500.

Contracts Awarded.

SCHOOL—2 story and base, reinforced concrete, \$50,000. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, Stockton School District. Contractors, O. B. Ackerman & Son, Oakland. Contract price, \$68,400. A complete list of the figures received for this work appears under the heading of Sacramento, Stockton and Northern California in this issue.

Eastside School, Stockton, Awarded.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Elmore R. Jeffery, Citizens' National Bank Bldg., L. A. Owner, William Duelling. The building will be erected at the corner of 16th and Georgia streets on a lot 50 by 90 feet. There will be a total of 42 rooms arranged in two and three room apartments with private baths and wall beds. Interior finish will be of pine throughout. All bath rooms will have composition floors and tile wainscot. Plans provide for steam heat and a hot water supply. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architect, C. F. Skillings, Garland Bldg., L. A. Owner, Mrs. Mundy. The building will be erected on a 45 by 70 foot lot located at the corner of 23rd and Hope streets. The plans provide for a total of 38 rooms, which will be arranged in two and three room apartments. All suites will have wall beds and private bath rooms. Interiors will be finished in pine and redwood with some elm panels and hardwood floors. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Garrett & Farrell, Currier Bldg., L. A. Owner, H. A. Pierce. The building will be erected at the corner of 51st and Moneta avenue, and has been designed for five stories on the first floor and a total of 25 apartments of two and three rooms on the upper floors. Interior finish will be of pine throughout. All apartments will have wall beds and private bath rooms. Plans provide for steam heat, a hot water supply, vacuum cleaning and wall beds. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

CHURCH—1 story and base, reinforced concrete, \$25,000. Riverside Co., Cal. Architect, T. Franklin Power, Higgins Bldg., L. A. Owners, Roman Catholic Church of Riverside. The building has been designed in the Spanish Renaissance style and will have a seating capacity of 700 people besides the Sunday school room. Interior finish will be of pine and redwood with ornamental plaster. Marble and art glass work are called for. Exterior of the building will be faced with cement plaster. Father Holm is

in charge of the work. Plans are still in the preliminary stage and further mention will be made of the work.

HOTEL—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, C. F. Skillings, Garland Bldg., L. A. Owners, Mrs. Fullerton and Mrs. Wagner. The building will be erected on West 20th street near 8th, and will cover an area of 50 by 90 feet. Upper floors have been arranged for a total of 40 guest rooms and 20 baths. Interior will be finished in pine and redwood. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster. Plans are being prepared and figures will be called for shortly.

HOTEL—2 story and base, brick. Cost not stated. Niland, Imperial Co., Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, California Land and Water Co. The building will be erected on a corner lot and has been designed for two stores, hotel lobby and billiard room on the first floor. Upper floor will contain 70 guest rooms and a number of baths. The building is irregular in shape and will cover an area of approximately 30,000 square feet. Plans provide for steam heat and a refrigerating system. Interior finish will be of pine. Exterior of the building will be covered with cement plaster. Plans are complete and foundation work is being done by Day Labor. A contract for the balance of the work will be let.

RESIDENCE—2 story and base, frame, \$25,000. Brentwood, Los Angeles Co., Cal. Architects, Milwaukee Bldg. Co., Wright and Callender Bldg., L. A. Owner, C. Stephens. The house has been designed in the classic style and will contain sixteen rooms and three baths. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Plans provide for steam heat and a hot water supply. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

MISSION SCHOOL—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, Christian Women's Board of Missions of Indianapolis. The building will be erected on Wall street. The first floor will contain the chapel, offices and class rooms. Second floor will contain 20 private rooms with baths and the third floor will be arranged for six apartments of three rooms each. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. A general contract except the heating will be awarded. Plans are complete and new figures are being taken.

Contracts Awarded.

APARTMENT HOUSE—2 story and base. Class C construction, \$45,000. Los Angeles, Cal. Architects, Noonan & Murphy, Douglas Bldg., L. A. Owner's name withheld. Contractors, Noonan & Murphy, Douglas Bldg., L. A. Contract price \$45,000.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

“KINNEAR”

The ONLY Door

You Buy for UTILITY

that INCLUDES

FIRE PROTECTION

KINNEAR STEEL ROLLING DOORS are designed to afford fire protection and for the closure of all openings in which ease and speed of operation and economy of space are considerations. They are adaptable to all classes of new or old building construction and by their use make possible the closing of very large openings which could not otherwise be conveniently covered.

Recent great conflagrations have fully vindicated the claim of the “KINNEAR” STEEL ROLLING DOOR to pre-eminence as a fire-stop. Placed side by side with various other forms of fire retardants it has in every case remained in place even after the others were destroyed.

We will consider ourselves favored if allowed to explain and make quotations on any constructions meeting your definite needs.

We have just received from the press a new Handbook on Steel Rolling Doors and Shutters Illustrated only with California Installations.

Editorial Comment.

The outbreak of the incorrigible prisoners at Folsom and the murder of Mrs. Harbert at Stockton by a paroled Japanese convict is likely to produce some reaction against the maudlin sentiment that is now prevalent for the criminal classes. It may be that all criminal minds are abnormal. It may be that it is a disease that should be treated in a hospital. But society owes its first duty to itself and the citizen who supports the laws of his land, pays his debts and earns an honest living is the first to be considered.

Julian Hawthorne, the son of an illustrious father, used his name and the United States mail to defraud the fellow citizens out of money by investing in fly-up-the-creek stock concerns. As a result he served some time in the federal prison at Atlanta, Georgia. Since then he had been filling space in criticism of our prison methods and prison officials. While the fare and the treatment may have been distasteful to him it certainly is not a place, nor should it be made a place, where criminals want to return.

A criminal is one who wants to get the best of it all the time. No matter whether he be a high financier or a second story burglar he wants to get the rewards without honest labor. And he tries to beat the game. If the honest citizen gets in the way and gets robbed or killed so much the worse for the honest citizen. And this kind of criminal is the person whom Fremont Older and his kind eulogize and devote more space to than to all the honest citizens in the country.

Prisons are primarily places of punishment and they sometime effect reform. And while it is a hard thing to remove the stigma of prison life from those who really want to reform yet the first thing for society to do is to protect itself and that it can only do by providing some sort of punishment for the wrong doer.

Chap Clark's flamboyant declaration that he is willing to go to war with England rather than permit her to interfere in this country's domestic affairs, and the general argument for "protecting American interests" by permitting this country's coastwise vessels to use the Panama Canal free of tolls, illustrates a curious error into which many people fall in considering questions of this sort. They ignore facts in a sort of hysteria of sentiment.

The Panama tolls question involves an interpretation of a treaty on the one hand, and on the other of a purely economic problem. Primarily free tolls

for American coastwise vessels means giving the use of a great public property to a few men who happen to own a certain class of ships. Whether this gratuity is justified on the ground that it will be of general benefit through the reduction of transportation rates is easily ascertainable by an analysis of facts, and cannot be decided by a false appeal to patriotism.—Kansas City Star.

The May Day Fete for San Francisco this year will consist of a celebration at the Exposition Grounds which will reveal the progress that has been made in the construction of the great fair and give some idea of what the completed Exposition will be.

And it will be a revelation to many of us. When times are dull and things look disappointing it is a good thing to look back sometimes and see how far we have gone. And as this May Day celebration is to commemorate the final rebuilding of the city it will show in review what has been accomplished during the last eight years.

A great deal is being published about the location of the regional banks and as might have been expected those cities that have lost are charging that political deals figured in the apportionment. Such things were expected. But it is only fair to say that the reelection of the cities that secured the location of these financial centers was made after due deliberation and a thorough examination of all claims.

Denver, for instance, objects and says that San Francisco is as foreign to it as San Francisco. And right here it would seem that the fact that Denver was not selected proves that no political consideration figured in the apportionment. For Missouri was allowed two regional banks, one at St. Louis and one at Kansas City. If politics had figured Missouri would have been "taken care of" by the allotment of one bank. And further than that Colorado is represented by two Democratic Senators. So that while there are a lot of disappointed applicants the apportionment seems to have been made as fairly as it could have been.

Earthquake Construction has now reached a very practical stage in the seismic districts of Italy, where all new buildings are being erected under strict supervision with respect to their ability to resist earthquake shocks. Prof. Omori, the Japanese authority, has estimated that 99.8 per cent of the deaths in the great Messina earthquake of 1908 would have been prevented if the buildings had been properly constructed.—Scientific American.

The Making Of Composite Floors

By Robert P. Skinner.

The report on "floorings of sawdust and magnesium chloride" has given rise to innumerable inquiries from correspondents from various parts of the United States, all of whom express a desire for further details. It was stated in the original report that extensive use was being made in Germany of a flooring composition consisting of a solution of chloride of magnesium to which pulverized magnesia is added, together with considerable proportions of sawdust, and which, being skillfully compounded, provided a relatively inexpensive and fairly fire-proof material, especially useful in large office buildings and public halls. One inquirer stated that the art of laying these floorings in Germany is far ahead of the practice in America, and asked particularly for the method of coloring the material and of governing its expansion and contraction.

According to my information, there should be neither expansion or contraction of the material from any cause whatever, after a flooring of magnesium chloride is once laid. The very ingredients are such that there is no buckling or cracking due to heat or cold. In Hamburg the composition is mixed and spread where the building operations are being carried on, the prepared dry meal being delivered in bags from the factory, and the lye water made on the spot. It is impossible to state the precise rule for the position of the meal or for the lye solution, these being the manufacturers' secrets and each manufacturer claiming particular merits for his own formula. These formulas are not patented, and there is no doubt that they are all substantially alike. Several manufacturers have expressed a willingness to sell their process, either for the whole of the United States or for a restricted territory. One Hamburg firm sold its formula for a small place in Southern Germany for \$1428.

The mixture of meal and lye water is made in a mortar box, and when a thickness of not more than 2 inches is proposed it is spread and smoother with a hand trowel, when a thickness of 1 inch is desired, the material is tamped and then smoothed. The amount of lye water used in mixing the meal depends upon whether the flooring is to be simply spread or tamped; if spread the ordinary practice seems to be to use from 4 to 6 buckets of lye water to 1 sack of meal, the sack apparently containing from 50 to 60 pounds.

These floorings were first utilized in large office buildings in Hamburg, and probably elsewhere, as a basic flooring for linoleum and also for the addition of artificial wood-marble flooring. These wood-marble floorings are substitutes for wood, and the panels are polished like hardwood floors; that is to say, smoothed with steel shavings and given a coating of wax. When linoleum is applied, it is glued to the magnesium chloride foundation with a linoleum cement, which is said to be composed of copal resin and putty

In Germany linoleum is never tacked to wood or artificial stone flooring, as is usual in the United States, but it is invariably glued in place, an ordinary floor paste being used when it is applied to wooden floors. Linoleum thus laid is washed afterwards with soap water and when dry given a coating of wax, exactly like a hardwood floor. This treatment is the ordinary practice in the large office buildings of Germany, even in hallways where thousands of people pass in the course of a week.

The magnesium-chloride flooring was first considered a particularly excellent foundation for linoleum, and it is only in comparatively recent times that it has been found possible to color it and lay it so attractively that no linoleum covering is necessary. It is laid tight against the side walls, making the entire floor waterproof. In bath rooms and around toilets, it is brought to the edge of the porcelain and the joints are rounded upward, so that no crevices present themselves in which dust or dirt can collect, nor should there be any joint through which water might percolate.

The favor in which linoleum is held in this country is such that manufacturers of these new composition floorings have some difficulty in inducing buyers to put down this material, in solid or varied colors, in preference to a similar natural color foundation with linoleum coverings, although the cost and wearing qualities of the former method are said to be much in its favor. Linoleum costs in Hamburg about 86 cents per square meter (a square meter equals 1.2 square yards), and the cheapest class of magnesium-chloride foundation pavement costs 4 cents, making a total of \$1.31 per square meter against a cost of \$1.19 per square meter for a colored wood-marble floor attractively finished. The new floorings may now be obtained in almost any color, or in mottled colors. When mottled colors are desired, the different colored mixtures are prepared separately and tamped in together as the floor is laid. Special dyes are required for these operations, and there are a number of manufacturers who produce them. In a general way, from 15.4 to 22 pounds of color are necessary for 220 pounds of mortar. The proportions vary with strength of coloring desired. The colors themselves are of different prices. One manufacturer quotes red, blue, black and brown at \$1.76 per 220 pounds, oxide green, \$3.55; and blue, \$19.04 to \$22.42 per 220 pounds. Another manufacturer quotes red dye, very much in demand, at an average price of \$3.81 per 220 pounds. The prices again vary with the quantity ordered. The more delicate tints, such as green and blue, are more sensitive to light, particularly if exposed for a long time, than the other colors, such as black, red and brown. Red is especially favored, and the many different shades are said to be absolutely unchangeable. Most of the manufacturers of these dyes supply

dyes for cement tiles, stucco, imitation marble, sand-lime brick and cement blocks.

One Hamburg manufacturer claims for his own composition that it is crack free under all circumstances, warm under foot, elastic and sound proof, preferable to linoleum, as linoleum curls at the edges after a time, breaks or wears away, and absorbs water, permitting it to leak through. This same manufacturer submits a certificate of examination from the royal board of examiners of material in the Technical High School in Berlin, reporting as follows on the examination of samples of his material:

1. After the sample plates were soaked in water and had been exposed to frost 25 times at 15 degrees C. below zero, the samples remained unharmed.

2. After the plates had been lying in water for eight days a very small proportion of water (9 per cent) had been absorbed.

3. After the plates had been attached to a vessel containing water—after 24 hours, none; after 48 hours, 2 cubic centimeters, of 5 per cent; after 72 hours, 4 cubic centimeters, or 10 per cent, of moisture had been absorbed.

This manufacturer also claims that in this country his composition is cheaper than pine flooring, tiling or stone; that it may be used to cover old worn-out wood and stone plate floorings, staircases, and the like, without the necessity of removing the old floors. Wherever a foundation is firm and dry it may be laid without any complicated preparations. Finally, it may be cleaned with cold water and only very seldom should lukewarm water be applied. After complete cleansing and thorough drying, the flooring should be rubbed with raw linseed oil or should be waxed.

Magnesium chloride, the chief ingredient of these compositions, is worth, in 50-ton lots, in casks of 880 pounds f. o. b. Hamburg, \$11.50 per ton fused. If in lesser lots, \$12 per ton. Greck calcined and powdered magnesite, in barrels of 396 to 440 pounds is worth \$33.32 to \$35.70 per 2,090 pounds f. o. b. Rotterdam. Raw magnesite, in casks, is worth \$30.90 per 200 pounds f. o. b. Hamburg.—From the Architect, Builder and Engineer.

PORTLAND CEMENT PRODUCTION.

The final figures for the Portland cement industry in 1913, as obtained by the United States Geological Survey on March 16, show a production of 92,097,121 barrels, shipments of 88,689,377 barrels and stocks on hand 11,220,328 barrels. It is somewhat interesting to compare these figures with the estimates made by the Geological Survey on January 15. These estimates were as follows: Production 92,406,000 barrels, shipments 88,852,000 barrels and stocks on hand 11,375,000 barrels, the percentage of error ranging from only .003 in production to about .01 in stocks on hand.

Items desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items classified and grouped under proper headings, commencing on this page. These items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected at the southeast corner of Page and Fillmore streets, covering an area of 30 by 81 feet. The building has been arranged for one store on the first floor besides the entrance to the apartments. Upper floors will be arranged for seven suites of two, three and four rooms. All apartments will have wall beds and private bath rooms. Interiors will be finished in pine and elm panels. Some oak floors will be used. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with brick veneer. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house alterations, 3 story and base, frame, \$3,000. Architect, none. Owner, Patrick Lynch, 116 Hampshire street, S. F. This work will consist of the alteration of a two-story frame building at 571 Natoma street into a three-story apartment house. Suites will be of the two and three room type. There will be new interior trim, plumbing, electric work and plastering. The outside of the building will be covered with rustic and shiplap. Plans are in the hands of the owner and work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced concrete, \$30,000. Architect, T. Patterson, 310 California street, S. F. Owner, S. Zussman. The building will be erected on the north side of Post street west of Larkin. There will be a number of two and three room suites, all of which will have private baths and wall beds. Interior finish will be of pine and redwood with some elm panels and oak floors. Plans provide for steam heat and a hot water supply. An automatic elevator will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster. Plans are complete and a contract will be awarded shortly.

SAN FRANCISCO—Apartment houses, 2, 3 story and base, frame, \$12,000 each. Architect, none. Owner, J. Sockolov, 1537 O'Farrell street, S. F. These two buildings will be erected on adjoining property on the north side of California street east of Broderick, and will cover an area of 40 by 122 feet. The two buildings will contain a total of 12 suites of three and four rooms. Interior finish will be of pine and elm panels with beam ceilings and some hardwood floors. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Exterior of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and

in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, Paul De Martini, 2123 Powell street, S. F. Owner, G. Romano. The building will be erected on Pacific street, near Taylor, and will contain six suites of two and three rooms. Interior will be finished in pine and redwood. There will be wall beds and private baths. Plans also provide for a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will close in one week.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architect, none. Owner, E. M. Fritz, 1401 Masonic avenue, S. F. The building will be erected at the northeast corner of Frederick and Delmar streets, covering an area of 29 by 105 feet. Interior has been arranged for a total of eleven suites of two, three and four rooms. All interior finish will be of pine and hardwood. Suites will have private bath rooms and wall beds. Plans provide for steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. Portable vacuum cleaners will be installed. Exterior of the house will be covered with cement plaster on metal lath. A klinker brick base is also specified. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Apartment house furnishings, fixtures etc. Cost not stated. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Sommarstrom Bros. The three-story frame apartment house at the corner of 16th and Alice streets is nearing completion, and the owners will shortly award contracts for furnishing, store fixtures, lighting fixtures etc. Marble and the work are now being figured.

SACRAMENTO, CAL.—Apartment house alteration, 3 story and base, brick, \$20,000. Architect, J. Seader, Forum Bldg., Sacramento. Owner's name withheld. The work will consist of both interior and exterior alteration. Included in the work will be new interior partitions, plastering, mill work and carpenter work, electric work, plumbing and painting. Patent store fronts will be used. Exterior will be faced with pressed brick. The apartments will all have wall beds and private baths. Bath rooms will have tile wainscot and composition floors. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$16,000. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, Mrs. Ryan. The building will be erected on the west side of Cole street near Fulton and has been designed to contain six suites of four rooms and bath each. Interior will be finished in pine and hardwood with oak floors in the living rooms. There will be steam heat, a hot water supply and portable vacuum cleaners.

Bath rooms will have tile floors and wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 4 story and base. Class C construction. Cost not stated. Architect, David C. Coleman, Merchants' National Bank Bldg., S. F. Owner, Mr. Osborn, Clunie Bldg. The building will be erected on Leavenworth street adjoining the corner of Geary. Plans provide for a total of 90 rooms, arranged in two and three room suites with private baths. Interior finish will be of pine and elm. There will be steam heat and a hot water supply. An automatic elevator will be installed. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Exterior of the building will be faced with cement plaster. Plans are being prepared.

VENICE, LOS ANGELES CO., CAL.—Apartment house, hotel and offices, 4 story and base, brick and steel, \$15,000. Architects, Western Architectural and Building Co., Coulter Bldg., L. A. Owners, Adiel B. Tomlinson and F. A. Ripley. The building will be erected at the corner of Westminster and Ocean avenues, covering an area of 40 by 110 feet. There will be stores on the first floor. Upper floors will be arranged for hotel rooms, apartments and offices. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. Stores will have patent fronts. Exterior of the building will be faced with pressed brick. Plans are being prepared. Excavating and foundation work has been awarded to L. G. Block.

LOS ANGELES, CAL.—Apartment house, 3 story and base. Class C construction. Cost not stated. Architects, Blanchard & Tifal, California Bldg., L. A. Owner, A. S. O'Neil. The building will be erected at the corner of Figueroa and Diamond streets, and has been designed to contain 120 rooms which will be arranged in two and three room suites. Interior finish will be of pine and elm. Some hardwood floors will be used. Plans provide for steam heat, a hot water system and vacuum cleaning. All apartments will have wall beds and private baths. Bath rooms will have the wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans will go out for figures in about two weeks.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, C. C. Rittenhouse, Washington Bldg., L. A. Owner, A. L. Jamison, Black Bldg. The building will be erected on Carondelet street near Ninth, and will cover an area of 106 by 133 feet. Plans provide for a total of 160 rooms arranged in two and three room suites with private baths. Interior finish will be of pine and redwood with some hardwood floors. There will be steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

VISALIA, TULARE CO., CAL.—Apartment house, 2 story and base, frame and plaster, \$8,000. Architect, H.

Y. Davis, Visalia. Owner, Mrs. A. W. Gilbert. The building has been designed to contain a number of three and four room suites. Interior finish will be of pine throughout. All suites will have wall beds and private baths. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster on metal lath. Plans are being prepared.

Contracts Awarded.

SAN FRANCISCO—Apartment house alteration and addition, 3 story, frame, \$5,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owners, Mr. and Mrs. L. S. Church. Contractor, J. Eric Johanson, 2726 20th street, S. F. Contract price, \$5,000.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$100,000. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, G. Rupert Johnson. Contractors, Hubbard & Gardner, Douglas Bldg., L. A. Contract price, \$100,000.

BRIDGES, DAMS AND HARBOR WORK.

KELLOG, ORE.—Bridge, steel and concrete, \$30,000. Engineer, Horace C. Hall, Grants Pass, Ore. Owners, Douglas County. There will be two spans each 200 feet in length with a third connecting span of 125 feet. Approaches will be of reinforced concrete. The roadway will be sixteen feet. Plans are now being prepared and figures will be called for shortly.

Contracts Awarded.

HOPE, B. C.—Approach for steel, brick, \$300,000. Engineer's name not given. Owners, Kettle Valley Railroad. Hope, B. C. Contractors, Canadian Bridge Co., Hope, B. C. Contract price, \$300,000.

CHURCHES.

SAN FRANCISCO—Church, 2 story and base. Class C construction, \$60,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Second Church of Christ, Scientist. The building will be erected at the corner of Dolores and Cumberland streets, and has been designed in the classic style. The main auditorium will have a seating capacity of 1,000 people. Interior finish will be of pine and ornamental plaster. There will be a central heating system. Art and leaded glass is also specified. Exterior of the building will be faced with pressed brick. Working drawings are nearly complete and bids will be called for within a month. Further mention will be made of the work.

STOCKTON, SAN JOAQUIN CO., CAL.—Church, 2 story and base, brick and steel, \$25,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Gertrude's Parish. The building will be designed in the Renaissance style and will be faced with pressed brick, trimmed with terra cotta. Interior will be finished in pine and ornamental plaster. Plans provide for steam heat and an oil burning plant. The main auditorium will seat 550 people. Art glass and considerable marble work will be used. Preliminary sketches have been approved and working drawings will be completed at once. Con-

struction will not be undertaken until summer.

MT. OLIVET CEMETERY, SAN MATEO CO., CAL.—Columbarium, 1 story, reinforced concrete, \$100,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Mt. Olivet Cemetery Co. This building has been designed in the Greek-Doric style and will be of the fireproof type of construction. Interior will be finished in pine, ornamental plaster, marble and caen stone. Exterior will be faced with cement plaster. Only a portion of the building will be erected at the present time. Working drawings are complete and bids will be taken by the architect within a week or ten days.

McMINNVILLE, ORE.—Church, 1 story and base, reinforced concrete, \$10,000. Architect, B. B. Ostlin, McMinnville. Owner's name withheld. The building will cover an area of 60 by 120 feet with a nave of 50 by 50 feet. A spire 120 feet in height will also be constructed. Interior of the auditorium will be finished in pine and ornamental plaster. There will be steam heat, art glass windows and marble work. Exterior of the building will be faced with cement plaster. Plans are being prepared. Further mention will be made of this work when figures are called.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Church, 2 story, frame, \$20,000. Architect, W. J. Wythe, Central Bldg., Oakland. Owners, Methodist Church of Santa Cruz. The building has been designed in the Mission style and will contain a main auditorium seating 500 people besides a large Sunday school room and pastor's study. Interior finish will be of pine, redwood and ornamental plaster. There will be a central heating system. Exterior of the building will be covered with cement plaster on metal lath. Art glass windows will be installed. Plans are complete and figures are being taken. Bids will be opened on April 18th.

COURT HOUSES

SACRAMENTO, CAL.—Capitol addition, 5 story. Class A construction. Cost not stated. Architect, State Department of Architecture, Sacramento. Owners, State of California. News comes from Sacramento that land is being sought on which to construct a five-story fireproof building to house the overflow from the State Capitol. Some five or six parcels of land will be submitted to the Board of Control on April 8th. Plans for the new building will be prepared by the State Department of Engineering. The building is to have 25,000 square feet of floor area on each of the floors. Further mention will be made of the work.

ALTURAS, MODOC CO., CAL.—Court house, 2 story, base and dome, reinforced concrete, \$80,000. Architect, F. J. De Longchamps, Reno, Nev. Owners, Modoc County. Bids opened for this work show C. G. Sellman of Reno low on the general construction at \$87,385, and the Savage Heating and Plumbing Co., also of Reno, low on the heating and plumbing at \$7,296. Even with these figures the building cannot be constructed within the amount available and all bids were rejected. The architect will probably be allowed to revise the plans and new figures will be called. A complete list of the

bids submitted will be found under the heading of Sacramento, Stockton and Northern California in this issue.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouse, 2 story and base, brick and steel, \$10,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, C. G. Lathrop. The building will be erected at the southwest corner of 19th and York streets, covering an area of 42 by 96 feet. Interior will be finished in pine. There will be metal window sash and frames and spiral chutes. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken on the work.

SAN FRANCISCO—Warehouse, 2 story and base, brick and steel, \$27,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, C. G. Lathrop. The building will be erected at the southeast corner of 19th and Bryant streets and will have a frontage on one street of 96 feet and of 150 feet on the other. Interior finish will be of pine throughout. Construction will be of the extra heavy type. Plans provide for metal window sash and frames and fireproof doors. There will be an elevator and spiral chutes. Exterior will be faced with pressed brick. Plans are complete and figures are now being taken.

OAKLAND, CAL.—Warehouse, 2 story and base, reinforced concrete and brick, \$50,000. Architect, Walter Reed Oakland Bank of Savings, Oakland. Owners, W. P. Fuller & Co. The building will be erected at the southwest corner of 3rd and Jackson streets, covering a large area. Construction will be fireproof. Metal window sash and frames and fireproof doors are specified. Interior finish will be of pine. There will be spiral chutes. Exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

SEATTLE, WASH.—Factory, warehouse and docks, concrete construction. Cost not stated. Architect, Charles H. Bebb, Denny Bldg., Seattle. Owners, National Producers and Consumers Alliance Co., Inc. This project is one of the largest projects yet conceived to bring about an alliance between the producer and consumer. Included in the project in the construction of a salt water terminal, the construction of factories and warehouses, ice and cold storage plants. The promoters claim to have secured a large tract of valuable land and to have hundreds of thousands of dollars pledged to the project.

SAN FRANCISCO—Ice and cold storage plant, 3 story and base, brick and steel, \$150,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, F. E. Knowles. The building will be erected at the corner of Bryant and 15th streets, covering an area of 120 by 200 feet. The plant is intended for one of the largest and most modern ice and cold storage plants on the coast, and will be equipped with the latest and most approved machinery. Interior of the building will be finished in pine. Metal window sash and frames are specified. Exterior will be faced with red pressed brick trimmed with granite. Plans are complete and all con-

tracts will be let by the owner. Brick work is now being figured.

Contracts Awarded.

PORTLAND, ORE.—Factory, 6 story and base, reinforced concrete, \$70,000. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Doernbecker Mfg. Co. Contractor, James P. Taylor, Macleay Bldg., Portland. Contract price, \$70,000.

FIRE HOUSES AND JAILS.

SAN FRANCISCO—Central fire alarm station. Cost not stated. Architect, City Department of Architecture. Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for this building show the Clinton Fireproofing Co. low at \$36,500. They will probably be awarded the contract. A complete list of the bids received will be found under the heading of San Francisco in this issue.

Contracts Awarded.

BAKERSFIELD, KERN CO., CAL.—Jail, 2 story and base, reinforced concrete. Cost not stated. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Kern County. Contractors, Caldwell & Son, S. F. Contract price, \$97,476. The contractors are now taking figures on the various parts of the work.

FLATS.

SAN FRANCISCO—Flats, 5, 2 story and base, frame, \$20,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, John McConaghy. These houses will be erected at the corner of Army and Serpentine streets on adjoining property. Each building has been designed to contain two modern flats of five and six rooms with bath. Interiors will be finished in pine and redwood. Some oak floors will be used. There will be open fire places in each of the living rooms. Mantels will be of tile. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, Thomas Finlayson, 552 6th avenue, S. F. The building will be erected on the east side of Belvedere street north of 17th and has been designed to contain two flats of five and six rooms with bath. Interiors will be finished in pine and redwood with some elm panels and oak floors. There will be large open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, E. E. Young, 251 Kearny street, S. F. Owner, W. A. Breen. The building will be erected on the west side of 20th avenue north of Balboa, covering an area of 35 by 70 feet. Each flat will contain five rooms and bath. A garage will occupy the basement. Interiors will be finished in pine and hardwood

veneer with some hardwood floors. There will be open fire places in each living room. Mantel will be of tile or brick. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,500. Architect, none. Owner, Charles W. Higgins, 1366 Shrader street, S. F. The building will be erected on 17th avenue north of California, covering an area of 26 by 60 feet, and has been designed to contain two modern flats of five and six rooms with bath. Interior finish will be of pine and redwood with some elm panels and hardwood floors. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster with a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Capt. George H. Goodell. The building will be erected on 3rd avenue near Hugo, covering an area of 25 by 80 feet and has been arranged to contain six flats of four and five rooms. Interiors will be finished in pine, redwood and elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places in the living rooms. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2, 2 story and base, frame, \$4,000 each. Architect, none. Owner, C. Rushton, 714 9th avenue, S. F. These buildings will each cover an area of 25 by 55 feet, and are to be erected on the west side of Ninth avenue near Cabrillo. Each building will contain two five-room flats. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

GARAGES.

OAKLAND, CAL.—Garage, 1 story frame and concrete, \$20,000. Architect, Walter D. Reed, Oakland Bank of Savings Bldg., Oakland. Owner, Walter Arnstein. The building will be erected at the gore corner of Broadway and Webster streets, covering a considerable ground area. Besides the garage the building will contain several stores. There will be a concrete floor and patent store fronts. Interior finish will be of pine throughout. Exterior of the building will be faced with

cement plaster on metal lath. Working drawings are nearly complete and figures will be called for shortly.

GOVERNMENT WORK AND SUPPLIES.

Berkeley, Cal., Post Office.

The contract for the construction, including plumbing, gas piping, heating apparatus, electric conduits, wiring, and approaches, of the U. S. post office at Berkeley, Cal., using limestone for all stonework, except where granite and exterior marble are required, has been awarded to the Van Sant-Houghton Co., 503 Market street, San Francisco, Cal., at \$128,000; plus alternate 1, substituting marble for wood wainscot and making ceiling for alternate design in public lobby \$50; plus alternate 3, painting all plastered walls and finishing all ceilings, cornices, etc., in distemper, \$2,100; total, \$130,650; time to complete 16 months.

Penitentiary Harbor, Steel Work.

The Honolulu Planing Mill, Ltd., Honolulu, H. T., \$54,900.

The Spalding Construction Co., Rialto Building, San Francisco, Cal., \$37,000.

The Gerrick & Gerrick Co., Central Building, Seattle, Wash., \$16.95 per ton of 2,900 pounds.

W. N. Concanan Co., 925 Market street, San Francisco, Cal., \$69,718.

The Ritter-Conley Mfg. Co., Leetsdale, Pa., \$79,200.

Hamilton & Chambers, 29 Broadway, New York City, \$63,437.

The Lord-Young Engineering Co., Ltd., 12 Merchant street, Honolulu, H. T., \$61,000.

Reclamation No. 278.

Abstract of proposals for 3 triplex plunger pumps geared to motors, advertisement 278, San River Project, bids opened at 2 p. m., March 22 at Los Angeles, Cal.:

Rumsey & Co., Ltd., Seneca Falls, N. Y., \$600.15; 20 days at Seneca Falls, N. Y.

Smith-Booth-Usher Co., Los Angeles, Cal., \$619; 15 days at Seneca Falls, N. Y.

Terry Engine & Machine Co., Los Angeles, Cal., \$642; 30 days at Dayton, Ohio.

Rumsey & Co., Ltd., Seneca Falls, N. Y., \$690.15; 20 days at Seneca Falls, N. Y.

Smith-Booth-Usher Co., Los Angeles, Cal., \$693; 15 days at Seneca Falls, N. Y.

Deane Steam Pump Co., Holyoke, Mass., \$922.50; 30 days at Holyoke, Mass.

Pump and Frame Work.

Abstract of bids received in response to advertisement No. 272F, Salt River project, Ariz., for centrifugal pump and steel frame work, opened at Los Angeles, Cal.:

Item 1, pump; 2, frame work.

Krogh Mfg. Co., San Francisco, Cal., item 1, \$2,000, San Francisco, 50 days; 2, \$10 per foot.

United Iron Works, Oakland, Cal., item 1, \$2,260, Oakland, Cal., 45 days; 2, \$30.

Byron-Jackson Iron Works, Los Angeles, Cal., item 1, \$2,500, West Berkeley, Cal., 35 days; 2, \$12.

San Francisco Circular 141.

The following bids were received and awards made by the depot quartermaster, San Francisco, Cal., under office circular 141:

1. Bid 1, Crane Co., 2d and Brannan streets, San Francisco, Cal.

2. Dalziel-Moller Co., 543 Mission street, San Francisco, Cal.

3. Haines-Jones & Cadbury Co., 851 Folsom street, San Francisco, Cal.

4. Mark-Lally Co., 235 2d street, San Francisco, Cal.

5. Holbrook, Merrill & Stetson Co., 6th and Townsend streets, San Francisco, Cal.

6. Pacific Hardware & Steel Co., 7th and Townsend streets, San Francisco, Cal.

7. Dunham, Carrigan & Hayden Co., 140 Kansas street, San Francisco, Cal.

8. Yates & Co., 762 Folsom street, San Francisco, Cal.

9. Whittier-Coburn Co., Howard and Beale streets, San Francisco, Cal.

10. California Steam and Plumbing Supply Co., 671 5th street, San Francisco, Cal.

Item 1, 100 lbs putty—Bid 4, 4.35c lb; 8, 3.5c, accepted; 9, 4c.

2, 300lbs do, in 10-lb cans—Bid 4, 4.25c lb; 8, 3.3c, accepted; 9, 3.3c.

3, 200 lbs do, in 25-lb cans—Bid 4, 3.85c lb; 8, 3.3c, accepted; 9, 3.3c.

4, 50 lbs rivets, iron, F. H.—Bid 4, 5c lb, 30 days delivery, accepted; 7, 5c, 40 days.

5, 50 lbs do, R. H., 1/4-in—Bid 4, 5c lb, accepted; 7, 5c.

6, 50 lbs do, 4x3 1/2 in—Bid 4, 5c lb, accepted; 7, 5c.

7, 50 lbs do, 5-16x2 in—Bid 4, 5c lb; 6, 4.4c, accepted; 7, 5c.

8, 209 bibbs, plain, finished brass, 3/4-in, Boston—Bid 1, \$1.05 and 77c ea; 2, 95c; 3, 79c; 4, 75c, accepted; 5, \$1.14; 7, \$1.36; 10, 95c.

9, 17 tanks, automatic flush, 5-gal capacity—Bid 1, \$11 ea; 2, \$10; 3, \$10.20 and \$9.35; 4, \$10.90; 5, \$9.65; 10, \$9.80, accepted.

Pablo Canals, Lateral.

Proposals were received March 20 at St. Ignatius, Mont., for earthwork and tunnel, Pablo Canals, lateral 31-A. Platehead project, Mont. U. S. Reclamation Service, as follows:

1. Bid 1, Nelson Rich, Prosser, Wash.

2. Clifton-Applegate Co., Spokane, Wash.

3. A. L. Markus, Polson, Mont.

4. Beley & Kress Construction Co., Livingston, Mont.

Item 1, 3,000 cu yds excavation, class 1—Bid 1, 40c; 2, 47c; 3, 60c; 4, 45c.

2, 300 cu yds do, class 2—Bid 1, \$1; 2, 75c; 3, 75c; 4, 90c.

3, 100 cu yds do, class 3—Bid 1, \$2.50; 2, \$1.25; 3, \$1.50; 4, \$2.

4, 2,000 sta. yds overhaul (open cut only)—Bid 1, 2c; 2, 2c; 3, 2c; 4, 2c.

5, 130 lin ft tunnel in earth, including lining—Bid 1, \$38; 2, \$31; 3, \$45; 4, \$32.12.

6, 40 lin ft tunnel in rock, including lining—Bid 1, \$22; 2, \$26.75; 3, \$25; 4, \$35.85.

7, 350 lin ft tunnel in rock, without lining—Bid 1, \$14; 2, \$21.50; 3, \$20; 4, \$24.12.

8, 25 M ft, B. M., permanent timbering—Bid 1, \$40; 2, \$40; 3, \$40; 4, \$40.

3, 25 cu yds required additional concrete lining—Bid 1, \$16; 2, \$26; 3, \$10; 4, \$34.

Total—Bid 1, \$13,950; 2, \$16,515; 3, \$17,355; 4, \$17,921.60.

Metal Flume.

Contract has been awarded under authority of the Secretary of the Interior to the Hess Flume Co., of Denver, Colo., for furnishing 7,357 lin ft of metal flume for use on the projects of the Reclamation Service in the northern division. The total price under the proposal of the successful bidder for the material furnished is \$19,630.42, items 12 and 13 having been eliminated on account of substitution of concrete pipe for the proposed steel flume.

Cold Storage Plant, Pearl Harbor.

The bids opened on October 18, 1913, for ice-making and cold-storage equipment for the naval station, Pearl Harbor, Hawaii, as well as the bids opened November 1, 1913, for building for this machinery and equipment, have been rejected. The plans are to be revised and the work readvertised.

Reclamation Specification 283.

Abstract of proposals, Rio Grande project, No. 383 (transformers), opened at Los Angeles:

Item 1, 2 20-kva transformers; 2, 2 35-kva; 3, total.

Pittsburgh Transformer Co., Pittsburgh, Pa., item 1, \$244, 15 days, Pittsburgh; 2, \$365, 15 days, Pittsburgh; 3, \$4350.

General Electric Co., Los Angeles, Cal., item 1, \$245; Fort Wayne; 2, \$362, 40 days, Fort Wayne; 3, \$4,180.

Allis-Chalmers Co., Los Angeles, Cal., item 1, \$250, 20 working days, East Norwood; 2, \$436, 20 working days, East Norwood; 3, \$4,645.

Moloney Electric Co., St. Louis, Mo., item 1, \$130, 20 days, St. Louis; 2, \$126, 20 days, St. Louis; 3, \$3,500.

Wagner Electric and Mfg. Co., St. Louis, Mo., item 1, \$266, 35 days, St. Louis; 2, \$400, 35 days, St. Louis; 3, \$4,728.

General Electric Co., Los Angeles, Cal., item 1, \$282, 10 days, Pittsfield; 2, \$379, 10 days, Pittsfield; 3, \$4,240.

Vestinghouse Electric and Mfg. Co., Los Angeles, Cal., item 1, \$297.42, 35 days, East Pittsburgh; 2, \$461.04, 35 days, East Pittsburgh; 3, \$5,320.

HALLS & SOCIETY BLDGS—

COLUSA, COLUSA CO., CAL.—Hall of Records, 2 story and base, reinforced concrete, \$60,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Colusa County. The building will be erected on property adjoining the present County Court House, and has been designed in the classic style.

Construction will be fireproof throughout with reinforced concrete walls, floors, hollow tile interior partitions, metal window sash and frames and metal covered doors. Interior finish will be of pine and hardwood with considerable marble, tile and ornamental iron used. Special fireproof vaults will be installed. There will be a Rector system of heating. Exterior of the building will be faced with cement plaster. Plans are complete and will go out for figures shortly.

HOTELS.

OAKLAND, CAL.—Hotel, 7 story and base, steel and reinforced concrete, \$55,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected in the downtown business district, covering an area of 33 by 100 feet. There will be a store besides the hotel lobby in the first floor. Upper floors will contain a number of single rooms, nearly all of which will have private baths. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans will be completed shortly and figures will be taken.

OAKLAND, CAL.—Hotel, 7 story and base, steel and reinforced concrete, \$75,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected in the downtown district in the same block as another seven-story hotel structure mentioned in this issue. This building will cover an area of 50 by 80 feet. All guest rooms will have connecting baths. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior will be finished in pine and elm. There will be tile wainscot and composition floors in the bath rooms. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are nearly complete and figures will be called for shortly. One figure may be submitted including this and the other seven-story hotel.

OAKLAND, CAL.—Hotel fittings, etc., 7 story. Class A construction, \$135,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Morris & Muller. The architect has completed plans for the hotel fittings and store fixtures for the seven-story class A hotel and store building now nearing completion at the northwest corner of 14th and Jefferson streets. Bids are now being taken on the above mentioned work.

SAN FRANCISCO—Hotel and stores, 3 story and base. Class C construction, \$20,000. Architects, P. Schwerdt & Co., Phelan Bldg., S. F. Owners, H. and I. Wolf. The building will be erected on Sixth street south of Howard, and has been arranged for stores on the first floor and a number of single rooms and baths on the upper two floors. Interior finish will be of pine throughout. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans have been revised and figures are now being taken from among the three lowest firms who originally figured the work.

LOS ANGELES, CAL.—Hotel, 5 story and base. Class B construction, \$115,000. Architect, John H. Brown, Hollingsworth Bldg., L. A. Owner, Dr. Hamilton Forline. The building will be erected on Figueroa street near Sixth, covering an area of 100 by 165 feet. There will be a number of modern stores on the first floor besides the hotel entrance and lobby. Upper floors will contain a total of 210 guest rooms, a large percentage of which will have private baths. Interior will

be finished in pine, redwood and hardwoods. There will be steam heat, elevator service, a vacuum cleaning plant and hot water supply. All bath rooms will be finished in tile. Metal window sash, frames and patent store fronts and specified. Exterior of the building will be faced with pressed brick. Preliminary plans have been prepared.

LOS ANGELES, CAL. — Hotel, 3 story and base, brick and steel. Cost not stated. Architect, Joseph H. Rhodes, Central Bldg., L. A. Owner, R. F. Bennett. The building has been designed to contain stores on the first floor and a total of 60 guest rooms and ten baths on the upper floors. A site on Ceres avenue near 5th street has been secured, covering an area of 38 by 100 feet. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water supply. All bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

LOS ANGELES, CAL. — Hotel, 4 story and base, Class C construction. Cost not stated. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owner, D. F. Hill. The building will be erected at the northwest corner of Sixth and Wall streets, covering an area of 79 by 120 feet, and has been designed to contain stores on the first floor besides the main hotel entrance and lobby. Upper floors will be arranged for a total of 110 guest rooms and 40 baths. Interior finish will be of pine and redwood. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LIBRARIES.

SACRAMENTO, CAL. — Library, 3 story and base, reinforced concrete, \$100,000. Architect, none. Owners, City of Sacramento. City Librarian L. W. Ripley of Sacramento has reported to the Library Trustees as to the most suitable type of building to be constructed. His report favors a reinforced concrete building three stories high with a frontage of 95 feet and a depth of 100 feet. About \$100,000 is available for construction and \$20,000 for equipment. No architect has been selected.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Louis Creyer, 2030 Larkin street, S. F. The dwelling will be erected on 11th avenue near Judah, and has been designed for a six-room house with bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be a large open fire place and tile mantel in the living room. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The dwelling has been designed for an eight-room house with two baths and will be erected on Commonwealth avenue in Jordan Park. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors and will be equipped with showers. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, Mrs. Helen S. Treat. The dwelling will be erected on 18th avenue between California and Lake streets, and has been designed for an eight-room house with two baths. Interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and bids will be called for shortly.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Paul F. De Martin, 2123 Powell street, S. F. Owner, Robert McGable. The house will be erected on 16th avenue north of Lake street, and has been designed for six large rooms and bath. Contracts Awarded.

CAPISTRANO, ORANGE CO., CAL.—Residence, 2 story and base, hollow

tile construction, \$25,000. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owner, Miss Grace Dolph. Contractor, John L. Conner, 435 West 31st street, L. A. Contract price, \$25,000.

PANAMA-PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Exhibit building, 2 story, frame and plaster. Cost not stated. Architect, Oakeshott, 417 Market street, room 267. Owners, State of Australia. Architect Oakeshott has arrived in this city with complete working drawings for the exhibit building to be erected by Australia and will shortly call for figures. The building will be one of the largest to be erected by the foreign countries. Further mention will be made when bids are called.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster. Cost not stated. Architect, Frederick Whitton, 251 Kearny street, S. F. Owners, State of Iowa. Frederick Whitton spent Monday with the Governor and delegates of the Iowa State Commission in selecting a site for the building. Plans will be prepared at once and construction will be carried on under the direction of Mr. Whitton. The building will be a two-story frame and plaster structure and will cost in the neighborhood of \$50,000.

SAN FRANCISCO—State Exhibit building, 2 story, frame and plaster. Cost not stated. Architect's name not given. Owners, State of Massachusetts. Plans submitted by the Massachusetts State Commissioners have been approved by the Division of Works of the Exposition Co., and figures will be called for at once. The structure will be a replica of the State Capitol at Boston. Commissioners C. O. Power and F. L. Wells, of the Massachusetts State Commission, are stopping at the St. Francis Hotel.

SAN FRANCISCO—Piled roadway and sheet piling bulkhead. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for the construction of a piled roadway and sheet piling bulkhead at the Fulton Basin Gardens of the Exposition Grounds. Bids are now being called for and will be opened on April 21st. An official proposal appears in another column of this issue.

SAN FRANCISCO—Asphalt paving, etc. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans for laying a sheet asphalt wearing surface on the Main Concession Roadway and the Chestnut Street Plaza have been completed and are now out for figures. Bids will be opened on April 28th. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

Contracts Awarded.

SAN FRANCISCO—State Exhibit building, 1 story, frame and plaster, \$20,000. Architect's name not given. Owners, State of North Dakota. Contractors, Streiblow, Freeze & Peterson, S. F. Contract price, \$20,000.

SAN FRANCISCO—Exhibit building, 2 story frame and plaster. Cost not stated. Architect, August Nordin, Mills Bldg., S. F. Owners, Sweden.

Contractors, Lange & Bergstrom, Sharon Bldg., S. F. Contract price, \$20,000.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Railroad track work, moving freight sheds, etc. \$30,000. Architects, Engineering Department, Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The Southern Pacific Co. will start work at Third and Townsend streets within a few days. The first work to be undertaken will be the moving of six sheds, a portion of the old passenger depot and construction of temporary office quarters. The company fixes the cost of this work at \$30,000. Bids may be called for or the work be done by the company under the Day Labor system.

SCHOOLS.

SUISUN, SOLANO CO., CAL.—School, 2 story and base, reinforced concrete, \$10,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Suisun Grammar School District. The building will be a two-story and basement structure designed in the classic style and of semi-fireproof construction. There will be eight class rooms, large assembly hall and principal's office. Interior finish will be of pine with maple floors in the class rooms. Plans provide for steam heat, oil burning furnace and a modern system of ventilation. Program clocks and vacuum cleaning are also specified. Exterior of the building will be faced with cement plaster. Plans are complete and bids will be called for as soon as bonds can be sold.

FRESNO, FRESNO CO., CAL.—State Normal School, 2 story and base, brick and steel, \$300,000. Architect, State Architect George R. McDougall, Sacramento. Owners, State of California. Final plans for the main building have been forwarded to Fresno and have received the approval of the Superintendent. These plans show a large structure in the shape of the letter H. Bids will be called for as soon as plans and specifications receive the approval of the State Board of Control.

SACRAMENTO, CAL.—School, 1 and 2 story and base, reinforced concrete, \$200,000. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Sacramento. The Board of Education has approved the final plans of Architect Donovan for the new building to be erected on the property at the corner of Cypress and Madrone avenues. The building has been designed on a combination primary and grammar school. Bids will be called for shortly. Further mention will be made of the work.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores and lofts 6 story and base. Class A construction. Cost not stated. Architect, Alfred Henry Jacobs, 110 Sutter street, S. F. Owner, Charles Schlesinger. The building will be erected on the south side of Market street just west of Second street, having a frontage of 20 feet on Market street and a depth of about 120 feet. The property is one of the last pieces of unimproved Market street property. The construction

will be class A with a complete steel frame and brick curtain walls. Upper floors will be arranged for lofts, but so designed that they may be turned into offices without much further outlay. Interior finish will be of pine. There will be steam heat, freight and passenger elevators, a hot water supply and metal window sash and frames. Patent store fronts are also specified. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and figures will be called for at once.

SAN FRANCISCO—Stores and dance hall, 2 story and base, brick and steel, \$30,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Henry Investment Co. The building will be erected at the northwest corner of Capp and 16th streets, covering an area of 73 by 143 feet. The first floor will be arranged for a number of stores, while the entire second floor will be given over to a dance hall. Interior finish will be of pine with a maple floor in the dance hall. There will be steam heat. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Stores, 1 story and base, brick, \$12,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, The Eisenbach Co. The building will be erected on the south side of Sutter street west of Jones, having a frontage of 35 feet and a depth of 88 feet. There will be several modern stores with plate glass display windows and patent store fronts. Floor will be of cement. Pine and hardwood interior finish are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Bakery, 1 story and base, brick, \$6,000. Architect Matthew O'Brien, Foxcroft Bldg., S. F. Owner, James L. McLaughlin, 241 Kearny street. The building will be erected on the north side of Jessie street west of 7th, covering an area of 50 by 80 feet. Interior will be finished in pine. A cement floor will be used. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

STOCKTON, SAN JOAQUIN CO., CAL.—Stores and lofts, 3 story and base, brick and steel. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owner, Dr. W. W. Stockwell. The building will cover a considerable area and has been designed for stores on the first floor and lofts above. Interior finish will be of pine throughout. Patent store fronts are specified. Modern plumbing and electric work are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LAS ANGELES, CAL.—Stores and offices, 8 story and base. Class A construction, \$100,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, William G. Kerckhoff. The building will be erected at the northwest corner of Sixth and Los Angeles streets, covering an area of 121 by 143 feet. There will be nine stores on the first floor, light lofts on the second and third floors. The Santa Fe Railroad Co. has taken a long-term lease on the upper five floors which will be arranged for offices.

Construction will be of the reinforced concrete type with reinforced concrete walls, floors, roof slabs and stairways. Interior will be finished in birch throughout with marble and tile floors and wainscot in the corridors and lobby. Plans provide for steam heat, four passenger and one freight elevator, hot water system, vacuum cleaning and mail chutes. Metal window sash and frames and hollow tile and metal lath and plaster partitions will be used. There will be patent store fronts and sidewalk doors, lifts and lights. Exterior of the building will be faced with enameled brick. Plans are complete and figures are now being taken.

THEATRES.

SAN FRANCISCO—Theatre, 1 story and base brick and frame, \$6,000 or more. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected in what is known as Carville, near the beach. It has not been fully determined whether brick or frame construction will be used. Interior will be finished in pine with some ornamental plaster. The theatre will seat about 400 people. Exterior will be covered with cement plaster. Only preliminary plans have been prepared. Further mention will be made of the work.

OAKLAND, CAL.—Theatre 1 story, frame and plaster, \$3,000. Architect, Harvey P. Smith, Blake Bldg., Oakland. Owner, A. Saba. The building, designed for a moving picture theatre, will be erected at the corner of 7th and Adeline streets, covering an area of 20 by 80 feet. Interior finish will be of pine throughout. A modern system of ventilation will be installed. Special electric work is specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within four hundred (400) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed as follows:

Proposition No. 1—	\$75,000.00.
Proposition No. 2—	\$50,000.00.
Proposition No. 3—	\$50,000.00.
Proposition No. 4—	\$50,000.00.
Proposition No. 5—	\$60,000.00.
Proposition No. 6—	\$30,000.00.
Proposition No. 7—	\$100,000.00.
Proposition No. 8—	\$100,000.00.
Proposition No. 9—	\$100,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order

of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposals.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect. All proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. **RICHARD J. CLANE,** Secretary.

**STATE OF CALIFORNIA.
DEPARTMENT OF ENGINEERING.
CALIFORNIA HIGHWAY COMMISSION
NOTICE TO CONTRACTORS.**

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Fourth Bldg., Sacramento, Cal., until the time herein-after noted, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Until 2 o'clock P. M., April 27, 1914.
Siskiyou County from Hornbrook to the Oregon Line (II-Sis-3-C), about 8 miles in length, to be graded.
Shasta County from La Moine to Hazel Creek P. O. (II-Sha-3-D), about 9.5 miles in length, to be graded.

Tehama County from the southerly boundary to Corning (II-Teh-7-A), about 8.5 miles in length, to be built of Portland cement concrete.

Butte County from Lando Channel to the northerly boundary (III-But-3-D), about 11.2 miles in length, to be built of Portland cement concrete.

Glenn County from Grapitt to the northerly boundary (III-Gle-7-C), about 7 miles in length, to be built of Portland cement concrete.

Sonoma County from the northerly boundary to Cloverdale (IV-Son-1-A), about 4.5 miles in length, to be graded.

Plans may be seen, and terms of proposals, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to each blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

**CHARLES D. BLANLYN,
NEWELL D. DARLINGTON,
CHARLES F. STERN**

California Highway Commission.
AUSTIN B. FLETCHER,
Highway Engineer.

WILSON R. ELLIS,
Secretary. (*)

Filed March 25, 1914.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., March 27, 1914.—SEALED PROPOSALS will be opened in this office at **1 P. M., May 6, 1914,** for the construction complete (including mechanical equipment, interior lighting fixtures and approaches) of the United States Post Office at Grass Valley, Cal. The building is one story and basement, with a ground area of approximately 14,000 square feet, stone facing, slate roof, nonfireproof construction. Drawings and specifications may be obtained from the custodian of site at Grass Valley, Cal., at this office, in the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including **12 o'clock, noon, Tuesday, April 21st, 1914,** said bids then and there to be publicly opened and read for furnishing all plant, materials and

labor, and doing the work required for the construction and erection of the elevator work of the building known as the Female Building, at the Stockton State Hospital, Stockton, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five Dollars (\$5.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposals for Elevator Work, Stockton State Hospital, Stockton, California."

(Signed) **W. F. McCLURE,** State Engineer. (*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the far part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

EXHIBIT BUILDING—2 story, frame and plaster. Cost not stated. San Francisco. Architect, Oakeshott, 417 Market street, room 207. Owners, State of Australia. Architect Oakeshott has arrived in this city with complete working drawings for the exhibit building to be erected by Australia and will shortly call for figures. The building will be one of the largest to be erected by the foreign countries. Further mention will be made when bids are called.

STATE EXHIBIT BUILDING—2 story, frame and plaster. Cost not stated. San Francisco. Architect, Frederick Whitton, 251 Kearny street. S. F. Owners, State of Iowa. Frederick Whitton spent Monday with the Governor and delegates of the Iowa State Commission to the Panama-Pacific Exposition in selecting a site for the building. Plans will be prepared at once and construction will be carried on under the direction of Mr. Whitton. The building will be a two-story, frame and plaster structure, and will cost in the neighborhood of \$50,000.

STATE EXHIBIT BUILDING—2 story, frame and plaster. Cost not stated. San Francisco. Architect's name not given. Owners, State of Massachusetts. Plans submitted by the Massachusetts State Commissioner have been approved by the Division of Works of the Exposition Co., and figures will be called for at once. The structure will be a replica of the State Capitol at Boston. Commissioners C. O. Power and F. L. Wells of the Massachusetts State Commission are stopping at the St. Francis Hotel.

APARTMENT HOUSE—3 story and base frame, \$20,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected at the southeast corner of Page and Fillmore streets, covering an area of 30 by 81 feet. The building has been arranged for one store on the first floor besides the entrance to the apartments. Upper floors will be arranged for seven suites of two, three and four rooms. All apartments will have wall beds and private bath rooms. Interiors will be finished in pine and elm panels. Some oak floors will be used. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with brick veneer. Plans are complete and figures are being taken.

APARTMENT HOUSE ALTERATION—3 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Patrick Lynch, 1116 Hampshire street, S. F. This work will consist of the alteration of a two-story frame building at 571 Natoma street into a three-story apartment house. Suites will be of two and three room type. There will be new interior trim, plumbing, electric work and plaster-

ing. The outside of the building will be covered with rustic and shiplap. Plans are in the hands of the owner and work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, G. Romano. The building will be erected on Pacific street near Taylor and will contain six suites of two and three rooms. Interiors will be finished in pine and redwood. There will be wall beds and private baths. Plans also provide for a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will close in one week.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architect, none. Owner, E. M. Fritz, 1101 Masonic avenue, S. F. The building will be erected at the northeast corner of Frederick and Delmar streets, covering an area of 29 by 105 feet. Interior has been arranged for a total of eleven suites of two, three and four rooms. All interior finish will be of pine and hardwood. Suites will have private bath rooms and wall beds. Plans provide for steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. Portable vacuum cleaners will be installed. Exterior of the house will be covered with cement plaster on metal lath. A klinker brick base is also specified. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—4 story and base, reinforced concrete, \$20,000. San Francisco. Architect, T. Patterson, 310 California street, S. F. Owner, S. Zussman. The building will be erected on the north side of Post street west of Larkin. There will be a number of two and three room suites all of which will have private bath rooms and wall beds. Interior finish will be of pine and redwood with some elm panels and oak floors. Plans provide for steam heat and a hot water supply. An automatic elevator will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster. Plans are complete and a contract will be awarded shortly.

APARTMENT HOUSES—2, 3 story and base, frame, \$12,000 each. San Francisco. Architect, none. Owner, J. Sockolov, 1857 O'Farrell street, S. F. These two buildings will be erected on adjoining property on the north side of California street east of Branderick and will cover an area of 40 by 122 feet. The two buildings will contain a total of 12 suites of three and four rooms. Interior finish will be of pine and elm panels with beam ceilings and some hardwood floors. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and

composition floors. All apartments will be equipped with wall beds. Exterior of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Louis Creyer, 2030 Larkin street, S. F. The dwelling will be erected on 11th avenue near Judah street, and has been designed for a six-room house with bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be a large open fire place and tile mantel in the living room. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Charles C. Frye, 26 Montgomery street, S. F. Owner's name withheld. The dwelling has been designed for an eight-room house with two baths and will be erected on Commonwealth avenue in Jordan Park. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors and will be equipped with showers. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, William H. Crim, Jr., 125 Kearny street, S. F. Owner, Mrs. Henel S. Treat. The dwelling will be erected on 18th avenue between California and Lake streets, and has been designed for an eight-room house with two baths. Interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and bids will be called for shortly.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Robert McGallie. The house will be erected on 16th avenue north of Lake street, and has been designed for six large rooms and bath. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

RESIDENCE—3, 2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owner, Edward E. Minnseu, 1278 35th avenue, S. F. These houses, designed to contain six rooms

each, will be erected on 35th avenue north of Irving. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places in all living rooms. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath and brick veneer bases. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

CHURCH—2 story and base. Class C construction, \$60,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Second Church of Christ, Scientist. The building will be erected at the corner of Dolores and Cumberland streets, and has been designed in the classic style. The main auditorium will have a seating capacity of 1,000 people. Interior finish will be of pine and ornamental plaster. There will be a central heating system. Art and leaded glass is also specified. Exterior of the building will be faced with pressed brick. Working drawings are nearly complete and bids will be called for within a month. Further mention will be made of the work.

CENTRAL FIRE ALARM STATION—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for this building show the Clinton Fireproofing Co low at \$36,500. They will probably be awarded the contract. A complete list of the bids received will be found under the heading of San Francisco in this issue.

WAREHOUSE—2 story and base, brick and steel, \$27,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, C. G. Lathrop. The building will be erected at the southeast corner of 19th and Bryant streets, and will have a frontage on one street of 96 feet and of 150 feet on the other. Interior finish will be of pine throughout. Construction will be of the extra heavy type. Plans provide for metal window sash and frames and fireproof doors. There will be an elevator and spiral chutes. Exterior will be faced with pressed brick. Plans are complete and figures are now being taken.

FLATS—5, 2 story and base, frame, \$20,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, John McConaghy. These houses will be erected at the corner of Army and Serpentine streets on adjoining property. Each building has been designed to contain two modern flats of five and six rooms with bath. Interiors will be finished in pine and redwood. Some oak floors will be used. There will be open fire places in each of the living rooms. Mantels will be of tile. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Thomas Finlayson, 552

6th avenue, S. F. The building will be erected on the east side of Belvedere street north of 17th and has been designed to contain two flats of five and six rooms with bath. Interiors will be finished in pine and redwood with some elm panels and oak floors. There will be large open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

FLATS—2 story and base, frame, \$6,000. San Francisco. Architect, E. E. Young, 251 Kearny street, S. F. Owner, W. A. Breen. The building will be erected on the west side of 20th avenue north of Balboa, covering an area of 25 by 70 feet. Each flat will contain five rooms and bath. A garage will occupy the basement. Interiors will be finished in pine and hardwood veneer with some hardwood floors. There will be open fire places in each living room. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are complete and work will be done by Day Labor.

FLATS—2 story and base, frame, \$4,500. San Francisco. Architect, none. Owner, Charles W. Higgins, 1306 Shrader street, S. F. The building will be erected on 17th avenue north of California, covering an area of 26 by 60 feet, and has been designed to contain two modern flats of five and six rooms with bath. Interior finish will be of pine and redwood with some elm panels and hardwood floors. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster with a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

FLATS—3 story and base, frame, \$7,000. San Francisco. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Capt. George H. Goodell. The building will be erected on 3rd avenue near Hugo, covering an area of 25 by 80 feet, and has been arranged to contain six flats of four and five rooms. Interiors will be finished in pine, redwood and elm panels. Hardwood floors will be used in the principal rooms. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RAILROAD TRACK WORK, MOVING FREIGHT SHEDS, ETC.—\$30,000. San Francisco. Architects, Engineering Department, Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The Southern Pacific Co. will start work at Third and Townsend streets within a few days. The first work to be under taken will be the moving of six sheds, a portion of the

old passenger depot and construction of temporary office quarters. The company fixes the cost of this work at \$30,000. Bids may be called for or the work may be done by the company under the Day Labor system.

STORES AND LOFTS—6 story and base. Class A construction. Cost not stated. San Francisco. Architect, Alfred Henry Jacobs, 110 Sutter street, S. F. Owner, Charles Schlesinger. The building will be erected on the south side of Market street just west of Second street, having a frontage of 30 feet on Market street and a depth of about 120 feet. The property is one of the last pieces of unimproved Market street property. Construction will be class A with a complete steel frame and brick curtain walls. Upper floors will be arranged for lofts, but so designed that they may be turned into offices without much further outlay. Interior finish will be of pine. There will be steam heat, freight and passenger elevators, a hot water supply and metal window sash and frames. Patent store fronts are also specified. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and figures will be called for at once.

STORES AND DANCE HALL—2 story and base, brick and steel, \$30,000. San Francisco. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Henry Investment Co. The building will be erected at the northwest corner of Capp and 16th streets, covering an area of 73 by 143 feet. The first floor will be arranged for a number of stores, while the entire second floor will be given over to a dance hall. Interior finish will be of pine with a maple floor in the dance hall. There will be steam heat. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES—1 story and base, brick, \$12,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, The Eisenbach Co. The building will be erected on the south side of Sutter street east of Jones, having a frontage of 35 feet and a depth of 85 feet. There will be several modern stores with plate glass display windows and patent store fronts. Floors will be of cement pine and hardwood interior finish are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

THEATRE—1 story and base, brick or frame, \$6,000 or more. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected in what is known as Carville, near the beach. It has not been fully determined whether brick or frame construction will be used. Interior will be finished in pine with some ornamental plaster. Only preliminary plans have been prepared. Further mention will be made of the work.

PILED ROADWAY AND SHEET PILING BULKHEAD—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for the construction of a piled roadway and sheet piling bulkhead at the

Fulton Basin Garage on the Exposition Grounds. Bids are now being called for and will be opened on April 21st. An official proposal appears in another column of this issue.

APARTMENT HOUSE—3 story and base, frame, \$16,000. San Francisco. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, Mrs. Ryan. The building will be erected on the west side of Cole street near Fulton and has been designed to contain six suites of four rooms and bath each. Interior will be finished in pine and hardwood with oak floors in the living rooms. There will be steam heat, a hot water supply and portable vacuum cleaners. Bath rooms will have tile floors and wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—4 story and base, Class C construction. Cost not stated. San Francisco. Architect, David C. Coleman, Merchants' National Bank Bldg., S. F. Owner, Mr. Osborn, Clunie Bldg. The building will be erected on Leavenworth street adjoining the corner of Geary. Plans provide for a total of 90 rooms arranged in two and three room suites with private baths. Interior finish will be of pine and elm. There will be steam heat and a hot water supply. An automatic elevator will also be installed. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Exterior of the building will be faced with cement plaster. Plans are being prepared.

WAREHOUSE—2 story and base, brick and steel, \$10,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, C. G. Lathrop. The building will be erected at the southwest corner of 19th and York streets, covering an area of 40 by 96 feet. Interior will be finished in pine. There will be metal window sash and frames and spiral chutes. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken on the work.

ICE AND COLD STORAGE PLANT—2 story and base, brick and steel, \$150,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, P. E. Knowles. The building will be erected at the corner of Bryant and 15th streets, covering an area of 120 by 200 feet. The plant is intended for one of the largest and most modern ice and cold storage plants on the coast and will be equipped with the latest and most approved machinery. Interior of the building will be finished in pine. Metal window sash and frames are specified. Exterior will be faced with red pressed brick trimmed with granite. Plans are complete and all contracts will be let by the owner. Brick work is now being figured.

PLATS—2, 2 story and base, frame \$1,000 each. San Francisco. Architect, none. Owner, C. Rushton, 714 9th avenue, S. F. These buildings will each cover an area of 25 by 55 feet, and are to be erected on the west side of Ninth avenue near Cabrillo. Each building will contain two five-room flats. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and

composition floors. Automatic water heaters will be installed. Exterior of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

HOTEL AND STORES 3 story and base, Class C construction, \$20,000. San Francisco. Architects, P. Schwerdt & Co., Phelan Bldg., S. F. Owners, H. and I. Wolf. The building will be erected on Sixth street south of Howard and has been arranged for stores on the first floor and a number of single rooms and baths on the upper two floors. Interior finish will be of pine throughout. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans have been revised and figures are now being taken from among the three lowest firms who originally figured the work.

ASPHALT PAVING, ETC.—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans for laying a sheet asphalt wearing surface on the Main Concession Roadway and the Chestnut Street Plaza have been completed and are now out for figures. Bids will be opened on April 25th. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

BAKERY—1 story and base, brick, \$6,000. San Francisco. Architect, Matthew O'Brien, Foxcroft Bldg., S. F. Owner, James L. McLaughlin, 244 Kearny street. The building will be erected on the north side of Jessie street west of 7th, covering an area of 50 by 80 feet. Interior will be finished in pine. A cement floor will be used. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE FURNISH-
INGS. FIXTURES, ETC.—Cost not stat-
ed. Oakland, Cal. Architect, Clay N.
Burrell, Albany Bldg., Oakland. Own-
ers, Sommerstrom Bros. The three-
story frame apartment house at the
corner of 16th and Alice streets is
nearing completion, and the owners
will shortly award contracts for fur-
nishing, store fixtures, lighting fix-
tures etc. Marble and tile work are
now being figured.

RESIDENCES—6, 2 story and base,
frame, \$6,000 to \$9,000. Oakland, Cal.
Architect, Charles W. McCall, Central
Bank Bldg., Oakland. Owner's name
withheld. These dwellings will be
erected on property in various loca-
tions in both Oakland and Piedmont.
Each house will contain from seven to
nine rooms with from one to three
baths. Interior finish will be of pine,
redwood and hardwood. Oak floors will
be used in the principal rooms. All of
the dwellings will have furnace heat
and open fire places. Mantels will be
of brick or tile. Automatic water
heaters will be installed. Bath rooms
will have composition floors and tile
wainscot. Exteriors will be covered
with cement plaster on metal lath.
Plans are being prepared.

RESIDENCE—2 story and base,
frame, \$3,000. Oakland, Cal. Archi-
tect, none. Owner, James Rountree,
5129 Ygnacio avenue, Oakland. The
dwelling has been designed for a seven
room house, and will be erected at the
corner of Belvedere and Ygnacio ave-
nues. Interior will be finished in pine
and redwood with some hardwood
floors and elm panels. There will be a
large open fire place in the living
room with a tile mantel. Bath room

will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are being purchased.

RESIDENCE—2 story and base, frame, \$3,000. Piedmont, Alameda Co., Cal. Architect, none. Owner, R. A. McWilliams, 5845 Avila avenue, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch, and will be erected on Ricardo and Arroya avenues. Interior finish will be largely of pine. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

BUNGALOW—1 story, frame, \$2,500. Albany, Alameda Co., Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Antonio Dutro. The house has been designed for a six-room dwelling with bath. Interior finish will be of pine and redwood. Oak floors will be used in the living room and dining room. There will be an open fire place with a tile mantel. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and work will be done by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. L. Johnson. The dwelling will be erected in Claremont, and has been designed for an eight-room house with two baths and a sleeping porch. Interior will be finished in pine and hardwoods. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$10,500. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, Mrs. Shores. The dwelling will be erected in East Piedmont Heights, and has been designed for an eight-room house with baths and sleeping porch. Interior finish will be of pine, redwood and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. A. Kruse. The dwelling will be erected in Thousand

Oaks Tract, and has been designed to contain eight rooms, two baths and sleeping porch. Interior will be finished in pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

WAREHOUSE—2 story and base, reinforced concrete and brick, \$50,000. Oakland, Cal. Architect, Walter Reed, Oakland Bank of Savings, Oakland. Owners, W. P. Fuller & Co. The building will be erected at the southwest corner of 3rd and Jackson streets, covering a large area. Construction will be fireproof. Metal window sash and frames and fireproof doors are specified. Interior finish will be of pine. There will be spiral chutes. Exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

GARAGE—1 story, frame and concrete, \$20,000. Oakland, Cal. Architect, Walter D. Reed, Oakland Bank of Savings Bldg., Oakland. Owner, Walter Arnstein. The building will be erected at the core corner of Broadway and Webster streets, covering a considerable ground area. Besides the garage the building will contain several stores. There will be a concrete floor and patent store fronts. Interior finish will be of pine throughout. Exterior of the building will be faced with cement plaster on metal lath. Working drawings are nearly complete and figures will be called for shortly.

HOTEL—7 story and base, steel and reinforced concrete, \$55,000. Oakland, Cal. Architect, Clay N. Burrell, Bldg., Oakland. Owners' name withheld. The building will be erected in the downtown business district, covering an area of 33 by 100 feet. There will be a store besides the hotel lobby in the first floor. Upper floors will contain a number of single rooms, nearly all of which will have private baths. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans will be completed shortly and figures will be taken.

HOTEL—7 story and base, steel and reinforced concrete, \$75,000. Oakland, Cal. Architect, Clay N. Burrell, Bldg., Oakland. Owners' name withheld. The building will be erected in the downtown district in the same block as another seven-story hotel structure mentioned in this issue. This building will cover an area of 50 by 80 feet. All guest rooms will have connecting baths. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior will be finished in pine and elm. There will be tile wainscot and composition floors in the bath rooms. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are nearly complete and figures will be called for shortly. One figure may be

submitted including this and the other seven-story hotel.

HOTEL, FITTINGS, ETC.—7 story, Class A construction, \$135,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Morris & Muller. The architect has completed plans for the hotel fittings and store fixtures for the seven-story class A hotel and store building now nearing completion at the northwest corner of 14th and Jefferson streets. Bids are now being taken on the above mentioned work.

THEATRE—1 story, frame and plaster, \$3,900. Oakland, Cal. Architect, Harvey P. Smith, Blake Bldg., Oakland. Owner, A. Saba. The building, designed for a moving picture theatre, will be erected at the corner of 7th and Adeline streets, covering an area of 30 by 80 feet. Interior finish will be of pine throughout. A modern system of ventilation will be installed. Special electric work is specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—1 story and base, frame, \$3,000. Piedmont, Alameda Co., Cal. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner, Charles S. Wheeler. The dwelling will be erected on Sunnyside avenue and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantel will be of tile or brick. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. An automatic water heater will be installed. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Piedmont, Alameda Co. Cal. Architect, Claude E. Barton, Security Bank Bldg., Oakland. Owner, E. L. Reed. The dwelling has been designed for a six-room house and will be erected in Piedmont. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, William A. Newman, David Hewes Bldg., S. F. Owner, Ray C. Davis. The dwelling will be erected at the corner of Manor Drive and Holly street, and has been designed for a seven room house with bath. Interior finish will be of pine and redwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base,

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

RESIDENCE—2 story and base, frame, \$10,000. Belvedere, Marin Co., Cal. Architect, Louis C. Mulgardt. Chronicle Bldg., S. F. Owner, J. W. Mailhard. The dwelling has been designed for an eight-room house with two baths and sleeping porch. Interior finish will be of pine and hardwoods. There will be furnace heat and open fire places. Mantels will be of tile or brick. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in tile. Automatic water heaters are specified. Exterior of the dwelling will be covered with cement plaster on metal lat. Plans are now being prepared.

RESIDENCES 6, 1 and 2 story, frame, \$2,000 to \$3,500. Richmond, Contra Costa Co., Cal. Architect, none. Owners, California Home Building Co., 1321 MacDonald avenue, Richmond. These houses will be erected in different sections of the city and will contain from five to seven rooms. Interior finish will be largely of pine with some redwood. Oak floors will be used in the principal rooms. Bath rooms and kitchens will have the wainscot. Automatic water heaters will be installed. Exteriors will be covered with rustic, shiplap and cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SCHOOL—2 story and base, reinforced concrete, \$10,000. Suisun, Solano Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Suisun Grammar School District. The building will be a two-story and basement structure, designed in the classic style and of semi-fireproof construction. There will be eight class rooms, large assembly hall and principal's office. Interior finish will be of pine with maple floors in the class rooms. Plans provide for steam heat, oil burning furnace and modern system of ventilation. Program clocks and vacuum cleaning are also specified. Exterior of the building will be faced with cement plaster. Plans are complete and bids will be called for as soon as bonds can be sold.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

APARTMENT HOUSE—2 story and base, frame and plaster, \$8,000. Visalia, Tulare Co., Cal. Architect, H. Y. Davis, Visalia. Owner, Mrs. A. W. Gilbert. The building has been designed to contain a number of three and four room suites. Interior finish will be of pine throughout. All suites will have wall beds and private baths. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster on metal lat. Plans are being prepared.

JAIL—2 story and base, reinforced concrete. Cost not stated. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Kern County. Contractor, Caldwell & Son, S. F. Contract price, \$97,476. The contractors are now taking figures on the various parts of the work.

STATE NORMAL SCHOOL—2 story and base, brick and steel, \$300,000. Fresno, Fresno Co., Cal. Architect, State Architect George B. McDougall. Sacramento. Owners, State of California. Final plans for the main building have been forwarded to Fresno and have received the approval of the Superintendent. These plans show a large structure designed in the shape of the letter H. Bids will be called for as soon as plans and specifications receive the approval of the State Board of Control.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

HALL OF RECORDS—2 story and base, reinforced concrete, \$60,000. Colusa, Colusa Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Colusa County. The building will be erected on property adjoining the present County Court House, and has been designed in the classic style. Construction will be fireproof throughout with reinforced concrete walls, floors, hollow tile interior partitions, metal window sash and frames and metal covered doors. Interior finish will be of pine and hardwood with considerable marble, tile and ornamental iron. Special fireproof vaults will be installed. There will be a Rector system of heating. Exterior of the building will be faced with cement plaster. Plans are complete and will go out for figures shortly.

LIBRARY—2 story and base, reinforced concrete, \$100,000. Sacramento, Cal. Architect, none. Owners, City of Sacramento. City Librarian, L. W. Ripley of Sacramento has reported to the Library Trustees as to the most suitable type of building to be constructed. His report favors a reinforced concrete building three stories high with a frontage of 95 feet and a depth of 100 feet. About \$100,000 is available for construction and \$20,000 for equipment. No architect has been selected.

APARTMENT HOUSE ALTERATION—3 story and base, brick, \$20,000. Sacramento, Cal. Architect, J. Seadler, Forum Bldg., Sacramento. Owner's name withheld. The work will consist of both interior and exterior alteration. Included in the work will be new interior partitions, plastering, mill and carpenter work, electric work, plumbing and painting. Patent store fronts will be used. Exterior will be faced with pressed brick. The apartments will all have wall beds and private baths. Bath rooms will have tile wainscot and composition floors. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$10,000. Stockton, San Joaquin Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Father L. Murphy. The dwelling has been designed for a parochial residence, and will contain eight rooms and two baths. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lat. Plans are being prepared.

RESIDENCE—1 story and base, frame, \$2,500. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, George Butterlick. The dwelling will be erected in the Sperry Addition, and will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be an open fire place and tile mantel. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

Wybro Panels keep their smooth finish.

One feature of the famous Wybro Panels is that they have a beautiful SMOOTH finish—a finish which RETAINS its smoothness.

Wybro Panels are everlastingly good and cost no more than ordinary ones.

RESIDENCE—1 story and base, frame, \$3,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell. Odd Fellows Bldg., Stockton. Owner, Walker Glenn. The dwelling will be erected in the Yosemite Terrace Tract, and has been designed to contain seven rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantels will be of tile. Bath room will have tile wainscot and composition floors. An automatic water heater is specified. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, hollow tile, \$5,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell. Odd Fellows Bldg., Stockton. Owner, Ben R. Farrar. The dwelling will be erected in the Yosemite Terrace Tract, and has been designed for a seven room house with bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and floor. Exterior of the house will be covered with cement plaster. Plans are nearly complete and the work will be done by Day Labor.

CHURCH—2 story and base, brick and steel, \$25,000. Stockton, San Joaquin Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Gertrude's Parish. The building will be designed in the Renaissance style and will be faced with pressed brick, trimmed with terra cotta. Interior will be finished in pine and ornamental plaster. Plans provide for steam heat and an oil burning plant. The main auditorium will seat 550 people. Art glass and considerable marble work will be used. Preliminary sketches have been approved and working drawings will be completed at once. Construction will not be undertaken until summer.

CAPITOL ADDITION—5 story. Class A construction. Cost not stated. Sacramento, Cal. Architect, State Department of Architecture, Sacramento. Owners, State of California. News comes from Sacramento that land is being sought on which to construct a

five-story fireproof building to house the overflow from the State Capitol. Some five or six parcels of land will be submitted to the Board of Control on April 5th. Plans for the new building will be prepared by the State Department of Engineering. The building is to have 25,000 square feet of floor area on each of the floors. Further mention will be made of the work.

COURT HOUSE—2 story, base and dome, reinforced concrete, \$90,000. Alturas, Modoc Co., Cal. Architect, E. J. De Longchamps. Reno, Nev. Owners, Modoc County. Bids opened for this work show C. G. Sellman of Reno low on the general construction at \$87,385, and the Savage Heating and Plumbing Co., also of Reno, low on the heating and plumbing at \$7,296. Even with these figures the building cannot be constructed within the amount available and all bids were rejected. The architect will probably be allowed to revise the plans and new figures will be called. A complete list of the bids submitted will be found under the heading of Sacramento, Stockton and Northern California in this issue.

RESIDENCES—1 story, frame. Cost not stated. Sacramento, Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: A. S. Gibbens, 1043 McCullough avenue, 1 story, frame, \$1,000, and Silvia Lavenxi 50th and J streets, four room frame cottage, \$800.

SCHOOL—1 and 2 story and base, reinforced concrete, \$200,000. Sacramento, Cal. Architect J. J. Donovan, Security Bldg., Oakland. Owners, City of Sacramento. The Board of Education has approved the final plans of Architect Donovan for the new building to be erected on the property at the corner of Cypress and Madrone avenues. The building has been designed for a combination primary and grammar school. Bids will be called for shortly. Further mention will be made of the work.

STORES AND LOFTS—3 story and base, brick and steel. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, Dr. W. W. Stockwell. The building will cover a considerable area and has been designed for stores on the first floor and lofts above. Interior finish will be of pine throughout. Patent store fronts are specified. Exterior of the building will be faced with pressed brick, are complete and figures are being taken.

LOS ANGELES AND SOUTH- ERN CALIFORNIA.

SCHOOL ADDITION—2 story and
base, brick and frame, \$25,000 to \$30,-
000. San Fernando, Los Angeles Co.,
Cal. Architects, Austin & Pennell,
Wright and Callender Bldg., L. A. Own-
ers, San Fernando School District. The
new portion of the building will con-
tain eight class rooms which will be
finished in pine with maple floors. The
present heating system, steam, will be
extended into the new portion of the
building. Exterior will be faced with
red pressed brick. Plans are being
prepared. Further mention will be
made of the work.

RESIDENCE—2 story and base,
frame, \$25,000. Hollywood, Los Ange-
les Co., Cal. Architect, Arthur S.
Heinemann, Fernando Bldg., L. A. Own-
er, Mrs. Russak. The dwelling will
cover an area of 80 by 60 feet and will
contain fifteen rooms, three baths and
sleeping porches. A garage will also
be erected on the property. Interior
will be finished in pine and hardwood.
There will be a central heating system,
probably furnace heat, and open fire
places. Mantels will be of tile. Hard-
wood floors will be used in the prin-
cipal rooms. Bath rooms will have
tile wainscot and floors and will be
equipped with showers. Considerable
art glass and ornamental grilles will
be used. Exterior of the dwelling will
be covered with cement plaster on
metal lath. Plans are nearly com-
plete and figures will be called for
shortly.

BANK AND OFFICES—5 story and
base, brick and steel. Cost not stated.
Long Beach, Los Angeles Co., Cal.
Architects, Krempf & Erkes, Henne
Bldg., L. A. Owner, William Prestin.
The building will be erected at the
corner of Pine avenue and Broadway,
covering an area of 50 by 150 feet.
While plans have been prepared for
a five-story structure it is possible
that only three stories will be erected
at this time. The first floor will con-
tain three stores and a banking room,
occupied by the Marine Commercial
and Savings Bank. Twenty offices have
been provided for on each of the upper
stories. There will be a steel frame
and brick exterior walls. Interior par-
titions will be of metal lath and plas-

ter. Elevator service, special bank
fixtures, vaults and metal window sash
and frames are specified. Exterior of
the building will be faced with pressed
brick. Plans are being prepared.

APARTMENT HOUSE, HOTEL AND
OFFICES—1 story and base, brick and
steel, \$15,000. Venice, Los Angeles Co.,
Cal. Architects, Western Architectural
and Building Co., Coulter Bldg., L. A.
Owners, Adiel B. Tomlinson and F. A.
Ripley. The building will be erected
at the corner of Westminster and
Ocean avenues, covering an area of 40
by 110 feet. There will be stores on
the first floor. Upper floors will be ar-
ranged for hotel rooms, apartments
and offices. Interior finish will be of
pine throughout. Plans provide for
steam heat, elevator service and a hot
water supply. Stores will have patent
fronts. Exterior of the building will
be faced with pressed brick. Plans are
being prepared. Excavating and founda-
tion work has been awarded to L.
C. Block.

APARTMENT HOUSE—3 story and
base, Class C construction. Cost not
stated. Los Angeles, Cal. Architects,
Blanchard & Tifal, California Bldg., L.
A. Owner, A. S. O'Neill. The building
will be erected at the corner of Pigne-
roa and Diamond streets, and has been
designed to contain 120 rooms which
will be arranged in two and three
room suites. Interior finish will be of
pine and elm. Some hardwood floors
will be used. Plans provide for steam
heat, a hot water system and vacuum
cleaning. All apartments will have
wall beds and private bath. Bath
rooms will have tile wainscot and com-
position floors. Exterior of the build-
ing will be faced with pressed brick.
Plans will go out for figures in about
two weeks.

APARTMENT HOUSE—1 story and
base, brick and steel. Cost not stated.
Los Angeles, Cal. Architect, C. C. Rit-
tenhouse, Washington Bldg., L. A.
Owner, A. L. Jamison, Black Bldg., L.
A. The building will be erected on
Cronin street near Ninth and will
cover an area of 104 by 122 feet. Plans
provide for a total of 100 rooms ar-
ranged in two and three room suites
with private baths. Interior finish will
be of pine and redwood with some
hardwood floors. There will be steam
heat, elevator service and a hot water
supply. Bath rooms will have tile
wainscot and composition floors. Ex-
terior of the building will be faced
with pressed brick. Plans are being
prepared.

HOTEL—5 story and base, Class B
construction, \$115,000. Los Angeles,
Cal. Architect, John Brown, Hollings-
worth Bldg., L. A. Owner, H. Ham-
ilton Forline. The building will be
erected on Figueroa street near 6th,
covering an area of 100 by 165 feet.
There will be a number of modern
stores on the first floor besides the
hotel entrance and lobby. Upper floors
will contain a total of 210 guest rooms,
a large per cent of which will have
private baths. Interior will be fin-
ished in pine redwood and hardwoods.
There will be steam heat, elevator
service, a vacuum cleaning plant and
hot water supply. All bath rooms will
be finished in tile. Metal window sash,
frames and patent store fronts are
specified. Exterior of the building will
be faced with pressed brick. Prelimi-
nary plans have been prepared.

HOTEL—3 story and base, brick and
steel. Cost not stated. Los Angeles,
Cal. Architect, Joseph H. Rhodes, Cen-
tral Bldg., L. A. Owner, R. F. Bennett.
The building has been designed to con-
tain stores on the first floor and a total
of 60 guest rooms and 10 baths on the
upper floors. A site on Cetes avenue
near 5th street has been secured, cov-
ering an area of 38 by 100 feet. Inter-
ior finish will be of pine throughout.
Plans provide for steam heat and a
hot water supply. All bath rooms will
have tile wainscot and composition
floors. Exterior of the building will be
faced with pressed brick. Plans are
complete and in the hands of the owner
who will do the work by Day Labor.
Materials are now being purchased.

HOTEL—1 story and base, Class C
construction. Cost not stated. Los
Angeles, Cal. Architects, Walker &
Vawter, Hibernal Bldg., L. A. Owner,
D. F. Hill. The building will be erect-
ed at the northwest corner of Sixth
and Wall streets, covering an area of
79 by 120 feet, and has been designed
to contain stores on the first floor be-
sides the main hotel entrance and
lobby. Upper floors will be arranged
for a total of 110 guest rooms and 40
baths. Interior finish will be of pine
and redwood. Plans provide for steam
heat, elevator service, a vacuum clean-
ing system and hot water supply. Bath
rooms will have tile wainscot and
composition floors. Exterior of the
building will be faced with pressed
brick. Plans are complete and figures
are being taken.

STORES AND OFFICES—8 story and
base, Class A construction, \$100,000.
Los Angeles, Cal. Architects, Morgan,
Walls & Morgan, Van Nuys Bldg., L.
A. Owner, William G. Kerckhoff. The
building will be erected at the north-
west corner of Sixth and Los Angeles
streets, covering an area of 121 by 143
feet. There will be nine stores on the
first floor, light lifts on the second
and third floors. The Santa Fe Rail-
road Co. has taken a long-term lease
on the upper five floors, which will be
arranged for offices. Construction will
be of the reinforced concrete type
with reinforced concrete walls, floors
roof slabs and stairways. Interior
will be finished in birch throughout,
with marble and tile floors and wain-
scot in the corridors and lobby. Plans
provide for steam heat, four passenger
elevators and one freight elevator,
hot water system, vacuum cleaning
and mail chutes. Metal window sash
and frames and hollow tile and metal
lath and plaster partitions will be
used. There will be patent store
fronts and sidewalk doors, lifts and
lights. Exterior of the building will
be faced with enameled brick. Plans
are complete and figures are now be-
ing taken.

Contracts Awarded.

APARTMENT HOUSE—4 story and
base, brick and steel, \$100,000. Los
Angeles, Cal. Architect, Frank M. Ty-
ler, Black Bldg., L. A. Owner, Rupert
Johnson. Contractors, Hubbard &
Gardner, Douglas Bldg., L. A. Con-
tract price, \$100,000.

RESIDENCE—2 story and base,
follow tile construction, \$25,000. Cap-
istrano, Orange Co., Cal. Architects,
Walker & Vawter, Hibernal Bldg., L.
A. Owner, Miss Grace Dolph. Con-
tractor, John L. Conner, 435 West 31st
street, L. A. Contract price, \$25,000.

PORTLAND AND OREGON.

THEATRE AND OFFICES—4 story and base, reinforced concrete, \$100,000. Portland, Ore. Architect, Aaron Gould, Henry Bldg., Portland. Owner, Melvin G. Winstock. The building will be erected at the corner of Park and Stark streets, covering an area of 100 feet square. There will be eight stories besides the theatre on the first floor. Upper floors will each contain 20 modern offices. Construction will be fireproof throughout. Interior finish will be of pine and hardwood, marble and tile. The theatre will have a seating capacity of 2,000 people. Plans provide for steam heat, elevator service, patent store fronts, metal window sash and frames and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans will be out for figures within two weeks.

BRIDGE—Steel and concrete, \$30,000. Kellogg, Ore. Engineer, Horace C. Hall, Grants Pass, Ore. Owners, Douglas County. There will be two spans each 200 feet in length with a third connecting span of 125 feet. Approaches will be of reinforced concrete. The roadway will be sixteen feet. Plans are now being prepared and figures will be called for shortly.

CHURCH—1 story and base, reinforced concrete, \$10,000. McMinnville, Ore. Architect, B. B. Ostlin, McMinnville. Owner's name withheld. The building will cover an area of 60 by 120 feet with a nave of 50 by 80 feet. A spire 120 feet in height will also be constructed. Interior of the auditorium will be finished in pine and ornamental plaster. There will be steam heat, art glass windows and marble work. Exterior of the building will be faced with cement plaster. Plans are being prepared. Further mention will be made of this work when figures are called.

Contracts Awarded.

FACTORY—6 story and base, reinforced concrete, \$70,000. Portland, Ore. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Iloerntecker Mfg. Co. Contractor, James P. Taylor, Macleay Bldg., Portland. Contract price, \$70,000.

HOTEL—2 story and base, brick, \$32,200. Pendleton, Ore. Architects, Tourtelotte & Hummel, Rothchild Bldg., Portland. Owners, Pendleton Hotel Co. Contractor, J. S. Winters, Couch Bldg., Portland. Contract price, \$32,200.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE—4 story and base, brick and steel, \$35,000. Seattle, Wash. Architect, V. W. Voorhees, Ellet Bldg., Seattle. Owner's name withheld. The building will be erected at the corner of 4th avenue and Bell street, and will contain 40 rooms arranged in two and three room apartments. All suites will have wall beds and private bath rooms. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. A central heating system, probably steam heat, will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, brick, \$35,000. Seattle, Wash. Architect, Frank H. Fowler, Central Bldg., Seattle. Owner, D. O. Boyd. The building will cover an area of 73 by 120 feet, and has been designed to contain 35 suites of two and three rooms. Interior finish will be largely of pine with some hardwood floors. All apartments will have wall beds and private bath rooms. Plans provide for steam heat and a hot water supply. Bath rooms will be finished in tile with composition floors. Entrance will have tile and marble wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

WAREHOUSE—4 story and base, reinforced concrete, \$200,000. Seattle, Wash. Architect, Port of Seattle Commission, Central Bldg., Seattle. Owners, State of Washington. The warehouse will be erected on Whatcom avenue between Seacey and Lander, and will cover an area of 78 by 138 feet. Construction will be fireproof. The building will be equipped with all modern conveniences and is to have fireproof doors, metal window sash and frames. Plans are complete and figures are being called. Bids will be opened on April 15th. Alternate bids may be submitted on plans prepared by the bidders and accomplishing the purpose of the design furnished by the Port of Seattle Commission.

RESIDENCE—2½ story and base, tile, \$50,000. Seattle, Wash. Architect, Carl Gould, Boston Bldg., Seattle. Owner, J. H. Bodell. The dwelling will be erected on Harvard Boulevard, covering an area of 40 by 62 feet with a wing 25 by 35 feet. There will be in the neighborhood of twelve rooms, several baths and a garage. Much landscape work is also contemplated. Interior of the dwelling will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be steam heat and a hot water supply. Portable vacuum cleaners are also specified. Bath rooms will have tile wainscot and composition floors. Exterior of the dwelling will be covered with cement plaster. Plans are complete and ready for figures.

STORES AND OFFICES—22 story and base, steel and reinforced concrete, \$750,000. Seattle, Wash. Architect, E. W. Houghton, Collins Bldg., Seattle. Owner, C. H. Jones, representing Chicago capital. The building will be erected at the northeast corner of Second avenue and Marion, covering an area of 108 by 122 feet. The interior first floor, except that portion devoted to the entrance, will be occupied by a high class moving picture theatre. Upper floors will contain a total of 420 offices. Construction will be fireproof throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Interior of the theatre will be handsomely finished in ornamental plaster. Metal trim, hardwoods, marble and tile will be used for finish throughout the office portion of the building. Basement of the building will be occupied by a cafe. The plans provide for seven passenger elevators, steam heat, hot water system, vacuum cleaning and mail chutes. Exterior will be faced with marble and

terra cotta. Plans will be ready to submit to the owners inside of two weeks. Further mention will be made of the work.

DOCK—Reinforced concrete, \$300,000. Seattle, Wash. Engineer, Engineering Department Standard Oil Co., Standard Oil Bldg., S. F. Owners, Standard Oil Co. The work will consist of the construction of a 175-foot dock on the east side of East Waterway. A corrugated iron shed will also be constructed. Plans are now being prepared and figures will be called for shortly.

FACTORY, WAREHOUSE AND DOCKS—Concrete construction. Cost not stated. Seattle, Wash. Architect, Charles H. Bebb, Denny Bldg., Seattle. Owners, National Producers and Consumers' Alliance Co., Inc. This project is one of the largest schemes yet conceived to bring about an alliance between the producer and consumer. Included in the project is the construction of factories and warehouses, ice and cold storage plants. The promoters claim to have secured a large tract of valuable land and to have hundreds of thousands of dollars pledged to the project.

Contracts Awarded.

THEATRE—3 story and base, Class A construction, \$80,000. Seattle, Wash. Architect, H. Ryan, Northern Bank Bldg., Seattle. Owners, Blaine Estate, Contractor, H. D. Stewart, American Bank Bldg., Seattle. Contract price, \$80,000. Note: The contractor is now taking subfigures on the work.

APPROACH FOR STEEL WORK—\$300,000. Hope, B. C. Engineer's name not given. Owners, Kettle Valley Railroad, Hope, B. C. Contractors, tractors, Canadian Bridge Co., Hope, B. C. Contract price, \$300,000.

GOVERNMENT ARCHITECTURE SINCE THE TARNSEY ACT.

Need of Additional Architectural Service and Proposed Methods for Securing It.

John Hall Rankin,*

*Architect, Philadelphia, Pa. Chairman of the committee on government architecture. Associated with him were J. L. Mauran, M. B. Medary, Jr., Egerton Swartout, Breck Trowbridge and Walter Cook, ex-officio.

The government at the close of 1912 was left, through the repeal of the Tarnsey act, without any means of procuring architectural service outside of the office of the supervising architect of the Treasury and such other bureaus for the preparation of plans as are maintained by other departments, beyond some isolated instances where authority to make other arrangements had been attached by Congress to authorizations for public buildings. There was much difference of opinion in the profession as to what should be done to change this condition; some advocating a bureau of fine arts; others a national board of works; while many advised the enactment of a law similar to, but more comprehensive than the Tarnsey act; while others felt that the certainty of intolerable conditions which would soon confront the government, made it desirable for the Institute to take advantage of the wave of discontent that this state of affairs

Telephone Market 337

San Francisco

must inevitably bring about. As it turned out, members of Congress attending the extra session, found upon inquiry and investigation, that the supervising architect's office was not in position to take up any new work for several years. This created a general demand in Congress for some sort of action. Various members of the Institute reported that they found, when discussing the question with members of Congress that there was a latent sentiment of great dissatisfaction and it was believed that perhaps this could be brought to a focus behind some form of legislation.

Congressional Committee on Buildings.

That a general feeling exists in Congress that the whole public building question is in wretched shape is indicated by a provision in the public buildings bill, approved March 4, 1913, which is as follows:

"A commission composed of the Secretary of the Treasury, the Postmaster General, the Attorney General, two members of the committee on public buildings and grounds of the Senate to be appointed by the President of the Senate, and two members of the committee on public buildings and grounds of the House of Representatives, to be appointed by the Speaker of the House, shall, with the aid of the supervising architect of the Treasury, present to Congress a connected scheme, involving annual appropriations for the construction and completion of public buildings hereinafter authorized with a reasonable time, and shall frame a standard or standards by which the size and cost of public buildings shall, as far as practicable, be determined, and shall report as to the adaptability in size, accommodations, and cost of buildings hitherto authorized to the requirements of the communities in which they are to be located, and also whether the existing appropriations should be increased or diminished to meet such requirements."

From this it would seem that the United States, which has under way and in contemplation more building than any other government in the world, is drifting aimlessly in respect to this work, and without definite policy regarding what is to be an important part of the enduring evidences

of the taste and cultivation of our time. It is to be hoped that the commission just referred to, consisting entirely of government officials and employees, may seek the advice and counsel of the profession for whose work it is charged with the responsibility of preparing a connected scheme.

There are a number of courses which the Institute may follow in order to assist in getting the question of government architecture placed on a basis commensurate with its importance, it being assumed at the outset that the Institute owes it to itself and to the government to take the initiative in a matter so directly involving its aims and ideals. These may be briefly outlined as follows:

First—Conditions being so generally unsatisfactory to Congress itself, we may confidentially await results with the certainty that some action will be taken by the government in the near future, free from any responsibility concerning whatever measure of relief may be decided upon. It seems so obviously the duty of the Institute to point the way however, that this suggestion may well be rejected as unworthy of serious consideration.

Second—The idea of a department of fine arts, or a board of works, or a bureau of arts and buildings, under which all government expenditures for art in any form may be handled, has most deservedly found an important place in the minds of those interested in architecture and other arts. Legislation leading to the establishment of such a department, that would have jurisdiction over all buildings, sculpture, objects of art, and all works involving these, has been the dream of many of our most earnest members, and it has many advantages. It would immediately place the question of government architecture and related arts in a position of great importance, and would perhaps enable many things to be done properly which are now done in a slipshod and slovenly way. On the other hand there are objections to such a plan, which might delay indefinitely its enactments into law. It would be opposed by all departments of the government for the reason that no department desires to relinquish control of its work to another department. Its adoption would probably

mean that all government architecture must necessarily be put on a competitive basis, because no other arrangement seems possible for work of such volume as that now conducted under the supervision of the Treasury Department, and it would be difficult or impossible to make distinctions. As it now stands, any government department, except the Treasury Department, can employ architects by direct selection, and it is a question whether the Institute should advocate a measure that would make it impossible for the government to employ private architects except by competition. The drafting of a bill to create a department such as would be necessary to take care of all this work, would be a task of great difficulty and could only be done properly with the assistance of the best legal and legislative experience, after considerable study and research. Therefore, while this plan has much merit, and while its consummation at some future time is to be looked forward to, the Institute should carefully consider whether it covers the needs of the immediate future.

Third—The Tarsney act proved to be a workable law, and there appears no reason why a similar law, with some slight but important modifications, would not be entirely practical and satisfactory as far as the Treasury Department work is concerned, for the near future at least. The enactment of such a law giving the additional authority to the Secretary of the Treasury to employ juries in each competition, to pay fees to competitors and juries, requiring him to apply it to all buildings above a certain cost and to conduct the competitions and pay the successful architects in accordance with the best practice, may well be considered as a relief from present conditions, while further thought could in the meantime be given to the designing of a plan and working out the details of a proposed department of fine arts.

Whether such a bill could pass Congress at present constituted is not now certain. A bill was drafted by the committee during the present year, not for introduction for passage, but at the request of a member of Congress to enable him to make a canvass of the House.—From Pacific Builder and Engineer.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Editorial Comment.

Building construction for the month of March went along at about an even pace compared with the same month of last year. For San Francisco the figures amounted to just about 3½ millions and the figures for last year amounted to about the same sum. To be accurate the total for the month of March, 1914, amounted to \$3,507,763, while the figures for the same month last year reached \$3,576,376.

Separating the figures of last month into different headings the following figures represent the amount of construction: Brick and concrete, \$1,974,469; frame, \$723,374; alterations and additions, \$137,202. Total for private construction \$2,834,045. To this is added the Panama-Pacific contracts, \$140,964; City construction—Municipal Rail Road, \$268,511, and streets and sewers, \$41,806—; State work, \$220,187; U. S. Government, \$2,250 making a grand total of \$3,507,763.

The figures for San Francisco compare with the general condition throughout the country. Reports from about 75 different cities throughout the country, made to the American Contractor, Chicago, show a slight gain over last year. But the gain is so slight that it is hardly more than would be expected from the natural growth of the country and the increase of population. The following is a comparative table:

	March 1914.	March 1913.
Akron	\$ 288,160	\$ 235,060

PRODUCTION OF ALUMINUM ORE IN 1913.

The demand for aluminum in the United States in 1913 showed a steady and rapid growth, according to W. C. Phalen of the United States Geological Survey. This resulted in a marked increase in the production of bauxite or aluminum ore, the output of which, according to final survey figures, was 210,241 long tons, valued at \$997,698, an increase of 50,376 long tons, or 31.5 per cent and \$228,766 or 29.8 per cent respectively, over the figures for 1912. This growth of the aluminum industry has been marked by health expansion and improvements in existing plants, the commencement of work at a new plant in the spring of 1914 and progress in the work on new power sites where largely increased hydro-electric power for use in the reduction of the metal will be in operation during the next few years.

Manufacture and Application of Paints.

An Interesting Paper on Some Important Phases of House Decoration.

From the Western Canada Contractor.

An interesting and instructive paper on paints and their applications was read before a recent meeting of the Vancouver branch of the British Columbia Society of Architects by H. H. Welch, local manager of the British American Paint Company, Vancouver, who is recognized in British Columbia as an authority on matters pertaining to this subject. Mr. Welch opened his discourse by describing the properties of corroded white lead, under the heading of "Pigments," his remarks being as follows:

"Corroded white lead (defined basic carbonate of lead) is really a combination of hydrated lead oxide with lead carbonate, in the proportions of one of the former to two of the latter, though these proportions are varied extremely. A theoretically correct composition of white lead is very dense and opaque, and is quite white, though not so white as oxide of zinc, and any excess of either chemical constituent impairs its color and quality. There are several methods of corroding lead. The oldest, and perhaps the best, is the old Dutch or 'Stack' process. The metallic lead is melted, cast into perforated discs or buckles, about six inches in diameter, which are put in earthen pots containing about a pint of vinegar or dilute acetic acid. These are placed in rooms holding several layers of many hundred pots. The pots are covered with boards, and layers of spent tan bark, or horse dung, are placed between each layer of pots. The rooms or stacks are kept closed for about one hundred days, during which period the heat and carbonic acid, generated by the fermentation of the spent tan bark with the acid vapors, combine to corrode the lead into a flaky white substance. After this is crushed, screened, floated, washed in water and dried—the result being the white lead of commerce which is afterwards ground in raw or refined linseed oil, and sold for general painting purposes.

"Another process of manufacture is the 'Cylinder' or quick process; in this method the molten lead is blown into fine granules by steam. The fine, powdered lead is put into large, slowly revolving wooden cylinders, moistened with dilute acetic acid, then for several days subjected to the action of air and carbonic acid derived from burning coke. It then goes through much the same process of grinding, washing, etc., as in the old Dutch process. The resultant corroded lead also is chemically very similar to the stack or old Dutch lead.

"A third method is the Dahl process, which consists in slowly pouring the molten lead into cold water, thus reducing it to a thin, fluffy condition. This is then placed in stationary tanks, through which a stream of diluted acetic acid is continually flowing, which eventually takes it up and converts it into basic acetate of lead. A stream of carbonic gas is passed through this solution, thereby precipi-

itating the lead in the form of basic carbonate. Lead corroded by this process is finer and whiter and takes up more oil in grinding than any other leads, but lacks the dense opacity of corroded lead. There are other processes of obtaining white lead, but these are the methods generally used.

Characteristics of Basic Carbonate of Lead.

"The outstanding characteristics of basic carbonate white lead are: It is very opaque; indeed it is one of the most opaque of all white pigments—this being largely due to the small quantity of oil needed to reduce it to a painting consistency. But, on the other hand, its spreading power is correspondingly small because the lead hydrate contained in it unites with the linseed oil to form a lead soap, which, while helping it to brush out, reduces its durability. In our cities, where sulphurated hydrogen gas is almost universally present, this kind of paint changes (on exposure) into black sulphide of lead. This is why pure white lead seldom retains its original color. White lead is a valuable and useful pigment on account of its opacity and working qualities, yet it is a treacherous one on account of its delicate durability and sensitiveness to atmospheric conditions. After one or two years good white lead paints will begin to disintegrate on the surface and wear off in the form of a white powder.

"A mixture of 40 per cent zinc and 60 per cent lead is more durable than pure white lead. A small percentage of inert pigments added to lead and zinc has been proven by the Master Painters' Association, working in conjunction with the United States Government, to be far superior to either pure white lead or pure white zinc. The results of exhaustive tests in different parts of the United States have upset the old theory that pure lead and linseed oil is the best paint. Based on these and other tests is my reason for advocating the use of ready mixed paints. Most of the leading paint manufacturers of mixed paints are now making their paints on the formulas which have proven more durable than pure white lead and linseed oil.

Objections of Painters to Mixed Paints.

"The painter is loath to use anything but lead and oil, claiming it is better because he knows what is in it. I venture to say that not one painter in one hundred has ever taken the trouble to test out paints made with other pigments and watch their results as compared with pure lead. Another reason why the painter dislikes mixed paint is that it is a little harder to brush out than his paint. He wants a paint that will spread easily, and makes it with this end in view, often sacrificing the quality of the paint to make it easy to apply.

"As to the vehicle, it is conceded by all paint authorities that of all the drying oils, linseed or flax seed oil is the most trustworthy and is, in fact,

the life of the paint. The purity of the linseed oil used is of the utmost importance. This oil is often sold in an adulterated form, the common adulterants being rosin oil, petroleum oil and fish oil. Petroleum oil has no virtue, except as a cheap adulterant. Rosin oil will cause the paint to become brittle and chip off, while fish oil never thoroughly dries, and is always tacky when the surface is exposed to the sun, thus collecting any flying dirt and grit that may come its way. Linseed oil is sold in two forms: raw and boiled. The raw is just as it comes from the crushed seed. On account of natural moisture in our humid atmosphere, it dries too slowly unless there is an excess of dryers added. The dryers do not improve the paint. In view of this fact, I would recommend boiled oil for all outside work, that is, if the oil is properly boiled.

"In regard to the boiling of oil, you are largely at the mercy of the manufacturers. There are several methods of boiling, a prevailing one is what is called 'bung hole boiling,' which is a pernicious practice, as no good lasting job can result. Another method is to boil the raw oil with rosin dryers. This also is only a substitute, and has nothing to recommend it, except its cheapness. It leaves the boiled oil a very light amber color.

"One of the best methods is to boil the oil at a sufficient heat to evaporate all the moisture, and add nothing but such dryers as red lead and oxide of manganese. By this method you can get a paint vehicle which allows the perfect oxidation and drying of the paint.

"The oxidation of paint is of the utmost importance because the absorption of oxygen by the linseed oil entirely changes it from a fluid to the tough, leathery coating so necessary for purposes of preservation. In this process of oxidation the linseed oil gains in weight about 16 per cent.

"The life of a good paint will vary, but should not be less than three years. Atmospheric conditions and exposures to various chemical gases have much to do in determining its durability. All new work should have three coats, namely: primer, intermediate and finishing coats.

Methods of Application of Paints.

"Never use a cheap primer. It is a common error that yellow ochre and oil make the correct primer. This is not the case, especially when the dry ochre is mixed by hand, since all dry colors are much bulkier in the dry state than when properly ground and combined with oil, so that when the hand mixture is combined without without pressure, the outside particles only are coated with the oil, and when the paint is applied to the surface, the wood, having a greater attraction for the oil than the pigment, absorbs the oil alone, thus leaving a dry, porous application to which subsequent coats cannot successfully bind themselves. Never prime over a wet or damp surface as it is bound to blister; this

blistering is caused by heat vaporizing the underlying moisture. The paint then becomes brittle and scales off. Before applying the second coat be sure the first one is bone dry. This coat should not be too oily or it will cause the finishing coat to crack, peel and flatten. Where light shades are used for trimming, better results will be obtained by applying the trimming color on both the middle and finishing coats.

"The finishing coat should never be applied when there are indications of rain, or late in the evening in cold weather, as if it is, the fog will attack it, causing the paint to dry flat or without lustre. This coat should have practically no turpentine in it, and should be well brushed out, not flowed on.

Some Notes on Stains and Varnishes

"Creosote stains for shingles have been very popular for a number of years, but the leading manufacturers of stains and paints who have given this question serious consideration by exhaustive tests, have come to the conclusion that creosote, while a good wood preserver, is a poor binder for the pigments used in making stain. Creosote is very penetrating, with the result that the vehicle penetrates into the cedar and leaves the coloring matter on the surface with no binder to hold it on. Creosote made from wood is far superior to creosote made from coal; the latter creosote contains so much coal tar acid that it bleaches and destroys the colors. The coal tar acid attacks the chemicals used in the manufacture of greens, yellows and blues, thereby changing the color almost as soon as they are applied. An oil stain made of linseed oil with sufficient penetrating thinners, gives the best results. The linseed oil binds the coloring matter on the shingles and prevents it washing off. Furthermore, linseed oil has no chemical action on any of the pigments.

Vardishes are made from treated gums, rosin, linseed oil, china wood oil, and turpentine or benzine, according to the purpose for which the varnish is required and the price at which it is sold. The gums are produced from South America, the islands of the Pacific, India and New Zealand. Kauri gum is one of the high grade gums and comes from the latter country. Most of the high grade varnishes are made from this gum on account of its hardness and durability. It is dug from the ground, where at an earlier time forests have stood. The gum is found in pockets just as it has run from the tree years ago. The older the gum, the better it is for varnish making; also the condition, color and freedom from dirt regulates its value and price. After being mined, it is scraped, cleaned and sorted, then shipped to New York or London. From these centers it is distributed to the varnish makers of the world. Large quantities, however, are now being shipped direct to the western states and British Columbia. The complicated process of varnish making, with its different grades, would be difficult to describe, but the fundamental fact stands out, that one cannot produce good varnish from cheap or poor gums. Suffice it to say that in the better varnishes, the gums are melted in kettles over open fires, the oils

added, and cooked at different temperatures, according to the varnish that is being made, the turpentine being added after the boiling is done and before the varnish cools. It is then packed away for a long period of time to settle out and properly mature. Good varnish, like good wine, improves with age.

The cheaper furniture varnishes and gloss oils are made in somewhat the same way, only rosin is used instead of gum, much less oil, and benzine in lieu of turpentine. These cheap varnishes should never be used on good work, as they are brittle, easily scratched, and are fit only to be used as a size on plaster for kalsomining. A good varnish size should contain no rosin and very little gum, the lime or hard wall finish absorbs the thin oil and leaves nothing but the gum or rosin, with the result that it has no binder, consequently it does not make a good ground or surface on which to apply kalsomine or wall finish. A good priming size for walls should be made almost entirely of linseed of China wood oil varnish. The wall absorbs considerable of the thinners, but leaves a tough oil varnish on which to apply either paint, wall finish or kalsomine.

A good foundation on which to apply flat finish is to apply a coat of shellac, one coat of good gloss or interior varnish, then one coat of flat finish. This gives better results than a coat of shellac and two coats of flat finish. The question of decoration for the plastered walls is attracting much attention at the present time, and most of the large paint manufacturers are making a flat oil paint with more or less success.

"The old fashioned kalsomine, made of glue and whitening, is fast being replaced by the more modern washable wall finishes. These wall finishes usually contain no lead, are therefore non-poisonous, dry hard with the same dull effect, and can be washed. Kalsomine, as soon as the glue has perished, has to be washed off and re-tinted. The cost of washing off the old kalsomine is as much as that of applying another coat. I predict that in a few years the new wall finishes will almost universally supercede kalsomine.

PLANS WANTED.

Supervising Architect W. D. Coates, Rowell Bldg., Fresno, Cal., states that plans for the first of Fresno's new schools will be called for shortly. He is now engaged in preparing a schedule which will put all competitors on an even footing. The first of the new buildings to be erected will cost in the neighborhood of \$150,000. The Board of Education are reported as being greatly in favor of securing plans from Fresno architects if possible.

Visalia, California, is to have a new school building costing in the neighborhood of \$25,000. The Board of Supervisors have approved a bond issue of that amount for the Tipton District. A smaller issue for the Manzanillo District was also approved by the Supervisors. Competitive plans will probably be called for both buildings.

The Board of Education at Petaluma, California, has adopted a resolution

calling for a special election which is to be held on May 17th at which time the people will vote on a bond issue of \$110,000 for the construction of a new school building. Schools are badly overcrowded, and from reports there appears to be little or no opposition to the bonds. Competitive plans will be called.

W. T. Giles, supreme secretary of the Royal Order of Moose, has reported to his committee as favoring Tucson, Arizona, as a suitable site for the order's proposed \$2,000,000 sanitarium for the treatment of tuberculosis. Mr. Giles has recently visited Tucson and the special committee in charge of the project will make a final trip of inspection within a short time. No plans for the building have been secured and architects interested should take the matter up with Mr. Giles.

Financing of the proposed \$140,000 civic building in Sacramento, California, has been put into the hands of two committees, both of which report favorable progress. The structure is to be an eight-story building, and will be erected on 7th street between I and J streets. A. Bonnhelm and Albert Elkins are the committee appointed to secure a \$100,000 loan, while D. W. Carmichael and D. S. Wasserman are getting in touch with prospective tenants. Architectural plans have not been secured.

RAILWAY ACCIDENTS.

Resistance by the Southern Pacific Railway Company to the workmen's compensation act will not bring it any public sympathy. At best, the contention that it is an interstate and not a local corporation, is a purely technical question, one that will not be of long avail with the expected improvement of national liability laws. No matter what administration is in power at Washington, liability legislation much like that now in operation in California cannot be very far off.

The justice of workmen's compensation is seen easiest, both from the employer's and employee's point of view, in the railroad business. Not only is the hazard more directly connected with the occupation there than anywhere else, but the employer can in this case better protect itself by shifting the load, than in any other occupation. The expense of employer's insurance is a feature of railroad expense that would be most readily recognized. The company will add the cost to its regular operating expenses, and the public will pay, in the long run, for the accidents of the railroad employees through passenger fares and freightage costs.—Fresno Republican.

ELEVATORS USED BY THE ANCIENTS.

According to archaeologists, elevators were used in the imperial palace at Rome 2,000 years ago, probably operated by slave power.

The highest building in the United States is the tower for wireless telegraphy that has just been finished on the New Jersey coast. It is 825 feet high and only 20 feet in diameter, 75 feet higher than the Woolworth building in New York.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel, \$70,000. Architect, Alfred Henry Jacobs, 110 Sutter street. S. F. Owner, Emanuel Levy, 717 Market street. S. F. The building will be erected on Van Ness avenue near Vallejo, and will cover a considerable ground area. Apartments will consist of five and six rooms with from one to two private baths. Interiors will be handsomely finished in pine and hardwoods with some oak floors. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will have tile floors and wainscot. Wall beds are specified. Entrance of the building will be finished in tile and marble. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, none. Owner, A. C. Lomelino, 1765 Hyde street. S. F. The building will contain six apartments of four rooms each, and will be erected on the north side of Pacific street west of Hyde. Interior finish will be of pine throughout. There will be a hot water supply, wall beds and private bath rooms. Entrance will be finished in marble and tile. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architect, Carl Geiffuss, 46 Kearny street. S. F. Owner, L. A. Becicco. The building will be erected on Vallejo street near Van Ness avenue. The building will have a frontage of 30 feet 1 inch by a depth of 122½ feet. There will be a total of nine apartments each of four rooms. All rooms will have outside exposures and will receive an abundance of sunlight and fresh air. Each apartment will have a reception hall from which all rooms except the baths may be entered. All rooms are exceptionally large and will be handsomely finished in pine with hardwood panels, beam ceilings, built-in book cases and hardwood floors. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Kitchens will be equipped with all modern improvements, including patent ironing boards, coolers and ice chests. The building will be entered from the sidewalk level, the entrance and lobby being finished in marble and tile. Basement will contain private storage space for each apartment, laundry, amusement room and furnace room. Exterior will be covered with cement plaster on metal lath.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced concrete, \$52,000. Architects, Rousseau & Rousseau, Monadnock Bldg. S. F. Owners, E. V. Lacey and J. B. Reite. The building will be erected on the south side

Post street 90 feet west of Larkin, having a frontage of 25 feet and, a depth of 120 feet. Interior has been arranged for a total of 27 suites of two and three rooms with private baths and wall beds. Pine and hardwood trim will be used. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior will be faced with cement plaster. Plans are complete and segregated figures are now being taken on the various parts of the work.

LOS ANGELES, CAL.—Apartment house, 4 story and base. Class C construction. Cost not stated. Architects, Blanchard & Tifal, California Bldg. L. A. Owner, Elbert L. Miller. The building will be erected on Ingraham street, covering an area of 60 by 100 feet. There will be a total of 100 rooms arranged in two and three room suites with wall beds and private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat and a hot water supply. There will be forty baths with tile wainscot and composition floors. Exterior of the building will be faced with pressed and glazed brick. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$7,000. Architect, none. Owners, C. J. and W. J. Keenan, Grove and Masonic streets, S. F. The building will be erected at the southeast corner of Grove and Masonic streets and has been designed to contain six modern apartments of four rooms each. Interior finish will be of pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base is specified. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg. S. F. Owner, Mrs. Bertha Overfeld. The building will be erected at the corner of Fillmore and Green streets. There will be a number of two, three and four room apartments with private baths and wall beds. Interiors will be finished in pine and hardwood with some oak floors. Plans provide for steam heat and a hot water supply. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be covered with cement plaster on metal lath. Entrance will be finished in marble and tile. Plans are being prepared.

Contracts Awarded.

SEATTLE, WASH.—Apartment house, 3 story and base, brick, \$30,000. Architects, Walter & White, 1626 4th avenue,

Seattle. Owner, J. N. Shaw. Contractors, Walter & White, 1626 4th avenue, Seattle. Contract price, \$50,000.

CHURCHES.

STOCKTON, SAN JOAQUIN CO., CAL.—Church, 1 story and base, brick, \$20,000. Architect, Joe Losekan, San Joaquin Bldg. Stockton. Owners, Clay street Methodist church. Rev. Smith, Pastor. A new site has been secured at the northeast corner of San Joaquin and Clay streets, and construction will be started as soon as plans can be completed. The new church will be designed in the Mission style and will contain, besides the main auditorium, Sunday school rooms and pastor's study. Interior finish will be of pine and ornamental plaster. There will be a central heating system, probably warm air. Art glass is specified. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are now being prepared.

COURT HOUSES.

COLUSA, COLUSA CO., CAL.—Hall of Records, 2 story and base, reinforced concrete, \$60,000. Architect, Henry C. Smith, Humboldt Bank Bldg. S. F. Owners, Colusa County. The building will be erected on J and 6th streets on property adjoining the County Court House. Construction will be fireproof throughout with reinforced concrete walls, floors and interior partitions of hollow tile and metal lath and plaster. Interior finish will be of pine, hardwoods and metal trim. Metal window sash and frames, fireproof doors and metal shelves and furniture will be used. There will be steam heat, a vacuum cleaning system and water supply. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on May 6th. An official proposal appears in another column of this issue.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Ice and cold storage plant, 5 story and base, brick and steel, \$60,000. Engineer, Charles Wallace, Kansas City, Mo. Owners, National Ice and Cold Storage Co. This is the second building to be erected on the company's property at the corner of Sansome and Union streets. A four-story building is now nearing completion and the new five-story building will be connected with this structure by an arcade. The two buildings combined will give the company approximately 1,000,000 cubic feet of refrigeration. The proposed building will cover an area of 120 by 177½ feet. Exterior will be faced with pressed brick. Plans are complete and in the hands of the owners who will do the work partly by Day Labor and partly by contract.

SAN FRANCISCO—Laundry, 2 story and base, reinforced concrete. Cost not stated. Architects, Fabre & Bearwald, Merchants' National Bank Bldg. S. F. Owner, Mr. Laroni. The building will be erected on Post street between Larkin and Polk and has been arranged for the laundry on the first floor and rooms above. Interior finish will be of pine throughout. A cement

floor will be used on the ground floor. Special machinery will be installed. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Municipal asphalt plant, 1 story, reinforced concrete, \$22,844. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for the construction of a Municipal asphalt plant on Florida street show Frank M. Garden Co. low at \$22,844, and he will probably be awarded the contract. A complete list of the figures submitted will be found under the heading of San Francisco in this issue.

FIRE HOUSES.

SAN FRANCISCO—Fire house, 2 story and base, brick and steel, \$35,000. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. Bids opened at last Wednesday's session of the Board of Public Works for the construction of Engine House No. 12 show C. L. Wold low on the general construction, S. W. Band low on the plumbing and gas fitting, National Electric Co. low on the electric wiring, and T. E. Davis & Son low on the brick work. A complete list of the bids opened will be found under the heading of San Francisco in this issue. The low men will probably be awarded the contracts.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,600. Architect, none. Owners, E. and G. Cicerone, 71 Valparaiso street, S. F. The building will be erected on Varennes street north of Green, and has been designed to contain two flats of five rooms each. Interior finish will be of pine and redwood with some oak floors. There will be gas grates and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owners and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$2,000. Architect, none. Owner, Mrs. Higgins, 639 Natoma street, S. F. The building will contain two flats of five rooms each. Interior finish will be of pine and redwood. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. A portion of an old residence will be utilized. Exterior will be covered with rustic and shiplap. Plans are complete and a contract will be let by the owner.

SAN FRANCISCO—Flats 3 story and base, frame, \$6,500. Architect, Edward E. Young, 25 Kearny street, S. F. Owner, Fred Roettger. The building will be erected on the north side of Lake street west of 7th avenue, covering an area of 28 by 61 feet. There will be three modern flats of five and six rooms. Interiors will be finished in pine, redwood and hardwood veneer with some oak floors. All living rooms will have open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed.

Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and work will be carried on by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$2,500. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, F. Devilt. The building will be erected at the corner of London and Italy streets and has been designed to contain two flats of four rooms each. Interior finish will be of pine and redwood. Oak floors will be used in the living rooms and dining rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are being prepared and figures will be taken shortly.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, none. Owner, E. Peterson, 1205 10th avenue, S. F. The building will be erected on the east side of 23rd avenue south of Taraval, having a frontage of 35 feet and a depth of 70 feet. Each flat will contain six rooms and bath. Interior will be finished in pine and hardwood veneer with oak floors in the principal rooms. There will be large open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$8,000. Architect, none. Owner, H. N. Turrell, 841 Walker avenue, Oakland. The building will be erected at the southwest corner of Alcatraz and Dana street, and has been designed to contain fourteen rooms which will be arranged in two seven-room flats. Interiors will be finished in pine, blue gum and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. The work will be done by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, H. N. Turrell, 841 Walker avenue, Oakland. The building will be erected on Alcatraz south of Dana street, and will contain twelve rooms arranged in two six-room flats. Interior finish will be of pine and redwood with hardwood floors throughout. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

GARAGES.

SAN FRANCISCO—Garage, 1 and 2 story and base, Class A construction. Cost not stated. Architect, Sylvan

Seuntmacher. First National Bank Bldg., S. F. Owners, Taxicab Co. of California. The building will be erected at the northeast corner of Bush and Larkin streets, covering an area of 137½ by 137½ feet and has been designed for one of the largest commercial garages in the west. Construction will be of the Class A type throughout with a complete steel frame, brick exterior walls and concrete floor. The main portion of the building will be one story high and will be occupied by the garage and storage space. The two-story portion will contain modern machine and repair shops. Office will be finished in pine. Plans provide for metal window sash and frames and two large gasoline storage tanks. An elevator capable of lifting the largest machines will be installed. Exterior of the building will be faced with pressed brick. Working drawings are now being prepared.

SAN FRANCISCO—Garage, 1 story and base, reinforced concrete or brick, \$20,000. Architect, Matthew O'Brien, Foxcroft Bldg., S. F. Owner, Mrs. W. J. Gallagher. The building will be erected on Grove street between Laguna and Buchanan streets, and has been designed for a commercial garage. Both reinforced concrete and brick and steel construction are being considered. The will be a cement floor, special gasoline storage tanks, metal window sash and frames. Interior will be finished in pine throughout. Plans provide for storage space and a machine shop. Exterior of the building will be faced with either pressed brick or cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Garage, 1 story and base, reinforced concrete or brick and steel, \$15,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. Lessee, Mr. Emanuel. The building will be erected on the north side of Post street west of Franklin street, having a frontage of 85 feet and a depth of 137½ feet. Bids will be taken for both the reinforced concrete and brick type of construction. Storage space and office will occupy the greater portion of the building while the rear will contain a machine shop. Foundations are already in. Interior finish will be of pine. There will be a cement floor and special steel gasoline storage tanks. Exterior will be faced with cement plaster. Plans are being prepared.

GOVERNMENT WORK AND SUPPLIES.

Prospective Bidders.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Griss Valley, Cal., Construction, May 4. E. F. Burke, 43 Sussex street, San Francisco, Cal.

F. J. Amweg Co., Marston Building, San Francisco, Cal.

Southern Construction Co., 425 Woodward Building, Washington, D. C.

William Simpson Construction Co., 537 Timken Building, San Diego, Cal.

Herman Voights, 1251 N. 28th street, Philadelphia, Pa.

King Lumber Co., Charlottesville, Va. Eugene Schuler, Pasadena, Cal.

The High Line Unit.

The Secretary of the Interior has authorized the Reclamation Service to undertake the construction of the High Line unit of the Strawberry Valley irrigation project, Utah, as soon as certain conditions have been complied with. At least 16,000 acres of lands privately owned and irrigable by gravity flow must be pledged to return the cost of the project, the executed water right applications showing the government to have a first lien on the lands then being placed on the county records. All water right applications made shall include all the land in the unit owned by applicant, and applicants owning irrigable land in excess of 80 acres shall execute appropriate trust deeds for the disposal of such excess to qualified water right applicants within a reasonable time to be fixed hereafter. About 24,000 acres are included in the unit.

The government will construct a distributing system of sufficient extent to supply water by gravity to the highest point of each quarter section containing land for which water right application has been accepted, or to such other convenient point as in the opinion of the project manager will enable the water user to secure water with a reasonable amount of work. The government does not undertake to construct any drainage works for lands within the area of the project which now or may hereafter become seeped or waterlogged.

The main High Line canal has its intake at the lower end of the power canal in Spanish Fork Canyon, about 3 miles southeast of Spanish Fork. It will extend southwest about 17 miles, its capacity ranging from 200 to 250 second feet. Its cost will be about \$345,000, and the distribution system as planned will cost \$180,000.

Steel Erection at Pearl Harbor.

The bid of the Honolulu Planing Mill, Ltd., of Honolulu, T. H. \$54,900 in amount, has been accepted for erecting the structural steel for the coaling plant at Pearl Harbor.

Locomotive, Etc., Pearl Harbor.

The following awards have been made under bids opened March 14 at the bureau of yards and docks, Navy Department, for compressed air locomotive, etc., to be delivered at Pearl Harbor: H. K. Porter Co., Pittsburgh, Pa., item 2, \$2,755; 5, \$1,450; Ingersoll-Rand Co., New York City, item 3, \$2,270; Magor Car Co., 30 Church street, New York City, item 4, \$1,700.

Denver, Colo., Mechanical Equipment.

All bids received February 16 for the mechanical equipment of the U. S. post office at Denver, Colo., have been rejected and the work readvertised.

Denver, Colo., Interior Finish.

The supervising architect, Treasury Department, Washington, D. C., has rejected all bids received February 16 for minor outside work and interior finish of the U. S. post office at Denver, Colo. A new advertisement has been issued for this work calling for bids to be opened April 23.

Indian Office, Steel Bridges.

The contract for the construction of two steel bridges across the Gila and San Carlos Rivers, bids for which were

opened September 21, has been awarded to the Omaha Structural Steel Works, Omaha, Neb., at \$53,600, time to complete 180 days.

Bronze Plates.

The following bids were opened under reclamation advertisement 258 for bronze plates for the Salt River project:

Fulton Engine Works, \$990; 25 days.
National Brass Works, \$1,198.50; 15 days.

Llewellyn Iron Works, \$1,224; 14 days.

Acme Brass Foundry, \$1,324.

James Jones Co., \$1,485; 30 days.

Pearl Harbor, Metal Work.

The date for the opening of bids for fabrication and delivery of structural steel and miscellaneous metal work for a marine railway at the U. S. naval station, Pearl Harbor, H. T., has been postponed from April 4 to May 9.

Reclamation Work.

The Reclamation Service is asking for proposals for the excavation of the auxiliary spillway channel and the construction of the north dike, Vandalla diversion, in connection with the Milk River irrigation project, Mont., involving approximately 160,000 cubic yards of material. The work is situated on the north side of Milk River adjacent to the main line of the Great Northern Railway, about 3 1/2 miles from Vandalla station and adjacent to the U. S. Reclamation Service's siding at Vandalla dam. The bids will be opened after 2 o'clock p. m. May 12, 1914, at the office of the Reclamation Service, Malta, Mont.

Minot, N. D., Post Office.

The contract for the construction, complete, of the U. S. post office at Minot, N. D., has been awarded to John Lauritzen, Fergus Falls, Minn., at \$124,650, using limestone for all stonework, except where granite is required, and reinforced concrete for floor construction; time to complete 16 months.

Fireproofing Building, Puget Sound.

Bids are to be opened May 20 at the bureau of yards and docks, Navy Department, Washington, D. C., for fireproofing and partially reconstructing building No. 59 at the navy yard, Puget Sound, Wash. The contract will consist in part of the removal of wooden structures within the building, the relaying of a new wooden floor and sleepers, and the installation of hot water heating and electric lighting systems on the ground floor; the increasing in concrete of existing steel columns and girders and the installation of a reinforced concrete second floor; the installation of 1 hand-power elevator with an automatic gate, and automatic sprinkling system in second story; a metal stairway, and all other work and installation necessary. The general inside dimensions of the portion of the building referred to are about 118 feet 5 inches long and 57 feet 1 inch wide.

Hilo, H. T., Post Office.

The contract for the construction, complete, of the U. S. post office and custom house at Hilo, H. T., has been

awarded to the Campbell Building Co., of Salt Lake City, Utah, at \$196,922; less alternate 3, using granite in lieu of lava stone for certain steps, buttresses, door sills, etc., and for the corner stone, for using marble in lieu of lava stone for certain saddles, column and pilaster bases, base in portico-loggia, and stair hall, etc., stucco finished concrete in lieu of all other lava stone in the building proper; cement-finished concrete in lieu of marble treads, risers, and base of all stairs except those from the first to second floor in stair halls, stucco finish concrete in lieu of lava stone for all copings around driveway and basement entrances and wall coping of west entrance and cement finished concrete in lieu of lava stone for the basement entrance and rear entrance, \$6,000; less alternate 5, using cement finished concrete in lieu of lava stone for all steps and borders and stucco finish concrete in lieu of lava stone for all wall copings for terraces and approaches from the streets, \$3,400; using Hawaiian sand for concrete only, \$2,000; net amount, \$185,522; time April 12, 1916.

SAN FRANCISCO—Stables, 5, 1 story, brick or reinforced concrete. Cost not stated. Engineer, Constructing Quartermaster Department, Fort Mason, Owners, United States Government. These buildings have been mentioned here a number of times before. Working drawings are complete and figures will be opened on May 11th. Each structure will cover an area of 68 by 185 feet and will have accommodation for 100 head of stock. Cement and composition floors will be used. Plans provide for modern electric work, plumbing and special stable features. If brick is used the five buildings will require 900,000 stock brick and 120,000 paving brick. Plans and specifications can be secured from the office of the Constructing Quartermaster at Fort Mason. An official proposal appears in another column of this issue.

—HALLS & SOCIETY BLDGS—

OAKLAND, CAL.—Lodge hall, 2 story and base, brick and steel. Cost not stated. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Sons of St. George. The building will be erected at the northeast corner of 25th and Grove streets, covering a considerable ground area. The entire structure will be occupied by the owners and will be arranged for lodge rooms, offices and library. Interior finish will be of pine and hardwoods. There will be steam heat and a modern system of vacuum cleaning. A maple floor will be used in the hall room. Exterior will be faced with pressed brick and stone. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Faculty club, 2 story and base, frame, \$12,500. Architect, Warren C. Perry, 2626 1/2 Dwight Way, Berkeley. Owners, Faculty Club. The present building will undergo repairs and a two-story addition will be made. Interior finish will be of pine and hardwood with hardwood floors throughout. There will be a central heating system and open fire place. Mantel will be of tile or brick. Exterior of the building will be covered with cement plaster

on metal lath. Plans are now being prepared.

OAKLAND, CAL.—Municipal Auditorium, granite and architectural cotta. Cost not stated. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids were opened Tuesday by the Oakland City Council for the granite work and setting and for the architectural terra cotta work on the Oakland Auditorium. The California Granite Co. submitted the lowest bid for granite work and setting, also for the alternate proposition of using limestone in place of granite. N. Clark & Son were low on the architectural terra cotta. A complete list of the bids submitted will be found under the heading of Oakland and Alameda County in this issue.

SEASIDE, ORE.—City Hall, 2 story and base, brick and concrete, \$20,000. Architect, O. G. Brubaker, Seaside. Owners, City of Seaside. The building will be designed in the classic style and will cover a considerable ground area. The first floor will contain police and fire departments, city offices and two fireproof vaults. Second floor will be arranged for the Mayor's office, council chamber and offices. There will be steam heat. Interior will be finished in pine throughout. Exterior of the building will be faced with pressed brick. A general contract will be let. Plans are complete and figures are now being taken.

HOSPITALS

SAN FRANCISCO—Morgue and laboratories, 1 and 2 story. Class A construction, \$60,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owners, City and County of San Francisco. These architects have been commissioned to prepare plans for the two remaining buildings which are to complete the San Francisco Hospital group on Potrero avenue between 21st and 23rd streets. Construction will be of the Class A type. Interiors will be finished in pine, metal trim and hardwood. Considerable tile and marble will be used. Exteriors will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared. Bids will be called for by the Board of Public Works.

SAN FRANCISCO—Hospital lighting fixtures and yard work. Cost not stated. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed for installing lighting fixtures in the San Francisco Hospital group and for the yard work. Bids are being taken and will be opened on May 6th by the Board of Public Works. Official proposals appear in another column of this issue.

Contracts Awarded.

LA GRANDE, ORE.—Hospital, 3 story and base, brick, \$15,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Grand Bonde Hospital. Contractor, C. H. Rust, La Grande. Contract price, \$15,000.

HOTELS.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, \$25,000. Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, C. F. Hornung. The building will be erected on Valen-

cia street south of 16th street and has been arranged for a restaurant on the first floor and a number of private rooms and baths above. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO—Hotel, 7 story and base, steel and brick, \$110,000. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. O. Stewart. The building will be erected on the north side of Ellis street east of Mason and will have a frontage of 50 feet by a depth of 137½ feet. There will be two stores on the first floor besides the office, lobby and amusement room. Upper floors will contain a total of 120 guest rooms, all of which will have private baths. A complete steel frame will be used. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Interior finish will be of pine and hardwood with ornamental plaster in the lobby and office. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with a cream colored pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Anton Reif, Higgins Bldg., L. A. Owners, John G. Orth, Susan B. Campbell and Ben Weingart. The building will be erected on San Julian street between 5th and 6th streets, covering an area of 66 by 134 feet. Plans provide for a total of 194 rooms with two baths and two showers on each floor. Interior finish will be of pine throughout. There will be steam heat, elevator service and a hot water supply. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 3 story and base, frame. Cost not stated. Architect, C. F. Skilling, Garland Bldg., L. A. Owners, Mrs. Wagner and Mrs. Fullerton. The building will be erected on West 8th street, covering an area of 50 by 90 feet. There will be a total of 40 rooms, 50 per cent of which will have private baths. Interior finish will be of pine and redwood. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 10 story and base. Class A construction, \$210,000. Architect, Lyman Farwell, Story Bldg., L. A. Owner, J. W. Brunton. The building will be erected on 6th street between Hope and Flower streets and will have a frontage of 73 feet by a depth of 104 feet. Construction will be of reinforced concrete and steel with concrete floors, walls and roof slabs and fireproof interior partitions. Plans provide for three stores besides the hotel office and lobby on the first floor and a total of 218 guest rooms, 70 per cent of which will have private baths, on the upper floors. Interior finish will be of birch and ma-

hogany. There will be steam heat, a hot water supply, vacuum cleaning and two elevators. All bath rooms will have tile floors and wainscot. Patent store fronts and metal sash and frames are specified. Lobby and office will be finished in ornamental plaster, marble and tile. Exterior of the building will be faced with glazed brick and terra cotta. Plans are now being prepared.

LODI, SAN JOAQUIN CO., CAL.—Hotel, 4 story and base. Class C construction. Cost not stated. Architect, E. B. Brown, Stockton. Owners, Lodi capitalists. The building will be erected on a corner site and will contain, besides the hotel lobby and offices, a store and banking quarters. Upper floors will be arranged for 65 guest rooms and a number of baths. The building will cover an area of 85 by 100 feet. Considerable steel will be used. Interior will be finished in pine and redwood. Plans provide for steam heat, oil burning plant, a hot water supply and patent store fronts. Special interior finish will be used in the bank and fireproof vaults are also specified. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

Contracts Awarded.

SEATTLE, WASH.—Hotel, 5 story and base, brick and steel, \$60,000. Architect, I. B. Johnson, 3838 Evanston street, Seattle. Owner, Hotel Buttrick. Contractor, I. B. Johnson, 3838 Evanston street, Seattle. Contract price, \$60,000.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$60,000. Architects, George F. Costerian and J. P. Kavanagh, California Bldg., L. A. Owner, J. B. Solomon. Contractor, Fred W. Siegel, Stimson Bldg., L. A. Contract price, \$60,000. Note: This contract has been taken on a percentage basis and working drawings are not yet complete.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—State exhibit building, 2 story and base, frame and plaster. Cost not stated. Architect, Thomas H. P. Burditt, Service Bldg., S. F. Owners, State of California. The building will be the largest and finest of the exhibit buildings to be erected by the state. Design is in the Mission style with the exterior covered with cement plaster on metal lath and roof of clay tile. The structure will cover an area of 737 by 540 feet and will cost between \$400,000 and \$500,000. Interior will be arranged for approximately 140,000 square feet of display space for the various counties, a large ball room, department for the Militia and Executive's quarters. Plans are complete and figures are being called for which will be opened on April 30th. Separate bids are being taken for the general construction, plumbing, water supply, gas fitting, heating and ventilating, electric work and elevators. An official proposal appears in another column of this issue.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, State of Massachusetts. Plans for the building which is to house the Massachusetts State Exhibit have been com-

pleted by eastern architects and awarded to the Director of Works for approval and to secure local figures. The building will be a duplicate of the Massachusetts' State Capitol. Plans are now out for figures which will be opened by the Panama-Pacific Managers for Massachusetts, Trenton Bldg., Boston, on May 11th at 11 o'clock eastern time. Plans can be secured from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

POST OFFICES.

PALO ALTO, SANTA CLARA CO., CAL.—Post office, 1 story and base, brick and frame, \$20,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Leland Stanford, Jr., University. The building will be erected on the Campus of the University, and has been designed for a branch post office to be used exclusively by the college. Interior will be finished in pine and hardwood. Special cabinet work will be required. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are now being completed and figures will shortly be called.

HANFORD, KINGS CO., CAL.—Post office, 2 story and base, brick and concrete, \$60,000. Architect, Supervising Architect Oscar Venderoth, Washington, D. C. Owners, United States Government. Word comes from the Supervising Architect's office that working drawings are nearly complete for the new post office which is to be erected at Hanford. The building will be of semi-fireproof construction with pressed brick facing trimmed with terra cotta. Interior finish will be of pine, hardwood and tile. There will be steam heat and an oil burning furnace. Special fixtures and cabinet work will be installed. Plans will be forwarded to the west for figures about May 1st. Further mention will be made of the work.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Municipal railroad work. Trolley poles and track specials. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last Wednesday afternoon session of the Board of Public Works for reinforced concrete trolley poles for the Van Ness-Chestnut Line show H. S. Tittle low at \$35.33 per pole. Bids were also opened for furnishing track specials at a cost of approximately \$20,000 and for cast iron cross arms and manhole covers. A complete list of the bids will be found under the heading of San Francisco in this issue.

Contracts Awarded.

VANCOUVER, B. C.—Car barns, 1 and 2 story, reinforced concrete and steel, \$400,000. Architect's name not given. Owners, British Columbia Electric Co., Vancouver. Contractors, Church, Kerr & Co., Metropolitan Bldg., Vancouver. Contract price, \$400,000.

SCHOOLS.

DAVIS, YOLO CO., CAL.—Class room building, 2 story and base, brick. Cost not stated. Architects, Cunningham &

Politco, First National Bank Bldg., S. F. Owners, Regents of the University of California. Plans have been completed for a two-story class room building which is to be erected at the University Farm. The structure will cover an area of 90 by 152 feet and will contain in addition to the class rooms a large assembly hall and library. Interior finish will be of pine throughout. There will be steam heat. Special cabinet work will be required. A slate roof will be used. Exterior of the building will be faced with cement plaster. Plans are complete and out for figures. Bids will be opened by the Regents of the University on April 30th. An official proposal appears in another column of this issue.

CHICO, BUTTE CO., CAL.—School, 2 story and base, brick and tile, \$50,000. Architect, A. J. Bryan, Chico. Owners, Oakdale School District. The building will contain eight class rooms, assembly hall, teachers' rooms and principal's office. Interior finish will be of pine with maple floors in the class rooms. There will be steam heat and an oil burning plant. Vacuum cleaning and program clocks will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and separate figures are now being taken for the general construction and heating and ventilating. These bids will be opened on April 30th. On the same day the Board of Education will open figures for a four-room addition to the 4th and Cleander Street School, and for a one-story reinforced concrete addition to the Chico School. Plans can be secured from the architect.

PATTERSON, STANISLAUS CO., CAL.—School, 2 story and base, reinforced concrete, \$50,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Patterson Union High School District. Bids were opened Saturday, April 18th, by the Board of Education of the Patterson School District for the construction of a two-story and basement reinforced concrete school. Caldwell & Son of this city submitted the lowest general figure at \$46,956 and were awarded the contract. The Standard Electric Time Co., were awarded the program clock work, and Peterson & Wilson were awarded the heating and ventilating. A complete list of these figures will be found under the heading of Fresno, Modesto, Stanislaus and Central California.

ALHAMBRA, LOS ANGELES CO., CAL.—School buildings, 7, 1 and 2 story and base, brick. Cost not stated. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Alhambra School District. The group will consist of seven buildings of one and two stories. Only three of these buildings will be erected at the present time, one of which will be the central heating plant. Exteriors will be faced with cement plaster. Detail information of the work cannot be given at this time as only preliminary sketches have been completed.

SACRAMENTO, CAL.—School, 2 story and base, reinforced concrete, \$200,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. This building has been out for figures before but overrun the estimated cost considerably. Plans have been revised decreasing the height by about two feet and lightening the construction in

some particulars. Interior finish will be of pine throughout with maple floors in the class rooms. Manual training departments and domestic science rooms are also included. There will be steam heat and oil burning plant. Exterior of the building will be faced with cement plaster. Plans are complete and an official advertisement has been published calling for bids which are to be opened on May 1st.

STOCKTON, SAN JOAQUIN CO., CAL.—Academy building, 2 story and basement, brick. Cost not stated. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, St. Agnes Academy. The following bids were opened by Father McGough for the construction of the new academy building to be erected for St. Agnes Parish in Stockton. The structure will be a two-story building and was designed by Architects Stone & Wright. James L. McLaughlin, \$55,793; Ward & Goodwin, 49,200; Chirhardt & Nystedt, \$45,446; Anthony & Meyers, \$44,975; John Kuykendall, \$44,530; F. J. Klenck, \$43,197; James Muleahy, \$36,984.

Contracts Awarded.

SAN FRANCISCO—School, 2 story and base, reinforced concrete. Cost not stated. Architect, Albert Fissis, Flood Bldg., S. F. Owners, City and County of San Francisco. The Board of Public Works has made the official award of contract for the general construction of the Oriental School to Elmer Carlson on his bid of \$87,285. The Butte Engineering and Electric Co. was awarded the electric work on the same at \$2,387. Scott Co. was awarded the heating and ventilating at \$3,260; the plumbing and gas fitting were awarded to Charles Wright at \$5,260.

RESIDENCES.

SAN FRANCISCO—Residences, 2, 2 story, frame, \$2,000 each. Architect, none. Owner, A. T. Morris, 616 9th avenue, S. F. These two houses, each designed to contain six rooms and bath, will be erected on the west side of 11th avenue north of Anza street. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be large open fire places in the living rooms. Mantels will be of tile. Automatic water heaters will be installed. The wainscot will be used in the bath rooms and kitchens. Exteriors of the houses will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Bungalow, 1½ story and base, frame, \$2,500. Architect, none. Owners, Oscar Heyman & Bros., 742 Market street, S. F. The dwelling will be erected on Huron street near Sikes, and has been designed to contain six rooms and bath. Interior finish will be largely of pine. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Johnson and Johnson, 35-A Devisadero street, S. F. The dwelling, designed for a six-room house with bath, will be erected on the east side of 23rd avenue north of Irving street. Interior finish will be of pine and redwood with some hardwood floors. Open fire places with tile or brick mantels will be installed. Bath room will have tile wainscot and composition floor. An automatic water heater is specified. Exterior of the house will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, A. R. Lapham, 1853 McAllister street, S. F. The dwelling has been designed or a seven-room house and will be erected on the west side of 12th avenue near Anza street. Pine and redwood interior finish will be used. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residences, 6 2 story and base, frame, \$2,500 each. Architect, O. E. Evans, 2367 Mission street, S. F. Owners, Guerrero Realty Co. These six houses will be erected on Douglas street near 23rd street and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Oak floors will be used in the principal rooms. A large open fire place and tile mantel will be used in the living rooms. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with rustic and shiplap with some cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

SAN FRANCISCO—Bungalow, 1 story and base, frame, \$1,500. Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, A. Neuschwander. The dwelling will be erected on Arlington street near Parraquet, and has been designed to contain five rooms and bath. Interior finish will be of pine throughout. There will be an open fire place and tile mantel. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are being prepared. Work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, M. J. Terranova. The dwelling will be erected at the southeast corner of Paris and Persia streets and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile or brick mantels.

Beam ceilings are also specified. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, P. W. Morehouse, 1444 Broadway, Oakland. The dwelling has been designed for a seven-room house and will be erected on the west side of Spruce street near Prospect avenue. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, James W. PlacHECK, Archeson Bldg., Berkeley. Owner, Thomas Cuthill. The dwelling will be erected on Spruce street and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwood veneer with beam ceilings and hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$12,000. Architect, Charles Mau, Macdonough Bldg., Oakland. Owners, Misses Mary and Margaret Dunn. The dwelling will be erected at the northeast corner of Bellevue and Van Buren avenues and has been designed to contain twelve rooms, three baths and sleeping porches. Interior finish will be of pine, redwood and hardwood. There will be furnace heat and open fire places. Mantels will be of tile and brick. Hardwood floors will be used in the living room, dining room and reception hall. Bath room will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HOLLISTER, SAN BENITO CO., CAL.—Residence, 2 story and base, frame, \$20,000. Architect, W. H. Weeks, 75 Post street, S. F. Owner, George E. Syker. The dwelling has been designed for a modern ranch house, and will be erected on the Patcines Ranch near Hollister. There will be twelve living rooms, three baths and sleeping porches. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and a hot water supply. Open fire places and tile mantels will be used in the principal rooms. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the dwelling will be covered with cement plaster on metal lath. A red

clay tile roof will be used. Plans are complete and figures will be taken at once.

SAN FRANCISCO—Residences, 6, 2 story and base, frame, \$3,500 to \$6,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Captain Edwards. These houses, designed to contain from six to eight rooms, will be erected in Ashbury Heights. Interiors will be finished in pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. The larger houses will have furnace heat as well as open fire places. Mantels will be of brick and tile. Automatic water heaters will be installed in all the houses. Bath rooms will have tile wainscot and composition floors. Exteriors will be covered with cement plaster on metal lath, shingles and rustic. Plans are being prepared and when complete the work will be done by Day Labor.

Contracts Awarded.

PASADENA, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame and plaster, \$21,240. Architects, Elmer Grey, Wright and Callender Bldg., L. A. Owner, W. H. Brophy. Contractor, W. A. Taylor, 965 Elizabeth street, Pasadena. Contract price, \$21,240.

OAK KNOLL, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame and brick, \$29,410. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owner, Morris Cohn. Contractor, John L. Conner, 435 West 31st street, L. A. Contract price, \$29,410.

SEWERS, STREET WORK AND WATER SYSTEMS.

Plans are complete and bids will be opened on April 23rd for the construction of 2,200 feet of 25-foot highway in the Presidio of San Francisco. The work will require a 2-inch binder and a 1½-inch top. Plans and specifications can be secured from the office of the Constructing Quartermaster at Fort Mason.

STORES.

WOOL LAND, YOLO CO., CAL.—Office, 2 story and base, reinforced concrete. Cost not stated. Architects, Ward & Blohne, Alaska Commercial Bldg., S. F. Owners, Yolo Water Co. The building will be designed to contain the company's offices on the first floor and an attorney's offices on the second floor. Interior will be finished in pine and hardwood with some ornamental iron and bronze grilles. There will be a central heating system. Exteriors of the building will be faced with cement plaster. Plans are complete and the work will probably be done by Day Labor.

OAKLAND, CAL.—Stores and offices, 3 story and base. Class A construction, \$50,000. Architect, C. W. Dickey. Central Bank Bldg., Oakland. Owners, Moody Estate. The building will be erected on the north side of 14th street between Clay and Jefferson streets, and has been designed with foundations and steel heavy enough to carry five additional stories. The first floor will contain stores and the upper floors will be arranged for a number of modern offices. There will be a complete steel frame, concrete or brick exterior walls and fireproof interior partitions. Interior finish will be of pine and hardwoods with metal trim and marble and tile. Metal window frames and sash are specified. There will be patent store fronts, sidewalk doors, lifts and lights. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for at once.

FRESNO, FRESNO CO., CAL.—Automobile exhibit building, brick construction, \$10,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, Fresno County Agricultural Association. The building will cover an area of 95 by 120 feet and will be 20 feet high. Interior will be finished in pine and hardwoods with a cement and tile floor. Steam heat and modern plumbing and electric work will be installed. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Preliminary plans are being prepared.

THEATRES.

BURLINGAME, SAN MATEO CO., CAL.—Theatre, 1 story and base, Class C construction, \$25,000. Architect, Harris Allen, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected on one of the main streets in San Mateo and will have a seating capacity of about 800 people. Interior finish will be of pine with some ornamental plaster. A modern system of heating and ventilation will be installed. Special electric work will be specified. Exterior of the building will be faced with pressed brick and cement plaster. Plans are now being prepared.

LOS ANGELES, CAL.—Greek theatre, reinforced concrete construction. Cost not stated. Architects, S. Tilden Norton and J. H. Wallis. Title Insurance Bldg., L. A., associated with Architects Heath & Gove, Tacoma, Wash. Owners, City of Los Angeles. The theatre will be erected in Griffith Park. A proposed science observatory is also a part of the project. The new theatre will be one of the largest Greek theatres in the United States. Complete plans will be submitted to the City Council within a week or ten days and bids will be called for at once. Further mention will be made of the work.

HOOD RIVER, ORE.—Theatre, 1 story and base, brick, \$15,000. Architect, Aaron H. Gould, Henry Bldg., Portland. Owner, William Baker. The building has been designed for a motion picture house and will cover an area of 50 by 100 feet. Besides the main floor plans provide for a balcony which will give the house a combined seating capacity of 650 people. Interior finish will be of pine throughout. Modern heating and ventilation will be in-

stalled. Special electric work is also specified. Exterior of the building will be faced with cement plaster. Plans will go out for figures in about one week. A general contract will be awarded.

PORTLAND, ORE.—Theatre and stores, 3 story and base, reinforced concrete, \$50,000. Architect, W. B. Bell, Sherlock Bldg., Portland. Owner, A. C. Ruhy. The building will be erected at the corner of 5th and Burnside streets, covering an area of 50 by 100 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster and hollow tile. There will be five stores on the ground floor besides the main auditorium and entrance. The theatre will seat 650 people. A portion of the upper floors will be arranged for hotel rooms, there being 69 rooms and several baths. Interior finish will be of pine throughout with some ornamental plaster in the theatre. Plans provide for steam heat, ventilating system and a hot water supply. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

PORTLAND, ORE.—Theatre, 1 story and base, brick, \$20,000. Architects, Emil Schacht & Son, Commonwealth Bldg., Portland. Owner, Joseph Clissett. The building will be erected at the corner of First and Main streets, covering an area of 50 by 100 feet, and has been designed for a motion picture house. Interior will be finished in pine and ornamental plaster. The main portion of the building will have a seating capacity of 500 people. Plans provide for one small store besides the theatre. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SEATTLE, WASH.—Theatre and offices, 6 story and base, Class A construction, \$500,000. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owner, Alex Pantages. This building will be erected on one of the principal business corners and will cover an area of 111 by 120 feet. Construction will be Class A throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. The main portion of the building will be occupied by the theatre, which will have a seating capacity of 2,000 people. Upper floors will contain twelve offices to the floor. Interior of the theatre will be finished in the French Renaissance style. Plans provide for steam heat, elevator service and a modern system of ventilation. Interior of the offices will be finished in pine and hardwood. Marble and tile will also be used extensively. Exterior of the building will be faced with white glazed terra cotta. Plans are complete and figures are being taken.

BELLINGHAM, WASH.—Theatre, 3 story and base, Class A construction, \$135,000. Architect, Stanley Piper, Bellingham. Owners, The Edison Amusement Co. A report states that this company, which is a large British Columbia firm, has secured a location in Bellingham and will start construction on a large theatre within the next three months. The exact location and other details of construction are lack-

ing at this time. The report states, however, that construction will be of the Class A type and that the theatre will have a seating capacity of 1,500 people. Further mention will be made of the work.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 842—Proposals for Cast Iron Water Pipe and Fittings, Valves, Nails, Water Coolers, Drinking Glasses, Leather, Cotton Sheet, Railway Flags, Rules, Record Books, Binder's Board, Padboard, Chipped Soap, Silica Sand, Calcium Carbide, Chloride of Lime, Turpentine, Linseed Oil, Lard Oil, Gasoline, Varnish, Shellac and Chrome Yellow.—Sealed proposals will be received at the office of the general purchasing officer, Panama Canal, Washington, D. C., until **10:30 a. m., April 30, 1914**, at which time they will be received in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 842) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR METAL HOOK RACKS

SEALED proposals for furnishing eight metal hook racks for the Hall of Records will be opened in open session of the Board of Supervisors, San Francisco, April 27th, 1914, at 3 p. m. Proposals blanks furnished on application. J. S. DUNNIGAN, Clerk.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 4th day of May, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and installing of lighting fixtures in the main group of buildings of the San Francisco Hospital.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within ninety (90) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. RICHARD J. CLANE, Secretary.

PROPOSALS FOR YARD WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 6th day of May, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The Yard Work of the San Francisco Hospital, located on Potrero avenue and Twenty-second street.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within time limits as provided in specifications.

The amount of bond for faithful performance of contract has been fixed at \$12,500.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. RICHARD J. CLANE, Secretary.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received at the Office of the Comptroller, University of California, Berkeley, Cal., at or before 10 A. M., Thursday, April 23rd, 1914, for the erection of a two-story brick Class Room Building at Davis, Cal., as per plans and specifications on file at said Office. A deposit of \$5.00 will be required for each set of plans and specifications, which will be refunded upon return of said plans and specifications.

No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to ten per cent of the bid, to secure execution of contract by successful bidder. The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA. (*)

NOTICE TO CONTRACTORS.

COUNTY OF KERN, State of California.—Sealed proposal addressed to the Board of Supervisors and endorsed "Proposals for Furnishing and Installing a Crushing Plant at Keene, near Woodford on the Southern Pacific Railroad" will be received by the Board of Supervisors of Kern County at their office in the County Court House until two (2) o'clock p. m. on May 12th, 1914, and at that time and place will be publicly opened and read.

Competitive designs and bids to be submitted by contractors for an electrically equipped plant of 1000 tons capacity to 8 hours.

A cutting of general specifications and contract maps of the quarry site may be obtained at the office of the Kern County Highway Commission, Bakersfield, California. All proposals must specify each part of the equipment, giving manufacturer's name and catalog identification and must give the price proposed both in writing and in figures signed by the bidder with his address.

Each proposal must be accompanied by a certified or cashier's check amounting to at least ten (10) per cent of the amount of the bid payable to the Chairman of the Board of Supervisors, such check to be returned to the bidder unless forfeited under the conditions herein stipulated.

A bond will be required for the faithful performance of the contract in a sum equal to one-half (½) of the amount of the contract, and a further bond in a sum equal to one-quarter (¼) of the amount of the contract will be required for the security of materialmen and laborers. The sureties on both bonds must be approved by the Board of Supervisors.

The bidder to whom the contract may be awarded will be required to appear at the office of the said Board of Supervisors within ten (10) days after it is awarded to him. In case of failure or neglect to do so, he may be considered as having abandoned it, and the check accompanying the proposal may, at the option of the Board of Supervisors be forfeited to the County Clerk.

All bids will be compared on the basis of excellence of design and material as well as the amount for which it is proposed to install the plant. The Board of Supervisors reserves the right to reject any or all bids. BOARD OF SUPERVISORS OF KERN COUNTY.

By H. A. JASTRO, Chairman.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors, Colusa Co., Cal., at their

Board rooms in County Courthouse, on the 6th day of May, 1914, up to 10 A. M. of said day, for furnishing the labor and material for constructing a new reinforced Concrete Hall of Records Building, in the Town of Colusa, Colusa Co., Cal., on the square facing Jay and 6th Streets. The building to be constructed directly in back of present Court House facing Jay St., south of 6th St. west.

The plans and specifications for the said proposed new Hall of Records Building are on file in the offices of W. J. King, County Clerk and Ex-Officio Clerk of the Board of Supervisors in the Town of Colusa, Colusa Co., Cal., and also in the office of Henry C. Smith, the authorized architect, 755 Market St., San Francisco, Cal., where copies of the same may be obtained by bidders on deposit of the sum of Twenty-five (\$25.00) Dollars. Reference is hereby made to such plans and specifications for mode of bidding. Blank forms of bidding will be furnished by the County Clerk or architect upon application before bids are received.

Each bid must be accompanied by a certified check or bidder's bond for ten (10) per cent of the amount of the bid, said check or bond to be made payable to W. J. King, County Clerk and Ex-Officio of the Board of Supervisors. The Board reserves the right to reject any and all bids.

All general bidders will be allowed to retain the plans and specifications for seven (7) consecutive days in which to prepare figures, but arrangements may be made upon payment of \$10.00 to retain same until opening of bids, which amount will be deducted from the deposit made of \$25.00 when the plans and specifications are returned.

DATED the 8th day of April, 1914.

WM. J. KING,
County Clerk. (*)

NOTICE TO CONTRACTORS.**BOARD OF PANAMA-PACIFIC MANAGERS FOR MASSACHUSETTS.**

SEALED PROPOSALS will be received by the Board of Panama-Pacific Managers for Massachusetts at Room 305, in the Tremont Building, Boston, Massachusetts, at 11:00 A. M. (Eastern Time), Monday, May 11, 1914, for Construction of the Panama-Pacific Exposition at the Panama-Pacific International Exposition on file in the office of the Board of Panama-Pacific Managers for Massachusetts in Room 305, Tremont Building, Boston, Massachusetts, and in the office of the Director of Works of the Exposition, Room 197, State Building, Exposition Grounds, San Francisco, California.

Each proposal must be accompanied by a certified check payable to the order of the Board of Panama-Pacific Managers for Massachusetts in the sum of ten (10) per cent of the amount bid on the same will not be considered. When the award of contract is made, all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be applied upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Board of Panama-Pacific Managers for Massachusetts.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects in the interest of the State of Massachusetts.

Plans and specifications for the work may be obtained from the Board of Panama-Pacific Managers for Massachusetts, Room 305 Tremont Building, Boston, Massachusetts, or from the Director of Works of the Exposition, Room 197, State Building, Exposition Grounds, San Francisco, California, by depositing \$25.00, which amount will be refunded to the contractor upon the return of plans and specifications in good condition.

By order of the Board of Panama-Pacific Managers for Massachusetts.

PETER H. COPELAND, Chairman.
CHARLES C. POWELL, Secretary. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 10:00 A. M. Thursday, April 30, 1914, for Constructing The California Building in accordance with specifications on file in the office of the Director of Works.

Separate proposals will be allowed on Plumbing, Water Supply and Gas Fitting, Heating and Ventilating, Electric Wiring, and Elevators.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made, all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit a bona fide bid will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,

Chairman. (*)

PROPOSALS FOR SALE OF VESSELS.

SALE OF U. S. NAVAL VESSELS.—Sealed proposals will be received at the bureau of supplies and accounts, Navy Department, Washington, D. C., until 12 o'clock noon, May 1, 1914, when they will be publicly opened for the purchase of the following vessels: U. S. S. Manila, at navy yard, Mare Island, Cal., appraised value \$60,000; U. S. S. Restless, at naval torpedo station, Newport, R. I., appraised value \$2,000. The Manila will be sold for cash to the highest bidder. The Restless will be sold to the bidder offering the highest price above the appraised value. Forms of proposal and bond and information concerning the vessels and the terms and conditions of sale may be obtained upon application to the bureau of supplies and accounts, JOSEPHUS DANIELS, Secretary of the Navy.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, on and including 12 o'clock noon, Tuesday, April 27, 1914, to build a dam and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as the Worker's Cottage—Female—at the Agnew's State Hospital, Agnew, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Each bid must be in the hand of a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Worker's Cottage—Female—Agnew's State Hospital, Agnew, California."

(Signed) W. F. McCLURE,

State Engineer. (*)

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

STATE EXHIBIT BUILDING—2 story and base, frame and plaster. Cost not stated. San Francisco. Architect, Thomas H. F. Burditt, Service Bldg., S. F. Owners, State of California. The building will be the largest and finest of the exhibit buildings to be erected by the states. Design is in the Mission style with the exterior covered with cement plaster on metal lath and roof of clay tile. The structure will cover an area of 737 by 340 feet and will cost between \$400,000 and \$500,000. Interior will be arranged for approximately 140,000 square feet of display space for the various counties, a large hall room, department for the Militia and Executive's quarters. Plans are complete and figures are being called for which will be opened on April 30th. Separate bids are being taken for the general construction, plumbing, water supply, gas fitting, heating and ventilating, electric work and elevators. An official proposal appears in another column of this issue.

APARTMENT HOUSE—4 story and base, brick and steel. \$70,000. San Francisco. Architect, Alfred Henry Jacobs, 110 Sutter street, S. F. Owner, Emanuel Levy, 717 Market street, S. F. The building will be erected on Van Ness avenue near Vallejo, and will cover a considerable ground area. Apartments will consist of five and six rooms with from one to two private baths. Interiors will be handsomely finished in pine and hardwoods with some oak floors. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will have tile floors and wainscot. Wall beds are specified. Entrance of the building will be finished in tile and marble. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, none. Owner, A. C. Lomelino, 1705 Hyde street, S. F. The building will contain six apartments of four rooms each and will be erected on the north side of Pacific street west of Hyde. Interior finish will be of pine throughout. There will be a hot water supply, wall beds and private bath rooms. Entrance will be finished in marble and tile. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$20,000. San Francisco. Architect, Carl Gelfuss, 16 Kearny street, S. F. Owner, L. A. Baeleccio. The building will be erected on Vallejo street near Van Ness avenue. The building will have a frontage of 30 feet 1 inch by a depth of 122 1/2 feet. There will be a total of nine apartments each of four rooms. All rooms will have outside exposures and will receive an abundance of sunlight and fresh air.

Each apartment will have a reception hall from which all rooms except the baths may be entered. All rooms are exceptionally large and will be handsomely finished in pine with hardwood panels, beam ceilings, built-in book cases and hardwood floors. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Kitchens will be equipped with all modern improvements, including patent ironing boards, coolers and ice chests. The building will be entered from the sidewalk level, the entrance and lobby being finished in marble and tile. Basement will contain private storage space for each apartment, laundry, amusement room and urnace room. Exterior will be covered with cement plaster on metal lath.

APARTMENT HOUSE—4 story and base, reinforced concrete, \$32,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, E. V. Lacey and J. B. Reite. The building will be erected on the south side of Post street 30 feet west of Larkin, having a frontage of 25 feet and a depth of 120 feet. Interior has been arranged for a total of 27 suites of two and three rooms with private baths and wall beds. Pine and hardwood trim will be used. Plans provide for steam heat, elevator service and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior will be faced with cement plaster. Plans are complete and segregated figures are now being taken on the various parts of the work.

ICE AND COLD STORAGE PLANT—5 story and base, brick and steel, \$60,000. San Francisco. Engineer, Charles Wallace, Kansas City, Mo. Owners, National Ice and Cold Storage Co. This is the second building to be erected on the company's property at the corner of Sansome and Union streets. A four-story building is now nearing completion and the new five-story building will be connected with this structure by an arcade. The two buildings combined will give the company approximately 1,000,000 cubic feet of refrigeration. The proposed building will cover an area of 120 by 177 1/2 feet. Exterior will be faced with pressed brick. Plans are complete and in the hands of the owners who will do the work partly by Day Labor and partly by contract.

LAUNDRY—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner, Mr. Laroni. The building will be erected on Post street between Larkin and Polk, and has been arranged for the laundry on the first floor and rooms above. Interior finish will be of pine throughout. A cement floor will be used on the ground floor. Special machinery will be installed. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

MUNICIPAL ASPHALT PLANT—1 story, reinforced concrete, \$22,844. San Francisco. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for the construction of a Municipal asphalt plant on Florida street show Frank M. Garden Co. low at \$22,844, and he will probably be awarded the contract. A complete list of the figures submitted will be found under the heading of San Francisco in this issue.

FLATS—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owners, E. and G. Cicerone, 71 Valparaiso street, S. F. The building will be erected on Varennes street north of Green and has been designed to contain two flats of five rooms each. Interior finish will be of pine and redwood with some oak floors. There will be gas grates and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owners and the work will be done by ay Labor. Materials are now being purchased.

FLATS—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Mrs. Higgins, 639 Natoma street, S. F. The building will contain two flats of five rooms each. Interior finish will be of pine and redwood. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. A portion of an old residence will be utilized. Exterior will be covered with rustic and shiplap. Plans are complete and a contract will be let by the owner.

FLATS—3 story and base, frame, \$6,500. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Fred Roettiger. The building will be erected on the north side of Lake street west of 7th avenue, covering an area of 28 by 61 feet. There will be three modern flats of five and six rooms. Interiors will be finished in pine, redwood and hardwood veneer with some oak floors. All living rooms will have open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and work will be carried on by Day Labor. Materials are now being purchased.

GARAGE—1 and 2 story and base, Class A construction. Cost not stated. San Francisco. Architect, Sylvain Schnaittacher, First National Bank Bldg., S. F. Owners, Taxicab Co. of California. The building will be erected at the northeast corner of Bush and Larkin streets, covering an area of 137 1/2 by 137 1/2 feet, and has been designed for one of the largest commercial garages in the west. Construction will be of the Class A type throughout with a complete steel frame, brick exterior walls and concrete floor. The main portion of the building will be one story high and will be occupied by the garage and storage space. The two-story portion will contain modern machine and repair shops. Office will be finished in pine. Plans provide for metal window sash and frames and two large gasoline storage tanks. An elevator capable of lifting the largest machines will be installed. Exterior of the building

will be faced with pressed brick. Working drawings are now being prepared.

GARAGE—1 story and base, reinforced concrete or brick, \$20,000. San Francisco, Architect, Matthew O'Brien, Foxcroft Bldg., S. F. Owner, Mrs. W. J. Gallagher. The building will be erected on Grove street between Laguna and Buchanan streets and has been designed as a commercial garage. Both reinforced concrete and brick and steel construction are being considered. There will be a cement floor, special gasoline storage tanks, metal window sash and frames. Interior will be finished in pine throughout. Plans provide for storage space and a machine shop. Exterior of the building will be faced with either pressed brick or cement plaster. Plans are complete and figures are being taken.

STABLES—5, 1 story, brick or reinforced concrete. Cost not stated. San Francisco. Engineer Constructing Quartermaster Department, Fort Mason. Owners, United States Government. These buildings have been mentioned here a number of times before. Working drawings are complete and figures will be opened on May 11th. Each structure will cover an area of 65 by 185 feet and will have accommodations for 100 head of stock. Cement and composition floors will be used. Plans provide for modern electric work, plumbing and special stable features. If brick is used the five buildings will require 900,000 stock brick and 120,000 paving brick. Plans and specifications can be secured from the office of the Constructing Quartermaster at Fort Mason. An official proposal appears in another column of this issue.

MORGUE AND LABORATORIES—1 and 2 story. Class A construction, \$60,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owners, City and County of San Francisco. These architects have been commissioned to prepare plans for the two remaining buildings which are to complete the San Francisco Hospital group on Potrero avenue between 21st and 23rd streets. Construction will be of the Class A type. Interiors will be finished in pine, metal trim and hardwood. Considerable tile and marble will be used. Exteriors will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared. Bids will be called for by the Board of Public Works.

HOSPITAL LIGHTING FIXTURES AND YARD WORK—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed for installing lighting fixtures in the San Francisco Hospital group and for the yard work. Bids are being taken and will be opened on May 6th by the Board of Public Works. Official proposals appear in another column of this issue.

HOTEL—7 story and base, steel and brick, \$110,000. San Francisco. Architects, Smith & Stewart, 241 Kearny street, S. F. Owner, A. O. Stewart. The building will be erected on the north side of Ellis street east of Mason, and will have a frontage of 50 feet by a depth of 137½ feet. There will be two stores on the first floor besides the office, lobby and amusement room. Upper floors will contain a total of

120 guest rooms, all of which will have private baths. A complete steel frame will be used. Plans provide for steam heat, elevator service, hot water system and vacuum cleaning. Interior finish will be of pine and hardwood with ornamental plaster in the lobby and office. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with a cream colored pressed brick. Plans are complete and figures are being taken.

STATE EXHIBIT BUILDING—2 story, frame and plaster. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, State of Massachusetts. Plans for the building which is to house the Massachusetts State Exhibit have been completed by eastern architects and forwarded to the Director of Works for approval and to secure local figures. The building will be a duplicate of the Massachusetts' State Capitol. Plans are now out for figures which will be opened by the Panama-Pacific Managers for Massachusetts, Trenton Bldg., Boston, on May 11th at 11 o'clock eastern time. Plans can be secured from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

APARTMENT HOUSE—3 story and base, frame, \$7,000. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, Grove and Masonic streets, S. F. The building will be erected at the southeast corner of Grove and Masonic streets and has been designed to contain six modern apartments of four rooms each. Interior finish will be of pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base is specified. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

FLATS—2 story and base, frame, \$3,500. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, F. Devitt. The building will be erected at the corner of London and Italy streets and has been designed to contain two flats of four rooms each. Interior finish will be of pine and redwood. Oak floors will be used in the living rooms and dining rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and ship-lap. Plans are being prepared and figures will be taken shortly.

FLATS—2 story and base, frame, \$6,000. San Francisco. Architect, none. Owner, E. Peterson, 1205 10th avenue, S. F. The building will be erected on the east side of 23rd avenue south of Taraval, having a frontage of 25 feet and a depth of 70 feet. Each flat will contain six rooms and bath. Interior will be finished in pine and hardwood veneer with oak floors in the principal rooms. There will be large open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the

house will be covered with cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

GARAGE—1 story and base, reinforced concrete or brick and steel, \$15,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. Lessee, Mr. Emanuel. The building will be erected on the north side of Post street west of Franklin street, having a frontage of 85 feet and a depth of 137½ feet. Bids will be taken for both the reinforced concrete and brick type of construction. Storage space and office will occupy the greater portion of the building while the rear will contain a machine shop. Foundations are already in. Interior finish will be of pine. There will be a cement floor and special steel gasoline storage tanks. Exterior will be faced with cement plaster. Plans are being prepared.

RESIDENCES—2, 2 story, frame, \$2,000 each. San Francisco. Architect, none. Owner, A. T. Morris, 616 9th avenue, S. F. These two houses, each designed to contain six rooms and bath, will be erected on the west side of 11th avenue north of Anza street. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be large open fire places in the living rooms. Mantels will be of tile. Automatic water heaters will be installed. Tile wainscot will be used in the bath rooms and kitchens. Exteriors of the houses will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOW—1½ story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Oscar Heyman & Bros., 742 Market street, S. F. The dwelling will be erected on Huron street near Sikes, and has been designed to contain six rooms and bath. Interior finish will be largely of pine. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile or brick mantel. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Johnson & Johnson, 55-A Devisadero street, S. F. The dwelling, designed for a six-room house with bath, will be erected on the east side of 23rd avenue north of Irving street. Interior finish will be of pine and redwood with some hardwood floors. Open fire places with tile or brick mantels will be installed. Bath room will have tile wainscot and composition floor. An automatic water heater is specified. Exterior of the house will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, A. R. Lapham, 1853 McAllister street, S. F. The dwelling has been designed for a seven-room

house and will be erected on the west side of 12th avenue near Anza street. Pine and redwood interior finish will be used. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCES—8, 2 story and base, frame, \$2,500 each. San Francisco. Architect, O. E. Evans, 2367 Mission street, S. F. Owners, Guerrero Realty Co. These six houses will be erected on Douglas street near 23rd street, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Oak floors will be used in the principal rooms. A large open fire place and tile mantel will be used in the living rooms. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with rustic and shiplap with some cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

BUNGALOW — 1 story and base, frame, \$1,500. San Francisco. Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, A. Neuschwander. The dwelling will be erected on Arlington street near Farragut, and has been designed to contain five rooms and bath. Interior finish will be of pine throughout. There will be an open fire place and tile mantel. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are being prepared. Work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$2,000. San Francisco. Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, M. J. Terranova. The dwelling will be erected at the southeast corner of Paris and Persia streets and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile or brick mantels. Beam ceilings are also specified. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and shiplap. Plans are complete and the work will be done by day labor.

FIRE HOUSE—2 story and base, brick and steel, \$35,000. San Francisco. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. Bids opened at last Wednesday's session of the Board of Public Works for the construction of Engine House No. 12 show C. L. Wold low on the general construction; S. W. Band low on the plumbing and gas fitting; National Electric Co. low on the electric wiring, and T. E. Davis & Son low on the brick work. A complete list of the bids opened will be found under the heading of San Francisco in this issue. The

low men will probably be awarded the contracts.

APARTMENT HOUSE—3 story and base, frame, \$25,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mrs. Bertha Overfeld. The building will be erected at the corner of Fillmore and Green streets. There will be a number of two, three and four room apartments with private baths and wall beds. Interiors will be finished in pine and hardwood with some oak floors. Plans provide for steam heat and a hot water supply. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be covered with cement plaster on metal lath. Entrance will be finished in marble and tile. Plans are being prepared.

RESIDENCES—6, 2 story and base, frame, \$3,500 to \$6,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Captain Edwards. These houses, designed to contain from six to eight rooms, will be erected in Ashbury Heights. Interiors will be finished in pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. The larger houses will have furnace heat as well as open fire places. Mantels will be of brick and tile. Automatic water heaters will be installed in all houses. Bath rooms will have tile wainscot and composition floors. Exteriors will be covered with cement plaster on metal lath, shingles and rustic. Plans are now being prepared and when complete the work will be done by Day Labor.

HIGHWAY CONSTRUCTION — Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids opened by the Highway Commission in Sacramento for highway construction in Solano, Alameda (two pieces), Ventura and Kern Counties will be found under the heading of San Francisco in this issue.

ASPHALT ROAD WORK—Cost not stated. Presidio of San Francisco, Cal. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Plans are complete and bids will be opened on April 23rd for the construction of 2,200 feet of 35-foot highway in the Presidio of San Francisco. The work will require a 2-inch binder and a 1½-inch top. Plans and specifications can be secured from the office of the Constructing Quartermaster at Fort Mason.

HOTEL—5 story and base, brick and steel, \$25,000. San Francisco. Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, C. F. Hornung. The building will be erected on Valencia street south of 16th street and has been arranged for a restaurant on the first floor and a number of private rooms and baths above. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are being prepared and figures will be called for shortly.

Contracts Awarded.

SCHOOL—2 story and base, reinforced concrete. Cost not stated. San

Francisco. Architect, Albert Pissis, Flood Bldg., S. F. Owners, City and County of San Francisco. The Board of Public Works has made the official award of contract for the general construction of the Oriental School to Elmer Carlson on his bid of \$57,285. The Butte Engineering and Electric Co. were awarded the electric work on the same at \$2,387. Scott Co. were awarded the heating and ventilating at \$3,260, and the plumbing and gas fitting was awarded to Charles Wright at \$5,200.

City Bids Opened.

Board of Public Works Consider Bids For Engine House No. 12 and Much Other City Work.

Bids for a large amount of City work were opened at the Wednesday afternoon session of the Board of Public Works. The general construction of fire house No. 12, with the figures submitted for the other parts of this work, attracted the greatest number of bidders. C. L. Wold submitted the lowest figure at \$23,485. S. W. Band was low on the plumbing, and gas fitting at \$6,400; the National Elec. Constr. Co. was low on the electric work at \$1,060 and T. E. Davis & Son were low on the brick work at \$13,014. No contracts were awarded.

Other bids opened were for the cutting and dressing of granite curbs from the old City Hall site, track specials for the Municipal Railroads, iron casting for the same, reinforced concrete trolley poles for the Van Ness avenue Municipal Road and for the general construction of the Municipal Asphalt plant.

A complete list of all bids received follows:

Engine House No. 12, General Construction.

Elmer Carlson	\$36,745
J. W. Carr	39,234
Frank M. Garden Co.	37,443
Williams Bros. & Henderson ..	42,430
C. L. Wold	35,485
E. W. Elliott	40,900
Heckenroth & Schell	35,571

Plumbing & Gas Fitting Engine No. 12.

A. Lettich	\$7,138
J. E. O'Mara	6,850
Herman Lawson	6,800
William F. Wilson Co.	7,693
F. W. Snook Co.	7,155
Ahhbach & Mayer Co.	7,000
S. W. Band	6,400
Kiernan & O'Brien	6,593
Scott Company	6,950
Wittman, Lyman & Co.	7,461

Electric Work, Engine House No. 12.

Burt Eng. & Elec. Co.	\$1,084
General Elec. Constr. Co.	1,349
National Elec. Constr. Co.	1,060
H. S. Tuttle	1,261

Brick Work, Engine House No. 12.

Reed & White	\$14,693
T. J. Campbell	18,293
J. W. Carr	14,586
O'Connor & Collins	15,186
James F. Pennell	15,290
Frank M. Garden & Co.	16,215
T. E. Davis & Son	13,014

Cutting and Dressing Curbs From Granite at Old City Hall.

McSheehy Bros. (a) \$49; (b) \$79; (c) \$69.	
John Spargo (a) \$60; (b) \$30; (c) \$75.	

J. P. M. Phillips (a) \$.45; (b) \$.80; (c) \$.65.
James Percy (a) \$.54; (b) \$.99; (c) \$.74.

Track Specials, Municipal Lines.

Only two firms, the United States Steel Products Co. and the Pennsylvania Steel Co., submitted figures for this work. The contract will approximate \$30,000. All prices were submitted on a unit basis.

Iron Castings, Municipal Railroads.

Price per pound was asked for on this work. Proposition A calls for furnishing cast iron manholes and Prop. B for furnishing cast iron cross arms.

Joshua Hendy Co. (a) \$.024; (b) \$.045.
Enterprise Foundry Co. (a) \$.021; (b) \$.0475.
Pacific Rolling Mills Co. (a) \$.0248; (b) \$.02334.
Vulcan Iron Works (a) \$.0220; (b) \$.0470.

Ajax Brass Foundry & Iron Works (a) \$.0235; (b) \$.07.

Municipal Asphalt Plant.

McSheehy Bros. \$24.42
R. A. Chisholm. 28.96
T. W. McClenahan & Co. 24.33
J. W. Carr. 24.76
William A. Newsom. 23.351
Frank M. Garden Co. 22.844

Reinforced Concrete Trolley Poles.

A number of different propositions were called for on this work, but only bids on the main proposition follow. This proposition called for furnishing and finishing all reinforced concrete trolley poles for the Van Ness Avenue line.

Each
Commarty, Peterson Co. \$42.00
H. L. Peterson. 35.00
T. W. McClenahan. 44.30
Robert C. Storrie & Co. 110.00
H. S. Tittle. 33.55

Open Highway Bids For Five Counties.

Highway Work to Be Started in Alameda, Kern, Solano and Ventura Counties at Once.

Bids were opened in Sacramento by the State Highway Commission for constructing state highways in the following counties: Solano, Alameda, (two pieces), Ventura and Kern. A complete list of the bidders together with the engineer's estimate of cost and a list of the materials furnished by the State follow. Parties interested in unit prices for this work can secure same by calling at this office.

SOLANO CO. DIV. 3 ROUTE 7 SEC. A.
Tieslau Bros. S. F. \$ 64,432.00
T. M. Burns, Sacramento. 79,250.00
Fred Leffler, S. F. 137,392.50
Daniel O'Day, S. F. 79,055.00
Raisch Imp. Co. S. F. 113,310.00

Engineer's Estimate, \$60,969.55

Materials furnished by the State: pipe railings, reinforcing steel, corrugated iron pipe, Portland cement, sand for subgrade, sand and coarse aggregate for concrete. Total, \$13,911.21.

ALAMEDA CO. DIV. 4 ROUTE 5 SEC. C.
Bates, Borland & Ayer, Okd. \$26,155.00
Tieslau Bros. S. F. 19,535.05
Fred Leffler, S. F. 37,242.50

Engineer's Estimate, \$24,103.57

Materials furnished by State: Pipe railing, reinforcing steel, corrugated

iron pipe, Portland cement broken stone for shoulders, sand and coarse aggregate for concrete. Total, \$18,819.71.

OAKLAND AND ALAMEDA COUNTY.

LODGE HALL—2 story and base, brick and steel. Cost not stated. Oakland, Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Sons of St. George. The building will be erected at the northeast corner of 25th and Grove streets, covering a considerable ground area. The entire structure will be occupied by the owners and will be arranged for lodge rooms, offices and library. Interior finish will be of pine and hardwoods. There will be steam heat and a modern system of vacuum cleaning. Maple floor will be used in the ball room. Exterior will be faced with pressed brick and stone. Plans are complete and figures are being taken.

FACULTY CLUB—2 story and base, frame, \$12,500. Berkeley, Alameda Co., Cal. Architect, Warren C. Perry. 263½ Dwight Way, Berkeley. Owners, Faculty Club. The present building will undergo repairs and a two-story addition will be made. Interior finish will be of pine and hardwood with hardwood floors throughout. There will be a central heating system and open fire places. Mantels will be of tile or brick. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

MUNICIPAL AUDITORIUM—Granite and architectural terra cotta. Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland, Owners, City of Oakland. Bids were opened Tuesday by the Oakland City Council for the granite work and settling and for the architectural terra cotta work on the Oakland Auditorium. The California Granite Co. submitted the lowest bid for granite work and settling, also for the alternate proposition of using limestone in place of granite. N. Clark & Son were low on the architectural terra cotta. A complete list of the bids submitted will be found under the heading of Oakland and Alameda County in this issue.

FLATS—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, H. N. Turrell, 841 Walker avenue, Oakland. The building will be erected at the southwest corner of Alcatraz and Dana streets, and has been designed to contain fourteen rooms which will be arranged in two seven-room flats. Interiors will be finished in pine, blue gum and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath

rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner. The work will be done by Day Labor. All materials are now being purchased.

FLATS—2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, H. N. Turrell, 841 Walker avenue, Oakland. The building will be erected on Alcatraz avenue south of Dana street and will contain twelve rooms arranged in two six room flats. Interior finish will be of pine and redwood with hardwood floors throughout. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architect, none. Owner, P. W. Morehouse, 144 Broadway, Oakland. The dwelling has been designed for a seven-room house and will be erected on the west side of Spruce street near Prospect avenue. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, Thomas Cuthill. The dwelling will be erected on Spruce street, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwood veneer with beam ceilings and hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$12,000. Oakland, Cal. Architect, Charles Mau, Macdonough Bldg., Oakland. Owners, Misses Mary and Margaret Dunn. The dwelling will be erected at the northeast corner of Bellevue and Van Buren avenue, and has been designed to contain twelve rooms, three baths and sleeping porches. Interior finish will be of pine, redwood and hardwood. There will be furnace heat and open fire places. Mantels will be of tile and brick. Hardwood floors will be used in the living room, dining room and reception hall. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

STORES AND OFFICES—3 story and base. Class A construction, \$60,000. Oakland, Cal. Architect, C. W. Dickey. Central Bank Bldg., Oakland. Owners, Moody Estate. The building will be erected on the north side of 14th street between Clay and Jefferson streets, and has been designed with foundations and steel heavy enough to carry five additional stories. The first floor will contain stores and the upper floors will be arranged for a number of modern offices. There will be a complete steel frame, concrete or brick exterior walls and fireproof interior partitions. Interior finish will be of pine and hardwoods with metal trim and marble and tile. Metal window frames and sash are specified. There will be patent store fronts, sidewalk doors, lifts and lights. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for at once.

Bids For Oakland Granite Work In.

California Granite Co. Low For Granite and Limestone. N. Clark & Son Low on Terra Cotta.

Bids were opened Tuesday by the Oakland City Council for the granite work and settling and for the architectural terra cotta work on the Oakland Auditorium. SAN JOSE AND THE SANTA CLARA VALLEY.

RESIDENCE—2 story and base, frame, \$20,000. Hollister, San Benito Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owner, George E. Syker. The dwelling has been designed for a modern ranch house and will be erected on the Palacios Ranch near Hollister. There will be twelve living rooms, three baths and sleeping porches. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace, heat and a hot water supply. Open fire places and tile mantels will be used in the principal rooms. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the dwelling will be covered with cement plaster on metal lath. A red clay tile roof will be used. Plans are complete and figures will be taken at once.

THEATRE—1 story and base. Class C construction, \$25,000. Burlingame, San Mateo Co., Cal. Architect, Harris Allen, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected on one of the main streets in San Mateo and will have a seating capacity of about 800 people. Interior finish will be of pine with some ornamental plaster. A modern system of heating and ventilation will be installed. Special electric work will be specified. Exterior of the building will be faced with pressed brick and cement plaster. Plans are now being prepared.

POST OFFICE—1 story and base, brick and frame, \$20,000. Palo Alto, Santa Clara Co., Cal. Architects, Bakenwell & Brown, 251 Kearny street, S. F. Owners, Leland Stanford, Jr., University. The building will be erected on the Campus of the University and has been designed for a branch post office to be used exclusively by the college. Interior will be finished in pine and hardwood. Special cabinet work will be required. There will be steam heat. Exterior of the building will be faced

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

SCHOOL—2 story and base, rein-
forced concrete. \$50,000. Patterson,
Stanislaus Co., Cal. Architect, Henry
C. Smith, Humboldt Bank Bldg., S. F.
Owners, Patterson Union High School
District. Bids were opened Saturday,
April 18th, by the Board of Education
of the Patterson School District for
the construction of a two-story and
basement reinforced concrete school.
Caldwell & Son of this city submitted
the lowest general figure at \$16,950
and were awarded the contract. The
Standard Electric Time Co. was award-
ed the program clock work, and Peter-
son & Wilson were awarded the heat-
ing and ventilating. A complete list
of these figures will be found under
the heading of Fresno, Modesto, Stanislaus
and Central California.

POST OFFICE—2 story and base,
brick and concrete, \$60,000. Hanford,
Kings Co., Cal. Architect, Supervising
Architect O. Venderoth, Washing-
ton, D. C. Owners, United States Gov-
ernment. Word comes from the Super-
vising Architect's office that work-
ing drawings are nearly complete for
the new post office which is to be
erected in Hanford. The building will
be of semi-fireproof construction with
pressed brick facing trimmed with
terra cotta. Interior finish will be of
pine, hardwood and tile. There will
be steam heat and an oil burning fur-
nace. Special fixtures and cabinet
work will be installed. Plans will be
forwarded to the west for figures
about May 1st. Further mention will
be made of the work.

AUTOMOBILE EXHIBIT BUILDING
—Brick construction, \$10,000. Fresno,
Fresno Co., Cal. Architect, Eugene
Mathewson, Forsythe Bldg., Fresno.
Owners, Fresno County Agricultural
Association. The building will cover
an area of 95 by 120 feet and will be
20 feet high. Interior will be finished
in pine and hardwoods with a cement
and tile floor. Steam heat and modern
plumbing and electric work will be
installed. Patent store fronts are
specified. Exterior of the building
will be faced with pressed brick. Pre-
liminary plans are being prepared.

Patterson School Work Awarded.

Caldwell & Son of this City Awarded
General Construction, Plumbing
Goes to Peterson & Wilson.

Bids were opened Saturday afternoon
by the Board of Education of the Pat-
terson School District for the construc-
tion of a two-story and basement rein-
forced concrete school. Caldwell &
Son of this city submitted the lowest
general figure at \$46,950, and was
awarded the contract. The Standard
Electric Time Co. were awarded the
program clock work and Peterson &
Wilson were awarded the heating and
ventilating. The buildings was de-
signed by Architect Henry C. Smith. A

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

CHURCH—1 story and base, brick,
\$20,000. Stockton, San Joaquin Co.
Cal. Architect, Joe Losekan, San Joa-
quin Bldg., Stockton. Owners, Clay
Street Methodist Church, Rev. Smith,
Pastor. A new site has been secured
at the northeast corner of San Joaquin
and Clay streets and construction will
be started as soon as plans can be
completed. The new church will be
designed in the Mission style and will
contain, besides the main auditorium,
Sunday school rooms and pastor's
study. Interior finish will be of pine
and ornamental plaster. There will be
a central heating system, probably
warm air. Art glass is specified. Ex-
terior of the building will be faced
with cement plaster. A clay tile roof
will be used. Plans are now being pre-
pared.

HALL OF RECORDS—2 story and
base, reinforced concrete \$50,000. Co-
lusa, Colusa Co., Cal. Architect, Henry
C. Smith, Humboldt Bank Bldg., S. F.
Owners, Colusa County. The building
will be erected on Jay and 6th streets
on property adjoining the County Court
House. Construction will be fireproof
throughout with reinforced concrete
walls, floors and interior partitions of
hollow tile and metal bath and plaster.
Interior finish will be of pine, hard-
woods and metal trim. Metal window
sash and frames, fireproof doors and
metal shelves and furniture will be
used. There will be steam heat, a vac-
uum cleaning system and water supply.
Exterior of the building will be faced
with cement plaster. Plans are com-
plete and figures are being taken. Bids
will be opened on May 6th. An official
proposal appears in another column of
this issue.

CLASS ROOM BUILDING — 2 story
and base, brick. Cost not stated. Dav-
is, Yolo Co., Cal. Architects, Cunning-
ham & Politeo, First National Bank
Bldg., S. F. Owners, Regents of the
University of California. Plans have
been completed for a two-story class-
room building which is to be erected

at the University Farm. The structure
will cover an area of 90 by 152 feet,
and will contain, in addition to the
class rooms, a large assembly hall and
library. Interior finish will be of pine
throughout. There will be steam heat.
Special cabinet work will be required.
A slate roof will be used. Exterior of
the building will be faced with cement
plaster. Plans are complete and out
for figures. Bids will be opened by
the Regents of the University on April
30th. An official proposal appears in
another column of this issue.

SCHOOL—2 story and base, brick
and tile, \$50,000. Chico, Butte Co., Cal.
Architect, A. J. Bryan, Chico. Owners,
Oakdale School District. The building
will contain eight class rooms, assem-
bly hall, teachers' rooms and principal's
office. Interior finish will be of pine
with maple floors in the class
rooms. There will be steam heat and
an oil burning plant. Vacuum clean-
ing and program clocks will be in-
stalled. Exterior of the building will
be faced with pressed brick. Plans are
complete and separate figures are now
being taken for the general construc-
tion and heating and ventilating.
These bids will be opened on April
30th. On the same day the Board of
Education will open figures for a four-
room addition to the 4th and Cleander
Street School, and for a one-story re-
inforced concrete addition to the Chico
School. Plans can be secured from the
architect.

OFFICES—2 story and base, rein-
forced concrete. Cost not stated.
Woodland, Yolo Co., Cal. Architects,
Ward & Blohme, Alaska Commercial
Bldg., S. F. Owners, Yolo Water Co.
The building will be designed to con-
tain the company's offices on the first
floor and an attorney's offices on the
second floor. Interior will be finished
in pine and hardwood with some or-
namental iron and bronze grilles.
There will be a central heating system.
Exterior of the building will be faced
with cement plaster. Plans are com-
plete and the work will probably be
done by Day Labor.

HOTEL—4 story and base. Class C
construction. Cost not stated. Lodi,
San Joaquin Co., Cal. Architect, E. B.
Brown, Stockton. Owners, Lodi capi-
talists. The building will be erected
on a corner site and will contain, be-
sides the hotel lobby and offices, a
store and banking quarters. Upper
floors will be arranged for 65 guest
rooms and a number of baths. The
building will cover an area of 85 by
100 feet. Considerable steel will be
used. Interior will be finished in pine
and redwood. Plans provide for steam
heat, an oil burning plant, a hot water
supply and patent store fronts. Special
interior finish will be used in the
bank and fireproof vaults are also
specified. Exterior of the building
will be faced with pressed brick and
terra cotta. Plans are now being
prepared.

SCHOOL—2 story and base, rein-
forced concrete, \$200,000. Sacramento,
Cal. Architects, Shea & Lofquist,
Bankers' Investment Bldg., S. F. Own-
ers, City of Sacramento. This building
has been out for figures before but
overrun the estimated cost consider-
ably. Plans have been revised de-
creasing the height by about two feet
and lightening the construction in
some particulars. Interior finish will
be of pine throughout with maple

floors in the class rooms. Manual
training departments and domestic
science rooms are also included. There
will be steam heat and an oil burning
plant. Exterior of the building will
be faced with cement plaster. Plans
are complete and an official advertise-
ment has been published calling for
bids which are to be opened on May 1.

ACADEMY BUILDING—2 story and
basement, brick. Cost not stated. Ar-
chitects, Stone & Wright, San Joaquin
Bldg., Stockton. Owners, St. Agnes
Academy. The following bids were
opened by Father McGough for the
construction of the new academy
building to be erected for St. Agnes
Parish in Stockton. The structure will
be a two-story building and was de-
signed by Architects Stone & Wright;
James L. McLaughlin, \$55,793; Ward &
Goodwin, \$19,200; Chirhardt & Nystedt,
\$45,446; Anthony & Meyers, \$44,975;
John Kuykendall, \$14,530; F. J. Klenck,
\$43,197; James Mulcahy, \$36,984.

two elevators. All ~~other~~ rooms will have the floors and walls of. Patent store fronts and metal sash and frames are specified. Lobby and office will be finished in ornamental plaster, marble and tile. Exterior of the building will be faced with glazed brick and terra cotta. Plans are now being prepared.

SCHOOL BUILDINGS—7 1 and 2 story and base, brick. Cost not stated. Alhambra, Los Angeles Co., Cal. Architect, Norman F. Marsh. Broadway Central Bldg., L. A. Owners, Alhambra School District. The group will consist of seven buildings of one and two stories. Only three of these buildings will be erected at the present time, one of which will be the central heating plant. Exteriors will be faced with cement plaster. Detail information cannot be given at this time as only preliminary sketches have been completed.

GREEK THEATRE—Reinforced concrete construction. Cost not stated. Los Angeles, Cal. Architects, S. Tilden Norton and J. H. Wallis. Title Insurance Bldg., L. A., associated with Architects Heath & Gove, Tacoma, Wash. Owners, City of Los Angeles. The theatre will be erected in Griffith Park. A proposed science observatory is also a part of the project. The new theatre will be one of the largest Greek theatres in the United States. Complete plans will be submitted to the City Council within a week or ten days, and bids will be called for at once. Further mention will be made of the work.

Contracts Awarded.

HOTEL—1 story and base, brick and steel, \$50,000. Los Angeles, Cal. Architects, George F. Costerisan and J. F. Kavanaugh, California Bldg., L. A. Owner, J. B. Solomon. Contractor, Fred W. Siegel, Stimson Bldg., L. A. Contract price, \$50,000. Note: This contract has been taken on a percentage basis and working drawings are not yet complete.

RESIDENCE—2 story and base, frame and plaster, \$21,400. Pasadena, Los Angeles Co., Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owner, W. H. Brophy. Contractor, W. A. Taylor, 966 Elizabeth street, Pasadena. Contract price, \$21,240.

RESIDENCE—2 story and base, frame and brick, \$29,410. Oak Knoll, Los Angeles Co., Cal. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owner, Morris Cohn. Contractor, John L. Conner, 435 West 31st street, L. A. Contract price, \$29,410.

PORTLAND AND OREGON.

CITY HALL—2 story and base, brick and concrete, \$20,000. Seaside, Ore. Architect, O. G. Brubaker, Seaside. Owners, City of Seaside. The building will be designed in the classic style and will cover a considerable ground area. The first floor will contain police and fire departments, city offices and two fireproof vaults. Second floor will be arranged for the Mayor's office, council chamber and offices. There will be steam heat. Interior will be finished in pine throughout. Exterior of the building will be faced with pressed brick. A general contract will be let. Plans are complete and figures are now being taken.

THEATRE—1 story and base, brick, \$15,000. Hood River, Ore. Architect, Aaron Gould, Henry Bldg., Portland. Owner, William Baker. The building has been designed for a motion picture house and will cover an area of 50 by 100 feet. Besides the main floor plans provide for a balcony which will give the house a combined seating capacity of 650 people. Interior finish will be of pine throughout. Modern heating and ventilation will be installed. Special electric work is also specified. Exterior of the building will be faced with cement plaster. Plans will go out for figures in about one week. A general contract will be awarded.

THEATRE AND STORES—3 story and base, reinforced concrete, \$50,000. Portland, Ore. Architect, W. B. Bell, Sherlock Bldg., Portland. Owner, A. C. Ruby. The building will be erected at the corner of 5th and Burnside streets, covering an area of 80 by 100 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster and hollow tile. There will be five stories on the ground floor besides the main auditorium and entrance. The theatre will seat 650 people. A portion of the upper floors will be arranged for hotel rooms, there being 69 rooms and several baths. Interior finish will be of pine throughout with some ornamental plaster in the theatre. Plans provide for steam heat, ventilating system and a hot water supply. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

THEATRE—1 story and base, brick, \$20,000. Portland, Ore. Architects, Emil Schacht & Son, Commonwealth Bldg., Portland. Owner, Joseph Closet. The building will be erected on the corner of First and Main streets, covering an area of 50 by 100 feet, and has been designed for a motion picture house. Interior will be finished in pine and ornamental plaster. The main portion of the building will have a seating capacity of 500 people. Plans provide for one small store besides the theatre. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

HOSPITAL—3 story and base, brick, \$15,000. La Grande, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Grand Bond Hospital. Contractor, C. H. Rust, La Grande. Contract price, \$15,000.

SEATTLE AND WASHINGTON.

THEATRE AND OFFICES—6 story and base, Class A construction, \$500,000. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owner, Alex Pantages. This building will be erected on one of the principal business corners, and will cover an area of 111 by 120 feet. Construction will be class A throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. The main portion of the building will be occupied by the theatre, which will have a seating capacity of 2,000 people. Upper floors will contain twelve offices to the floor. In-

terior of the theatre will be finished in the French Renaissance style. Plans provide for steam heat, elevator service and a modern system of ventilation. Interior of the offices will be finished in pine and hardwood. Marble and tile will be used extensively. Exterior of the building will be faced with white glazed terra cotta. Plans are complete and figures are being taken.

THEATRE—3 story and base, Class A construction, \$135,000. Bellingham, Wash. Architect, Stanley Piper, Bellingham. Owners the Edison Amusement Co. A report states that this company, which is a large British Columbia firm, has secured a location in Bellingham and will start construction on a large theatre within the next three months. The exact location and other details of construction are lacking at this time. The report states however that construction will be of the class A type, and that the theatre will have a seating capacity of 1,500 people. Further mention will be made of the work.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, brick, \$50,000. Seattle, Wash. Architects, Walter & White, 1626 4th avenue, Seattle. Owner, J. N. Shaw. Contractors, Walter & White, 1626 4th avenue, Seattle. Contract price, \$50,000.

HOTEL—5 story and base, brick and steel, \$60,000. Seattle, Wash. Architect, L. B. Johnson, 2838 Evanston street, Seattle. Owner, Hotel Buttrick. Contractor, L. B. Johnson, 3838 Evanston street, Seattle. Contract price, \$60,000.

TALLEST CHIMNEY IS IN ARIZONA.

The tallest steel stack in the world is now building at Jerome, Ariz., as part of the new works there of the United Verde Copper Company. The chimney is 30 feet in diameter inside the brick lining, 30 feet 9½ inches inside of the steel shell and 400 feet 1 inch from top of foundation to top of steel. In comparison it may be stated that Liberty statue, in New York harbor, from bottom of pedestal to torch, is 205 feet in height, whereas the statue proper is only 151 feet. The unusual size of this structure, the connections for three flues, and the protection of the steel plate from the flue gases caused several interesting problems in the design.

The diameter and height of the chimney were determined by the draft calculations; the diameter and height of bell were made one-eighth of the height of the chimney, or 50 feet. The brick lining was supported on the legs of circular angles riveted to the inside of shell and spaced 15 feet apart. By this method the bearing capacity of the brick is not exceeded and any section can be replaced without affecting the others.

The wind load was assumed to be 50 pounds per square foot, or 25 pounds per square foot on the projected diameter, equal to 770 pounds per foot of height. The dead load was taken as the actual weight of steel plus the weight of brick lining, assumed at 112 pounds per cubic foot.—Engineering and Mining Journal.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the *Building and Industrial News* contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the *Building and Industrial News* containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee your satisfaction or we will refund your money.

**Combination
Boiler and Gas
Water Heater**

The

SOLUTION

To Your Hot Water
Problem.

Gives an inexhaustable supply of hot water
to any part of the home, with 30 per cent
less gas than any system ever produced.

Editorial Comment.

The battle ships and colliers steaming out of the Bay of San Francisco on the errand of war reminds us that after all the human race is much unchanged since the world began. That the law of might still obtains in the final analysis and that civil law is dependent in the end upon the capacity of the fighting men and the material wealth of the nation. The incident in Mexico is merely an incident so far as this country is concerned. What complications it may lead to no one knows but the situation is such that it looks like there will be little or no notice taken of it by the outside world.

It is a strange thing to contemplate the war footing maintained by the great powers of the world. Half of the wealth produced by the great nations is spent in maintaining preparedness for war. And one nation will not disarm because the other might take advantage of it when it was unprepared.

Mexico and the people in control in the Southern republic can only be brought to a sense of responsibility by armed intervention. It is time wasted to moralize with them. And the only question is whether or not there will be any one strong enough to maintain a stable government even after things are in a degree pacified.

Those citizens of Mexico who desire peace and security should welcome the coming of the military of the United States. For they can expect no security of life and property under present conditions. And whether or not such a protectorate is established as was established in Cuba, in any event the coming of some constructive people that will assume control and hold in subjection the bandits that infest the country will be a hundred times better than present condition.

General Huerta is reported as stating that Mexico will have 400,000 men in the field in twenty days to repel the hated Yankee invader. This statement is perhaps on a par with his previous acts. Judged by the Mexican standard of morals it is impossible for them to believe that President Wilson's action is inspired by any thing but selfish motives. So it seems like the thing that was sought to be averted has happened at last and that armed intervention on the part of the United States is all that can be expected to effect any hope of peace and protection of lives and property in that country.

What can be expected of Huerta, who assumed power by the assassination of his chief who represented the only legitimate head of the republic? What can be expected of Villa a blood thirsty bandit whose record is red with

numberless murders? And under such leaders as these are the people to rally to repel the hated Yankee, whose chief offense is an effort to compel them to be decent and respect the lives and property of the citizens of this nation.

Judged by their own standard of morals it is impossible for these men to understand the action taken by President Wilson. Criminals that they are they consider courtesy to be weakness and honor a thing to be taken advantage of when the opportunity offers. The only way to deal with them is with the nailed fist, and the sooner they are landed on, the better for all concerned.

The Sacramento Bee quotes the Highway Commissioner of Colorado as being in favor of convict labor on highways and reports that his state has secured good results from such labor. Credits are given to the convicts employed in that they have their terms reduced by meritorious work on the state's highways.

This is a sensible way to employ the criminal class. For the country can never have too many good roads and no matter what amount may be expended for this purpose there is always room for improvement. No class of laborers could have legitimate objection for thus employing convicts.

Good roads like cheap transportation benefits everybody. They increase the farmer's output and his profits. As a result the general wealth of the country is increased and improvements go on apace. They make possible the development of mines and open timber lands and any increase in the number of good roads or their improvement materially helps the whole commonwealth.

And further than that there is a good effect on the criminal classes themselves. There is some incentive for good work, and they are employed in the open air on constructive labor. On the whole the plan seems to have worked well where it has been tried and could be well followed.

General Villa is reported to have refused to fight against the United States. May this not be because he still wants to import arms and ammunition from this country since they are stopped from other sources by the United States fleet?

The old adage of the Ancients was to "Beware of the Greeks when they bring gifts." In present language it would be "Beware of the Mexicans at all times." For the only cohesion that the army of Mexicans have is loot, their only desire to fight and plunder. One thing seems to be reasonably certain and that is that events from now on will move reasonably fast and that the next year or two will witness some kind of restoration of order.

The World Importance Of Nitrogen.

The Uses of Nitrogen—Why the Earth's Supply Must Continue and Increase
—The Nitrogen Problem—The Fixation of Nitrogen.

By Herbert R. Moody, Ph.D.

Associate Professor of Analytical and Applied Chemistry, College of the City of New York.

How many of the readers of this publication have ever stopped to think what the source of all vegetable growth really is? Does the reader know that vegetation builds into its structure - metabolizes - elements, belonging to the mineral or inorganic kingdom?

In addition to the oxygen, hydrogen and carbon which plants build up into their structure and from which they obtain from water and the carbon dioxide of the air, they need in varying proportions phosphorus, potassium, sulphur, silicon, calcium, etc., and they also need nitrogen.

The earth contains certain amounts of these necessary elements and so for a period of years plants may be continuously raised in a given area, but with a steadily increasing exhaustion of the soil and the crops would be less and less bountiful. To be sure some natural replacement would occur as certain rocks or minerals, were they present, would disintegrate and furnish some of the elements—phosphorus, potassium, calcium, sulphur, etc. It is also true that parts of the last crop would be left on the ground, potato vines, beet tops, corn stalks, pumpkin vines, etc., and their constituents would be returned to the soil, but these would not wholly make up for the exhaustion of the land.

For generations it has been known that the farm must be manured or fertilized in some manner. Bone meal, bone ash, or bones had been put on to supply the phosphorus; lime to supply the calcium; and wood ashes to furnish potassium. To the soil has been added stable and hen manure, the contents of the outhouse and garbage heap, etc. In such ways much of the material that the plants had extracted from the earth had been returned. Still there was exhaustion. In the last generation the discrepancy between what was taken out and what was returned has increased. Why? Because what might be called "The Cycle Life" of the farm has been destroyed. No longer is all the hay that is raised on a farm eaten by the cattle there. No longer are all the vegetables that are raised on the farm eaten on the place or even in its locality. No longer, then, is a large percentage of the corresponding garbage and excreta returned to the soil of any particular farm. Today population is crowded into cities, whence all garbage must be carried away immediately and all excreta must be water carried to the sea.

Tremendous loss is due to the sewage item alone. Sir William Crookes estimates that the waste fertilizing material lost to England alone through water carried sewage amounts to the almost incredible sum of \$80,000,000. Such waste as this, together with increased needs of man, has made necessary a new industry—the fixation of nitrogen.

In early days, with a virgin soil had a chance to return much of the plant-absorbed material to the ground, the exhaustion was not noticed, but today the need of artificial fertilizers is seriously increasing. The following figures show the vital necessity of bringing material from afar that the land may be kept fertile. French crops use annually (1906) 600,000 tons of nitrogen. If all stable manure were returned to the soil, there would be but 327,000 tons of nitrogen returned (and all does not go back). In addition to the foregoing, note that France used 230,000 tons of Chili nitre, which is equal to 31,200 tons of nitrogen. Now the deficiency of 273,000 tons (600,000 less 327,000) is thus only 11 plus per cent made up by nitre. Hence there is impoverishment even with a supply of nitre to draw upon. It was estimated that thirty years from that date the average acreage yield of 12.7 bushels of wheat would have to be increased to 20 bushels. To make this increase per acre of 7.3 bushels would require the addition of one and a half hundred weight of nitre, per acre, per year. The acreage for wheat at that time was 163,000,000. On these were raised 2,670,000,000 bushels. To raise this to the required 3,260,000,000 bushels would require 12,000,000 tons of nitre.

The three principal ingredients of artificial fertilizers are phosphorus, potassium and nitrogen. It has always been easy to obtain a sufficient supply of both phosphorus and potassium and their production forms the basis of two great industries.

The phosphorus is supplied by bones, from which there is a never failing partial supply of phosphorus, and also by phosphate rock, which in many parts of the world occurs in apparently inexhaustible quantities. Both bones and phosphate rock are largely composed of phosphate of calcium and a simple treatment renders it soluble in plant juices—a necessary step if they are to be used to the best advantage as fertilizers.

The potassium is obtained from salts of potassium which occur in large deposits in Germany. A little of it is also being extracted on our Pacific slope, where in a California desert it is reported to have been found in commercial quantities. On the west coast it is extracted from kelp, which is dredged up from the ocean bed.

Nitrogen, the third ingredient, offers a more perplexing problem. It is chemically lazy; chemists call it "inert." Its principal use in the atmosphere is to dilute the oxygen. In pure oxygen, fire once kindled would be unlikely to go out until all was consumed. Even iron burns in oxygen. A small animal breathing pure oxygen wears out his life in a short time.

It is this property of inertness which keeps nitrogen from easily becoming a part of the plant structure. Before it can be used the element must be chemically combined, unless the plant be of one specific variety. This plant

family can absorb free nitrogen and the growth and decay of its members has been one way in which combined nitrogen has been stored up in the earth. The other contributing cause has been lightning, which is able to cause the nitrogen and oxygen of the air to combine chemically. By these two means a store of what is called "available nitrogen" has been formed in the earth. All varieties of plants could draw from this store and animals ate the vegetation and so incorporated nitrogen into their structure. Now this nitrogen combined in vegetable structure, together with such salts as nitrates and salts of ammonia, is "available nitrogen" since all these forms can be the starting point of the so-called "nitrogen cycle." This cycle consists in the change of animal or vegetable nitrogenous matter into ammonia, the ammonia into nitrous acid and this later into nitric acid. As a salt of nitric acid—a nitrate, the nitrogen may be absorbed by plants. Then the nitrogen in the plant may go through the foregoing changes and the cycle repeated.

Either vegetable or animal matter if piled up and kept moist and somewhat warm, through lack of radiation, will ferment, as it is ordinarily called, many are familiar with the odor of ammonia in a stable, that is the first step in the cycle. Doubtless many have noticed a white efflorescence on stable manure or on the stable wall against which the manure has been piled. That is "nitre"—a nitrate of potassium or calcium or sodium, and it is the result of the combination of the third product of the cycle with whatever base happens to be at hand. This is the finish of the cycle—nitrogenous matter in the manure, ammonia forms from it, nitrous acid from the ammonia and nitric acid (in the nitrate) from the second product. Plants can absorb this final product and then the nitrogen can go through again all the stages mentioned.

No if we kept all that was raised on a farm upon that farm, returned all waste, buried our family and the animals in the fields—theoretically at least, no nitrogen bearing matter need be added to the soil. It has already been seen that old fashioned farm life could not wholly accomplish this and modern life cannot do it as well, so we must replenish or starve in the future.

A remarkable example of complete destruction of fertility is shown in Asia Minor and the Holy Land. Innumerable wars and persecutions have prevented systematic fertilization, all plant food has been taken out and little or none returned to the land. As a result much of that section has been reduced to the condition of a desert. Professor Andrew D. White estimates that in the world "a total area equal to that of a first-class European country has been impoverished to such an extent that it is doubtful if anything but a geological change can ever restore it to agricultural use."

We have now seen that enormous quantities of nitrogen combined in organic material, or as ammonia salts or as salts of nitric acid are needed to keep the fields as productive as they were originally. And still greater quantities are needed to raise the increased crops necessary for the increased population. Besides this the world is using enormously increasing quantities of nitric acid compounds for explosives both or war-like preparations and for peaceful arts, such as mining, quarrying, and excavating. In addition our dye industry has been entirely changed since the last generation. Formerly we relied on animal and vegetable colors; now we produce them from aniline. A whole class of these new dyes are called "azo" dyes from the fact that they contain nitrogen in their structure.

By this time it must be evident why we speak of the nitrogen problem.

Where are we to find the sources of nitrogen which are needed for all of the foregoing purposes?

There are \$1,000,000,000,000 tons of nitrogen in air over the United States and naturally a proportionally greater weight over the rest of the world. But nitrogen, as has been said, must be induced to join with some other element or elements before it is useful. With this one exception: Pod-bearing plants were long known to flourish where other crops failed. Recall the beach-pea and think how little nourishment it can get from the sand in which it grows. For some time this was not understood. But recently improved bacteriological methods showed that on the roots of such plants colonies of bacteria lived and "fed" the atmospheric nitrogen to the plant. Thus the presence of much "available" nitrogen in virgin soil is accounted for—stored up in past ages through the life and decay of such plants. The government (and business houses also) now provide cultures of these nitrogen fixing bacteria and soils in which they are not naturally present may be impregnated with them.

For all other plants, nitrogen must be provided either in a form which will change to nitrates, or in the nitrates themselves. Before we begin to see how such compounds can be made by electro-chemistry let us see what sources there have been before the recently devised processes of "fixing the nitrogen of the air" were invented.

Nitrogen, as has been already said, is returned to the soil, to some extent, in stable manure and household refuse. In addition we have guano (bird excrement from rainless islands off South America), animal refuse, scrap skin, hair, butchers' scrap, blood, tannage, fish scrap, etc. These are used in large quantities. This country produced 18,000 tons of dried blood in 1910, costing \$567,900, and used even more. It used 47,000 tons of guano, costing \$822,500. Each year there are 703,525,500 pounds of food fish caught in this country. Twenty-five per cent of this is waste. So there is produced in the United States alone 175,881,375 pounds of fish scrap. This, too, is an excellent source of nitrogen.

Coal, too, is a source of nitrogen; it contains 2%. When coal is distilled to make coal gas most of this nitrogen appears as ammonia or its salts. In this industry, and the allied coke in-

dustry, there have been unbelievable wastes. Formerly little attempt was made to catch the nitrogen compounds, although the process is simple. The following figures will give an idea of how much nitrogen was wasted. The figures were compiled by Professor Charles Parsons.

In 1911 over 406,000,000 tons of bituminous coal were mined in this country. In it was \$160,000,000 worth of recoverable nitrogen and yet only \$3,800,000 worth was recovered. Pennock states that from 1893 to 1910 enough coal was coked with entire waste of the nitrogen in it to have yielded 9,315,000 tons of ammonium sulphate worth \$558,900,000.

Added to these sources of nitrogen has been "saltpeter" formerly made almost entirely in tropical, more or less rainless countries. There potassium nitrate was cultivated by spontaneous or "assisted" action of bacteria upon nitrogenous organic matter. Potassium nitrate was the product of this action.

The greatest source of all is the famous Chili nitrate field. Here a geological upheaval cut off an arm of the sea. It is a rainless country. The water evaporated and left a mass of organic matter, salts of sodium and other metals. The nitrogenous organic matter went through the "cycle," with which we are familiar, and sodium nitrate was the result. This material is found in a desert 430 miles long and of variable width. The deposits vary in depth from a few inches to 16 feet. A simple process of solution, filtration and crystallization gives us Chili nitrate, more recently indispensable. The new processes make it possible for us to view now with some complacency the diminishing supply from Chili.

This substance was first excavated in 1823. A ship load of it could not be sold in England and had to be thrown away. In 1830, 1,000 tons were produced; in 1870, 150,000 tons in 1911, 2,400,000. The world paid \$100,000,000 for Chili nitrate in 1911, and this country paid \$20,000,000 for its share. It is expected that in 1915 the world will consume 10,000,000 tons, which will be worth \$150,000,000. This product constitutes 80% of Chili's export and furnishes 60% of its government's revenue.

Authorities differ as to the length of time this wonderful source of nitrogen will last. A Chilean commissioner in 1907 placed it at centuries from that time. The Nitrate Prompaga Association place it at 50 years. Others set the date of exhaustion at 1940.

The foregoing will have shown how much available nitrogen is needed and how inadequate the supply soon will be. Is it any wonder that chemists have been working on, and are still busy solving this great problem of making available the inexhaustible, but inert, nitrogen which is all about us?

Power was the crucial factor, and in the next issue we shall show how by some of the greatest engineering feats of modern times power has been transformed into a proper form of energy to act upon the nitrogen and make it inert as it is, combine and so become available.

This is chemical fairy land. These industries are transforming quiet,

lonesome valleys into bustling, humming industrial centers. They are replacing a few isolated farmers' huts by modern beautiful cement dwellings placed along orderly streets. They are doing more, they are saving our descendants from actual starvation which would surely come if no means had been found to return nitrogen to the land.

The Nitrogen Problem is being solved!

Eight years have elapsed since the great conflagration of 1906. Perhaps the greatest fire in the world's history it has been followed by the greatest rebuilding period. And that under labor conditions that obtained nowhere else in the world. The great monuments of history, the pyramids and temples, the great wall of China and the Taj Mahal have been the products of slave labor. Behind the splendid architecture is blood of thousands of human beings. But in the structures of San Francisco is the labor of mechanics, who have received the wage for their skill. So that in the rebuilding of the city the major part of the money has gone to the homes of the laborers, the skilled artisans and the mechanics. The past eight years has witnessed the expenditure of hundreds of millions of dollars in the rebuilding of our city. While it is not altogether what it might be, still it is a city of which we may well be proud.

EXPOSITION NOTES.

Henry Bacon, one of the leading architects of New York, is now on his way to San Francisco to superintend the finishing of the great Court of the Four Seasons, which will be the first of the five courts to be completed.

Plans for the pavilions of Massachusetts and the Philippines were approved March 31 and the actual work will begin in a few days. Idaho's building is almost completed and New York probably will have the distinction of having the second state pavilion to be finished. Honduras has completed her pavilion, which is on a site commanding the foreign and state areas.

Paint From Beans.

From Manchuria comes the invention of a new paint that is both waterproof and fireproof in addition to being cheap and durable. "Solite" is the name of this new product, and three months after its introduction it found a ready market in Shanghai, Harbin and Tientsin. It is reported that the Japanese navy is testing it with a view to adoption. "Solite" is made from bean oil which is produced in tremendous quantities in Manchuria.

An 1,800 Years Old Egg.

An egg which cannot be said to be fresh is one which dates from 1,800 years back. It was found during recent excavations made at Nikopolis, in the tomb of an 11 months old child, Sextus Rufus. Already more than 80 tombs have been explored by the archeological service in this ancient city, which was built to commemorate the battle of Actium. Among the finds are a quantity of gold jewels, also pottery and lamps ornamented with elegant figures in relief.—Scientific American.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will send such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 2 story and base, frame. Cost not stated. Architect, M. J. Welsh, 22nd and Mission streets. S. F. Owner, L. Cella. The building will be erected at the corner of First avenue and Hugo street and has been designed to contain four suites of four rooms each with bath. Interior finish will be of pine with some elm panels and hardwood floors. There will be an automatic water heater in each apartment. Bath rooms will have tile wainscot and composition floors. Wall beds are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house alterations, 2 story, frame, \$10,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, J. H. Diekmann. The present building located at the corner of California and Laguna streets will be altered from a flat building into a modern apartment house. When complete there will be eight apartments of two and three rooms. The work will call for new interior partitions, interior finish, hardwood floors, plastering, plumbing, electric work and painting. Exterior of the building will also be refinished. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 3 story and base, brick and frame, \$18,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, C. F. Renz. The building will be erected on Alcatraz avenue and has been designed to contain stores on the first floor and a number of modern apartments on the second and third floors. Interior finish will be of pine and redwood with some elm panels. There will be steam heat and a hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Apartment house, 2 story and base, brick, \$17,000. Architect, M. J. Welsh, 22nd and Mission streets, S. F. Owner's name withheld. The building will be erected on Macdonald avenue near 10th street, and has been designed to contain stores on the first floor besides the entrance to the apartments. Upper floors will contain about 30 rooms arranged in three and four room suites with baths. Interior will be finished in pine throughout. There will be steam heat and a hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SEATTLE, WASH.—Apartment house, 5 story and base, brick, \$100,000. Architect, John Graham, Lyon Bldg., Seattle. Owner, D. R. McKay. The building will be erected at the

southeast corner of 7th avenue and Pike street and will cover an area of 80 by 120 feet. Interior has been designed to contain seventy-six suites of two and three rooms with baths. All apartments will have wall beds. Interior finish will be of pine and hardwood. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owner, John Bayles. The building will be erected at the southeast corner of Third avenue and Hugo street, having a frontage of 35 feet and a depth of 86 feet. There will be a total of twelve suites of three and four rooms. Interior will be finished in pine with some elm panels and oak floors. All suites will have wall beds and private bath rooms. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and subfigures are being taken on the various parts of the work.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$24,000. Architect, E. H. Denke, 1317 Hyde street, S. F. Owners, Mrs. and Dora Kollander. The building will be erected at the southeast corner of Franklin and Sacramento streets, covering an area of 39½ feet by 75 feet. There will be a total of six apartments of three and four rooms with private baths. Interiors will be finished in pine, redwood and elm. Oak floors will be used in the principal rooms. Plans provide for steam heat and a hot water supply. Portable vacuum cleaners will be installed. All apartments will have wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans have been revised and new figures will be called for at once.

SANTA MONICA, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, Class C construction. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Thomas Higgins. The building will be erected at the corner of Second and Arizona streets, covering an area of 75 by 100 feet. There will be a total of 75 rooms arranged in two and three room suites. Interiors will be finished in pine, redwood and some hardwood veneer. Oak floors will be used. There will be steam heat, a vacuum cleaning system, hot water supply and wall beds. All suites will have private bath rooms. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, Class C, \$15,000. Architect, L. T. Mayo, Van Nuys Bldg., L. A. Owner, Mrs. Dora Reddin. Contractor, L. T. Mayo, Van Nuys Bldg., L. A. Contract price, \$15,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$30,000. Architects, Garrett & Farrell, Currier Bldg., L. A. Owner, H. A. Pierce. Contractors, Atlas Construction Co., Grant Bldg., L. A. Contract price, \$30,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, Class C construction, \$30,000. Architect, L. L. Jones, Central Bldg., L. A. Owner, Herman Gutterman. Contractors, W. W. La Vanway and Adams, Maryland Apartments, L. A. Contract price, \$30,000.

BANKS.

SACRAMENTO, CAL.—Bank, 1 story and base, reinforced concrete, \$25,000. Architects, Seadler & Hoen, Forum Bldg., Sacramento. Owners, Oak Park Branch of the Sacramento Bank. The building has been designed in the classic style and will be practically fireproof in construction. Reinforced concrete floors and walls and metal lath and plaster interior partitions are specified. Interior will be finished in pine, hardwoods and ornamental plaster. There will be steam heat, ornamental iron and bronze and special bank fixtures. Exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Bank and offices, 7 story and base, Class A construction. Cost not stated. Architects, Reid Bros., California-Pacific Bldg., S. F. Owner, Hulett C. Merritt. The building will be erected at the northwest corner of 8th and Spring streets, covering an area of 60 by 115 feet. There will be a number of stores in the first floor, banking rooms on the second floor and offices on the upper floors. The entire seventh floor will be occupied by the Merritt Co. Construction will be of steel and brick with reinforced concrete floors and roof slabs. The stories will be considerably higher than usual and the building will have an extreme height of 115 feet. Interior will be finished in pine, hardwoods, metal trim and marble. There will be special bank equipment and vaults. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BRIDGES AND DAMS.

VALLEJO, SOLANO CO., CAL.—Bulkhead work, crushed rock and earth, \$100,000. Engineer's name not given. Owners, City of Vallejo. Bids are now being called for on the second section of bulkhead to be erected in Vallejo. Plans and specifications can be secured from the City Clerk. Bids will be opened on May 1st.

REDDING, SHASTA CO., CAL.—Bridge, steel and concrete, \$50,000. Engineer, A. V. Saph. Redding. Owners, Shasta County. The City Trustees of Redding, Shasta County, formally approved plans for the Reid Ferry bridge which were awarded by Engineer A. V. Saph. Approval of the State Highway Commission has also been given. The bridge will cost in the

neighborhood of \$50,000, leaving the sum of \$10,000 for construction of approaches. An official notice will be published at once.

CHURCHES.

SAN FRANCISCO—Church, 2 story and base. Class C construction, \$50,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Second Church of Christ, Scientist. The building will be erected on property at the corner of Dolores and Cumberland streets, and has been designed in the classic style. There will be a large main auditorium seating 900 people, study rooms and Sunday school rooms. Interior finish will be of pine with ornamental plaster. Plans provide for a central heating system, probably steam heat. Art glass windows will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

McMINNVILLE, ORE.—Church, 2 story and base, hollow tile construction, \$25,000. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Roman Catholic Church of McMinville. The building will contain an auditorium seating 600 people, vestry and Sunday school rooms. Interior finish will be of pine throughout. There will be steam heat. Some ornamental plaster and art glass will be used. Exterior of the church will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

COURT HOUSES.

SAN FRANCISCO—City Hall, 4 story and dome. Class A construction, \$4,500,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans for the plastering, metal lath and metal furring work to be done in the new City Hall have been completed and have received the approval of the Board of Public Works. Plans are now out for figures and bids will be opened on May 6th.

FACTORIES & WAREHOUSES.

OAKLAND, CAL.—Warehouse, 2 story and base, brick and reinforced concrete, \$40,000. Architect, Walter D. Reed, Oakland Bank of Savings, Oakland. Owners, W. P. Fuller & Co. The building will cover a considerable ground area and will be erected at the southwest corner of Third and Jackson streets. There will be cement floor, elevator service, metal window sash and frames. Modern plumbing and electric work will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owners who are taking figures on the work.

LOS ANGELES, CAL.—Warehouse, 4 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. J. S. Van Nuys. The building will be erected at the corner of Pico and San Pedro streets, covering an area of 70 by 170 feet. Construction will be of the extra heavy type with brick walls and mill constructed interior. There will be elevators and spiral chutes. Metal window sash and frames are

specified. Exterior of the building will be faced with stock brick. Plans are now being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Warehouse, 3 story and base. Class C construction, \$40,000. Architect, none. Owner, Moritz Thomsen. Contractor, Joseph F. Rhodes, Central Bldg., L. A. Contract price, \$10,000.

FIRE HOUSES AND JAILS.

RED BLUFF, TEHAMA CO., CAL.—Jail building, 2 story and base, reinforced concrete, \$25,000. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Tehama County. Plans for this building have been revised and new figures will be called for at once. The building will be of fireproof construction, and, besides the jail proper, will contain the office of the Sheriff and other officials. There will be separate wards for the male and female prisoners. Plans provide for steam heat and a hot water supply. Interior will be finished in pine. Special jail equipment will be used. Exterior of the building will be faced with cement plaster. Plans are to be refigured at once.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, A. P. Fuhman, 7 Shepard street, S. F. The building has been designed to contain two flats of five rooms each, and will cover an area of 20 by 44½ feet. The building will be erected on the west side of Codman street south of Washington. Interior finish will be of pine and redwood. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

Bath rooms will have tile wainscot and floors and will be equipped with showers. Automatic water heaters will be installed. Exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base, reinforced concrete, \$110,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, City and County of San Francisco. Plans for the new Cooper School, which is to be erected at the southwest corner of Jones and Lombard streets, have been completed and are now out for figures. The building will be of reinforced concrete with concrete floors, stairways and corridors. Metal lath and plaster interior partitions will be used. There will be steam heat, vacuum cleaning and program clocks. Interior finish will be of pine with maple floors in the class rooms. Exterior of the building will be faced with cement plaster. Bids will be opened on May 6th by the Board of Public Works. Separate bids are being taken for the general construction, heating, ventilating, plastering and metal lath and furring, plumbing, gas fitting and electric work. Official proposals appear under another heading in this issue.

RIO VISTA, SOLANO CO., CAL.—School, 2 story and base, Class C construction, \$45,000. Architect, Erwin Schaefer, Plaza Bldg., Oakland. Owners, Rio Vista High School District. The building will contain eight class rooms, principal's office and teachers' rooms. There will be a large assembly hall. Interior finish will be of pine

with maple floors in the class rooms. Plans also provide for steam heat, oil burning furnace and vacuum cleaning. Exterior of the building will be faced with pressed brick. Working drawings are complete and figures will be called for as soon as bonds are sold. Further mention will be made of the work at that time.

CERES, STANISLAUS CO., CAL.—School, 1 story and base, reinforced concrete. Cost not stated. Architect, William H. Weeks, 75 Post street, S. F. Owners, Ceres School District. The building has been designed to contain seven class rooms, assembly hall, principal's office and library. Interior finish will be of pine and hardwood with maple floors in the class rooms. There will be steam heat, oil burning furnace, and a modern system of ventilation. Program clocks will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken. Bids close on May 2nd. Plans and specifications can be secured from the architect.

ROSEVILLE, PLACER CO., CAL.—School, 1 story and base, frame, \$15,000. Architect, Erwin Schaefer, Plaza Bldg., Oakland. Owners, City of Roseville. The building will contain four standard sized class rooms, library and principal's office. Interior will be finished in pine throughout. Maple floors will be used in the class rooms. There will be a central heating system, probably warm air. A modern system of ventilation will also be installed. Exterior of the building will be covered with rustic. Plans are complete and bids will be called for shortly. Further mention will be made at that time.

ROSEVILLE, PLACER CO., CAL.—School, 1 story and base, Class C construction, \$40,000. Architect, Erwin Schaefer, Plaza Bldg., Oakland. Owners, City of Roseville. The building will contain six class rooms and assembly hall. Interior will be finished in pine and redwood with maple floors in the class rooms. There will be steam heat and modern ventilation. Program clocks will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

LOS ANGELES, CAL.—School, 3 story and base, Class A construction, \$40,000. Architect, Arthur B. Benton, 114 North Spring street, L. A. Owners, Florence Crittenton Home for Girls. The building will cover an area of 60 by 100 feet and will be of reinforced concrete. Concrete walls, floors and roof slabs will be used. Interior will be arranged for class rooms, library, sewing rooms, wards and single rooms. There will be kitchens and dining rooms. Interior finish will be of pine and hardwood. There will be steam heat and modern plumbing. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

WILLOWS, GLENN CO., CAL.—School, 2 story and base, reinforced concrete, \$52,026. Architect, William H. Weeks, 75 Post street, S. F. Owners, Willows Union High School District. Contractor, W. R. Zumwalt. Contract price, \$52,026.

SEWERS, STREET WORK AND WATER SYSTEMS.

WOODFORD, KERN CO., CAL.—Rock crusher equipment. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Plans for a large rock crushing plant which is to be installed at Woodford have been completed by the County Engineer and are now out for figures. The plant is to be electrically equipped and is to have an output of 1,000 tons per day. The State Highway Commission has agreed to take nearly the entire output of the plant. Bids are now being taken and will be opened on May 12th. Plans can be secured from the County Clerk at Bakersfield. An official proposal appears in another column of this issue.

SAN RAFAEL, MARIN CO., CAL.—Incinerator plant. Cost not stated. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. The City Council of San Rafael rejected all bids for the construction of the new incinerator to be erected in that city. Z. O. Field of San Jose presented the lowest figure. Plans are to be revised and new bids will be called for shortly.

Contracts Awarded.

ST. HELENA, NAPA CO., CAL.—Street electroliters. Cost not stated. Engineer's name not given. Owners, City of St. Helena. Contractors, Napa Valley Electric Co. Contract price, \$3,108.

STORES.

SAN FRANCISCO—Stores and lofts, 6 story and base, brick and steel, \$75,900. Architect, Alfred Henry Jacobs, 110 Sutter street, S. F. Owner, Charles Schlessinger. The building will be erected on the south side of Market street west of Second, and will have a frontage of 30 feet by a depth of 120 feet. There will be stores on the first floor and upper floors will be arranged for lofts. There will be a steel frame, brick exterior walls and metal lath and plaster interior partitions. Interior finish will be of pine throughout. Plans provide for elevator service, steam heat and metal window sash and frames. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are complete and figures are being taken.

OAKLAND, CAL.—Stores and offices, 2 story and base. Class C construction. Cost not stated. Architect, William Wilde, Albany Bldg., Oakland. Owners, B. and B. Cianciarulo. The general contract for this building has already been let and the architect is now taking figures for the heating, ventilating and plumbing. The structure will be erected on Broadway between 17th and 18th streets, and has been designed to carry five additional stories.

SAN JOSE, SANTA CLARA CO., CAL.—Stores, 1 story and base, brick, \$7,000. Architect, none. Owners, J. F. Pryle & Son, San Jose. The building will be erected at the northwest corner of Martha and 5th streets, and will contain two modern stores. Interiors will be finished in pine. There will be modern plumbing and electric work. Patent store fronts will be used. Ex-

terior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, reinforced concrete, \$68,544. Architects, Train & Williams, Exchange Bldg., L. A. Owner, J. F. Hosfield. Contractors, Barber-Bradley Construction Co., 1824 East 15th street, L. A. general construction. Contract price, \$68,544.

LOS ANGELES, CAL.—Office building, 8 story and base. Class A construction, \$100,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, W. G. Kerchoff. Contractor, Weymouth Crowell, Story Bldg., L. A. general construction, \$100,000 Independent Sewer Pipe Co., 233 South Los Angeles street, L. A., terra cotta work; Foulkes Electric Co., Van Nuys Bldg., L. A., electric work.

THEATRES.

PORTLAND, ORE.—Theatre, 2 story and base. Class A construction, \$100,000. Architect, Aaron H. Gould, Henry Bldg., Portland. Owner, M. G. Winston. The building will be erected at the corner of Park and Stark streets, covering an area of 100 by 100 feet. Construction will be fireproof throughout with a complete steel frame and reinforced concrete walls and floors. The main auditorium will have a seating capacity of about 2,000 people. Plans also provide for stores and storage space. Interior partitions will be of hollow tile and metal lath and plaster. Interior finish will be of pine and hardwoods. Ornamental plaster, marble and tile will also be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Theatres and stores, 1 story and base, frame and plaster, \$15,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Scott street near the Exposition grounds and will cover an area of 60 by 100 feet. There will be three stores, a saloon and motion picture theatre. Interior of the building will be finished in pine with ornamental plaster in the theatre. Special electric work will be required. Patent store fronts are specified. Exterior of the building will be covered with cement plaster on metal lath. Working drawings are complete and figures will be taken in about a week.

BRAWLEY, IMPERIAL CO., CAL.—Theatre and offices, 3 story and base, brick and steel, \$25,000. Architects, P. W. Ehlers and A. W. Riewe, California Bldg., L. A. Owner, J. L. Manahan. The building will cover an area of 104 by 125 feet and has been designed to contain three stores and the theatre on the first floor. Upper floors will be arranged for a large number of modern offices. Interior finish will be of pine and redwood. Metal lath and plaster interior partitions will be used. Plans provide for steam heat and a hot water system. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

The amount of bond for faithful performance of contract has been fixed at \$1,500.00.

formance of contract has been fixed at \$800.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works, RICHARD J. CLINE, Secretary.

PROPOSALS FOR ELECTRICAL EQUIPMENT.

ELECTRICAL APPARATUS—U. S. Reclamation Service, Los Angeles, Cal.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Los Angeles, Cal., until 2 p. m. May 11, for furnishing electrical apparatus for the Okanogan project, Wash. For further particulars address U. S. Reclamation Service, 695 Federal Building, Los Angeles or Washington, D. C. O. H. ENSIGN, chief electrical engineer.

PROPOSALS FOR VALVES.

BALANCED VALVES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Los Angeles, Cal., until 2 o'clock p. m. May 7, 1914, for furnishing 20 balanced valves for the Arrowrock Dam, Boise project, Idaho. For particulars address the U. S. Reclamation Service, 695 Federal Building, Los Angeles, Cal., or Washington, D. C. MORRIS BIEN, acting director.

PROPOSALS FOR EXCAVATING.

EXCAVATING—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Montana, until 2 o'clock p. m. May 12, 1914, for the excavation of the auxiliary spillway channel and the construction of the North Dike, Vandalla Division, involving approximately 760,000 cubic yards of material. The work is situated on the north side of Milk River adjacent to the main line of the Great Northern Railway, about three and one-half miles from Vandalla Station and adjacent to the U. S. Reclamation Service's siding at Vandalla Dam. For particulars address the United States Reclamation Service, Washington, D. C., or Great Falls, Mont., or Malta, Montana, F. H. NEWELL, director.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed bids will be received by the Board of Trustees of Ceres High School District of Stanislaus County, State of California, at the office of the County Superintendent of Schools at Modesto, until 2:30 o'clock p. m. Saturday, May 2nd, 1914, for the construction and equipping of a high school building to be built at Ceres, California, according to plans and specifications prepared for the same by W. H. Weeks, registered architect, of 75 Post Street, San Francisco, California.

Bids will be received separately for furnishing and installing the heating and ventilating, vacuum cleaning, and program clock systems; and bids will also be received for the general contract with alternate propositions for plans and specifications can be seen during office hours at the offices of Dr. S. W. Cartwright of Ceres, or Miss

Flourence Briggs, County Superintendent of Schools at Modesto, or at the office of the architect, W. H. Weeks, 75 Post Street, San Francisco, California.

A cash deposit of twenty dollars will be required from all prospective bidders on all copies of plans and specifications loaned out, as a guarantee of good faith and of the return of the same.

Each bid must be accompanied by a certified check on some responsible California bank in a sum not less than five (5) per cent of the amount of the bid made payable to E. C. Barnes, clerk of the High School Board.

The Board of Trustees expressly reserves the right to reject any and all bids.

By order of the Board of Trustees of the Ceres High School District of Stanislaus County, State of California.

E. C. BARNES, Clerk.
DR. S. W. CARTWRIGHT.
J. B. WING.

PROPOSALS FOR WIRE SCREENS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 13th day of May, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The Furnishing and Installing of Wire Screens in the Main Group Buildings of the San Francisco Hospital, located on Potrero avenue and Twenty-second street.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within one hundred and twenty (120) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed as follows:

Proposition No. 1—\$1,000.00.

Proposition No. 2—\$2,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

RICHARD J. CLINE, Secretary.

COUNTY OF KERN.

STATE OF CALIFORNIA.

SEALED PROPOSALS addressed to the Board of Supervisors and endorsed "Proposals for Furnishing and Installing a Crushing Plant at Keene, near Woodford on the Southern Pacific Railroad" will be received by the Board of Supervisors of Kern County at their office in the County Court House until two (2) o'clock p. m. on May 12th, 1914, and at that time and place will be publicly opened and read.

Competitive designs and bids to be submitted by contractors for an electrically equipped plant of 1000 tons capacity in 8 hours.

An outline of general requirements and contour maps of the quarry site may be obtained at the office of the Kern County Highway Commission, Bakersfield, California. All proposals must specify each part of the equipment, giving manufacturer's name and catalog identification and must give price proposed both in writing and in figures signed by the bidder with his address.

Each proposal must be accompanied by a certified or cashier's check amounting to at least ten (10) per cent of the amount of the bid payable to the Chairman of the Board of Supervisors, such check to be returned to the bidder unless forfeited under the conditions herein stipulated.

A bond will be required for the faithful performance of the contract in a sum equal to one-half (1/2) of the amount of the contract, and a further bond in a sum equal to one-quarter (1/4) of the amount of the contract will be required for the security of material-men and laborers. The sureties on both bonds must be approved by the Board of Supervisors.

The bidder to whom the contract may be awarded will be required to

appear at the office of the said Board of Supervisors with the sureties offered by him and execute a contract within (10) days after it is awarded to him. In case of failure or neglect to do so, he may be considered as having abandoned it, and the check accompanying the proposal may, at the option of the Board of Supervisors be forfeited to the County of Kern.

All bids will be compared on the basis of excellence of design and materials as well as the amount for which it is proposed to install the plant.

The Board of Supervisors reserves the right to reject any and all bids.

BOARD OF SUPERVISORS OF KERN COUNTY.

By H. A. Jastro,
Chairman.

PROPOSALS FOR RECLAMATION WORK.

RECLAMATION WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Montana, until 2 o'clock p. m. May 2, 1914, for the excavation of the auxiliary, spillway channel, and the construction of the North Fork Vandalia Diversion, involving approximately 160,000 cubic yards of material. The work is situated on the main line of Milk River adjacent to the main line of the Great Northern Railway, about 3 1/2 miles from Vandalia station and adjacent to the U. S. Reclamation Service's siding at Vandalia Dam. For particulars address the United States Reclamation Service, Washington, D. C., Great Falls, Montana, or Malta, Montana. F. H. NEWELL, director.

PROPOSALS FOR CONSTRUCTING CANALS.

CANAL WORK—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Orland, Cal., until 2 o'clock p. m. May 9, 1914, for the construction of about 55 miles of distribution canal and laterals. The work involves the excavation of about 110,000 cubic yards of material and is situated near the town of Orland, Cal. For particulars address the United States Reclamation Service, Washington, D. C., Portland, Ore., or Orland, Cal. F. H. NEWELL, director.

PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR 810—Proposals for the purchase of Scrap Chain, Malleable Iron, Steel, Wrought Iron and Steel offered for sale by the Panama Canal and which is no longer needed.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. May 7, 1914, at which time they will be opened and read publicly. Blanks and general information relating to this circular (No. 810) may be obtained from this office or the office of the assistant purchasing agent, 1036 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 4th day of May, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and installing of lighting fixtures in the main group of buildings of the San Francisco Hospital.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made,

and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within ninety (90) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Board of Public Works, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

RICHARD J. CLINE, Secretary.

PROPOSALS FOR YARD WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 6th day of May, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The Yard Work of the San Francisco Hospital, located on Potrero avenue and Twenty-second street.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within time limits as provided in specifications.

The amount of bond for faithful performance of contract has been fixed at \$12,500.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

RICHARD J. CLINE, Secretary.

NOTICE TO CONTRACTORS.

COUNTY OF KERN, State of California.—Sealed proposals addressed to the Board of Supervisors and endorsed "Proposals for Furnishing and Installing a Crushing Plant at Keene, near Woodford on the Southern Pacific Railroad" will be received by the Board of Supervisors of Kern County at their office in the County Court House until two (2) o'clock p. m. on May 12th, 1914, and at that time and place will be publicly opened and read.

Competitive designs and bids to be submitted by contractors for an electrically equipped plant of 1000 tons capacity in 8 hours.

An outline of general requirements and contour maps of the quarry site may be obtained at the office of the Kern County Highway Commission, Bakersfield, California. All proposals must specify each part of the equipment, giving manufacturer's name and catalog identification and must give price proposed both in writing and in figures signed by the bidder with his address.

Each proposal must be accompanied by a certified or cashier's check amounting to at least ten (10) per cent of the amount of the bid payable to the Chairman of the Board of Supervisors, such check to be returned to the bidder unless forfeited under the conditions herein stipulated.

A bond will be required for the faithful performance of the contract in a sum equal to one-half (1/2) of the amount of the contract, and a further bond in a sum equal to one-quarter (1/4) of the amount of the contract will be required for the security of

materialmen and laborers. The sureties on both bonds must be approved by the Board of Supervisors.

The bidder to whom the contract may be awarded will be required to deposit with the office of the said Board of Supervisors with the sureties offered by him and execute a contract within ten (10) days after it is awarded to him. In case of failure or neglect to do so, he may be considered as having abandoned it, and the check accompanying the proposal may be forfeited to the Board of Supervisors he forfeited to the County of Kern.

All bids will be compared on the basis of the lowest price for the material as well as the amount for which it is proposed to install the plant.

The Board of Supervisors reserves the right to reject any or all bids.

By H. A. JASTRO, Chairman.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors, Colusa Co., Cal., at their Board rooms in County Courthouse, on the 6th day of May, 1914, up to 10 o'clock a. m., for furnishing the labor and material to construct a new Reinforced Concrete Hall of Records Building, in the Town of Colusa, Colusa Co., Cal., on the square facing Jay and 6th Streets. The building to be situated directly in back of present Court House facing Jay Street, of 6th St. west.

The plans and specifications for the said proposed new Hall of Records building are on file in the offices of W. J. King, County Clerk and Ex-Officio Clerk of the Board of Supervisors in the Town of Colusa, Colusa Co., Cal., and also in the office of Henry S. Smith, the authorized architect, 755 Market St., San Francisco, Cal., where copies of the same may be obtained by bidders on deposit of the sum of Twenty-five (\$25.00) Dollars. Reference is hereby made to such plans and specifications for mode of bidding. Blank forms for bidding will be furnished by the County Clerk or architect upon application before bids are received.

Each bid must be accompanied by a certain check or cash bond for the sum of (10%) per cent of the amount of the bid, said check or bond to be made payable to W. J. King, County Clerk and Ex-Officio of the Board of Supervisors. The Board reserves the right to reject any or all bids.

All general bidders will be allowed to reject any plans and specifications for seven (7) consecutive days in which to prepare figures, but arrangements may be made upon payment of \$10.00 to obtain same until opening of bids, which amount will be deducted from the deposit made of \$25.00 when the plans and specifications are returned.

DATED the 8th Day of April, 1914.

WM. J. KING,
County Clerk. ()

NOTICE TO CONTRACTORS.

BOARD OF PANAMA-PACIFIC MANAGERS FOR MASSACHUSETTS.

SEALED PROPOSALS will be received by the Board of Panama-Pacific Managers for Massachusetts at Room 305, Tremont Building, Boston, Massachusetts, at 11:00 A. M. (Eastern Time), Monday May 11, 1914, for Constructing the Massachusetts Pavilion at the Panama-Pacific International Exposition in accordance with specifications on file in the office of the Board of Panama-Pacific Managers for Massachusetts at Room 305, Tremont Building, Boston, Massachusetts, and in the office of the Director of Works of the Exposition, Room 207, Service Building, Exposition Grounds, San Francisco, California.

Each proposal must be accompanied by a certified check payable to the order of the Board of Panama-Pacific Managers for Massachusetts in the sum of ten (10) per cent of the amount bid and the same will not be returned. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or proposals which check will be returned upon the suc-

cessful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Board of Panama-Pacific Managers for Massachusetts.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the State of Massachusetts.

Plans and specifications for the work may be obtained from the Board of Panama-Pacific Managers for Massachusetts, Room 305 Tremont Building, Boston, Massachusetts, or from the Director of Works, Room 207 Service Building, San Francisco, by depositing \$25.00, which amount will be refunded to contractors upon the return of plans and specifications in good condition.

By order of the Board of Panama-Pacific Managers for Massachusetts.
PETER H. H. CORR,
Chairman.

CHARLES O. POWER,
Secretary. ()

Interiors will be finished in pine with oak floors in the living rooms, dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms and kitchens will have the wainscot. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are now being figured.

STATE EXHIBIT BUILDING—2 story, frame and plaster, \$60,000. San Francisco, Architect, A. F. Heide, 46 Kearny street, S. F. Owner, State of Washington. Working drawings are nearly complete for the building which is to be erected by the State of Washington at the Panama-Pacific International Exposition. Besides the large floor space on the ground floor which will be given over to the exhibits of the state, plans provide for a motion picture hall, apartments for the governor and reception hall. Exterior will be finished in cement plaster. The architect is now completing details and bids will be called for within a week or ten days.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. San Francisco, Architect, M. J. Welsh, 22nd and Mission streets, S. F. Owner, L. Cella. The building will be erected at the corner of First avenue and Hugo street and has been designed to contain four suites of four rooms each with bath. Interior finish will be of pine with some elm panels and hardwood floors. There will be an automatic water heater in each apartment. Bath rooms will have tile wainscot and composition floors. Wall beds are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE ALTERATIONS—2 story, frame, \$10,000. San Francisco, Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, J. H. Dieckmann. The present building located at the corner of California and Laguna streets will be altered from a flat building into a modern apartment house. When complete there will be eight apartments of two and three rooms. The work will call for new interior partitions, interior finish, hardwood floors, plastering, plumbing, electric work and painting. Exterior of the building will also be refinished. Plans are being prepared.

CHURCH—2 story and base. Class C construction, \$60,000. San Francisco, Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Second Church of Christ, Scientist. The building will be erected on property at the corner of Dolores and Cumberland streets, and has been designed in the classic style. There will be a large main auditorium seating 900 people,

study rooms and Sunday school rooms. Interior finish will be of pine with ornamental plaster. Plans provide for a central heating system, probably steam heat. Art glass windows will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called shortly.

CITY HALL—4 story and dome, Class A construction, \$4,500,000. San Francisco, Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans for the plastering, metal lath and metal furring work to be done in the new City Hall have been completed and have received the approval of the Board of Public Works. Plans are now out for figures and bids will be opened on May 6th.

FLATS—2 story and base, frame, \$3,000. San Francisco, Architect, none. Owner, A. P. Buhman, 7 Shepard street, S. F. The building has been designed to contain two flats of five rooms each and will cover an area of 20 by 44½ feet. The building will be erected on the west side of Codman street south of Washington. Interior finish will be of pine and redwood. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$14,000. San Francisco, Architect, M. J. Welsh, 22nd and Mission streets, S. F. Owner's name withheld. The building will be erected on Fourth avenue in the Sunset District, and will contain two modern flats of five and six rooms. A garage will occupy the basement. Interior will be finished in pine, redwood and elm panels. Hardwood floors will be used in the living rooms and dining rooms. Batha will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$5,000. San Francisco, Architect, none. Owners, John A. Hoots and Son, 251 Kearny street, S. F. The building will be erected on the west side of Ashbury street near 17th, covering an area of 25 by 64 feet. There will be two flats of five and six rooms. Interiors will be finished in pine and redwood with hardwood floors in the principal rooms. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

FLATS—3 story and base, frame, \$6,000. San Francisco, Architect, Edward F. Helms, 8th avenue and California street, S. F. Owner, O. E. Anderson. The building will be erected on 15th avenue near California, having a frontage of 25 feet and a depth of 85 feet. There will be two modern flats with garage in the basement. Each flat will consist of six rooms and bath. Interiors will be finished in pine and elm panels with hardwood floors in the living rooms, dining rooms and

reception halls. There will be open fire places in each living room with tile or brick mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

FLATS—3 story and base, frame, \$5,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Mr. Shibeley. The building will be erected on Rich street near Fourth and has been designed to contain six flats of four and five rooms. Interior finish will be of pine and redwood. There will be open fire places and tile or stock mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior of the house will be covered with rustic and shiplap. Plans are now being prepared.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Mr. Segale. The building will be erected on Pfeiffer between Grant avenue and Stockton, and will contain two modern flats of five rooms each. Interiors will be finished in pine and redwood. Some oak floors will be used. Automatic water heaters will be installed. There will be open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot and composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

FLATS—2, 3 story and base, frame, \$4,000 to \$6,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected on Greenwich street near Powell. Each building will contain three flats ranging from four to six rooms. Interiors will be finished in pine and redwood with some elm panels and oak floors. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath and shiplap. Plans are now being prepared.

FLATS AND STORES—2 story and base, frame, \$5,000. San Francisco. Architect, M. J. Welsh, 22nd and Mission streets, S. F. Owner's name withheld. The building will be erected on San Bruno avenue and has been designed to contain a saloon, stores and flats. Flats will have from four to five rooms and baths. Interior finish will be of pine and redwood. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

HOTEL—4 story and base, reinforced concrete, \$25,000. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owners, Edward Franks and Edward Swift. The building will be erected on the south side of California street west of Kearny. The building will contain about 32 rooms and several public baths. Interior finish will be of pine and redwood. There will be steam heat and

a hot water supply. Bath rooms will have tile floors and wainscot. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

HOTEL—6 story and base. Class B construction, \$25,000. San Francisco. Architect, Chester H. Miller, Dalziel Bldg., Oakland. Owner's name withheld. The building will be erected on Post street, having a frontage of 25 feet and a depth of 68 feet. Interior will be arranged for in the neighborhood of 75 guest rooms, a large percentage of which will have private baths. Interior finish will be of pine throughout. There will be an office and lobby on the ground floor. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with pressed brick trimmed with terra cotta. Plans are nearly complete and figures will be called for within a few days.

HOTEL ADDITION—1 story, frame, \$3,000. San Francisco. Architects, Safford & Kohberg, Clunie Bldg., S. F. Owner, Leopold Hirsch. The present one-story frame building on Third street at Folsom will be altered and an addition of one story will be constructed. Upper floor will be arranged for rooms. Interior finish will be of pine throughout. There will be a hot water supply. Exterior of the building will be covered with cement plaster. Modern plumbing and electric work is specified. Plans are complete and figures are being taken.

HOSPITAL SCREENS—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete for furnishing and installing wire window screens in the main group of the San Francisco Hospital. Bids are being taken by the Board of Public Works and will be opened on May 13th. An official proposal appears in another column of this issue.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner, Paul Gerson. The dwelling has been designed for a seven room house with two baths, and will be erected on Commonwealth avenue in the Jordan Park Tract. Interior finish will be of pine and elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOL—2 story and base, reinforced concrete, \$116,000. San Francisco. Architect, Houghton Sawyer Shreve Bldg., S. F. Owners, City and County of San Francisco. Plans for the new Cooper School, which is to be erected at the southwest corner of Jones and Lombard streets, have been completed, and are now out for figures. The building will be of reinforced concrete with concrete floors, stairways and corridors. Metal lath and plaster interior partitions will be used. There will be steam heat, vac-

uum cleaning and program clocks. Interior finish will be of pine with maple floors in the class rooms. Exterior of the building will be faced with cement plaster. Bids will be opened on May 6th by the Board of Public Works. Separate bids are being taken for the general construction, heating, ventilating, plastering and metal lath and furring, plumbing, gas fitting and electric work. Official proposals appear under another heading in this issue.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owner, John Bayles. The building will be erected at the southeast corner of Third avenue and Hugo street, having a frontage of 35 feet and a depth of 86 feet. There will be a total of twelve suites of three and four rooms. Interior will be finished in pine with some elm panels and oak floors. All suites will have wall beds and private bath rooms. Plans provide for steam heat and a hot water system. Bath rooms will have the wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and subfigures are being taken on the various parts of the work.

APARTMENT HOUSE—3 story and base, frame, \$24,000. San Francisco. Architect, E. H. Denke, 1317 Hyde street, S. F. Owners, Max and Dora Kolander. The building will be erected at the southeast corner of Franklin and Sacramento streets, covering an area of 39½ feet by 79 feet. There will be a total of six apartments of three and four rooms with private baths. Interiors will be finished in pine, redwood and elm. Oak floors will be used in the principal rooms. Plans provide for steam heat and a hot water supply. Portable vacuum cleaners will be installed. All apartments will have wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans have been revised and new figures will be called for at once.

FLATS—3 story and base, frame, \$6,000. San Francisco. Architect, E. H. Denke, 1317 Hyde street, S. F. Owner, Joseph Jurisch. The building will be erected on the south side of California street west of Larkin, covering an area of 25 by 65 feet. There will be three modern flats of five and six rooms. Interiors will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be open fire places in the living rooms with tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

HOTEL—6 story and base, reinforced concrete, \$40,000. San Francisco. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owners, Burnett Estate. The building will be erected on Clementina street between Third and Fourth streets, and will have a frontage of 40 feet and a depth of 60 feet. There will be two stores on the first floor besides the hotel office. Upper floors will contain a total of 70 rooms

and a number of public baths. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$10,000. San Francisco. Architect, H. H. Gutterston, 80 Post street, S. F. Owner, T. T. Mosby. The dwelling will be erected on San Luis street in St. Francis Wood, and has been designed to contain nine rooms, two baths and sleeping porch. Interior finish will be of pine, redwood and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot and will be equipped with showers. Automatic water heaters will be installed. A garage will also be erected on the property. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

THEATRE AND STORES—1 story and base, frame and plaster, \$15,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Scott street near the Exposition grounds, and will cover an area of 60 by 100 feet. There will be three stores, a saloon and a motion picture theatre. Interior of the building will be finished in pine with ornamental plaster on the theatre. Special electric work will be required. Exterior of the building will be covered with cement plaster on metal lath. Working drawings are complete and figures will be taken in about a week.

STORES AND LOFTS—6 story and base, brick and steel, \$75,000. San Francisco. Architect, Alfred Henry Jacobs, 110 Sutter street, S. F. Owner, Charles Schlessinger. The building will be erected on the south side of Market street, west of Second and will have a frontage of 30 feet by a depth of 120 feet. There will be stores on the first floor and upper floors will be arranged for lofts. There will be a steel frame, brick exterior walls and metal lath and plaster interior partitions. Interior finish will be of pine throughout. Plans provide for elevator service, steam heat and metal window sash and frames. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are complete and figures are being taken.

erected in the Redwood Court Tract in
Fruitvale. Each house will contain
from five to seven rooms with bath.
The larger homes will be designed
with sleeping porch. Hardwood floors
and pine trim will be used. Automatic
water heaters are specified for all
houses. Bath rooms will have tile
wainscot and composition floors. Ex-
teriors will be covered with cement
plaster on metal lath and rustic. Plans
are now being prepared. Work will be
carried on by Day Labor. Materials
will be purchased by the owners.

RESIDENCE—2 story and base,
frame, \$4,750. Piedmont, Alameda Co.,
Cal. Architect, none. Owner, C. M.
Blake, 4434 Vista street, Oakland. The
dwelling has been designed for a
seven-room house and will be erected
on the north side of Craigie avenue
east of Highland. Interior finish will
be of pine with some hardwood veneer
and oak floors. Furnace heat and open
fire places are specified. Bath room
and kitchen will have tile wainscot
and composition floor. Mantels will
be of tile. An automatic water heater
will be installed. Exterior of the
house will be covered with cement
plaster on metal lath. Plans are com-
plete and the work will be done by
Day Labor.

RESIDENCE—2 story and base,
frame, \$3,000. Oakland, Cal. Archi-
tect, none. Owner, R. A. Williams,
First National Bank Bldg., Oakland.
The house has been designed for a
seven-room dwelling and will be erect-
ed at the southwest corner of 4th
avenue and 21st street. Plans provide
for furnace heat and open fire places.
Mantels will be of tile. Interior will
be finished in pine and hardwood with
hardwood floors in the principal rooms.
There will be an automatic water
heater. Bath rooms will have tile
wainscot and composition floor. Ex-
terior of the dwelling will be covered
with cement plaster on metal lath.
Plans are complete and in the hands
of the owner who will do the work by
Day Labor. Materials are now being
purchased.

RESIDENCES—2, 2 story and base,
frame, \$3,500 each. San Leandro, Alame-
da Co., Cal. Architects, Hutchinson
Bros., 470 13th street, Oakland. Own-

er, Mr. Graff. These houses will be de-
signed to contain six rooms each with
bath and sleeping porch. Interior fin-
ish will be of pine and redwood with
hardwood floors in the living rooms,
dining rooms and reception halls.
There will be furnace heat and open
fire places. Mantels will be of tile or
brick. Automatic water heaters will
be installed. Bath rooms and kitchen
will have tile wainscot. Exteriors
will be covered with cement plaster
on metal lath and rustic. Plans are
complete and the work will be done by
Day Labor.

RESIDENCE—2 story, attic and base,
frame, \$7,500. Piedmont, Alameda Co.,
Cal. Architect, W. H. Ratcliff, Jr.,
First National Bank Bldg., Berkeley.
Owner, Wickham Havens. The dwell-
ing has been designed for an eight-
room house and will be erected in
Crocker Highlands. Interior finish
will be of pine and hardwoods with
hardwood floors in the principal rooms.
There will be furnace heat and open
fire places. Mantels will be of tile
and brick. Bath rooms will have tile
floors and wainscot and will be
equipped with showers. Automatic
water heaters will be installed. Ex-
terior of the dwelling will be covered
with cement plaster on metal lath. A
clay tile roof will be used. Plans are
complete and figures are being taken.

RESIDENCES—1 story, frame. Cost
not stated. San Jose, Santa Clara Co.,
Cal. Architect, none. The following
Day Labor jobs are reported as about
to be started in San Jose: C. R. Wight-
man, 3rd avenue north of Palm, 1
story, five-room cottage, \$1,000, and
Kelley Bros, northeast corner of Grant
and Orchard streets, four-room cot-
tage, \$1,200.

APARTMENT HOUSE—3 story and
base, brick and frame, \$18,000. Berke-
ley, Alameda Co., Cal. Architect, Clay
N. Burrell, Albany Bldg., Oakland.
Owner, C. F. Renz. The building will
be erected on Alcatraz avenue and has
been designed to contain stores on the
first floor and a number of modern
apartments on the second and third
floors. Interior finish will be of pine
and redwood with some elm panels.
There will be steam heat and a hot
water supply. All suites will have wall
beds and private bath rooms. Bath
rooms will have composition floors and
tile wainscot. Exterior of the build-
ing will be covered with cement plas-
ter on metal lath. Plans are now be-
ing prepared.

WAREHOUSE—2 story and base,
brick and reinforced concrete, \$40,000.
Oakland, Cal. Architect, Walter D.
Reed, Oakland Bank of Savings, Oak-
land. Owners, W. P. Fuller & Co. The
building will cover a considerable
ground area and will be erected at the
southwest corner of Third and Jack-
son streets. There will be a cement
floor, elevator service, metal window
sash and frames. Modern plumbing
and electric work will be installed. Ex-
terior of the building will be faced
with pressed brick. Plans are com-
plete and in the hands of the owners
who are taking figures on the work.

GARAGE—2 story and base. Class
C construction, \$25,000. Oakland, Cal.
Architect, Charles W. McCall, Central
Bank Bldg., Oakland. Owners, Im-
perial Garage Co. The building, which
has been designed for a commercial
garage, will cover a large ground area
and will be erected on the east side of

Franklin street north of 14th street. Construction will be nearly fireproof, with concrete floors, brick and steel walls and steel roof trusses. Interior will be finished in pine. There will be a completely equipped machine shop as well as the storage space. Metal window sash and frames and special gasoline storage tanks are specified. Exterior of the building will be faced with pressed brick. Working drawings are being prepared.

RESIDENCES—2, 1 and 2 story and base, frame, \$2,000 and \$2,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner R. A. McWilliams. These houses will be erected on Fourth avenue, the smaller house will contain five rooms and the two-story house seven rooms. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exteriors will be covered with shingles. Plans are being prepared and when complete work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owners, Banning & Stewart. The house has been designed for a seven room dwelling with bath and sleeping porch, and will be erected in the Country Club Heights. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Mr. Royd, Raymond Apts. The dwelling will be erected on the Boyd Tract, and has been designed to contain seven rooms and bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who is now taking figures on the work.

STORES AND OFFICES—2 story and base, Class C construction. Cost not stated. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owners, B. and B. Cianciarulo. The general contract for this building has already been let and the architect is now taking figures for the heating, ventilating and plumbing. The structure will be erected on Broadway between 17th and 18th streets, and has been designed to carry five additional stories.

BRADSTREET ESTABLISHES OAK- LAND OFFICE.

On May first, Bradstreet will open
an office in Oakland, California, with
Mr. J. K. Munsell in charge as Super-
intendent.

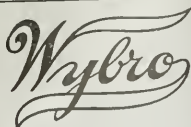

The establishment of this office by
Bradstreet as one of the 150 stations
in the principal wholesale and jobbing
centers of the United States is at one
and the same time, a recognition of
the growth and importance of Oakland
and the east bay shore community
commercially, and the provision for
additional business facilities to the
citizens of that district.

Mr. Munsell is a native of Oakland
and a graduate of the University of
California with many years experience
in Bradstreet's office work, six years of
which was spent as chief clerk of the
San Francisco office.

The Oakland Bradstreet like all the
offices of that concern is an independ-
ent one except in its relations to the
headquarters, in the East.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

SCHOOL—2 story and base. Class C
construction, \$45,000. Rio Vista, Solan-
o Co., Cal. Architect, Erwin Schaefer,
Plaza Bldg., Oakland. Owners, Rio
Vista High School District. The build-
ing will contain eight class rooms,
principal's office and teachers' rooms.
There will be a large assembly hall.
Interior finish will be of pine with
maple floors in the class rooms. Plans

Veneered Panels that
ARE good—order
today from

White Brothers

5th and Brannan Streets

San Francisco

Wybro Panels keep their smooth finish.

One feature of the famous Wybro Panels is that they have a beautiful SMOOTH finish—a finish which RETAINS its smoothness.

Wybro Panels are everlastingly good and cost no more than ordinary ones.

also provide for steam heat, on burning furnace and vacuum cleaning. Exterior of the building will be faced with pressed brick. Working drawings are complete and figures will be called for as soon as bonds are sold. Further mention will be made of the work at that time.

APARTMENT HOUSE—2 story and base, brick, \$17,000. Richmond, Contra Costa Co., Cal. Architect M. J. Welsh, 22nd and Mission streets, S. F. Owner's name withheld. The building will be erected on Macdonald avenue near 10th street, and has been designed to contain stores on the first floor besides the entrance to the apartments. Upper floors will contain about thirty rooms arranged in three and four room suites with baths. Interior will be finished in pine throughout. There will be steam heat and a hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

BULKHEAD WORK—Crushed rock and earth, \$100,000. Vallejo, Solano Co., Cal. Engineer's name not given. Owners, City of Vallejo. Bids are now being called for on the second section of bulkhead to be erected in Vallejo. Plans and specifications can be secured from the City Clerk. Bids will be opened on May 8th.

INCINERATOR PLANT—Cost not stated. San Rafael, Marin Co., Cal. Engineer, City Engineer. The City Council of San Rafael rejected all bids for the construction of the new incinerator to be erected in that city. Z. O. Field of San Jose presented the lowest figure. Plans are to be revised and new bids will be called for shortly.

Contracts Awarded.

E. H. Williams

Chalmer Munday

Munday & Williams

Attorneys-at-Law

Special Attention Given to Building Law and Bankruptcy Cases

Telephone Kearny 2622

615 Phelan Building, San Francisco

The dwelling has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile floors and wainscot and will be equipped with showers. Exterior will be finished with cement plaster on metal lath. Plans are now being prepared.

GARAGE—1 story and base, reinforced concrete, \$20,000. San Jose, Santa Clara Co., Cal. Architect, none. Owners, Olsen & McFarland Auto Co., 228 North First street, San Jose. The building will be erected on the property now occupied by the company on North First street. New building will cover a considerable ground area and will be practically fireproof. There will be concrete floor and walls, steel roof trusses and fireproof interior partitions. Metal window sash and frames and special gasoline storage tanks will be used. Interior will contain a display room, storage space and machine shop. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

POST OFFICE—1 story and base, brick and frame, \$20,000. Palo Alto, Santa Clara Co., Cal. Architects, Bakenwell & Brown, 251 Kearny street, S. F. Owners, Leland Stanford, Jr., University. Plans are complete for a one story branch post office to be erected on the University grounds at Palo Alto. The building will contain work space and public lobby. Interior finish will be of pine and hardwoods. There will be special cabinet work. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

STORES—1 story and base, brick, \$3,000. San Jose, Santa Clara Co., Cal. Architect, none. Owners, J. F. Pryle & Son, San Jose. The building will be erected at the northwest corner of Martha and 5th streets and will contain two modern stores. Interiors will be finished in pine. There will be modern plumbing and electric work. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

RESIDENCE—2 story and base, frame, \$6,000. Reedley, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owner, Mr. A. Winters. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Automatic water heaters will be installed. Bath room will be finished in tile with composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SCHOOL—1 story and base, reinforced concrete. Cost not stated. Ceres, Stanislaus Co., Cal. Architect, William H. Weeks, 75 Post street, S. F. Owners, Ceres School District. The building has been designed to contain seven class rooms, assembly hall, principal's office and library. Interior finish will be of pine and hardwood with maple floors in the class rooms. There will be steam heat, oil burning furnace, and a modern system of ventilation. Program clocks will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken. Bids close on May 2nd. Plans and specifications can be secured from the architect.

ROCK CRUSHER EQUIPMENT—Cost not stated. Woodford, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Plans for a large rock crushing plant which is to be installed at Woodford have been completed by the County Engineer and are now out for figures. The plant is to be electrically equipped and is to have an output of 1,000 tons per day. The State Highway Commission has agreed to take nearly the entire output of the plant. Bids are now being taken and will be opened on May 12th. Plans can be secured from

the County Clerk at Bakersfield. An official proposal appears in another column of this issue.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BUNGALOW—1 story and base, frame, \$2,000. Sacramento, Cal. Architect, none. Owner, Ernest Hall, Chico avenue. The dwelling has been designed for a six-room house with bath and will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place with a tile mantel in the living room. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SCHOOL—1 story and base, frame, \$15,000. Roseville, Placer Co., Cal. Architect, Erwin Schaefer, Plaza Bldg., Oakland. Owners, City of Roseville. The building will contain four standard sized class rooms, library and principal's office. Interior will be finished in pine throughout. Maple floors will be used in the class rooms. There will be a central heating system, probably warm air. A modern system of ventilation will also be installed. Exterior of the building will be covered with rustic. Plans are complete and bids will be called for shortly. Further mention will be made at that time.

BANK—1 story and base, reinforced concrete, \$25,000. Sacramento, Cal. Architects, Seadler & Hoen, Forum Bldg., Sacramento. Owners, Oak Park Branch of the Sacramento Bank. The building has been designed in the classic style and will be practically fireproof in construction. Reinforced concrete floors and walls and metal lath and plaster interior partitions are specified. Interior will be finished in pine, hardwoods and ornamental plaster. There will be steam heat, ornamental iron and bronze and special bank fixtures. Exterior of the building will be faced with cement plaster. Plans are being prepared.

BRIDGE—Steel and concrete, \$50,000. Redding, Shasta Co., Cal. Engineer, A. V. Saph, Redding. Owners, Shasta County. The City Trustees of Redding, Shasta Co., formally approved plans for the Reid Ferry bridge which were prepared by Engineer A. V. Saph. Approval of the State Highway Commission has also been given. The bridge will cost in the neighborhood of \$50,000, leaving the sum of \$10,000 for construction of approaches. An official notice will be published at once.

JAIL BUILDING—2 story and base reinforced concrete, \$25,000. Red Bluff, Tehama Co., Cal. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Tehama County. Plans for this building have been revised and new figures will be called for at once. The building will be of fireproof construction and besides the jail proper will contain the office of the Sheriff and other officials. There will be separate wards for the male and female prisoners. Plans provide for steam heat and a hot water supply. Interior will be finished in pine. Special jail equipment will be used. Exterior of the building will be faced with cement

plaster. Plans are to be refigured at once.

HOSPITAL WARD NO. 25—2 story and base, reinforced concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, State Department of Architecture, Sacramento. Owners, State of California. The lowest figure for constructing Ward Building No. 25 at Stockton was that received from L. G. Berggren & Son of San Francisco at \$18,472. A complete list of the bids as opened in Sacramento will be found under the heading of Sacramento, Stockton and Northern California.

HOSPITAL ELEVATOR WORK—Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, State Department of Engineering, Sacramento. Owners, State of California. The Otis Elevator Co. submitted the lowest figure at \$2,295 for furnishing and installing an elevator in the Female Ward at the Stockton Hospital. A complete list of the bids as opened will be found under the heading of Sacramento, Stockton and Northern California in this issue.

HOTEL—9 story and base. Class A construction. Cost not stated. Sacramento, Cal. Architect, none. Owners, Miller and McGilvray, Sacramento. The building will be erected at the corner of 11th and J streets, covering an area of 70 by 11½ feet. There will be a complete steel frame, brick exterior walls and concrete floors. Interior finish will be of pine and hardwoods. There will be several stores besides the hotel lobby on the first floor. A large percent of the rooms will have private baths. There will be steam heat, elevator service, vacuum cleaning and a hot water supply. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and the owners are taking figures on some parts of the work.

SCHOOL—1 story and base. Class C construction, \$40,000. Roseville, Placer Co., Cal. Architect, Erwin Schaefer, Plaza Bldg., Oakland. Owners, City of Roseville. The building will contain six class rooms and assembly hall. Interior will be finished in pine and redwood with maple floors in the class rooms. There will be steam heat and modern ventilation. Program clocks will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

Contracts Awarded.

LOS ANGELES AND SOUTH- ERN CALIFORNIA.

BANK AND OFFICES—7 story and
base. Class A construction. Cost not
stated. Los Angeles, Cal. Architects,
Reid Bros., California-Pacific Bldg., S.
P. owner, Hulett C. Merritt. The
building will be erected at the north-
west corner of 8th and Spring streets,
covering an area of 60 by 115 feet.
There will be a number of stores in
the first floor, banking rooms on the
second floor and offices on the upper
floors. The entire seventh floor will
be occupied by the Merritt Co. Con-
struction will be of steel and brick
with reinforced concrete floors and
roof slabs. The stories will be con-
siderably higher than usual and the
building will have an extreme height
of 115 feet. Interior will be finished
in pine, hardwoods, metal trim and
marble. There will be special bank
equipment and vaults. Exterior of the
building will be faced with pressed
brick. Plans are being prepared.

WAREHOUSE—4 story and base,
brick. Cost not stated. Los Angeles,
Cal. Architects, Morgan, Walls &
Morgan, Van Nuys Bldg., L. A. Owner,
Mrs. H. S. Van Nuys. The building will
be erected at the corner of Pico and
San Pedro streets, covering an area of
70 by 170 feet. Construction will be of
the extra heavy type with brick walls
and mill constructed interior. There
will be elevators and spiral chutes.
Metal window sash and frames are
specified. Exterior of the building
will be faced with stock brick. Plans
are now being prepared.

SCHOOL—3 story and base. Class A
construction. \$40,000. Los Angeles, Cal.
Architect, Arthur B. Benton, 114 North
Spring street, L. A. Owners, Florence
Crittenton Home for Girls. The build-
ing will cover an area of 60 by 110
feet, and will be of reinforced concrete.
Concrete walls, floors and roof slabs
will be used. Interior will be arranged
for class rooms, library, sewing rooms,
wards and single rooms. There will
be kitchens and dining rooms. Inter-
ior finish will be of pine and hard-
wood. There will be steam heat and
modern plumbing. Exterior of the
building will be faced with pressed
brick. Plans are complete and figures
are being taken.

APARTMENT HOUSE—3 story and
base. Class C construction. Cost not
stated. Santa Monica, Los Angeles Co.,
Cal. Architect, A. C. Martin, Higgins
Bldg., L. A. Owner, Thomas Higgins.
The building will be erected at the

corner of Second and Arizona streets, covering an area of 75 by 100 feet. There will be a total of 75 rooms arranged in two and three room suites. Interiors will be finished in pine, redwood and some hardwood veneer. Oak floors will be used. There will be steam heat, a vacuum cleaning system, hot water supply and wall beds. All suites will have private bath rooms. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—5 story and base, brick and steel, \$65,000. Venice, Los Angeles Co., Cal. Architects, Western Architectural and Building Co., Coulter Bldg., L. A. Owner, Adiel B. Tomlinson and F. A. Ripley. The building will be erected at the corner of Westminster and Ocean avenues, and will cover an area of 40 by 100 feet. Five stories and the hotel office and lobby will occupy the first floor. Basement will contain a large cafe while the upper floors will be arranged for hotel rooms and offices. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, brick and plaster. Cost not stated. Los Angeles, Cal. Architect, Homer W. Glidden, Wright and Callender Bldg., L. A. Owner, J. W. Fowler. The dwelling will be erected in Oneonta Park, and has been designed to contain ten rooms and three baths. A garage of similar construction will also be erected on the property. Interior of the dwelling will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and floors and will be equipped with showers. Automatic water heaters will be installed. Exterior of the dwelling and garage will be covered with cement plaster. Plans are complete and figures are being taken.

OFFICE BUILDING—3 story and base, Class A construction, \$100,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, W. G. Kerchoff Contractor, Weymouth Crowell, Story Bldg., L. A., general construction, \$160,000; Independent Sewer Pipe Co., 223 South Los Angeles street, L. A., terra cotta work; Foulkes Electric Co., Van Nuys Bldg., L. A., electric work.

THEATRE AND OFFICES—3 story and base, brick and steel, \$25,000. Brawley, Imperial Co., Cal. Architects, P. W. Ehlers and A. W. Riewe, California Bldg., L. A. Owner, J. L. Manahan. The building will cover an area of 104 by 125 feet, and has been designed to contain three stores and the theatre on the first floor. Upper floors will be arranged for a large number of modern offices. Interior finish will be of pine and redwood. Metal lath and plaster interior partitions will be used. Plans provide for steam heat and a hot water system. Patent store fronts are specified. Ex-

terior of the building will be faced with pressed brick. Plans are now being prepared.

HOTEL—1 story and base, reinforced concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, D. M. Linnard. The building will be erected at the corner of Colorado and Euclid streets and will have a frontage on Euclid of 200 feet. Construction will be fireproof throughout with reinforced concrete floors, walls and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Plans provide for in the neighborhood of 300 rooms and are so arranged that a wing may be added in the future giving the hotel an additional 100 rooms. All rooms will have private baths. Interior finish will be of pine and hardwood. There will be steam heat, elevator service, vacuum cleaning and a hot water system. Exterior will be faced with cement plaster. Preliminary plans have been approved.

Contracts Awarded.

Interior has been designed to contain seventy-six suites of two and three rooms with baths. All apartments will have wall beds. Interior finish will be of pine and hardwood. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

GARAGE—2 story and base, brick and steel, \$28,000. Seattle, Wash. Architect, none. Owners, Firestone Tire and Rubber Co., Seattle. Contractor, L. L. Lang, New York Bldg., Seattle. Contract price, \$28,000.

The laying of the foundation stone of the San Francisco Auditorium marks the formal ceremony of a publication. And the first building of the big building well on its way to commence Civic Center is to be the assembly hall for the public meetings and conventions to be held here. It will be a most valuable asset to the city. And in the accommodations it will furnish for all kinds of gatherings it will place San Francisco in the front rank as a convention city.

It is said that the big exposition organ will be installed in the auditorium after the fair and this will be an added attraction. An auditorium is something we have needed for a long time and its final completion will be hailed with delight.

of the
BANK OF ITALY**

Are Open Every Day of the Year

Including Sundays and Holidays

From 8 A. M. Until Midnight. Especially
Convenient for Builders and Contractors.

Boxes \$2.50 per year and upwards.

Junction Market, Mason and Turk Streets

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee your satisfaction or we will refund your money.

Price 50 Cents

CALL Douglas 2944

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT
Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires
Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London
The Ritz, London
The Hyde Park, London
The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hoteliers with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

 by the above companies.**

"Duplex", "Ideal" and "Van Dorn" Steel Joist Hangers, Post Caps and Bases.

"Pasehall" Sidewalk Light Construction—All kinds.

"J. C. E." Welsh Quarries—For Floors, Mantels, etc.

"Universal"—"Anti-Slip" and "Carborundum" Safety Stair Treads.

"Kinnear," Steel Rolling Doors and Shutters.

"Dririte" Cabinet Laundry Dryers.

"Fenestra" Steel Sash—For Factories, Garages, Schools, etc.

"Drouve" Straight-Push Window Operating Devices.

"Drouve" Anti-Pluvius Skylights.

"Grant" Pulleys, Pivot Lifts and Case-ment Devices.

"Turner" Drawer Sildes.

"Home" Safety Window Guards.

"Merritt" Steel Lockers and Shelving—For Garages, Schools, Gymnasiums, etc.

"Phoenix" Sanitary Metal Tile — For Bathrooms, Kitchens, etc.

"American" Rotary Vacuum Cleaning Plants—For Office Buildings, Residences, etc.

"Hill" (Clothes Dryers—For Yards, Balconies and Roofs.

"Hustler" Ash Sifters—Save Coal.

"The Window" Coal Chute—Ornamenta'l and Necessary.

Asbestos Theatre Curtains.

"Beaver Board",—The Superior Modern Wallboard.

"Cabot's" Deafening and Sheathing "Quilt."

Building Papers, Deadening Felts, etc., of all kinds.

"All-Metal" Doors, Windows and Trim.

"Liquid Stone", The Paint Eternal.

"Wainright" Concrete Curb and Corner bar.

"Graphilatium" for Roofs.

"Herringbone" Expanded Steel and Ingot Iron Lath.

"Hannon", "Hub" and "Goodwin" Metal Corner Bead.

"Best's" Keene's Cement—For Gauging Plaster and Finishing.

"Caenstone" Cement—For Making Artificial Caen-Stone.

"Victoria" Keene's Cement (Imported) For Artificial Marble and Tile.

"La Farge" Non-Staining Cement.

"Cabot's" Mortar Color Pulps.

"Whalebone" and "Crimped" Metal Wall Ties.

"Rutty" Metal Wall Plugs.....

"Hercules" Waterproofing Cement Compounds.

"Cabot's" Mortar Color Pulps.

"Cabot's" Creosote Shingle Stains.

"Cabot's" Cement and Brick Waterproofing Stains.

"Cabot's" "Conserve" Wood Preservative.

"Con-ser-tex" Canvas Roofing — For Sleeping Porches and Decks.

"Rubber-Mica" Ready Roofing.

The Ruberoid Roofing.

"Textile" Rubber Shingles.

"Diamond" Ball bearing Door Hangers.

"Metalcrete" concrete Hardner.

"Ironite" concrete Hardner.

Wood rolling doors and partitions.

Venitian Blinds.

"White House" Kitchen Furniture.

A number of new agencies will shortly be added to the above list.

Editorial Comment.

Relative to our Industrial Accident Commission and the Safety Appliance Act, which went into effect the first of the year, the report of Industrial Accident Board of the State of Massachusetts is interesting. It has prepared a table which shows the results of the fatal and non-fatal accidents.

The total number of non-fatal accidents in the State was \$9,694, or about one for every ten wage-workers. The board is of the opinion that at least half of these can be prevented through improved inspection methods, by safeguarding machines before they leave the factory, by the maintenance of safety museums, through lectures, moving pictures, school talks and the elimination of danger spots in plants. There were 474 fatal accidents, classified as follows:

Assault and fighting.....	1
Railroad equipment	119
Falls	66
Vehicles	43
Hand labor	37
Elevators	33
Electricity	25
Street Railways	15
Boiler explosions and burns...	13
Excavating	14
Cranes	11
Miscellaneous	11
Asphyxiation, drowning, etc...	10
Animals, insects, etc.....	9
Shaffing, set screws, etc.....	9
Falling material	8
Machinery peculiar to special Industries	7
Beltng	6
Infection from trivial cuts, burns, etc.....	5
Saws	4
Explosions (not boiler).....	4
Hoists	4
Illness	3
Presses	2
Gras	2
Emery wheels	2
Occupational diseases	2
Glass	1
Wood molders	1
Total	474

This is definite and accurate information. It answers the many objections raised by opponents of our own law by showing how many people are really injured and how easily most of them could be prevented. When an accident means that the person injured is sure to be paid for his injury better devices will be used and more care for humanity will be exercised.

THE OPPRESSED BALD HEADS.

What is there about baldheadedness to arouse laughter? That profound inquiry is suggested once more by a gen-

tleman with a grievance who writes to the Public Mind. Comedians, he says—"alleged" comedians he prefers to call them—always make the baldheaded men the butt of their jokes. He doesn't see why he should be ridiculed for the loss of his hair any more than for the loss of a limb.

Quite right. He shouldn't be, but he is. There is no logical reason for laughing when the dignified gentleman slips on a piece of banana peel. But you laugh, all the same. Considered in the light of pure reason there is no occasion in the world to even smile when you see a man chase his hat up the street. But you do. The sense of humor doesn't work by rules of logic.

So the man who is involuntarily bald-headed is considered just as fair game by the jokers as the human angoras who are responsible for letting their hair grow long. He oughtn't to be so no doubt. But facts are facts.

People have been making sport of the baldheads from the time of Ellsna. There seems to be nothing for the bald-headed correspondent to do except to make the best of it unless he has a couple of shears handy to sick on his defamers, as Ellsna did in the case of the children who mocked him as he was going to Beth-el. That is the only time on record when a baldhead ever got even.

Work is progressing rapidly on the new municipal car lines. It looks like there will be some accommodation given the district of the fair grounds by the close of the year in spite of the action or non-action of the United Rail Roads. As the transportation problem is a serious one the rush work will be appreciated by all, not only on account of the fair, but because of the accommodation it will afford.

It is estimated that the present population of the United States and its dependencies amount to 109,000,000 people. That is certainly a great number and emphasizes the fact that modern civilization has increased longevity. For the standard of living has been raised and the great majority of these millions are independent citizens unlike the emasculated hordes that people the valley of the Yang-tse-kiang and the Ganges.

The barbaric nations of the past have sometimes included great numbers, the human race was fecund and the birth rate per capita was much higher. But wars and plagues decimated the millions and what was gained in years of prosperity was lost in the night which followed. Modern science and civilized conditions is rendering the lot of the average man better and distributing the products in a more equitable manner.

The Building Of San Francisco

Reprinted from the Campanile.

The story now can be told of how San Francisco was founded. It is an eye-witness who speaks. From the time-stained pages of an old Spanish manuscript deciphered by Professor Frederick Teggart, the University of California has printed Father Pedro Font's own diary. It tells how Font came in 1776 from Sonora, as Chaplain with the Anza Expedition, across more than a thousand miles of desert and mountain, and of how the cross was raised on a white cliff high above the Golden Gate.

"A little after eleven," says Father Font, in the entry in his diary for March 27, 1776, "we halted beside a pond or spring of fine water near the mouth of the port of San Francisco, having traveled some six leagues.

"The port of San Francisco is a wonder of nature, and may be called the port of ports, on account of its great capacity and the various bights included in its littoral or shore and in its islands. Closed in, and surrounded by mountains, it is as quiet as in a cup.

"The commander decided to erect the holy cross on the extremity of the white cliff at the inner point of the entrance to the port. At eight o'clock in the morning we ascended a small low hill, and then entered a table land, entirely clear, of considerable extent, and flat, with a slight slope towards the port; it must be about half a league in width and a little more in length, and keeps narrowing until it ends in the white cliff. This table land commands a most wonderful view, as from it a great part of the port is visible, with its islands, the entrance, and the ocean, as far as the eye can reach—even farther than the Farallones.

"The commander marked this table land as the site of the new settlement, and the fort which is to be established at this port, for from its being on a height, it is so commanding that the entrance of the mouth of the port can be defended by musket fire, and at a distance of a musket shot there is water for the people, that is, the spring or pond where we halted."

All that day the commander and his lieutenant roamed over "the low hills leading toward the inner part of the port," and at evening they returned, "very much pleased, as they had found more than they had hoped for—much brush and firewood, plenty of water in various springs or ponds, much tillable ground, and also plenty of pasture everywhere, so that the new settlement can obtain much wood, water, grass or pasture for their horses, all close at hand—there is lacking only timber for large edifices, although for huts and barracks, and for the stockade of the presidio, there is sufficient material in the woods."

The Indians they encountered were "gentle, good-natured, and very poor, and as they presented themselves unarmed they gave no sign of being warlike or ill-intentioned. Those who live near the port are pretty well bearded."

Thus San Francisco was having its rude pioneer beginnings, in the same year when Boston witnessed the signing of the Declaration of Independence. But in Sonora, where Don Juan Bautista de Anza organized his expedition, there had been missions for a century and a half already, and towns that antedated by many years the first settlements in Massachusetts Bay.

The first day's journey of the Anza Expedition was a scant three miles, out from the Presidio of San Miguel de Horcasitas, in Sonora, Mexico. Most of the day had been taken up with singing a mass to the most Blessed Virgin of Guadalupe and getting the pack-train ready. That September day of 1775 was the starting of a three-months' march over a stretch of wild country as vast as from San Francisco to Denver or El Paso, or from Washington to New Orleans.

The last Christian settlement was passed near the Mission of San Xavier del Bac, in Southern Arizona. But the Indian "nations" through which they passed were kindly and hospitable—once the country of the fierce Apaches was left behind. The "governors and alcaldes" of the Papago villages came bearing Apache scalps and asking baptism. Elated at the arrival of the arrival of the Spaniards, they welcomed the white men and proudly exhibited the "Casa Grande de Montezuma." "This palace," says Father Font, "may have been built some 500 years ago. It seems that this place was founded by the Mexicans when, during their migration, the devil led them through various countries until they arrived at the promised land of Mexico."

Timbers brought from the mountains seventy-five miles distant, a very large conduit to carry water from the river, and round apertures in the walls through which "the prince" had "saluted the rising and setting sun"—these were part of Font's observations. At Yuma the Spaniards left two priests to minister to the 3,000 Indians, and then, after much trafficking of beads and tobacco for watermelons, pumpkins, and other provisions, the expedition started across what is now Imperial County. Once, their cattle stampeded to return to the last water holes, again they were snowed on, and on Christmas day they stopped their march for one day, "for the reason that on this holy night of the Nativity the wife of a soldier happily gave birth to a son and because the day was raw and foggy." A day later, when they had halted near the rocks of San Carlos Pass, almost at the summit of the Sierra Madre, they were shaken by an earthquake, "accompanied by an instantaneous and loud noise."

Soon they reached the Mission of San Gabriel, "in a most beautiful and ample place, with plenty of water and very good soil." News had come of a rising of the mission Indians at San Diego. They had burned and plundered, and murdered the minister,

Father Luis Jaume. Commander Anza, Chaplain Font, and twenty soldiers set off posthaste to bring aid. The blushing of an old woman gave evidence as to the guilty. Thirteen prisoners were taken, and the recalcitrants fled to the mountains.

Six soldiers were despatched on the return journey to Sonora, bearing letters. Scarcely had Anza and Font returned to San Gabriel when a soldier from Monterey deserted, and accompanied by four servants and muleteers, with thirty animals and much loot, fled away across the mountains into the desert, only to be brought back prisoner.

From San Gabriel the 200 members of the *Senor Comandante's* expedition proceeded northward up the coast, across the Santa Clara valley, by the village of Carpinteria, past the Mission of San Luis Obispo, "in a beautiful spot on a little rise beside a stream, near the Sierra de Santa Lucia, with very fertile lands. The Indians of this nation are much better looking and seemly than those of any other nation I have seen."

At Monterey they were welcomed by Junipero Serra, Father President of the missions, and at Carmel mission the seven resident Padres sang a Te Deum, with peals of bells and great rejoicing. "The site is splendid, and the land very fertile," says Father Font.

March 23 they set out once more from Monterey, traveling by the Valle de Santa Delina, the Monterey River, the Arroyo de las Llagas, the Arroyo de San Benito, the Pajaro River, the Valle de San Bernardino, the Arroyo de San Joseph Curpetino, the Arroyo de San Mateo, the Arroyo de San Francisco, and on the fifth day, March 27, 1776, halted by the Golden Gate.

After spending only a single day at the new town-site, Commander Anza and his immediate party left the settlers to begin the creation of the future city of San Francisco, and set out to explore the neighboring region. They killed "a huge bear" in the Arroyo de San Mateo. Then they circled about the lower end of the bay, and followed its shore past villages whose Indians were fishing for salmon with nets, off tule rafts. The deer tracks were as numerous as if an immense herd of cattle were about. At last they could look out across "an immense treeless plain," to "a great snow-covered mountain range." They concluded that the river was not a river, but a great "fresh-water gulf," and imagined it to extend as far south as San Luis Obispo. Despairing of getting across the tule-swamps, they turned southwest through the coast-range, and made their way back to Monterey, and on to San Gabriel, and across the desert to the Colorado River. Father Garces, whom they had left five months before, was not to be found. His companion, Father Tomas, had had no news of him "since he went up the river to the Jalchedunes," with

the thought of penetrating into the interior and discovering a way of getting into New Mexico.

"I infer," says Father Font, "either that Father Garces has found a way and means for getting to New Mexico as he desired, or that he has had some great reverse in his apostolic visitations; indeed, as he was ailing, he may have died, or the Indians may have killed him."

But Font himself suffered no such reverse. Eleven of the party crossed the hundred-yard wide Colorado River, turbulent and swollen from melting snows, on a single raft. It began to sink, but forty Indians plunged in, and surrounding the raft, took the party across with no harm but a wetting. They bade farewell to the Yumas, "with much tenderness on account of their fidelity and affection," and passing unharmed through the dangerous country of the unfriendly Apaches and the "even worse" Seris and Pimas, came safely back to Sonora, two months after starting from San Francisco. And there in Mexico, at the Mission of Ures, Father Font "wrote out this diary," the original of which the University of California possesses, through the gift of the Robert E. Cowan collection by Collis P. Huntington. The diary has now been edited by Frederick J. Teggart, Associate Professor of Pacific Coast History in the University of California and Curator of the Academy of Pacific Coast History. Its publication, in English and in Spanish, is a part of the great work that is being done at the University of California, through the famous Bancroft Library and the Academy of Pacific Coast History, of giving to the world authentic memorials of the exploration, the settlement, and the development of California.

ABOUT NOTED PUBLIC BUILDINGS.

The capacity of some of the public buildings in the world is as follows:

Coliseum, Rome, 87,000; St. Peter's, Rome, 54,000; Theatre of Pompey, Rome, 40,000; Cathedral, Milan, 37,000; St. Paul's, London, 31,000; St. Petronia, Bologna, 26,000; Cathedral Florence, 24,300; Cathedral, Antwerp, 21,000; St. John Lateran, Rome, 23,000; St. Sophia's, Constantinople, 23,000; Notre Dame, Paris, 21,500; Theatre of Marcellus, Rome, 20,000; Cathedral, Pisa, 13,000; St. Stephen's, Vienna, 12,400; St. Dominic's, Bologna, 12,000; St. Peter's, Bologna, 11,400; Cathedral, Vienna, 11,000; Madison Square garden, New York, 8,443; Mormon temple, Salt Lake City, 8,000; St. Mark's, Venice, 7,500; Spurgeon's tabernacle, London, 6,000; Bolshoi Theatre, St. Petersburg, 5,000; La Scala, Milan, 3,800.

INTERESTING FACTS.

The United States sold to other countries about two billion gallons of petroleum last year.

Electrical apparatus to trace the course of buried water pipes by sound has been invented by a St. Louis man.

A Pennsylvania inventor claims to have greatly increased the strength and durability of rubber without impairing it in any way by adding vanadium as it is being manufactured.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 2 story and base, frame. Cost not stated. Architect, none. Owner, D. E. Bigelow, 2333 Channing Way, Berkeley. The building has been designed to contain 24 rooms, which will be arranged in two and three room suites, and will be erected on the north side of Channing Way west of Dana. Interior finish will be of pine and redwood with some oak floors. There will be a central heating system and wall beds. All apartments will have private bath rooms. A hot water system will also be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

PORTLAND, ORE.—Apartment house, 4 story and base, brick and steel, \$100,000. Architects, Claussen & Claussen, Macleay Bldg., Portland. Owner, Mrs. C. Brown. The building will be erected at the south west corner of 14th and Yamhill streets, and will cover an area of 100 feet square. There will be a total of 66 apartments of two and three rooms. Interiors will be finished in pine and some hardwood veneer. There will be steam heat, elevator service, dumb waiters, a vacuum cleaning system and hot water supply. All apartments will have wall beds and private bath rooms. Hardwood floors will be used in the living rooms. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SEATTLE, WASH.—Apartment house, 3 story and base, brick and steel, \$60,000. Architect, David Dow, 21st and Spruce streets; Seattle. Owner, H. R. Richmond. The building will be erected on 7th avenue near Pine street covering an area of 60 by 120 feet. The building will contain a total of 125 rooms, which will be arranged in 15 three room suites and 10 two rooms. Interior finish will be largely of pine with some hardwood veneer and oak floors. There will be steam heat, elevator and dumb waiters, a hot water supply and vacuum cleaning. All suites will have wall beds and private bath rooms. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, A. Burnside Sturges, Story Bldg., L. A. Owner, E. Rubin. The building will be erected on Bonnie Brae street near 20th and will contain 32 rooms arranged in two and three room suites with wall beds and private baths. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be gas

heaters and automatic water heaters. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with veneer pressed brick and resawed rustic. Plans are being prepared and when complete the work will probably be done by Day Labor.

Contracts Awarded.

CAL.—Apartment house, 1 and 2 story and base, frame. Cost not stated. Architect, J. B. Nicholson, Wright & Callender Bldg., L. A. Owner, S. R. Adams. Contractor, Fred W. Siegel, Stimson Bldg., L. A. Contract price not stated.

BANKS.

STOCKTON, SAN JOAQUIN CO., CAL.

—Bank alteration, 2 story, brick, \$10,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, First National Bank of Stockton. The present banking quarters will be rearranged and new interior finish and banking fixtures will be installed. Included in the work will be new plastering, plain and ornamental, electric work, painting, plumbing and ornamental iron and bronze work. Vaults will also be rearranged. plans are now being prepared.

Contracts Awarded.

BAKERSFIELD, KERN CO., CAL.—Bank alterations, brick construction, \$12,000. Architect, none. Owners, First National and Producers' Bank of Bakersfield. Contractors, Lindgren Co., Monadnock Bldg., S. F. Contract price, \$12,000.

ANAHEIM, ORANGE CO., CAL.—Bank alterations and addition, 2 story, brick, \$12,490. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, German-American Savings Bank of Anaheim. Contractors, Frank Graves & Son, Builders' Exchange, L. A. Contract price, \$12,490, not including painting.

BRIDGES AND DAMS.

SAN FRANCISCO.—Pier construction cement and timber. Cost not stated. Engineer, Assistant State Engineer Jerome Newman, Ferry Bldg., S. F. Owners, State of California. Plans have been approved by the State Board of Control for Pier No. 15 to be erected on the San Francisco waterfront. Portland cement, plain and cross-sawn piles will be used. Cement and piles will be furnished the contractor by the state. Bids are now being taken and will be opened by the State Board of Harbor Commissioners on May 7th. Plans and specifications can be secured from the Assistant State Engineer at the Ferry Bldg. An official proposal appears in another column of this issue.

SACRAMENTO, CAL.—Wharf shed, 2 story, reinforced concrete. Cost not stated. Engineer, City Engineer A. Givan, Sacramento. Owners, City of Sacramento. Plans have been submitted to the City Commissioners for a wharf shed which is to be erected at the foot of P street. Construction will be fireproof. Exterior will be faced

with cement plaster. Plans are complete and waiting approval of the Commission. Further mention will be made of the work.

ASTORIA, ORE.—Docks and dredging. Cost not stated. Engineer, F. J. Walsh, Port of Astoria Commission, Astoria. Owners, City of Astoria. Plans have been completed and figures are now being taken on the foundation work for the new docks and wharves which are to be erected at Astoria. In the neighborhood of 7,000 piles of from 50 to 75 feet will be required as well as about 1,000,000 cubic yards of dredging. The docks will be erected in units of which several are planned. Two docks will be built at this time each of which will be 90 feet wide and 1,000 feet long. About 3,000 feet of bulkheading will also be required. Plans are now out for figures and can be secured by addressing the engineer.

KELLOGG, ORE.—Bridge, steel and concrete. Cost not stated. Engineer, Horace C. Hall, Grants Pass, Ore. Owners, Douglas County. The bridge will consist of two main spans each 200 feet long and a third span of 125 feet. Approaches will be of concrete. The bridge will have a sixteen-foot roadway. Plans are complete and bids will close May 12th. Plans and specifications can be secured from the engineer.

RICHMOND, CONTRA COSTA CO., CAL.—Harbor improvement. Cost not stated. Engineer's name not given. Owners, Ellis Landing Co. Bids will be called for at once for harbor work in connection with the Ellis Landing project at Richmond. The location is at the foot of Tenth street, and the work will require a large amount of 12-inch piling driven 10 and 12 feet apart. Twenty-four-foot piles will be used. A rock bulkhead and a large amount of back filling will also be required.

ORLAND, GLENN CO., CAL.—Earth dam and levees. Cost not stated. Engineer, U. S. Reclamation Service, Orland. Owners, Orland Reclamation District. M. Fisher, S. F., submitted the lowest figure for this work at \$46,386 and will probably be awarded the contract. Other figures submitted were as follows: Phil Schuyler, Oakland, \$47,818; Moffitt & Need, San Francisco \$49,147; Grant Pree, San Francisco, \$54,266; Mesmer & Rice, Los Angeles, \$67,382; F. F. Prendergast, Los Angeles, \$68,992; Blake Bros., Oakland, \$71,968.

Contracts Awarded.

SACRAMENTO, CAL.—Dam and bulkhead. Cost not stated. Engineer's name not given. Owners, Reclamation District No. 1500. Contractors, Hyde-Harjes Co., S. F. Contract price, \$22,275. Other bids for this work were: Healy-Thibbitts Co., \$23,341; Nervy-Elwell Co., \$22,866; W. N. Concanon, \$24,866; San Francisco Bridge Co., \$22,599; Thompson Bridge Co., \$30,430; Portland Concrete Pile Co., \$28,472.99.

CHURCHES.

HOLY CROSS CEMETERY, SAN MATEO CO., CAL.—Mausoleum, 1 story, reinforced concrete. Cost not stated. Architect, L. Mastropasqua, 580 Washington street, S. F. Owner, Angelo Ferroglia. The structure has been designed in the classic style and will be faced with marble. Interior will be finished in Caen stone and provides or

six receptacles. There will be art glass, bronze doors and grilles. Plans are complete and figures are being taken.

ROSE CITY PARK, ORE.—Church, 2 story and base, brick and frame. Cost not stated. Architect, L. R. Bailey, Abington Bldg., Portland. Owners, Methodist Church of Rose City Park. The building will contain a large auditorium and Sunday school rooms. Only the first unit will be erected at the present time, costing in the neighborhood of \$10,000. Interior finish will be of pine throughout. A steam heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Church, 1 story and base, frame and plaster, \$20,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, First Methodist Church of Santa Cruz. Contractors, Johnston Co., 1776 12th avenue, S. F. Contract price, \$19,255. Note: This contract does not include the art glass, pews or heating. Figures are now being taken for this work.

COURT HOUSES

SAN FRANCISCO—City Hall, 4 story and base. Class A construction, \$4,500,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids were opened at the Wednesday meeting of the Board of Public Works for the marble work at the new City Hall. Five sets of figures were submitted. In all seven propositions were considered. A complete list of the bids as opened will be found under the heading of San Francisco in this issue.

ALTURA, MODOC CO., CAL.—Court house, dome and basement, reinforced concrete, \$90,000. Architect, De Longchamps, Reno, Nev. Owners, Modoc County. The building has been mentioned here a number of times before when plans were first out for figures. Bids recently opened were in excess of the amount available for construction and plans are now being revised. New figures will be called for at the May meeting of the Board of Supervisors. Further mention will be made of the work at that time.

SEATTLE, WASH.—Court house group, 3 and 5 story and base. Class A construction, \$950,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, City of Seattle. The building will be erected on the property bounded by Third avenue, James, Jefferson and Fourth avenue. The Third avenue frontage will be five stories high and the Fourth avenue but three stories. Construction will be fireproof with a complete steel frame, reinforced concrete floors and roof. Interior partitions will be of hollow tile. Exterior will be faced with tile and terra cotta. Hardwood and metal trim will be used. There will be steam heat, vacuum cleaning, elevator service and fireproof vaults. Plans have been revised and new figures will be called for within a very short time.

Factories & Warehouses.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Warehouse, 3 story and

base, reinforced concrete. Cost not stated. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Homer N. Duffey, Santa Barbara. The building will be erected at the corner of Mason and Helena streets, covering an area of 67½ feet by 140 feet, and will be of the extra heavy type designed for a six-story structure. Construction will be fireproof with reinforced concrete walls, floors and roof slabs. Interior will be finished in pine. Plans provide for steel rolling doors, metal window sash and frames and elevator service. Exterior will be faced with cement plaster. Work will be started at once under the Day Labor system.

LOS ANGELES, CAL.—Warehouse, 3 story and base, brick and concrete. Cost not stated. Architects, William Curlett & Son, Title Insurance Bldg., L. A. Owners, Rudger-Merle Co. The building will be erected at the corner of Alameda and Palmetto streets, and will contain an area of 100 by 272 feet. Interior will be finished in pine. There will be metal window sash and frames. Plans provide for elevator service, spiral chutes and other warehouse conveniences. Construction has been held up for some time pending the settlement of a spur track facilities. Exterior of the building will be faced with pressed brick. Working drawings are complete and bids will be called for at once.

LOS ANGELES, CAL.—Warehouse, 4 story and base, brick and steel. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. H. S. Van Nuys. The building will be erected on property at the corner of Los Angeles, Pico and San Pedro streets, covering an area of 70 by 150 feet. Construction will be of the extra heavy type. Interior finish will be of pine throughout. Plans provide for two elevators, metal window sash and frames and fireproof doors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

MARTINEZ, CONTRA COSTA CO., CAL.—Oil storage tanks. Cost not stated. Engineer's name not given. Owners, American Gasoline Co. Contractors, Healy-Thibbitts Construction Co., S. F. Contract price not given. Note: This contract includes the construction of ten steel tanks each of 50,000 barrels capacity.

SEATTLE, WASH.—Factory, 4 story and base, reinforced concrete, \$90,000. Architect, none. Owners, City of Seattle. Contractors, Harrington-Peters Co., Oriental Bldg., Seattle. Contract price, \$190,000.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$5,500. Architect, C. Pantoni, 916 Kearny street, S. F. Owner, Phillip Teresi. The building will be erected on Mission street near Persia and will contain two modern flats and a store. Each flat will have five rooms and bath. Interiors will be finished in pine and redwood. There will be open fire places and tile mantels in the living rooms. Bath rooms will have composition floors. Automatic water heaters are specified. Exterior of the building will be covered with shiplap. Plans

are complete and figures are now being taken.

SAN FRANCISCO—Flat addition, 1 story, frame, \$2,500. Architect, C. C. Fantoni, 916 Kearny street, S. F. Owner, F. Di Gaglia. The building will be erected on Greenwich near Stockton street and will contain five rooms and bath. The present building, a two-story structure, will also be altered and new plumbing, electric work and plastering will be installed. Open fire place and tile mantel will be used. Exterior will be covered with rustic and shiplap. Plans are now being prepared.

SAN FRANCISCO—Flats, 2, 3 story and base, frame, \$4,000 and \$6,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. These two buildings will be erected on Greenwich street near Powell and each has been designed to contain three flats. Interiors will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the living rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Entrances will be finished in tile with terrazzo steps. Exteriors will be covered with shiplap and cement plaster on metal lath. Plans are complete and figures are now being taken for the work.

GARAGES.

SAN FRANCISCO—Garage, 1 story, brick, \$7,500. Architect, none. Owner, S. J. Sterner, 125 4th avenue. The building will be erected on the north side of Green street east of Octavia, covering an area of 54 by 137 feet. A cement floor will be used and steel roof trusses. There will be a large gasoline storage tank. Interior finish will be of pine. Besides the storage space a machine shop will be included in the building. Exterior will be faced with stock brick or cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Garage, 2 story and base, brick, \$10,000. Architect, Frederick Soderberg. Union Bank Bldg., Oakland. Owner, W. M. Greuner. The building will be erected at the corner of Brook and Broadway and will be used as a commercial garage. The building will cover an area of 59 by 100 feet. There will be a cement floor, steel roof trusses and metal window sash and frames. Interior finish will be of pine throughout. Special gasoline storage tanks are specified. Exterior will be faced with cement plaster. Plans are complete and figures are being taken. All parts of the work will be segregated.

LOS ANGELES, CAL.—Garage, 2 story and base, brick and steel. Cost not stated. Architects, Dennis & Hewitt, Fay Bldg., L. A. Owner, W. Collins. The building will be erected at the corner of Third and Hope streets and will cover an area of 100 by 120 feet. Construction will be practically fireproof. There will be concrete floors and metal lath and plaster interior partitions. Besides the garage there will be nine stores on the first floor. Upper floor will be used for storage space in connection with the garage. Metal window sash and frames, patent store fronts and metal

covered doors are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

GOVERNMENT WORK AND SUPPLIES.

Air Brake Switches.

The following bid was received at the bureau of yards and docks, Navy Department, Washington, D. C., April 18 for dredging at the U. S. navy yard, Puget Sound:

The Erickson Construction Co., 25 Downs Building, Seattle, Wash., \$1,160.

Pumps, North Platte Project.

Abstract of proposals for 1 water turbine-driven centrifugal pump, advertisement 284, North Platte project. Reclamation Service, received on April 8 at Los Angeles, Cal.:

United Iron Works, Oakland, Cal., \$725; time 60 days; delivery Oakland, Cal.

Byron Jackson Iron Works, Los Angeles, Cal., \$1,167; time 63 days; delivery West Berkeley, Cal.

Krogh Mfg. Co., San Francisco, Cal., \$1,300; time 60 days; delivery San Francisco, Cal.

Henry B. Worthington, Los Angeles, Cal., \$1,357; time 50 days; delivery Harrisburg, Pa.

C. F. Braun & Co., San Francisco, Cal., \$1,574; time 63 days; delivery Harrisburg, Pa.

Reclamation Work.

The U. S. Reclamation Service is asking for proposals for earthwork and structures on the second unit of Vandalia south canal on the Milk River irrigation project, Mont. The work includes about 145,000 cubic yards of excavation, 300 cubic yards of reinforced concrete, the placing of 18,000 pounds of steel reinforcement, and the placing in wooden structures of 135,000 feet, B. M., of lumber, and it is situated on the south side of Milk River in the vicinity of Glasgow and Nashua, Mont. Bids will be opened after 2 o'clock p. m., May 20, 1914, at the office of the Reclamation Service at Malta, Mont.

MARE ISLAND NAVY YARD, SO-LANO CO., CAL.—Heating system. Cost not stated. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids will be opened on May 23rd for furnishing and installing a new heating system and oil burning equipment at Mare Island. Included in the work will be 1 70-H. P. and 1 30-H. P. boiler fuel oil set, pumps, heater and steel flue. Plans can be secured from the Commandant of the Yard at Mare Island.

FORT WORDEN, WASH.—Officers' quarters, 2 story and base, brick, \$60,000. Architect, Chief Constructing

Quartermaster Office, Washington, D. C. Owners, United States Government. Plans have been completed and forwarded to Fort Worden for the new officers' quarters. The main building will be 32 by 84 feet with a wing 58 by 85 feet. Each apartment will contain six rooms. Interior finish will be of pine. There will be hardwood floors and open fire places. Plans provide for steam heat and a hot water supply. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Bids are now being taken and will be opened in Washington, D. C., on May 20th.

-HALLS & SOCIETY BLDGS.-

SAN MATEO, SAN MATEO CO., CAL.—Lodge hall, 2 story and base, brick and stucco, \$50,000. Architect, Will D. Shea, 244 Kearny street, S. F. Owners, San Mateo Knights of Columbus Hall Association. The building will cover a considerable ground area and will be devoted entirely to the use of the organization. Interior has been arranged for a large auditorium, gymnasium, handball court, swimming pool, bowling alley and club rooms. Interior finish will be of pine and hardwoods with maple floor in the ball room. There will be steam heat and open fire places. Mantels will be of tile. Exterior of the building will be faced with cement plaster. The architect's plans have just been selected in competition with a number of other local architects.

LIVERMORE, ALAMEDA CO., CAL.—Lodge hall, 2 story and base, concrete and frame, \$15,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Livermore Foresters' Hall Association. The building will have reinforced concrete walls and frame interior construction. There will be several lodge rooms, ball room and auditorium, besides the offices of the organization. Interior finish will be of pine with a maple floor in the ball room. Plans provide for a central heating system. Exterior will be finished with cement plaster. Plans are complete and figures are now being taken.

SILVERTON, ORE.—Lodge hall, 4 story and base, brick, \$20,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland, Owners, Masonic Hall Association of Silverton. The building will cover an area of 82 by 62 feet, and has been designed for four stories on the first floor and 18 offices on the second floor. Upper two floors will be arranged for the lodge rooms, ball room and auditorium. Interior finish will be of pine with a hardwood floor in the ball room. There will be steam heat and elevator service. Patent store fronts are specified. Exterior will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared and bids will be called for within three weeks or a month.

DELANO, KERN CO., CAL.—Lodge hall, 2 story and base, brick, \$20,000. Architects, Swartz, Hothkin & Swartz, Rowell Bldg., Fresno. Owners, Delano Masonic Temple Association. The building will be erected on a corner lot, covering an area of 60 by 100 feet. There will be stores on the first floor and large lodge rooms and office on the upper floor. Interior finish will

be of pine throughout. Plans provide for a central heating system. Patent store fronts are specified. Modern plumbing and electric work will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

HOSPITALS

AGNEW, SANTA CLARA CO., CAL.—Workers' Cottage and Nurses' Home, brick and concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids were opened on the 27th and 28th for these two buildings. Robinson & Place of Oakland were low on both buildings. The price for the Workers' Cottage was \$36,750 and for the Nurses' Home \$32,750. A complete list of these figures will be found under the heading of San Jose and the Santa Clara Valley.

PORTERVILLE, TULARE CO., CAL.—Hospital addition, 3 story and base, brick. Cost not stated. Architect, F. W. Griffin, Porterville. Owners, Mt. Whitney Hospital. The addition will be erected adjoining the present building at the corner of Main and Harrison streets, and will cover a considerable ground area. There will be wards and private rooms. Interior finish will be of pine and white enamel. Considerable tile will be used. The new portion of the building will contain the heating plant, steam with oil burning equipment, for both buildings. Modern hospital plumbing and electric work will be installed. Exterior will be faced with pressed brick. Plans are complete and figures will be called for at once.

MARTINEZ, CONTRA COSTA CO., CAL.—Hospital addition, 1 and 2 story brick, \$30,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Contra Costa County. This work has been mentioned here before when plans were first prepared. The addition will contain two wards and operating room. Interior finish will be of pine and white enamel. There will be steam heat, oil burning system and vacuum cleaning. Modern hospital plumbing will be installed. Considerable tile work is specified. Exterior of the building will be faced with either pressed brick or cement plaster. Plans are complete and figures are being taken. Plans can be secured from the architect. Bids will be opened on May 15th.

HOTELS.

SAN FRANCISCO—Hotel, 15 story and base, Class A construction. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Fred C. Finkle. This building will be erected at the northwest corner of Pine and Stockton streets, covering an area of 40 by 60 feet. Construction will be of the Class A type throughout with a complete steel frame, reinforced exterior walls, floors and roof slabs. It was originally intended to carry the structure to a height of 23 stories. Interior partitions will be of metal lath and plaster. Interior finish will be of pine and hardwood with some metal trim. All guest rooms will have private baths. Plans provide for steam heat, elevator service, a hot water supply and vac-

uum cleaning. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with cement plaster. Plans for the reinforced concrete work are now complete and figures are being taken.

SAN FRANCISCO—Hotel, 5 or 6 story and base, Class A construction. Cost not stated. Architect, Alfred Schroepfer, Foxcroft Bldg., S. F. Owner, Mr. Davidson, 46 Kearny street, S. F. The building will be erected at the northeast corner of Third and Townsend streets and will cover a large ground area. Construction will be fireproof throughout with a complete steel frame and brick exterior walls, metal lath and plaster interior partitions. Interior finish will be of pine and hardwood. There will be a number of stores on the first floor besides the hotel office and lobby. Upper floors will be arranged for modern hotel rooms, a large percentage of which will have private baths. There will be steam heat, elevator service, a vacuum cleaning plant, hot water supply and patent store fronts. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Hotel and stores, 3 story and base, brick and steel, \$45,000. Architect, Harry H. Meyers, Kohlt Bldg., S. F. Owner's name withheld. The building will cover a considerable ground area and will be arranged for stores on the first floor besides the hotel entrance and lobby. Upper floors will contain in the neighborhood of 75 rooms and a number of baths. Interior will be finished in pine and redwood. There will be steam heat and a hot water supply. All bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Patent store fronts will be specified. Plans are now being prepared.

SAN FRANCISCO—Hotel, 3 story and base, brick and steel, \$20,000. Architect, W. J. Cuthbertson, 328 Montgomery street, S. F. Owner, Ellen E. Herrin. The building will be erected on the north side of O'Farrell street west of Larkin, covering an area of approximately 12,000 square feet. There will be fifty guest rooms, nearly all of which will have private baths. Interior finish will be of pine and redwood. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

BANNING, RIVERSIDE CO., CAL.—Hotel, 3 story and base, reinforced concrete, \$250,000. Architect, J. Martyn Haenke, Story Bldg., L. A. Owners, Gateway Inn Company. This work has been mentioned here before when plans were first started. Working drawings have been completed and grading of the site has been started. The main building will be 200 by 50 feet with two large wings. There will be a total of 150 guest rooms, all of which will have private baths. Plans also provide for a large office, dining rooms, ladies' and gentlemen's parlors and grill. Construction will be fireproof. Interior will be finished in pine and hardwoods.

There will be steam heat, elevator service and a hot water supply. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans will go out for figures shortly.

LOS ANGELES, CAL.—Hotel, 3 story and base, Class C construction. Cost not stated. Architect, Anton Reif, Higgins Bldg., L. A. Owner, Mr. Seller. The building will be erected on San Pedro street near Ninth, covering an area of 42 by 121 feet. There will be two stores on the first floor besides the hotel lobby. Upper floors will contain a total of 50 guest rooms and four baths. Interior finish will be of pine throughout. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Hotel, 6 story and base, brick and steel, \$25,000. Architect, Chester H. Miller, Dalziel Bldg., Oakland. Owner's name withheld. The building will be erected on Post street near Larkin, and will have a frontage of 23 feet and a depth of 78 feet. There will be a store besides the hotel lobby on the first floor. Upper floors will contain in the neighborhood of 75 rooms, all of which will have private baths. Interior finish will be of pine and elm. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. A complete steel frame will be used. Plans are complete and figures are being taken.

Contracts Awarded.

PORTLAND, ORE.—Hotel, 3 story and base, brick, \$20,000. Architect, C. Spies, Kenton, Ore. Owner, Mr. McNary. Contractor, C. Spies, Kenton, Ore. Contract price, \$20,000.

BAKERSFIELD, KERN CO., CAL.—Hotel, 2 story and base, brick, \$13,000. Architect, L. K. Conradjian, Fresno. Owner, C. Petrin. Contractor, L. K. Conradjian, Fresno. Contract price, \$13,000.

NILAND, IMPERIAL CO., CAL.—Hotel, 2 story and base, brick and steel, \$60,000. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, California Land and Water Co. Contractor, J. R. Rochelt, El Centro. Contract price, \$60,000.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Warehouse extensions, frame construction. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans for the extensions to be made to warehouses Nos. 2 and 3 have been completed and are now out for figures. Bids will be opened on May 7th by the Buildings and Grounds Committee. An official proposal appears in another column of this issue. Plans can be secured from the Director of Works, Service Bldg.,

SAN FRANCISCO—State Exhibit building, 2 story and base, frame and plaster. Cost not stated. Architects, R. A. Messmer Bro., Majestic Bldg., Milwaukee, Wis. Owners, State of Wisconsin, represented by the Wisconsin

sin Panama-Pacific Commission. 709 Germania Bldg., Milwaukee, Wis. Plans for this building have been completed and bids are now being taken. No plans have been forwarded to this city as yet, but may be obtained from either the architects or from the Wisconsin Panama-Pacific Commission in Milwaukee. Bids will be opened on May 16th. An official notice to contractors appears in another column of this issue.

POST OFFICES.

BRIGHAM CITY, UTAH—Post office, 2 story and base, stone and brick. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans for the new Federal Building to be erected in Brigham City have been completed and forwarded to the coast for figures. The structure will be of fireproof type to the second floor line, and will cover a ground area of approximately 3,700 square feet. Interior will be finished in pine and hardwood. There will be steam heat and special cabinet work. Bids are now being taken and will be opened on June 1st. Plans and specifications can be secured from the Supervising Architect at Washington, D. C., or from the custodian of the site at Brigham City, Utah. An official proposal appears in another column of this issue.

CHICO, BUTTE CO., CAL.—Post office, 1 and 2 story and base, stone and brick. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans for this building have been completed and forwarded to the coast for figures. The main portion of the building will be two stories high with a one-story wing in the rear. Construction will be of the non-fireproof type except the first floor. Plans provide for steam heat and special cabinet work. The building will cover an area of approximately 6,000 square feet. Exterior will be faced with cut stone and pressed brick. Plans can be secured from either the Supervising Architect at Washington, D. C., or from the Custodian of the site at Chico. Bids will be opened on June 9th. An official proposal appears in another column of this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

FOLSOM, SACRAMENTO CO., CAL.—Railroad station, 2 story, frame, \$10,000. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Work has been started by the Southern Pacific Co. on the construction of a new passenger depot at Folsom. The building will be a two-story frame structure containing the two usual waiting rooms and agent's office on the first floor. The second floor will contain living rooms for the agent, consisting of a five-room flat. Exterior will be covered with cement plaster. About \$9,000 will be spent in constructing the building.

SAN DIEGO, SAN DIEGO CO., CAL.—Railroad station, 1 and 2 story, reinforced concrete, \$200,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Santa Fe Railroad Co.

The building has been designed in the Mission style and will be of fireproof construction with reinforced concrete walls and floors. Interior partitions will be of metal lath and plaster. The building will be 200 feet long and about 75 feet wide. There will be two waiting rooms, offices of the company, ticket and agent's office, baggage rooms and express office. Interior will be finished in pine with tile floors and marble wainscot. There will be a central heating system. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are complete and figures are now being taken.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,000. Architect, none. Owner, C. A. Warren, Merchants' National Bank Bldg., S. F. The house will be designed for a seven-room house and will be erected on 43rd avenue. Interior finish will be of pine and hardwood veneer with some oak doors. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. The work will probably be done by Day Labor.

SAN FRANCISCO—Residence, 1½ story and base, frame, \$5,000. Architect, C. H. Barrett, 38½ Bush street, S. F. Owner's name withheld. The dwelling will be erected in the Richmond District and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,500 each. Architect, none. Owner, P. Nelson, 30 Presidio Terrace, S. F. These two houses will be erected on the west side of 15th avenue near Fulton, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places in the living rooms. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exteriors of the houses will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Leonard H. Ford, 2126 Center street, Berkeley. Owner, Caroline Wolbold. The house will be erected in Claremont Tract and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine, redwood and hardwood veneer. Hardwood floors

will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have the wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Charles H. Bebb, Denny Bldg., Seattle. Owner, Mrs. Annie H. Lewis. The house will be erected in Claremont Park on lot 7, block 5, and has been designed to contain eight rooms, two baths and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will have tile floors and wainscot and will be equipped with showers. Exterior of the house will be covered with cement plaster on metal lath. Plans have been revised and new figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Fraternity house, 2 story and base, frame. Cost not stated. Architect, W. H. Katsif, Jr., First National Bank Bldg., Berkeley. Owners, Delta Chi Chapter House Association, Inc. The building, designed for a large residence, will be erected on lot 6 and 7 in the Simons property. There will be in the neighborhood of 20 rooms and a number of baths. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot and will be equipped with showers. Automatic water heaters will be installed. Hardwood floors will be used in the principal rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, E. B. Spitis, 254 Ashby street, Berkeley. The dwelling will be erected on Indian Park near San Diego street, and has been designed to contain six rooms and bath. Interior finish will be of pine and hardwood with oak floors in the living room, dining room and reception hall. There will be open fire places and tile mantels. Furnace heat is also specified. Bath rooms will have tile wainscot and composition floor. An automatic water heater is specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, D. S. Glover, 244½ Webster street, Berkeley. The house has been designed for a ten-room dwelling and will be erected on the north side of Webster street west of Regent. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exte-

rior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN JOSE, SANTA CLARA CO., CAL.—Residence, 1 story and base, frame. Cost not given. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: Edward Delmastro, 620 South 1st street, 1 story, five-room cottage, \$1,800, and J. G. Luchien, 85 St. Mark street, 1 story, five-room cottage, \$1,000. Materials are now being purchased.

STOCKTON, SAN JOAQUIN CO., CAL.—Residences, 1 and 2 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: F. W. Priestly, 202 West Stockton, frame dwelling, \$2,000; Richard Godels, 516 West Park, frame cottage, \$1,600; M. Lamasney, 744 West Flora, frame cottage, \$1,600; Mrs. Sarah E. Gibbs, 1326 South California, frame residence, \$1,750; W. J. Magnuson, 725 South Pilgrim, cottage, \$600; J. B. Wolf, 541-C East Oak, frame cottage, \$1,500; J. Cleinmann, 39 North El Dorado, two frame cottages, \$1,500 each, and Sadie Jewitt, 409 East Weber, frame addition, \$500. Materials for this work are now being purchased.

SACRAMENTO, CAL.—Bungalow, 1 story and base, frame, \$1,500. Architect, none. Owner, Burton H. Bill, 3215 4th avenue, Sacramento. The dwelling has been designed to contain six rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

SANTA MONICA, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Thomas Higgins. The dwelling will be erected on Second street near Arizona, and has been designed to contain fifteen rooms, three baths and sleeping porch. Interior finish will be of pine and hardwood. Hardwood and inlaid floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters are specified. Bath rooms will have tile wainscot and composition floors and will be equipped with showers. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$20,000. Architect, Henry Guttersen, Guttersen, 80 Post street, S. F. Owners, Delta Kappa Epsilon Chapter House Association. The building will be erected at the foot of Piedmont avenue and has been designed similar to a large residence. There will be in the neighborhood of twenty rooms and several baths. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have

tile floors and wainscot and will be equipped with showers. Exterior of the house will be covered with cement plaster on metal lath. Only preliminary plans have been prepared and construction will not be started for at least three months.

HOLLYWOOD, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame and hollow tile construction, \$15,000. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owner, John Luckenbach. The dwelling will cover a large area and will contain twelve rooms, three baths and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat, open fire places and a hot water system. A garage will also be erected on the lot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SAN DIEGO, SAN DIEGO CO., CAL.—Residence, 2 story and base, frame and hollow tile, \$25,000. Architect, Irving I. Gill, 931 South Figueroa street, L. A. Owner, Ethel H. Williams. The dwelling will contain eleven rooms in the first floor and nine rooms in the second floor. There will be six baths. Interior will be finished in pine, redwood, hardwoods and white enamel. Hardwood floors will be used throughout. There will be steam heat, open fire places and a hot water supply. All bath rooms will have tile wainscot and floors and will be equipped with showers. Exterior of the house will be faced with cement plaster. Plans are being prepared.

SEWERS, STREET WORK AND WATER SYSTEMS.

CALIFORNIA—Highway construction. Cost not stated. Engineers, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans have been completed by the State Highway Commission for highway work in the following counties: Tehama, Solano (2 pieces), Marin, Santa Clara, Kern, Humboldt, Colusa, Tulare and Los Angeles. Plans for this work are now out for figures and bids will be opened on May 25th. Plans can be secured from the office of the State Highway Commission, Forum Bldg., Sacramento. An official proposal for the work appears in another column of this issue.

SAN FRANCISCO—Civic Center improvements. Cost not stated. Architects, City Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Board of Works has forwarded to the Supervisors a report from the consulting architects in regard to improving the two blocks in the Civic Center, which have been set aside for a plaza, with a request for \$54,000 for carrying out the plan of the architects for the adornment of this square. The plan is to level the two blocks and create a park. A large part of the estimated expense is for proposed temporary sculpture work and modeling of balustrades, pedestals, fountains, electroliters and other decorative features. The temporary figures and models will be used later as the basis of the permanent work of this character, the purpose now merely being to make the Civic Center attractive for exposition year. The Finance Commit-

tee of the Supervisors is disinclined to expend any large amount at present for temporary purposes, and may limit the outlay to parking and gardening.

SCHOOLS.

SAN FRANCISCO—School, 3 story and base, brick and steel, \$50,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Paul's Church, Rev. Father M. D. Connelly, 221 Valley street, S. F. The building will be erected at the northwest corner of Church and 29th streets, covering an area of 99 by 142 feet. Interior will contain, besides the class rooms, a large assembly hall, chapel and gymnasium. There will be steam heat, oil burning furnace, program clocks and hore reels. Interior will be finished in pine with maple flooring. Blackboards and other common school equipment will be used. Exterior of the building will be faced with pressed brick. Plans are complete and bids are now being taken.

DAVIS, YOLO CO., CAL.—School, 2 story and base, brick and steel. Cost not stated. Architects, Cunningham & Folice, First National Bank Bldg., S. F. Owners, Regents of the University of California. Bids opened for the construction of this building, a structure 30 by 152 feet, show J. W. Carr of San Francisco low at \$17,340. A complete list of the figures submitted will be found under the heading of San Francisco in this issue.

STOCKTON, SAN JOAQUIN CO., CAL.—School, 2 story and base, brick and steel, \$86,000. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, City of Stockton. The building will be erected on the property bounded by Park, Flora, Madison and Monroe streets, and has been designed to contain fourteen class rooms, assembly hall and principal's office. Corridors and stairways will be of fireproof construction. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat and oil burning furnace. There will be program clocks and vacuum cleaning. Slate blackboards are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared. Further mention will be made of the work when figures are called.

SAN BERNARDINO, SAN BERNARDINO CO., CAL.—School group, 6, 1 and 2 story, brick and steel, \$210,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, San Bernardino Union High School District. The Board has decided to erect six buildings. Administration, Science, Classical, Home Economics, Commercial and Mechanics buildings. If there are sufficient funds a cafeteria and gymnasium will also be erected. The style of architecture will be classical, Class C, with masonry walls, tile roofs, wood interiors, metal lath ceilings, wiring, etc. Only preliminary plans have been prepared and details will be published later.

THE DALLES, ORE.—School, 3 story and base, brick, \$100,000. Architect, C. J. Grandall, The Dalles. Owners, City of The Dalles. The building has been designed in the classic style and will cover a large ground area. Besides the class rooms plans provide for an auditorium seating 600 people and

equipped with a modern stage. There will also be a large gymnasium, library and manual training and domestic science rooms. Interior finish will be of pine with hardwood floors. Plans provide for steam heat, program clocks and a vacuum cleaning system. Slate blackboards are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken. Separate bids will be taken for the heating and plumbing. Plans can be secured from the architect.

ASTORIA, ORE.—School alterations and additions, 2 story and base, brick, \$20,000. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owners, Astoria School District. The work will consist of an addition to be used for an auditorium. This will contain a gallery with a seating capacity of 800 people and will be of brick construction. The balance of the work will be altering and repairing the interior of the school building. Bids for the work are to be submitted to W. A. Sherman, Clerk of the School District. Separate bids will be received for the heating and electric wiring. Plans are complete and figures are now being taken.

CHICO, BUTTE CO., CAL.—School, 2 story and base, brick, \$50,000. Architect, A. J. Bryan, Chico. Owners, Oakdale School District. Bids opened for this work show I. C. Evans of Marysville low on brick construction, and Graham & Jensen of San Francisco low for the alternate proposition of tile. Mr. Evans' bid was \$34,000 and Graham & Jensen's bid was \$35,250. Bids were taken under advisement. A complete list of the figures submitted will be found under the heading of Sacramento, Stockton and Northern California in this issue.

SACRAMENTO, CAL.—School, 2 story and base, reinforced concrete, \$200,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. Bids opened for the construction of this building show H. S. Williams, Hearst Bldg., San Francisco, low on all four propositions. These bids were all within the amount available for construction and he will probably be awarded the contract. A complete list of the bids will be found under the heading of Sacramento, Stockton, and Northern California.

BEVERLY HILLS, LOS ANGELES CO., CAL.—School, 1 story, concrete and hollow tile construction, \$20,000. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, Beverly Hills School District. The building will contain six class rooms and an assembly hall. Interior finish will be of pine and redwood. Maple floors will be used in the class rooms. There will be a central heating system. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

BANNING, RIVERSIDE CO., CAL.—School, 1 story and base, brick, \$17,900. Architects, C. H. Russell Co., Union League Bldg., L. A. Owners, Banning School District. The building has been designed in the Mission style and will contain six class rooms and an assembly hall. Interior finish will be of pine with maple floors in the class rooms. There will be a central heating system, probably furnace heat.

Modern school plumbing and electric work will be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

GLENDALE, LOS ANGELES CO., CAL.—Schools, 2, 1 story and base. Class C construction. Cost not stated. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Glendale High School District. Contractor, G. Hanson, 1414 South Vermont avenue, L. A., general construction. Contract price, \$59,183; plumbing, J. Hokom, \$6,393; Munger & Munger, Pasadena, heating, \$3,795; Bliss & Schwenzefer, Pasadena, painting, \$3,188; L. W. Chobe, Glendale, electric work, \$1,196.75; and Eugene Winslip, program clocks, \$1,550.

LOS ANGELES, CAL.—Mission school, 3 story and base, brick. Cost not stated. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, Christian Women's Board of Missions, Indianapolis. Contractors, Gauger Construction Co., Langdon Bldg., L. A. Contract price, \$23,251.

STORES.

SAN FRANCISCO—Stores, 2 story brick addition, \$10,000. Architect, A. W. Pattiani, Merchants' National Bank Bldg., S. F. Owner, A. S. Mardonald, Mills Bldg., S. F. The present one-story brick building on the north side of Market street east of Page will be added to by the construction of two stories. The entire lower floor will be occupied by a coffee house and upper two floors will be arranged for a number of rooms. Interior finish will be of pine. There will be a hot water supply. Two baths to the floor will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SEALED PROPOSALS.

PROPOSALS FOR BUILDING ALTERATIONS.

CONSTRUCTION—Office of the Quartermaster, Presidio of Monterey, Cal.—Sealed proposals will be received at this office until 11 a. m., May 15, 1914, and then opened, for moving and reconstructing guardhouse, this post, including plumbing, heating and electric wiring. Further information may be obtained by applying to this office. F. A. GRANT, major, quartermaster corps.

PANAMA CIRCULAR 846—Proposals for Furnishing or Furnishing and Erecting Structural Steel Work. Required for Decking of Sections of the Quay Wall for the Balboa Terminal Docks.—Sealed proposals will be received at the office of the general purchasing officer, Panama Canal, Washington, D. C., until 10:30 a. m., May 12, 1914, at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 846) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the engineer office of the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS major, corps of engineers, U. S. Army, general purchasing officer.

PROPOSALS FOR CONSTRUCTING DREDGE.

DREDGE—Sealed proposals for constructing the steel sea-going hydraulic hopper dredge San Pablo will be re-

ceived at this office until 11 o'clock a. m., June 18, 1914, and then publicly opened. Information on application, THOMAS H. REES, chief engineer, civil engineers, custom house, San Francisco.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m., May 23, 1914, for the construction, complete (including mechanical equipment, interior lighting fixtures and approaches), of the United States post office at Casper, Wyo. One story, basement and mezzanine, first floor fireproof, stone and brick facing and tin roof. Drawings and specifications may be obtained from the custodian of site at Casper, Wyo., or at this office, in the discretion of the supervising architect, O. WENDEROTH, supervising architect.

PROPOSALS FOR HYDRAULIC APPARATUS.

HYDRAULIC APPARATUS—U. S. Reclamation Service, Los Angeles, Cal.—Sealed proposals will be received at this office until 2 o'clock p. m., May 20, 1914, for furnishing hydraulic apparatus for the Okanagan Project, Wash. For particulars address U. S. Reclamation Service, 602 Building, Los Angeles, Cal. O. H. ESSIGN, chief electrical engineer.

PROPOSALS FOR STEEL REINFORCEMENT AND LUMBER.

STEEL REINFORCEMENT, LUMBER, ETC.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m., May 20, 1914, for earthwork and structures of the Second Unit of Vandalla South Canal, involving about 145,000 cubic yards of excavation, 200 cubic yards of reinforced concrete, the placing of 18,000 pounds of steel reinforcement and the placing in wooden structures of 135,000 feet B. M. of lumber. The work is situated on the south side of Milk River in the vicinity of Glasgow and Nashua, Mont. For particulars address the United States Reclamation Service, Washington, D. C.; Great Falls, Mont., or Malta, Mont. MORRIS BIEN, acting director.

PROPOSALS FOR BUILDING.

BUILDING—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Hospitals, Cheyenne River, Rosebud and Standing Rock Indian Reservation, North and South Dakota," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office, Department of the Interior, May 21, 1914, for furnishing materials and labor for the construction of a frame hospital on the Standing Rock Reservation, North Dakota, and hospitals on the Cheyenne River and Rosebud Reservations, South Dakota, in strict accordance with the plans, specifications and instructions of the undersigned, which may be examined at the U. S. Indian warehouse, San Francisco, Cal., and at the several schools. For further information apply to the superintendents of the Cheyenne River Indian School, Cheyenne Agency, South Dakota; Rosebud Indian School, Rosebud, South Dakota; and the Standing Rock Indian School, Fort Yates, North Dakota. CATO SELLS, commissioner.

NOTICE TO CONTRACTORS.

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS Union Depot and Ferry House, San Francisco, California.

Sealed proposals or bids will be received at this office at or prior to 11 o'clock a. m., on Thursday, May 7, 1914, for furnishing materials and constructing a pier (to be known as Pier No. 151) and adjacent bulkhead wharf on the waterfront of the City and County

of San Francisco. In accordance with the plans and specifications prepared therefor by the Assistant State Engineer and adopted by the Board March 1914, and all the bids are to be opened at which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of Portland cement and creosoted piles (which will be furnished to the contractor by the Board), green piles, machined and redwood lumber, redwood lumber, cedar lumber, asphalt paving, bituminous concrete paving, sand, crushed rock or gravel, reinforcing materials, castings, structural steel, rods, bolts, spikes, car springs, rails and fastenings, etc. All materials used must be of the best of their respective kinds, if not especially specified herein. All materials used in the structures will be subjected to a rigid examination and test and if found defective, under size, unsuitable or not as specified, will be condemned and must be immediately removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office, and is accompanied by a certified check for an amount equal to Five (5) per cent of the amount of the proposal, to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and the bidder fails to execute or neglect to execute a contract and give the bond required within Six (6) days after the award is made, in that case said sum mentioned in the condition shall be deemed liquidated damages for such failure and neglect and shall be paid in the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-half the amount of the bid, with two or more sureties to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof, and the satisfaction of said board, and said bond shall also be effective as provided in the order approved March 1914, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary at or prior to 11 o'clock a. m. on Thursday, May 14, 1914, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids.

Plans and specifications for this work to be had at Room No. 18, Union Depot and Ferry House, upon depositing \$4.00 for same, which amount will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid, "Bid for Pier No. 15."

J. J. DWYER,

THOMAS S. WILLIAMS,

J. H. McCALLUM,

Board of State Harbor Commissioners.

GEROME NEWMAN,

Assistant State Engineer.

LEO V. MERLE, Secretary.

STATE OF CALIFORNIA.

DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 215 Germania Bldg., Sacramento, Cal., until the times hereinafter noted, at which times they will be publicly opened and read, for consideration of the same, and the specifications therefor, to which special reference is made, portions of State highway as follows:

Tulh 4 o'clock P. M. May 23, 1914.
Tehama County from Red Bluff to the Northernly Boundary (H-Teh-3-C), about 13.7 miles in length, to be built of Portland cement concrete.

Solano County from Benicia to a point 2 1/2 miles south of Cordelia (H-Sol-7-A), about 9.0 miles in length, to be built of Portland cement concrete.

Mart County from Larkspur to Sausalito (IV-Mrt-1B), about 6.0 miles in length, to be graded and part surfaced with "grave".

Stanislaus County from Gilroy to Sargent (IV-S, Cl-2-C2), about 6.0 miles in length, to be built of Portland cement concrete.

Mtn County from Sections 5 and 6, T. 32 S. R. 23 E. M.D.B. & M. to Bakersfield (VI-Ker-4-C), about 13.0 miles in length, to be built of Portland cement concrete.

Tulh 2 o'clock P. M. May 25, 1914.
Humboldt County from Dycerville to Shively (H-H-1-B), about 7.3 miles in length, to be graded.

Colusa County from Hershey to Berlin (H-Col-7-A), about 10.8 miles in length, to be built of Portland cement concrete.

Solano County from Fairfield to Vacaville (H-Sol-7-C), about 8.8 miles in length, to be built of Portland cement concrete.

Tulare County from Tulare to Tagus Spring (H-Tul-4-C), about 4.3 miles in length, to be built of Portland cement concrete.

Los Angeles County from Liebre Mountain to the Northernly Boundary (VII-L-A), about 10.0 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained at the said office and they may be seen at the office of the Division Engineers in the divisions in which the work is situated. The Division Engineers' offices are located at Williams, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal for further directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any and all bids or to accept the bid deemed for the best interests of the State.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C. April 28, 1914.—SEALED PROPOSALS will be opened in this office at 3 P. M. on June 4, 1914, for the construction (including mechanical equipment, lighting fixtures and approaches) of a one-story and two-story and a one-story rear extension) stone, and brick-faced building of 6,000 square feet ground area, nonfireproof construction (except first floor) for the International Exposition Company at Chico, Cal. Drawings and specifications may be obtained from the custodian at Chico, Cal., or at this office, in the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect. (*)

CALL FOR BIDS FOR WISCONSIN BUILDING AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

NOTICE IS HEREBY GIVEN that sealed bids or proposals will be received by the Wisconsin, Panama-Pacific Exposition Commission at their office 709 Germania Bldg., Milwaukee, Wis., up to and including the 16th day of May, 1914, at 10 o'clock A. M. (Central Time) for the furnishing of all material and doing all work necessary and required to construct and complete the Wisconsin Building at the Panama-Pacific International Exposition in San Francisco, Cal., according to plans and specifications. Only complete bids will be considered. Plans and specifications are on file in the office of the Wisconsin Commission, 709 Germania

Bldg., Milwaukee, Wis.; also in the office of R. A. Messmer & Bro., Architects, 1604 Majestic Bldg., Milwaukee, Wis.

Each proposal must be accompanied by money, certified check or surety bond in the sum of 5% of the bid. Conditioned that the bidder, if successful, will furnish materials and do the work as in his bid agreed, and also furnish proper bond to secure the performance of the contract or failing to do so, then to forfeit such accompanied sum to the Wisconsin Panama-Pacific Exposition Commission. The Commission reserves the right to reject any and all bids.

Each proposal must be filled out on blank forms and returned in self-addressed envelope furnished by said Commission.

D. E. BOWE, Secretary,
Wisconsin Panama-Pacific Exposition Commission, 709 Germania Bldg., Milwaukee, Wis. (*)

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C. April 24, 1914.—SEALED PROPOSALS will be opened in this office at 3 P. M. on June 4, 1914, for the construction complete (including mechanical equipment, interior lighting fixtures, and approaches) of the United States post office at Brigham City, Utah. Two-story building; ground area, 3,700 square feet first floor fireproof; stone and brick facing; composition roof. Drawings and specifications may be obtained from the custodian of site at Brigham City, Utah, or at this office, in the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Commission of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, Cal., up to and including Thursday, May 7, 1914, for Extensions to Warehouses Nos. 2 and 3 in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the amount bid will be required to secure faithful performance of the contract, the sureties thereon must be satisfactory to the Buildings and Grounds Commission of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to award the order of contracts in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and bids are required to submit a bid, which will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Commission.

WILLIAM H. CROCKER,
Chairman. (*)

The amount of bond for faithful performance of contract has been fixed as follows:

Proposition No. 1—\$1,000.00.

Proposition No. 2—\$3,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, RICHARD J. CLINE, Secretary.

NOTICE TO CONTRACTORS.

COUNTY OF KERN.

STATE OF CALIFORNIA.

SEALED PROPOSALS addressed to the Board of Supervisors and endorsed "Proposals for Furnishing and Installing a Crushing Plant at Keene, near Woodford on the Southern Pacific Railroad" will be received by the Board of Supervisors, Kern County, at their office in the County Court House until two (2) o'clock P. M. on May 12th, 1914, and at that time and place will be publicly opened and read.

Competitive designs and bids to be submitted by contractors for an electrically equipped plant of 1000 tons capacity in hours.

An outline of general requirements and contour maps of the quarry site may be obtained at the office of the Board of Supervisors, Kern County, Bakersfield, California. All proposals must specify each part of the equipment, give make, model, and give a catalog identification and must give the price proposed both in writing and in figures signed by the bidder with his address.

Each proposal must be accompanied

by a certified or cashier's check, amounting to at least ten (10) per cent of the amount of the bid payable to the Chairman of the Board of Supervisors, such check to be returned to the bidder upon the forfeiture, under the conditions herein stipulated.

A bond will be required for the faithful performance of the contract in a sum equal to one-half (1/2) of the amount of the contract, and a further bond in a sum equal to one-quarter (1/4) of the amount of the contract will be required for the security of material-men and laborers. The sureties on both bonds must be approved by the Board of Supervisors.

The bidder to whom the contract may be awarded will be required to appear at the office of the said Board of Supervisors with the sureties offered by him and execute a contract within ten (10) days after it is awarded to him. In case of failure or neglect to do so, he may be considered as having abandoned it, and the check accompanying the proposal may, at the option of the Board of Supervisors be forfeited to the County of Kern.

All bids will be compared on the basis of excellence of design and materials as well as the amount for which it is proposed to install the plant.

The Board of Supervisors reserves the right to reject any or all bids.

BOARD OF SUPERVISORS OF KERN COUNTY.

By H. A. Jastro, Chairman. (•)

NOTICE TO CONTRACTORS.

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Cal., April 11, 1914.—SEALED PROPOSALS, in triplicate, for constructing Quartermaster's Stables at the Presidio, San Francisco, Cal. will be received until 11 A. M., May 14, 1914, and then opened. Plans, specifications, etc., can be obtained here. Deposit of \$25.00 required to insure return of plans, etc. Proposals to be enclosed in sealed envelopes and addressed to: Col. GEO. MCK. WILLIAMSON, Q. M. C.

NOTICE TO CONTRACTORS.

COUNTY OF KERN, State of California.—Sealed proposals addressed to the Board of Supervisors and endorsed "Proposals for Furnishing and Installing Crushing Plant at Keene, near to Woodford on the Southern Pacific Railroad" will be received by the Board of Supervisors of Kern County at their office in the County Court House until two (2) o'clock p. m. on May 14th, 1914, and at that time and place will be publicly opened and read.

Plans, specifications, and bids to be submitted by contractors for an electrically equipped plant of 1000 tons capacity in 8 hours.

Plan outline of general requirements and contour maps of the quarry site may be obtained at the office of the Kern County Highway Commission, Bakersfield, California. Bidders must specify each part of the equipment, giving manufacturer's name and catalog identification, and must give the price proposed both in writing and in figures signed by the bidder with his address.

Each proposal must be accompanied by a certified or cashier's check amounting to at least ten (10) per cent of the amount of the bid payable to the Chairman of the Board of Supervisors, such check to be returned to the bidder unless forfeited under the conditions herein stipulated.

A bond will be required for the faithful performance of the contract in a sum equal to one-half (1/2) of the amount of the contract, and a further bond in a sum equal to one-quarter (1/4) of the amount of the contract will be required for the security of material-men and laborers. The sureties on both bonds must be approved by the Board of Supervisors.

The bidder to whom the contract may be awarded will be required to appear at the office of the said Board of Supervisors with the sureties offered by him and execute a contract within ten (10) days after it is awarded to him. In case of failure or neglect to do so, he may be considered as having abandoned it, and the check accompanying the proposal may, at the option of the Board of Supervisors be forfeited to the County of Kern.

All bids will be compared on the basis of excellence of design and material as well as the amount for which it is proposed to install the plant.

The Board of Supervisors reserves the right to reject any or all bids.

BOARD OF SUPERVISORS OF KERN COUNTY.

By H. A. JASTRO, Chairman.

BOARD OF PANAMA-PACIFIC MANAGERS FOR MASSACHUSETTS.

ed by the Board of Panama-Pacific SEALED PROPOSALS will be received by the Board of Panama-Pacific Managers for Massachusetts at Room 305, in the Tremont Building, Boston, Massachusetts, at 11:00 A. M. (Eastern Time), Monday May 11, 1914, for Constructing the Massachusetts Pavilion at the Panama-Pacific International Exposition in accordance with specifications on file in the office of the Board of Panama-Pacific Managers for Massachusetts in Room 305, in the Tremont Building, Boston, Massachusetts, and in the office of the Director of Works of the Exposition, Room 207, Service Building, Exposition Grounds, San Francisco, California.

Each proposal must be accompanied by a certified check payable to the order of the Board of Panama-Pacific Managers for Massachusetts in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of ten (10) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfac-

tory to the Board of Panama-Pacific Managers for Massachusetts.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the State of Massachusetts.

Plans and specifications for the work may be obtained from the Board of Panama-Pacific Managers for Massachusetts, Room 305 Tremont Building, Boston, Massachusetts, or from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$25.00 which amount will be refunded to contractors upon the return of plans and specifications in good condition.

By order of the Board of Panama-Pacific Managers for Massachusetts.

PETER H. CORR, Chairman.
CHARLES O. POWER, Secretary. (•)

PROPOSALS FOR SALE OF VESSELS.

SALE OF U. S. NAVAL VESSELS.—Sealed proposals will be received at the bureau of supplies and accounts, Navy Department, Washington, D. C., until 12 o'clock, noon, May 14, 1914, when they will be publicly opened for the purchase of the following vessels: U. S. S. Manila, a new iron-hulled Island, Cal., appraised value \$10,000; U. S. S. Restless, at naval torpedo station, Newport, R. I., appraised value \$2,000. The Manila will be sold for cash, the highest bidder and the Restless to the bidder offering the highest price above the appraised value. Forms of proposal and bond and information concerning the vessels and the terms and conditions of sale may be obtained upon application to the bureau of supplies and accounts. JOSEPHUS DANIELS Secretary of the Navy.

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the first part of the news department, under different headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

CITY HALL.

—1 story and base, Class A construction, \$4,500,000. San Francisco, Architects, Barwell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids were opened at the Wednesday meeting of the Board of Public Works for the marble work at the new City Hall. Five sets of figures were submitted. In all seven propositions were considered. A complete list of the bids as opened will be found under the heading of San Francisco in this issue.

FLATS.

—3 story and base, frame, \$5,500. San Francisco, Architect, C. Fantoni, 916 Kearny street, S. F. Owner, Philip Teresi. The building will be erected on Mission street near Persia and will contain two modern flats and a store. Each flat will have five rooms and bath. Interiors will be finished in pine and redwood. There will be open hearthplaces and tile mantels in the living rooms. Bath rooms will have composition floors. Automatic water heaters are specified. Plans are complete and figures are now being taken.

FLAT ADDITION.

—1 story, C. C. Fantoni, 916 Kearny street, S. F. Owner, F. Di Graglia. The building will be

erected on Greenwich near Stockton street, and will contain five rooms and bath. The present building, a two-story structure, will also be altered and new plumbing, electric work and plastering will be installed. Open fire place and tile mantel will be used. Exterior will be covered with rustic and shiplap. Plans are now being prepared.

GARAGE—1 story, brick, \$7,500. San Francisco. Architect, none. Owner, S. J. Sterner, 125 4th avenue. The building will be erected on the north side of Green street east of Octavia, covering an area of 34 by 137 feet. A cement floor will be used and steel roof trusses. There will be a large gasoline storage tank. Interior finish will be of pine. Besides the storage space a machine shop will be included in the building. Exterior will be faced with stock brick or cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

HOTEL—15 story and base. Class A construction. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Fred C. Finkle. This building will be erected at the northwest corner of Pine and Stockton streets, covering an area of 40 by 60 feet. Construction will be of the Class A type throughout with a complete steel frame, reinforced exterior walls, floors and roof slabs. It was originally intended to carry the structure to a height of 23 stories. Interior partitions will be of metal lath and plaster. Interior finish will be of pine and hardwood with some metal trim. All guest rooms will have private baths. Plans provide for steam heat, elevator service, a hot water supply and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with cement plaster. Plans for the reinforced concrete work are now complete and figures are being taken.

HOTEL—5 or 6 story and base. Class A construction. Cost not stated. San Francisco. Architect, Alfred Schroepfer, Foxcroft Bldg., S. F. Owner, Mr. Davidow, 46 Kearny street, S. F. The building will be erected at the northeast corner of Third and Townsend streets and will cover a large ground area. Construction will be fireproof throughout with a complete steel frame and brick exterior walls, metal lath and plaster interior partitions. Interior finish will be of pine and hardwood. There will be a number of stores on the first floor besides the hotel office and lobby. Upper floors will be arranged for modern hotel rooms, a large percentage of which will have private baths. There will be steam heat, elevator service, a vacuum cleaning plant, hot water supply and patent store fronts. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$6,000. San Francisco. Architect, none. Owner, C. A. Warren, Merchants' National Bank Bldg., S. F. The house will be designed for a seven-room house and will be erected on 43rd avenue. Interior finish will be of pine and hardwood veneer with some oak

floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. The work will probably be done by Day Labor.

RESIDENCE—1½ story and base, frame, \$3,000. San Francisco. Architect, C. H. Barrett, 381 Bush street, S. F. Owner's name withheld. The dwelling will be erected in the Richmond District and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCES—2, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These two houses will be erected on the west side of 15th avenue near Fulton, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places in the living rooms. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the houses will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SCHOOL—3 story and base, brick and steel, \$50,000. San Francisco. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Paul's Church, Rev. Father M. D. Connelly, 221 Valley street, S. F. The building will be erected at the northwest corner of Church and 29th streets, covering an area of 99 by 142 feet. Interior will contain, besides the class rooms, a large assembly hall, chapel and gymnasium. There will be steam heat, oil burning furnace, program clocks and hose reels. Interior will be finished in pine with maple flooring. Blackboards and other common school equipment will be used. Exterior of the building will be faced with pressed brick. Plans are complete and bids are now being taken.

STORES—2 story brick addition, \$10,000. San Francisco. Architect, A. W. Pattiani, Merchants' National Bank Bldg., S. F. Owner, A. S. Macdonald, Mills Bldg., S. F. The present one-story brick building on the north side of Market street east of Page will be added to by the construction of two stories. The entire lower floor will be occupied by a coffee house and upper two floors will be arranged for a number of rooms. Interior finish will be of pine. There will be a hot water supply. Two baths to the floor will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FLATS—2, 3 story and base, frame, \$4,000 and \$6,000. San Francisco. Architect, Paul F. De Martin, 2123 Powell street, S. F. Owner's name withheld. These two buildings will be erected on Greenwich street near Powell, and each has been designed to contain three flats. Interiors will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the living rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Entrances will be finished in tile with terrazzo steps. Exterior will be covered with shiplap and cement plaster on metal lath. Plans are complete and figures are now being taken for the work.

HOTEL—3 story and base, brick and steel, \$20,000. San Francisco. Architect, W. J. Cuthbertson, 328 Montgomery street, S. F. Owner, Eliza Herrin. The building will be erected on the north side of O'Farrell street west of Larkin, covering an area of approximately 12,000 square feet. There will be fifty guest rooms, nearly all of which will have private baths. Interior finish will be of pine and redwood. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—6 story and base, brick and steel, \$25,000. San Francisco. Architect, Chester H. Miller, Dalziel Bldg., Oakland. Owner's name withheld. The building will be erected on Post street near Larkin and will have a frontage of 29 feet and a depth of 73 feet. There will be a store besides the hotel lobby on the first floor. Upper floors will contain in the neighborhood of 75 rooms, all of which will have private baths. Interior finish will be of pine and elm. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. A complete steel frame will be used. Plans are complete and figures are being taken.

CIVIC CENTER IMPROVEMENTS—Cost not stated. San Francisco. Architects, City Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Board of Works has forwarded to the Supervisors a report from the consulting architects in regard to improving the two blocks in the Civic Center, which have been set aside for a plaza, with a request for \$64,000 for carrying out the plan of the architects for the adornment of this square. The plan is to level the two blocks and create a park. A large part of the estimated expense is for proposed temporary sculpture work and modeling of balustrades, pedestals, fountains, electrolites and other decorative features. The temporary figures and models will be used later as the basis of the permanent work of this character, the purpose now merely being to make the Civic Center attractive for exposition year. The Finance Committee of the Supervisors is disinclined to expend any large amount at present for temporary purposes, and may limit the outlay to parking and gardening.

City Bids Opened.

Five Sets of Figures Submitted With Seven Proposition for Marble Work on New City Hall.

The Board of Public Works received five sets of bids at their Wednesday afternoon meeting for the marble work at the City Hall. Bids were submitted with seven alternative propositions calling for different combinations of marble and for different amount of work. All bids were taken under consideration.

Marble Work For City Hall.

Joseph Musto Sons-Keenan Co. (1) \$583,000 (6) \$234,860; (7) \$115,000.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, none. Owner, D. E. Bigelow. 2333 Channing Way, Berkeley. The building has been designed to contain 24 rooms, which will be erected on the north side of Channing Way west of Dana. Interior finish will be of pine and redwood with some oak floors. There will be a central heating system and wall beds. All apartments will have private bath rooms. A hot water system will also be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

GARAGE—2 story and base, brick, \$10,000. Oakland, Cal. Architect, Frederick Soderberg, Union Bank Bldg., Oakland. Owner, W. H. Greuner. The building will be erected at the corner of Brook and Broadway and will be used as a commercial garage. The building will cover an area of 59 by 100 feet. There will be a cement floor, steel roof trusses and metal window sash and frames. Interior finish will be of pine throughout. Special gasoline storage tanks are specified. Exterior will be faced with cement plaster. Plans are complete and figures are being taken. All parts of the work will be segregated.

LODGE HALL—2 story and base, concrete and frame, \$15,000. Livermore, Alameda Co., Cal. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Livermore Foresters' Hall Association. The building will have reinforced concrete walls and frame interior construction. There will be several lodge rooms, ball room and auditorium, besides the offices of the organization. Interior finish will be of pine with a maple floor in the ball room. Plans provide for a central heating system. Exterior will be finished with cement plaster. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, Caroline Wolbold. The house will be erected in Claremont Tract and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine, redwood and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Charles H. Bebb, Denny Bldg., Seattle. Owner, Mrs. Annie H. Lewis. The house

will be erected in Claremont Park on lot 7, block 5, and has been designed to contain eight rooms, two baths and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will have tile floors and wainscot and will be equipped with showers. Exterior of the house will be covered with cement plaster on metal lath. Plans have been revised and new figures are being taken.

FRATERNITY HOUSE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Delta Chi Chapter House Association, Inc. The building, designed for a large residence, will be erected on lots 6 and 7 in the Simons property. There will be in the neighborhood of 20 rooms and a number of baths. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot and will be equipped with showers. Automatic water heaters will be installed. Hardwood floors will be used in the principal rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. B. Spitts, 2154 Ashby street, Berkeley. The dwelling will be erected on Indian Park near San Diego street, and has been designed to contain six rooms and bath. Interior finish will be of pine and hardwood with oak floors in the living room, dining room and reception hall. There will be open fire places and tile mantels. Furnace heat is also specified. Bath room will have tile wainscot and composition floor. An automatic water heater is specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, D. S. Glover, 2445 Webster street, Berkeley. The house has been designed for a ten-room dwelling and will be erected on the north side of Webster street west of Regent. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$30,000. Berkeley, Alameda Co., Cal. Architect, Henry Cutterson, 50 Post street S. F. Owners, Delta Kappa Epsilon Chapter House Association. The building will be erected at the foot of Piedmont avenue and has been designed similar to a large residence.

There will be in the neighborhood of twenty rooms and several baths. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile floors and wainscot and will be equipped with showers. Exterior of the house will be covered with cement plaster on metal lath. Only preliminary plans have been prepared and construction will not be started for at least three months.

Bids On University Farm Work Opened.

Regents of the University of California
Open Bids for Two-story Brick
Building at Davis.

Regents of the University of California opened bids on April 30th for constructing a two-story brick and steel class room building, 90x152 feet, which is to be erected at the University Farm at Davis, Yolo County. The structure was designed by Architects Cunningham & Politeo, First National Bank Bldg., San Francisco. Eighteen sets of figures were submitted, the lowest by J. W. Carr of this city at \$47,340. No contract has been awarded.

SAN JOSE & SANTA CLARA CLARA VALLEY.

MAUSOLEUM — 1 story, reinforced concrete. Cost not stated. Holy Cross Cemetery, San Mateo Co., Cal. Architect, L. Mastropasqua, 580 Washington street, S. F. Owner, Angelo Ferroag-gara. The structure has been designed in the classic style and will be faced with marble. Interior will be finished in Caen stone and provides for six receptacles. There will be art glass, bronze doors and grilles. Plans are complete and figures are being taken.

LODGE HALL—2 story and base, brick and stucco, \$50,000. San Mateo, San Mateo Co., Cal. Architect, Will D. Shea, 244 Kearny street, S. F. Owners, Santa Mateo Knights of Columbus Hall Association. The building will cover a considerable ground area and will be devoted entirely to the use of the organization. Interior has been arranged for a large auditorium, gymnasium, handball court, swimming pool, bowling alley and club rooms. Interior finish will be of pine and hardwoods with maple floor in the ball room. There will be steam heat and open fire places. Mantels will be of tile. Exterior of the building will be faced with cement plaster. The architect's plans have just been selected in competition with a number of other local architects.

WORKERS' COTTAGE AND NURSES' HOME—Brick and concrete. Cost not stated. Agnew, Santa Clara Co., Cal. Architect, State Architect, George B. McDougall, Sacramento. Owners, State of California. Bids were opened on the 27th and 28th for these two buildings. Robinson & Place of Oakland were low on both buildings. The price for the Workers' Cottage was \$36,750 and for the Nurses' Home \$32,750. A complete list of these figures will be found under the heading of San Jose and the Santa Clara Valley.

RESIDENCE — 1 story and base, frame. Cost not given. San Jose, Santa Clara Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: Edward Delmastro, 634 South 1st street, 1 story, five-room cottage, \$1,800, and J. G. Lueben, 53 St. Mark street, 1 story, five-room cottage, \$1,000. Materials are now being purchased.

Contracts Awarded.

CHURCH—1 story and base, frame and plaster, \$20,000. Santa Cruz, Santa Cruz Co., Cal. Architect, W. J. Wythe. Central Bank Bldg., Oakland. Owners. First Methodist Church of Santa Cruz Contractors, Johnston Co., 1776 12th avenue, S. F. Contract price, \$19,255. Note: This contract does not include the art glass, pews or heating. Figures are now being taken for this work.

FRESNO, MODESTO, STANIS- LAUS AND CENTRAL CALIFORNIA.

HOSPITAL ADDITION—3 story and
base, brick. Cost not stated. Porter-
ville, Tulare Co., Cal. Architect, F. W.
Griffin, Porterville. Owners, Mt. Whit-
ney Hospital. The addition will be
erected adjoining the present building
at the corner of Main and Harrison
streets and will cover a considerable
ground area. There will be wards and
private rooms. Interior finish will be
of pine and white enamel. Consider-
able tile will be used. The new por-
tion of the building will contain the
heating plant, steam with oil burning
equipment, for both buildings. Modern
hospital plumbing and electric work
will be installed. Exterior will be
faced with pressed brick. Plans are
complete and figures will be called for
at once.

LODGE HALL—2 story and base,
brick, \$20,000. Delano, Kern Co., Cal.
Architects, Swartz, Hutchkin & Swartz,
Rowell Bldg., Fresno. Owners, Delano
Masonic Temple Association. The
building will be erected on a corner lot
covering an area of 60 by 100 feet.
There will be stores on the first floor
and large lodge rooms and office on the
upper floor. Interior finish will be of
pine throughout. Plans provide for a
central heating system. Patent store
fronts are specified. Modern plumb-
ing and electric work will be installed.
Exterior of the building will be faced
with pressed brick. Plans are com-
plete and figures will be called for at
once.

Contracts Awarded.

BANK ALTERATIONS—Brick con-
struction, \$12,000. Bakersfield, Kern
Co., Cal. Architect, none. Owners,
First National and Producers' Bank of
Bakersfield. Contractors, Lindgren Co.,
Monadnock Bldg., S. F. Contract price,
\$12,000.

HOTEL—2 story and base, brick,
\$13,000. Bakersfield, Kern Co., Cal.
Architect, L. K. Condrajian, Fresno.
Owner, C. Petrini. Contractor, L. K.
Condrajian, Fresno. Contract price,
\$13,000.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

SCHOOL—2 story and base, brick,
\$50,000. Chico, Butte Co., Cal. Archi-
tect, A. J. Bryan, Chico. Owners, Oak-
dale School District. Bids opened for
this work show L. C. Evans of Marys-
ville low on brick construction and
Graham & Jensen of San Francisco low
for the alternate proposition of tile.
Mr. Evans bid was \$31,500 and Graham
and Jensen's bid was \$35,250. Bids
were taken under advisement. A com-
plete list of the figures submitted will
be found under the heading of Sacra-
mento, Stockton and Northern Califor-
nia in this issue.

SCHOOL—2 story and base, rein-
forced concrete, \$200,000. Sacramento,
Cal. Architects, Shea & Loquist,
Bankers' Investment Bldg., S. F. Own-
ers, City of Sacramento. Bids opened
for the construction of this building
show H. S. Williams, Hearst Bldg., San
Francisco, low on all four propositions.
These bids were all within the amount
available for construction and he will
probably be awarded the contract. A
complete list of the bids will be found
under the heading of Sacramento,
Stockton and Northern California.

HIGHWAY CONSTRUCTION — Cost
not stated. California, Engineers,
State Highway Commission, Forum
Bldg., Sacramento. Owners, State of
California. Plans have been completed
by the State Highway Commission for
highway work in the following coun-
ties: Tehama, Solano (2 pieces), Marin,
Santa Clara, Kern, Humboldt, Col-
usa, Tulare and Los Angeles. Plans
for this work are now out for figures
and bids will be opened on May 25th.
Plans can be secured from the office of
the State Highway Commission, Forum
Bldg., Sacramento. An official pro-
posal for the work appears in another
column of this issue.

BANK ALTERATION—2 story, brick,
\$10,000. Stockton, San Joaquin Co.,
Cal. Architect, Henry H. Meyers, Kohl
Bldg., S. F. Owners, First National
Bank of Stockton. The present bank-
ing quarters will be rearranged and
new interior finish and banking fix-
tures will be installed. Included in the
work will be new plastering, plain and
ornamental, electric work, painting,
plumbing and ornamental iron and
bronze work. Vaults will also be re-
arranged. Plans are now being pre-
pared.

WHARF SHED—2 story, reinforced
concrete. Cost not stated. Sacramento,
Cal. Engineer, City Engineer A. Givan,
Sacramento. Owners, City of Sacra-
mento. Plans have been submitted to
the City Commissioners for a wharf
shed which is to be erected at the foot
of P street. Construction will be fire-
proof. Exterior will be faced with ce-

ment plaster. Plans are complete and
waiting the approval of the Commis-
sion. Further mention will be made of
the work.

CORP HOUSE—2 story, dome and
basement, reinforced concrete, \$90,000.
Alturas, Modoc Co., Cal. Architect, De
Longchamps, Reno, Nev. Owners, Modoc
County. The building has been men-
tioned here a number of times be-
fore when plans were first out for fig-
ures. Bids recently opened were in
excess of the amount available for con-
struction and plans are now being re-
vised. New figures will be called for
at the May meeting of the Board of
Supervisors. Further mention will be
made of the work at that time.

HOTEL AND STORES—3 story and
base, brick and steel, \$45,000. Stock-
ton, San Joaquin Co., Cal. Architect,
Henry H. Meyers, Kohl Bldg., S. F.
Owner's name withheld. The building
will cover a considerable ground area
and will be arranged for stores on the
first floor besides the hotel entrance
and lobby. Upper floors will contain
in the neighborhood of 75 rooms and a
number of baths. Interior will be
finished in pine and redwood. There
will be steam heat and a hot water
supply. All bath rooms will have tile
wainscot and composition floors. Ex-
terior of the building will be faced
with pressed brick. Patent store fronts
will be specified. Plans are now be-
ing prepared.

RAILROAD STATION — 2 story,
frame, \$10,000. Folsom, Sacramento
Co., Cal. Architect, Engineering De-
partment Southern Pacific Co., Flood
Bldg., S. F. Owners, Southern Pacific
Co. Work has been started by the
Southern Pacific Co. on the construc-
tion of a new passenger depot at Fol-
som. The building will be a two-story
frame structure containing the two
usual waiting rooms and agent's of-
fice on the first floor. The second floor
will contain living rooms for the agent
consisting of a five-room flat. Exterior
will be covered with cement plaster.
About \$3,000 will be spent in con-
structing the building.

RESIDENCES—1 and 2 story, frame.
Cost not stated. Stockton, San Joaquin
Co., Cal. Architect, none. The follow-
ing Day Labor jobs are reported as
about to be started in Stockton: P.
W. Priestly, 202 West Stockton, frame
dwelling, \$2,000; Richard Godsil, 516
West Park, frame cottage, \$1,600; M.
Lamasney, 744 West Flora, frame cot-
tage, \$1,600; Mrs. Sarah E. Gibbs, 1328
South California, frame residence, \$1-
750; W. J. Magnuson, 725 South Pil-
grim, cottage, \$600; J. E. Wolf, 541-C
East Oak, frame cottage, \$1,500; J.
Cleinmann, 39 North El Dorado, two
frame cottages, \$1,500 each; Th. and Sadie
Jewitt, 409 East Weber, frame addi-
tion, \$500. Materials for this work are
now being purchased.

BUNGALOW — 1 story and base,
frame, \$1,500. Sacramento, Cal. Archi-
tect, none. Owner, Burton H. Bill, 3215
4th avenue, Sacramento. The dwelling
has been designed to contain six rooms
and bath. Interior finish will be of
pine throughout. Hardwood floors will
be used in the principal rooms. There
will be open fire places and tile man-
tels. Bath room and kitchen will have
tile wainscot. An automatic water
heater will be installed. Exterior of
the dwelling will be covered with ce-
ment plaster on metal lath. Plans are

complete and the work will be done by Day Labor. Materials are now being purchased.

SCHOOL—2 story and base, brick and steel. Cost not stated. Davis, Yolo Co., Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Regents of the University of California. Bids opened for the construction of this building, a structure 90 by 152 feet, show J. W. Carr of San Francisco low at \$47,340. A complete list of the figures submitted will be found under the heading of San Francisco in this issue.

SCHOOL—2 story and base, brick and steel, \$36,000. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, San Joaquin Bldg., Stockton Owners, City of Stockton. The building will be erected on the property bounded by Park, Flora, Madison and Monroe streets, and has been designed to contain fourteen class rooms, assembly hall and principal's office. Corridors and stairways will be of fireproof construction. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat and oil burning furnace. There will be program clocks and vacuum cleaning. State blackboards are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared. Further mention will be made of the work when figures are called.

POST OFFICE—1 and 2 story, and base, stone and brick. Cost not stated. Chico, Butte Co., Cal. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans for this building have been completed and forwarded in this coast for figures. The main portion of the building will be two stories high with a one-story wing in the rear. Construction will be of the non-fireproof type except the first floor. Plans provide for steam heat and special cabinet work. The building will cover an area of approximately 6,000 square feet. Exterior will be faced with cut stone and pressed brick. Plans can be secured from either the Supervising architect at Washington, D. C., or from the Custodian of the site at Chico. Bids will be opened on June 9th. An official proposal appears in another column of this issue.

Contracts Awarded.

EARTH DAM AND LEVEES—Cost not stated. Orland, Glenn Co., Cal. Engineer, U. S. Reclamation Service, Orland. Owners, Orland Reclamation District. M. Fisher, S. F., submitted

the lowest figure for this work at \$16,386 and will probably be awarded the contract. Other figures submitted were as follows: Phil Schuyler, Oakland, \$17,815; Moffitt & Need, San Francisco, \$19,147; Grant Fee, San Francisco, \$34,266; Mesmer & Rice, Los Angeles, \$67,382; F. F. Prendergast, Los Angeles, \$68,992; Blake Bros., Oakland, \$71,968.

DAM AND BULKHEAD—Cost not stated. Sacramento, Engineer's name not given. Owners, Reclamation District No. 1500. Contractors, Hyde-Harjes Co., S. F. Contract price, \$22,275. Other bids for this work were Healy-Tibbetts Co., \$22,341; Mervy-Elwell Co., \$22,866; W. N. Concanon, \$24,866 San Francisco Bridge Co., \$22,599 Thompson Bridge Co., \$20,950; Portland Concrete Pile Co., \$28,472.99.

Bids For Nurses' Home At Agnew

State Board of Control Receives Sixteen Figures for Work, Frederick Robinson Low Man.

(By Special Wire.)

SACRAMENTO, CAL., April 27th, 1914—Bids were opened in the office of the State Board of Control today for constructing a building to be known as the Nurses' Home at the State Asylum at Agnew, Santa Clara County. All bids were taken under advisement and a contract will probably be awarded sometime next week.

The lowest figure was submitted by Frederick Robinson for \$32,750. Sixteen figures in all were submitted, all of which were very close. The following is a complete list of all bids received:

Nurses' Home, Agnews.

Frederick Robinson	\$32,750

Sacramento School Bids Are Opened.

H. S. Williams of San Francisco Low On All Four Propositions. Contract Not Awarded.

(By Special Wire.)

SACRAMENTO, CAL., May 1, 1914.—Seven sets of figures were opened by the Sacramento Board of Education for the construction of the two-story and basement reinforced concrete school to be erected on the property bounded by 11th, 12th, U and V streets. Four different propositions were submitted by the bidders and H. S. Williams, of San Francisco, was low on all four. Conditions under which bidders submitted figures were that in all propositions corridor partitions should be of tile throughout, except on the corridor sides. Proposition No. 1 called for all partitions to be of tile with plastering omitted in the auditorium, kitchens, lunch rooms and wood working room. Proposition No. 2 all partitions wood studs, wood lath and plaster. Proposition No. 3, wood studs, metal lath and plaster three coat work, and Proposition No. 4, metal studs and Jackson patent plaster board. Plans were prepared by Architects Shea & Lofquist of San Francisco. The following is a complete list of the bids as submitted:

Sacramento School Bids.

LOS ANGELES AND SOUTHERN CALIFORNIA.

RESIDENCE—2 story and base, frame. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Thomas Higgins. The dwelling will be erected on Second street near Arizona and has been designed to contain fifteen rooms, three bath rooms and sleeping porch. Interior finish will be of pine and hardwood. Hardwood and inlaid floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters are specified. Bath rooms will have tile wainscot and composition floors and will be equipped with showers. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SCHOOL GROUP—6, 1 and 2 story, brick and steel, \$210,000. San Bernardino, San Bernardino Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, San Bernardino Union High School District. The Board has decided to erect six buildings, Administration, Science, Classical, Home Economics, Commercial and Mechanics buildings. If there are sufficient funds a cafeteria and gymnasium will also be erected. The style of architecture will be classical, Class C, with masonry walls, tile roofs, wood interiors, metal lat ceilings, wiring, etc. Only preliminary plans have been prepared and details will be published later.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. Los An-

geles, Cal. Architect, A. Burnside Sturges, Story Bldg., L. A. Owner, F. E. Rubin. The building will be erected on Bonnie Brae street near 20th, and will contain 32 rooms arranged in two and three room suites with wall beds and private baths. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be gas heaters and automatic water heaters. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with veneer pressed brick and re-sawed rustic. Plans are being prepared and when complete the work will probably be done by Day Labor.

WAREHOUSE—3 story and base, reinforced concrete. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Homer M. Duffey, Santa Barbara. The building will be erected at the corner of Mason and Helena streets, covering an area of 67½ feet by 140 feet and will be of the extra heavy type designed for a six-story structure. Construction will be fireproof with reinforced concrete walls, floors and roof slabs. Interior will be finished in pine. Plans provide for steel rolling doors, metal window sash and frames and elevator service. Exterior will be faced with cement plaster. Work will be started at once under the Day Labor system.

GARAGE—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Dennis & Hewitt, Fay Bldg., L. A. Owner, W. S. Collins. The building will be erected at the corner of Third and Hope streets and will cover an area of 100 by 120 feet. Construction will be practically fireproof. There will be concrete floors and metal lath and plaster interior partitions. Besides the garage there will be nine stores on the first floor. Upper floor will be used for storage space in connection with the garage. Metal window sash and frames and metal covered doors are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—2 story and base, reinforced concrete, \$250,000. Banning Riverside Co., Cal. Architect, J. Martin Haenke, Story Bldg., L. A. Owners, Gateway Inn Company. This work has been mentioned before when plans were first started. Working drawings have been completed and grading of the site has been started. The main building will be 300 by 50 feet with two large wings. There will be a total of 150 guest rooms, all of which will have private baths. Plans also provide for a large office, dining rooms, ladies' and gentlemen's parlors and grill. Construction will be fireproof. Interior will be finished in pine and hardwoods. There will be steam heat, elevator service and a hot water supply. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans will go out for figures shortly.

HOTEL—3 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architect, Anton Reif, Higgins Bldg., L. A. Owner, Mr. Siller. The building will be erected on San Pedro street near Ninth, covering an area of 42 by 121 feet. There will be two stores on the first floor besides the hotel lobby. Upper floors will contain a total of 50 guest rooms and four

Wednesday, May 6, 1914.

BUILDING AND INDUSTRIAL NEWS

PORTLAND AND OREGON.

baths. Interior finish will be of pine throughout. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

WAREHOUSE—3 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architects, William Curlett & Son, Title Insurance Bldg., L. A. Owners, Rudgear-Merle Co. The building will be erected at the corner of Alameda and Palmetto streets, and will cover an area of 100 by 272 feet. Interior will be finished in pine. There will be metal window sash and frames. Plans provide for elevator service, spiral chutes and other warehouse conveniences. Construction has been held up for sometime pending the settlement of spur track facilities. Exterior of the building will be faced with pressed brick. Working drawings are complete and bids will be called for at once.

RESIDENCE—2 story and base, frame and hollow tile construction, \$15,000. Hollywood, Los Angeles Co., Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owner, John Luckenbach. The dwelling will cover a large area and will contain twelve rooms, three baths and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat, open fire places and a hot water system. A garage will also be erected on the lot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SCHOOL—1 story, concrete and hollow tile construction, \$20,000. Beverly Hills, Los Angeles Co., Cal. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, Beverly Hills School District. The building will contain six class rooms and an assembly hall. Interior finish will be of pine and redwood. Maple floors will be used in the class rooms. There will be a central heating system. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

WAREHOUSE—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. H. S. Van Nuys. The building will be erected on property at the corner of Los Angeles, Pico and San Pedro streets, covering an area of 70 by 150 feet. Construction will be of the extra heavy type. Interior finish will be of pine throughout. Plans provide for two elevators, metal window sash and frames and fireproof doors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

RAILROAD STATION—1 and 2 story, reinforced concrete, \$200,000. San Diego, San Diego Co., Cal. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Santa Fe Railroad Co. The building has been designed in the Mission style and will be of fireproof construction with reinforced concrete walls and floors. Interior partitions will be of metal lath and plaster. The building will be 200 feet long and about 75 feet wide. There will be two waiting rooms, offices of the company, ticket and agent's office, baggage

rooms and express office. Interior will be finished in pine with tile floors and marble wainscot. There will be a central heating system. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame and hollow tile, \$25,000. San Diego, San Diego Co., Cal. Architect, Irving L. Gill, 921 South Figueroa street, L. A. Owner, Ethel H. Williams. The dwelling will contain 11 rooms in the first floor and nine rooms in the second floor. There will be six baths. Interior will be finished in pine, redwood, hardwoods and white enamel. Hardwood floors will be used throughout. There will be steam heat, open fire places and a hot water supply. All bath rooms will have tile wainscot and floors and will be equipped with showers. Exterior of the house will be faced with cement plaster. Plans are being prepared.

SCHOOL—1 story and base, brick, \$17,000. Banning, Riverside Co., Cal. Architects, C. H. Russell Co., Union League Bldg., L. A. Owners, Banning School District. The building has been designed in the Mission style and will contain six class rooms and an assembly hall. Interior finish will be of pine with maple floors in the class rooms. There will be a central heating system, probably furnace heat. Modern school plumbing and electric work will be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

APARTMENT HOUSE—1 and 2 story and base, frame. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, J. B. Nicholson, Wright & Callender Bldg., L. A. Owner, S. R. Adams. Contractor, Fred W. Siegel, Stimson Bldg., L. A. Contract price not stated.

BANK ALTERATION AND ADDITION—2 story, brick, \$12,490. Anaheim, Orange Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, German-American Savings Bank of Anaheim. Contractors, Frank Graves & Son, Builders' Exchange, L. A. Contract price, \$12,490, not including painting.

HOTEL—2 story and base, brick and steel, \$60,000. Niland, Imperial Co., Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, California Land and Water Co. Contractor, J. R. Rohelt, El Centro. Contract price, \$60,000.

SCHOOLS—2, 1 story and base. Class C construction. Cost not stated. Glendale, Los Angeles Co., Cal. Architect, Norman P. Marsh, Broadway Central Bldg., L. A. Owners, Glendale High School District. Contractor, G. Hanson, 1414 South Vermont avenue, L. A. General construction. Contract price, \$59,183. Plumbing, J. Hokom, \$6,593. Munger & Munger, Pasadena, heating, \$3,795. Bliss & Schwenzel, Pasadena, painting, \$3,188. L. W. Chobe, Glendale, electric work, \$1,196.75. Eugene Winslip, program clocks, \$1,550.

MISSION SCHOOL—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, Christian Women's Board of Missions, Indianapolis. Contractors, Ganger Construction Co., Laughlin Bldg., L. A. Contract price, \$23,251.

APARTMENT HOUSE—4 story and base, brick and steel, \$100,000. Portland, Ore. Architects, Claussen & Claussen, Macleay Bldg., Portland. Owner, Mrs. C. Brown. The building will be erected at the southwest corner of 14th and Yamhill streets and will cover an area of 100 feet square. There will be a total of 66 apartments of two and three rooms. Interiors will be finished in pine and some hardwood veneer. There will be steam heat, elevator service, dumb waiters, a vacuum cleaning system and hot water supply. All apartments will have wall beds and private bath rooms. Hardwood floors will be used in the living rooms. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

DOCKS AND DREDGING—Cost not stated. Astoria, Ore. Engineer, F. J. Walsh, Port of Astoria Commission. Astoria. Owners, City of Astoria. Plans have been completed and figures are now being taken on the foundation work for the new docks and wharves which are to be erected at Astoria. In the neighborhood of 7,000 piles of from 50 to 75 feet will be required as well as about 1,000,000 cubic yards of dredging. The docks will be erected in units of which several are planned. Two docks will be built at this time, each of which will be 90 feet wide and 1,000 feet long. About 3,000 feet of bulkheading will also be required. Plans are now out for figures and can be secured by addressing the engineer.

BRIDGE—Steel and concrete. Cost not stated. Kellogg, Ore. Engineer, Horace C. Hall, Grants Pass, Ore. Owners, Douglas County. The bridge will consist of two main spans each 200 feet long and a third span of 125 feet. Approaches will be of concrete. The bridge will have a sixteen-foot roadway. Plans are complete and bids will close May 12th. Plans and specifications can be secured from the engineer.

CHURCH—2 story and base, brick and frame. Cost not stated. Rose City Park, Ore. Architect, L. R. Bailey, Abington Bldg., Portland. Owners, Methodist Church of Rose City Park. The building will contain a large auditorium and Sunday school rooms. Only the first unit will be erected at the present time, costing in the neighborhood of \$10,000. Interior finish will be of pine throughout. A steam heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

LODGE HALL—4 story and base, brick, \$20,000. Silverton, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Masonic Hall Association of Silverton. The building will cover an area of 82 by 82 feet, and has been designed for four stores on the first floor and 18 offices on the second floor. Upper two floors will be arranged for the lodge rooms, ball room and auditorium. Interior finish will be of pine with a hardwood floor in the ball room. There will be steam heat and elevator service. Patent store fronts are specified. Exterior will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared and bids will

be called for within three weeks or a month.

SCHOOL—3 story and base, brick, \$100,000. The Dalles, Ore. Architect, C. J. Grandall. The Dalles. Owners, City of The Dalles. The building has been designed in the classic style and will cover a large ground area. Besides the class rooms plans provide for an auditorium seating 600 people and equipped with a modern stage. There will also be a large gymnasium, library and manual training and domestic science rooms. Interior finish will be of pine with hardwood floors. Plans provide for steam heat, program clocks and a vacuum cleaning system. Slate blackboards are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken. Separate bids will be taken for the heating and plumbing. Plans can be secured from the architect.

SCHOOL ALTERATIONS AND ADDITIONS—2 story and base, brick, \$20,000. Astoria, Ore. Architects, Whitehouse & Foulhoux. Wilcox Bldg. Portland. Owners, Astoria School District. The work will consist of an addition to be used for an auditorium, this will contain a gallery with a seating capacity of 800 and will be of brick construction. The balance of the work will be altering and repairing the interior of the school building. Bids for the work are to be submitted to W. A. Sherman, Clerk of the School District. Separate bids will be received for the heating and electric wiring. Plans are complete and figures are now being taken.

Contracts Awarded.

HOTEL—3 story and base, brick, \$20,000. Portland, Ore. Architect, C. Spies. Kenton. Ore. Owner, Mr. Nary. Contractor, C. Spies, Kenton Ore. Contract price, \$20,000.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE—5 story and base, brick and steel, \$60,000. Seattle, Wash. Architect, David Dow, 21st and Spruce streets, Seattle. Owner, H. M. Richmond. The building will be erected on 7th avenue near Pine street, covering an area of 60 by 120 feet. The building will contain a total of 125 rooms which will be arranged in 13 three room suites and 40 two room. Interior finish will be largely of pine with some hardwood veneer and oak floors. There will be steam heat, elevator and dumb waiters, a hot water supply and vacuum cleaning. All suites will have wall beds and private bath rooms. Bath rooms will have the wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are being taken.

COURT HOUSE GROUP—2 and 5 story and base. Class A construction, \$950,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners City of Seattle. The building will be erected on the property bounded by Third avenue, James, Jefferson and Fourth avenue. The Third avenue frontage will be five stories high and the Fourth avenue but three stories. Construction will be fireproof with a complete steel frame, reinforced concrete floors and roof. Interior partitions will be of hollow tile.

Exterior will be faced with tile and terra cotta. Hardwood and metal trim will be used. There will be steam heat, vacuum cleaning, elevator service and fireproof vaults. Plans have been revised and new figures will be called for within a very short time.

OFFICERS' QUARTERS—2 story and base, brick, \$60,000. Fort Worden, Wash. Architect, Chief Constructing Quartermaster Office, Washington, D. C. Owners, United States Government. Plans have been completed and forwarded to Fort Worden for the new officers' quarters.

The main building will be 32 by 84 feet with a wing 58 by 85 feet. Each apartment will contain six rooms. Interior finish will be of pine. There will be hardwood floors and open fire places. Plans provide for steam heat and a hot water supply. Bath rooms will tile floors and wainscot. Exterior of the building will be faced with pressed brick. Bids are now being taken and will be opened in Washington, D. C., on May 20th.

A COMBINATION FILTER AND FAUCET.

The cut above illustrates a self-cleaning filter and faucet combined, recently perfected by Mr. F. L. Guillemet of this city. The faucet part proper is the same as in the regular compression bibbs on the market and will be understood at a glance, the water valve (C) being opened and closed in the usual manner by turning the handle, but a filter chamber is formed above the spout (B) and a filter (O) fitted therein, and the water has to pass through this filter before reaching the spout. The filter is cylindrical in shape and open at both ends, but the top end is closed by a cap (D), which is provided with a disk fitting snugly inside the end of the filter. Said cap is made of one piece with the plug (N) and connected with it by a short stem, so that when the plug (N) is removed, the filter will come out with it, but can be detached. Plug (N) is provided with four lugs (n) arranged in a square, for insertion of any small rod or a spike for tightening the plug when no monkey wrench is at hand, but hand power alone may be sufficient in most cases.

The lower end of the filter fits nicely around a collar (h), the lower part of the filter being broken away to show this collar. Now it will be seen that the water has to pass from the outside to the inside of the filter for reaching the spout (B), which increases very materially its resisting strength against water pressure and the water does not tend to open the pores of the filter in passing through it. The bottom of the filter is connected with a small passage or tubing (K) designed to carry away the impurities in the water in proportion as they are stopped by the filter. This passage remains always open and therefore whenever water is drawn out a streamlet flows through this passage at the same time it flows through the spout. The tube (K) passes through a perforated lug which acts as a bracket below the nut (S), and the end of the tube is bent downward more or less, so as to direct the streamlet of impure water to drop on the slanting side of the sink.

The tube K is long enough to prevent what is known as the venturi tube effect whereby a fluid at any given pressure flows faster through a narrow opening than through a larger one. In parts where water is very scarce and expensive, a long piece of rubber tubing may be attached to the tube K for collecting the waste water to be used for other than drinking or culinary purposes.

The space around the filter is designedly made very narrow to accelerate the speed of the water as it flows down the flank of the filter so as to give the impurities in the water no chance to stick to the filter.

The filter is intended to be made of brass gauze No. 200, which is from 4 to 10 times as fine as any kind of cloth usually attached to faucets for filtering purposes.

It will do away with this crude method of filtering; being much more efficient, self cleaning, and changeable when worn out. Anyone wishing to investigate further into this should communicate with the inventor, F. L. Guillemet, 3529 Mission street, San Francisco.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT
Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires

Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London

The Ritz, London

The Hyde Park, London

The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hosteleries with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

Editorial Comment.

Building operations for the month of April fell somewhat behind that of the previous months. Stated in the figures tabulated from the permits issued and contracts filed the record is as follows: Brick and concrete, \$340,176; frame, \$902,555; alterations, \$178,825 making a total of \$1,921,556 for private work; to this is added \$231,131 for city building construction, \$71,686 for street work, \$217,036 for State work and \$8,700 for U. S. Government construction within the city limits; also there is \$280,790 of work on the Panama-Pacific Exposition, making in all a total of \$2,795,350 for the month. This averages up for the year, for commencing with January 1914, the totals are as follows:

January, 1914	\$1,828,563
February, 1914	2,331,866
March, 1914	3,507,763
April, 1914	2,795,350
Compared to previous years the record is as follows:	
April, 1905	\$2,226,555
April, 1906	3,096,561
April, 1907	6,556,007
April, 1908	3,306,676
April, 1909	3,330,909
April, 1910	3,383,269
April, 1911	2,139,696
April, 1912	3,435,334
April, 1913	3,327,584
April, 1914	2,795,350

Generally speaking the month of April has usually been a pretty good one for the building business. Comparing the figures for the past ten years, the record shows more than an average of 2 millions. It must be remembered that the above figures are for private construction up to 1913, but since that time the total contains all the work of the City, State and U. S. Government. Altogether the figures show a record about what could be expected under present conditions. Frame buildings predominated over permanent construction so that the inference is that dwelling houses and flats are being built and that the ordinary private construction is about up to normal.

There has recently been demolished, ten-story tower building at 60 Broadway, New York city. The building was erected in 1889 and has been in service for a quarter of a century. Naturally to make way for a larger structure, a condition of its framework was a matter of interest for architects and engineers. The frame consisted of cast iron columns and wrought iron floor beams. The floors were of flat-arch, terra cotta construction. The framework was found to be in excellent condition, the wrought iron beams

showing a practical absence of rust, and the cast iron columns, with a three-inch cast iron shell around them for fire protection, showing only a few localized patches of rust and heavy rusting only at a few special points.

In these days of steel construction we ordinarily forget the fact that this form of structure has been in use only a quarter of a century. That there has not really been time enough yet to test the enduring qualities and that practically few of these structures have ever been torn down so that it has not been possible to determine the life of steel under the ordinary conditions of building construction.

Up to the second election of Diaz, in 1884, Mexico had fifty-two Dictators, Presidents and rulers in fifty-nine years.

The statement may seem incredible, but it is made on the authority of the British Encyclopedia.

An even Diaz, who crushed many incipient revolutions with a hand of iron, at last was forced to leave the country by the Mexican love of change.

Judging the future by the past then there seems little hope of establishment of any stable government in Mexico by means of mediation. There may come some man strong enough who will have the support of a majority of the people long enough to restore order in the country, but it is doubtful. It seems impossible for a people of their mold to ever work out any sort of salvation for themselves.

A MOVEMENT FOR GOOD ROADS.

The American Highway Association and the American Bar Association have inaugurated a movement to remove from the statute books of various States, ancient and obsolete road laws which have been on those books more than one hundred years. The first step in the revision of the State road laws would be to recommend that all obsolete and unnecessary laws be rescinded. Certain basic features of good administration will be urged by the joint committees, such as payment of road taxes in cash, elimination of unnecessary officials, the requirement of skilled supervision in construction and maintenance, constant employment of highway engineers, the substitution of appointed for elected officials and the substitution of continuous maintenance for the present intermittent methods.

The unbought loyalty of men is the cheap defense of nations.

The Problem Of The High Cost Of Living

The Futility of Local Effort.

By John P. Young.

Reprinted from the Proceedings of the Commonwealth.

The attempt to discover a remedy for the real or fancied evils of rising prices by studying local phenomena can produce no good result. On the contrary, it is calculated to do mischief by obscuring the true cause of the thing complained of, thus tending to deter the application of a really efficacious remedy. If there is a real economic disease to be cured.

No fact is better established than the complete interdependence of the people of a country in which no internal tax barriers are reared. The United States is such a country, and the commercial relations between its inhabitants are so close that the same price levels are maintained throughout its length and breadth. Any variations from the general level are wholly attributable to added costs incurred through bringing commodities from distant points where produced or manufactured to the places where they are consumed.

If there are departures from this general rule, investigation will disclose that they are due to causes which can not be reached except through regulations of the sort which deprive people of liberty of action. To illustrate: It might be feasible by municipal ordinance to establish markets or a huge general market at some central point in the city; but in order to insure its success it would be necessary to prohibit the convenient but costly green grocery. Actual experience in San Francisco demonstrates that this is the case. Free markets so called, have been founded, but they have failed of success through lack of patronage.

Convenience More Than Cheapness.

Unquestionably the neighborhood store is uneconomic, but the number is constantly increasing in this and other cities, despite the fact that the department stores which buy on a large scale sell much more cheaply. The citizen might be compelled by municipal ordinance to forego convenience for cheapness, but there is grave reason to doubt whether there would be an economic gain. A paper of pins might be sold in a department store for 5 cents, but if the housekeeper who lived two or three miles distant from the large establishment had to consume two or three hours' time or spend 10 cents for car fare when she wished to buy pins she would not effect a great saving. The small store can be proved wasteful, but its persistence shows that the demonstration is only theoretically sound and that in practice it fills an economic want.

In the last analysis it will be found that the increased cost of living represents an increase of units of satisfaction. It has been said that "the cost of high living" is at the bottom of the modern trouble, but the saying, while containing an economic truth, is unfortunate, because the words chosen to express the idea convey the impression that the people are revelling in luxury. "High living" in the minds of most men

stands for luxurious living, and that condition has not yet been attained by the masses.

Higher Standard of Living.

But the evidence is overwhelming that there has been a vast improvement in the mode of life of peoples living in countries where the prices of commodities which have come to be regarded as necessities are high; while, on the other hand, in those lands where the demands of the people are few the things consumed by them are low priced. China and India furnish notable examples of cheap living, and the variety and quantity of their consumption harmonize with the low range of prices in those countries. The United States presents the other extreme. The standard of living in this country is not proved by the fact that the per capita consumption of food products is greater than in other lands; it is established by the evidence that the people generally demand a greater variety for the table and insist upon the employment of a vastly larger number of articles of furniture and adornment and of conveniences and amusements.

As the propensity to indulgence of this sort increases it is usually accompanied by a change of local price level. It is not likely that this tendency can be arrested in any locality unless, indeed, the disposition to enact minimum wage laws should increase to such an extent as to arouse a recrudescence to the natural laws which Adam Smith and other economists claimed was in constant operation under the competitive system—that of pressing wages to the limit of subsistence. If that result occurs it will come about through an extension of the altruistic idea responsible for the legislation which assumes that any person willing to work should receive a reward sufficiently great to subsist him. The legislator who attempts to designate the amount necessary to properly subsist an individual may easily be induced to prescribe by law what constitutes proper subsistence. If regulation has the effect which economists predict, of curtailing production, of necessity the standard of living will be lowered, as there will be less to go around.

At present it does not appear as if the problem would work out in the manner suggested. When Adam Smith wrote, and for nearly three-quarters of a century afterward, the competition of labor was unrestricted, but with the advent of modern trades unionism a new factor entered. The operation of the assumed natural law was suspended. By combination the worker was enabled to secure a greater share of the things he helped to produce, and he succeeded measurably in improving his condition, a fact which exhibited itself in a steady elevation of the standard of living in all countries, but more particularly in those possessed of great natural resources and in which inventiveness has enlarged the ability to produce.

The Standards of Living.

If we convert the phrase "improved standard of living" into what it really represents, namely, an increased demand for things, we have what seems a simple explanation of the cause of rising prices, or we should have, if it were possible to preserve an invariable standard by which to measure values. But there is no such monetary standard, and for that reason it is impossible to tell from a comparison of the prices of one period with those of another, whether the standard of living has been elevated or lowered. There is only one way of testing the matter, and that is to ascertain whether consumption has increased or diminished. In other words, nominal prices do not gauge the degree of prosperity attained by a community. That is determined by volume of production and the quantity of consumable goods shared by the people. If a country is able to consume 600 pounds of iron, per capita, per annum at 10 cents a pound, iron is cheaper in that country than in those countries where one-sixth of that quantity is consumed at 5 cents a pound.

The individual may suffer from an ascending scale of prices, but the masses do not, if concurrently with the rise there is an increased production which enlarges the quantity of things consumable. That has been shown during the so-called boom periods, one of the most recent and striking of which was that which followed the election of McKinley in 1896. The student of prices who will take the trouble to study the index numbers of recognized authorities will not that during the twenty-three years preceding that date there was a comparatively steady fall from a high to a low level, and that during the seventeen years following the range has been upward. I have not had occasion to estimate the percentage of decline and advance recently, but a couple of years ago the drop between 1873 and 1896 was nearly the equivalent of the rise after that date, the apex of two comparative periods of rise being nearly on a level.

Increasing Complexity of Living.

If we disregard the story told by price lists and concentrate our attention upon the factors of production and consumption, we discover at once that there was an enormous increase of the latter during the period of ascending prices. In order to comprehend the full significance of this statement we must disregard comparisons which deal with isolated articles or commodities and recognize the fact that the most striking phenomenon of advancing civilization is the steady march from the simple to the complex, and that man, as his condition improves, demands thousands of things, where he was formerly content or was compelled to accept a few. If the world had been satisfied to live on bread and meat, as its meager populations did during the Middle Ages, those products would be relatively

abundant and nominally cheap, for the comparatively small number that could exist to enjoy them. But mankind, under improving conditions, diversifies its demands, and in the matter of alimentation becomes more and more epicurean. If this diversification had not taken place; had, for illustration, the simple diet of hog and hominy of the early settlers of the states which were a terra incognita when the thirteen colonies revolted been adhered to, hog and hominy would be much cheaper than they are at present, but there would not be ninety or more millions of Americans clamoring for a fair share of the choicest sugar-cured hams produced in the West.

The beginning of this remarkable diversification may be said practically to date from the closing years of the first half of the nineteenth century, when the hand product began to be superseded by the output of the factory, and it has proceeded without serious interruption, so far as the world at large is concerned for nearly 75 years. There have been periods of depression during this interval, but that fact does not impair the force of the observation that the productive powers of man have been steadily enlarging, and that each succeeding era of prosperity has been marked by enormously increased outputs of all sorts of articles and commodities in which the share of the average man is constantly growing greater.

Increases in the Food Supply.

This general enlargement of output is sometimes obscured by comparisons which take into consideration one or two, or only a very few staple articles, but even in the matter of foodstuffs a careful examination of all the facts will disclose that the volume available for the use of mankind has greatly increased. It may be shown that there is less meat or wheat per capita, but the relatively small deficiency they represent is more than compensated for by the numerous equally acceptable contributions to the table which permit the most illly paid laborer to vary his diet in a fashion undreamed of by the populations which enjoyed "cheap" meat and bread. It is easily demonstrable that other grains, the sugar, vegetables, fruit and fish, now so easily obtainable by all classes, more than offset the diminution of the supply of the two staples mentioned; and that their substitution for the unvarying bread and meat diet has proved highly beneficial to the human race, and is an important factor in promoting the increased longevity which the insurance tables show us is one of the marked characteristics of the present age.

Turning from alimentation to the other causes which contribute to the physical well being of man we find even more convincing evidence that no matter what the price lists may record, the indisputable fact remains that the means of gratifying the very human desire for conveniences and comfort are continually being added to, and that the major part of the addition is enjoyed by the people at large. All the great inventions have contributed to that end. The envious may think and say that the railroad king is the chief beneficiary of the system he created, but that is a mistake. The rich always enjoy opportunities to get about, and if they were very rich they

could travel luxuriously; but the railroad train has made it possible for the mechanic and the day laborer to share the luxury once strictly confined to the affluent. Once kings and barons dined in the doubtful light of smoky torches; now the artisan eats his evening meal, which is as likely to be appetizing as the barbarous spreads of baronial halls, under the softened rays of an electric lamp.

Effects of Rising and Falling Prices.

It is obvious, then, that the price aberrations which fill so large a space in the public mind, while they cause great inconvenience and more or less hardship, do not have the effect generally assumed of hindering the progress of mankind. And least of all is there any ground for the assumption that rising prices cause interruptions of advancement. Prosperity and boom always concur with ascending prices; depression is the invariable accompaniment of descending prices. The optimistic form of speculation, which takes the shape of discounting the future, never asserts itself unless there is a prospect of a rise; the pessimist is the king of the market when the signs indicate a fall. These are mere truisms, and need no illustration or statistical corroboration. They are indisputable facts known to all men.

Whatever evil attaches to high or ascending prices must be regarded as the outcome of maladjustment to changing conditions due to a cause beyond the control of individuals, communities or even nations. They are the result of a variable standard of value. The condition produced by the variation may be corrected, but there is no possibility—except a theoretical one—of preventing the variation while we adhere to an indeterminate measure. The individual, by the exercise of economies, a process which is tantamount to the practice of self-denial may adjust his income to the change, or he may succeed in compelling someone else to make good his deficiency caused by the process of adjustment of the mass of production to the increase of the measure of values, but these efforts must, in the nature of things, prove powerless to arrest the operation of a universal phenomenon which on analysis is seen to be responsive to the economic law of supply and demand.

Explanations Offered for Current Increases.

There are those who think that this economic law may be set aside, but the effort to do so will prove no more successful than that of the arrogant king who commanded the waters of the sea to recede. A variety of causes have been suggested to explain the rise of prices since 1896, and a public unwilling to investigate has demanded their abatement or removal. But the experiences of recent years unmistakably point to the fact that while the things complained of and denounced may be evils, their elimination would not have the effect desired. It is said that the tariff is responsible for the increased cost of commodities in this country, but those who make this assertion ignore the fact that the McKinley bill, which was enacted into law during the period of falling prices, between 1873 and 1896, was powerless to arrest the decline. The index numbers show con-

clusively that while the measure undoubtedly had the effect of stimulating protected industries within the borders of this country, the products of those industries shared in the universal decline. This being the case, it would have been about as reasonable to hold the McKinley high protective tariff responsible for the fall in prices after its enactment as it is now to assert that the later Dingley and Payne-Aldrich measures account for the present high level.

Effects of Taxation.

Another explanation offered is that connected with increasing taxation, but it is easily demonstrable that that phenomenon was in operation on a relatively greater scale before the turn of the tide in 1896 than since that date. Americans who forget that it was during the period of falling prices that our appropriations mounted at such a rate that the nickname "billion-dollar" Congress was bestowed have poor memories. One of the strongest points made by bimetalists during the discussion over the standards was that the effect of falling prices was to disguise or conceal increasing taxation. From a monograph, which I wrote in 1895, I extract the following, the figures of which were derived from the Statesman's Year Book:

In 1873 the total actual payments out of the British exchequer footed up £70,714,448. In 1894 they had increased to £91,392,846. In 1871 the population of Great Britain was 31,628,358, in 1894 it was probably 39,000,000—the census of 1891 made it 38,104,975. A simple calculation shows that the per capita expenditure in the first-named year was £2 4s 9d and in 1894 it had increased to £2 9s 6½d.

The view of the English and Continental bimetalists that increasing taxes in the face of declining prices was pernicious seems far more rational than the assumption of the critics of the present high prices, who may reasonably be suspected of confounding cause and effect. When prices were descending and nominal taxes were rising there could be no doubt that the burden of the taxpayer was being increased both relatively and absolutely, but when the expenditures of a government are only nominally increased during a period of ascending prices the increase may be more apparent than real. If the cost of government as expressed in dollars and cents is increased fifty per cent during a period in which properly constructed tables of index numbers show that the general rise of prices has also been fifty per cent, the obvious inference from the concurrent upward movement is that the rising prices compelled increased governmental expenditures; but on the other hand, if governmental expenditures show a nominal increase during a period of descending prices, there is no escape from the conclusion that legislators indulged in extravagance.

Growth of Expenditures.

Under the circumstances we are compelled to dismiss governmental extravagance from the list of causes that may properly be quoted to explain the nominal price elevation. Excessive expenditure by governments is an evil, and one which often bears with severity on the people governed, but it does not have the effect which some at-

tribute to it. If it did we would not be able to show that nearly all civilized governments were greatly increasing their expenditures during the period of descending prices without in the least tending to arrest the downward trend. Although it is impossible to furnish statistical evidence to support the assertion, yet it is undoubtedly true that individual extravagance was expanding relatively as rapidly during the period of descending prices as it has been since 1896. The exhibitions of extravagance have been more spectacular, but the fact that production was greatly enlarged between 1873 and 1896, and that the increase was more rapid than that of population, establishes that consumption per capita increased, and that is only another way of stating that mankind was becoming more extravagant unless we assume that men were denied the necessities of life before 1873.

Influence of the Middleman.

Another in the list of thirty-two, more or less, causes advanced to explain the rise in prices since 1896 is the multiplication of middlemen. There may be too many, and a host of them might be eliminated if the disposition to dispense with them existed. But it does not, and the fact that the middleman constantly increases in numbers, and that he devotes himself largely to making commodities absolutely dearer by putting them up in attractive packages and selling them in pleasant and sanitary surroundings, clearly establishes that he fills an economic want. That his rewards when successful are earned, is proved by the fact that he works mostly in a field in which monopoly is impossible, and that he is not always successful is shown by the table of failures which tell the story of hundreds of thousands of victims of misplaced confidence in their ability to earn a living by serving the convenience of their fellow man.

But whether an evil or a positive economic benefit, as some economists assert, the middleman flourished and multiplied as greatly during the period of low prices as he does now. Statisticians abundantly support this assertion, and if there is any disinclination to consult dry figures the diatribes of men like Carlyle may be drawn upon. And let us not forget that Edward Bellamy wrote his "Looking Backward" in 1888, and that one of his alluring remedies for the woes of that day was the elimination of the middleman. Curiously enough, Bellamy's dream of great central depots is in constant process of realization, not by the adoption of fantastic socialistic methods, but through the operation of unrestrained individualism which is providing the big department stores and placing within the reach of constantly increasing numbers articles, pleasures and conveniences which in his boldest flights of imagination he failed to foresee.

Influence of the Gold Supply.

I repeat and challenge contradiction, that every phenomenon but one suggested as an explanation of rising prices was in operation during the period of decline. Some of these alleged causes are too puerile to waste attention upon, but all of them were manifest between 1873 and 1896, during which period the drop in prices was as

great as the rise since that date. Sauerheck's index number for the period 1864-73 was 102; for the period 1885-94 it was 69. Middling Orleans cotton in 1872-73 was quoted at 9.65 cents; in 1893-94 the average was 1.25 cents. In 1895, near the culmination of the period of low prices, the American product of pig iron was 6,657,885 tons; in 1907 the output was over 27,000,000 tons, as there any one prepared to assert that the world is not in better case with the enormously increased production of the high price era than it was when the relatively as well as absolutely small product of the low priced period was recorded? If there is any one so bold, let him recall that the output of pig iron increased fourfold while our population increased a little more than twenty-five per cent. If he does he will probably conclude that four times as much iron at a high price is more desirable than a fourth of the quantity at a low price.

It is not my purpose in presenting this argument to intimate that economies are undesirable, but to point out that it is idle to attempt to combat a universal tendency by the application of a local device. The rise in prices since 1896 has been worldwide, and so was the fall during the period between 1873 and 1896. Economists from the time of Adam Smith down to the day when public discussion obscured the causes were agreed that previous alterations from high to low price levels were due to the abundance or scarcity of the basic money metals. They also explain the recent changes which have come under our observation. When prices were falling between 1873 and 1896, the quantity of metal on which the Western world's legal tender system was based was constantly diminishing; since 1896 the store of basic money metal has been enormously increased, and prices have risen. It is the only cause for the decline and rise of prices in the two periods, an analysis of which can be made without disclosing contradictions of the sort contained in all the other explanations offered.

For the reasons given I am inclined to believe that a discussion of the cost of living in California will disclose no facts of value which are not already known. We may, as a result, reach the conclusion that we are individually extravagant, and that we would individually be better off if we curtailed our expenditures, but unless we attack the question in a large way we shall be no nearer determining the cause of the high range of prices, or whether the world would be in better case with low than with high prices.

THE DARWIN SILVER-LEAD MINING DISTRICT, CALIFORNIA.

California, rich in other metallic resources, has never been highly productive of lead ore. Most of the lead produced has come from Cerro Gordo, Darwin, and Modoc districts, all in Inyo County, in the eastern part of the State. The Cerro Gordo district has furnished by far the largest output, having yielded during its most prosperous years \$7,000,000 in silver-bearing lead.

The Darwin district has probably produced between \$2,000,000 and \$3,000,000, according to a report just published by the United States Geological

Survey (Bulletin 580, Part A, by Adolph Knopf). Darwin, the principal settlement of the district, is situated 24 miles southeast of Keeler on Owens Lake, the southern terminus of the Nevada & California Railroad. The name of the district is said to have been derived from Dr. Darwin French who in May, 1860, led a party of 15 men in search of the Gunsight lode. This lode was a mythical silver deposit, which at that time was widely believed to have been founded by the emigrant party that was lost in Death Valley in 1850. In the early part of the decade between 1870 and 1880 silver-bearing lead ores were discovered in the vicinity of Darwin. A town soon sprang up here, and it is said to have had at one time a population of several thousand inhabitants. Three smelters were built in 1876 and a heavy production of base bullion was made. These furnaces, after the activities the first few years, were operated in a desultory way only. Mining and smelting expenses were high, because prior to the completion of the railroad to Keeler in 1883 all freight had to be brought across the desert by teams from Los Angeles, a distance of 275 miles. The richer and more easily mined ore bodies were early exhausted and the district soon lapsed into stagnation occasionally interrupted by periods of activity.

In the early part of 1912 interest in the district was renewed and considerable activity was displayed. It is locally hoped that the introduction of modern machinery and the systematic exploration work now being undertaken at some of the old mines will cause a permanent revival of the mining industry.

The geologic features of the distant are of somewhat more than local interest. The ore bodies, ranging from contact metamorphic deposits of high-temperature origin to fissure veins formed at more moderate temperatures, are enclosed in lime-silicate of late carboniferous age. The lime silicate are due to the metamorphism of originally calcareous and magnesian beds to wollastonite, diopside, and grossularite rocks and are the result of the invasion of the region by quartz diorite of probable Cretaceous age. The inclosure of the ore bodies in strata composed of lime-silicate of this kind is the distinguishing feature of the Darwin district. Somewhat later than this metamorphism, which affected the district as a whole, came the formation of the ore bodies. They were produced by metalliferous vapors and solutions given off from deep-seated bodies of molten rock from which the quartz diorite now seen at the surface crystallized.

The ores consist of silver-bearing galena, together with minor pyrite and zinc blende, commonly associated with a gangue of calcite and fluorite. As a rule the galena is considerably oxidized to lead carbonate and sulphate. There is, however, no evidence of important downward concentration of silver, lead, or zinc through the action of oxidizing solutions, as, indeed, appears unlikely from the prevalence of calcite in the deposits. From this it follows that the value of surface ore is an index of the probable value of ore masses found during deeper exploration.

Films dealing with the special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, Herbert Maggs, 125 Alpine street, S. F. Owner's name withheld. The building will be erected on the north side of Sutter street east of Broderick, having a frontage of 27½ feet and a depth of 120 feet. Interior will be arranged for a number of two and three room suites which will be finished in pine and elm. Hardwood floors will be used in the living rooms. There will be steam heat and a hot water supply. All suites will have private baths and wall beds. Bath rooms will be finished in tile with composition floors. Entrance will be wainscoted with tile and marble. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architects, Smith & Stewart, 24 Kearny street, S. F. Owner, Thomas McGrath. The building will be erected at the southeast corner of Larkin and Vallejo streets, and has been designed to contain three large suites of from six to seven rooms. Interiors will be finished in pine and hardwood with some oak floors. There will be a hot water supply and open fire places. Mantels will be of tile. Bath rooms will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and figures are being taken.

RICHMOND, CONTRA COSTA CO., CAL.—Apartment house and stores, 2 story and base, brick, \$30,000. Architect, A. W. Smith, 1010 Broadway. Oakland. Owner, George L. Yager. The building will be erected at the southwest corner of Macdonald avenue and 17th street, covering an area of 50 by 100 feet. There will be three stores on the first floor, thirteen apartments of two rooms each and two single rooms on the upper floor. Interior will be finished in pine throughout. There will be steam heat and a hot water supply. All suites will have wall beds and private baths. Patent store fronts are specified. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mrs. Bertha Overfield. The building will be erected at the corner of Green and Fillmore streets and will cover a considerable ground area. There will be a number of two and three room suites all of which will have private baths and wall beds. Interiors will be finished in pine and redwood with hardwood veneer. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on

metal lath. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 4 story and base, Class C construction. Cost not stated. Architect, C. C. Rittenhouse, Washington Bldg., L. A. Owner, A. Jamieson. The building will be erected on Carondelet street near 9th, and will cover an area of 88 by 103 feet. There will be 100 rooms, arranged in two and three room suites. Interior finish will be largely of pine. There will be steam heat, elevator service and a hot water supply. All apartments will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$100,000. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, G. Rupert Johnson. The building will be erected at the corner of Ingraham and Wither streets, and will cover a considerable ground area. Interior will contain a total of 172 rooms, arranged in two and three room apartments. Interior finish will be of pine and hardwood. There will be steam heat, two electric elevators and a hot water supply. All apartments will have wall beds and private bath rooms. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick. Plans are complete and the work is being done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$50,000. Architects, C. F. Borton Co., Hibernian Bldg., L. A. Owner, Laura Borton. Contractors, C. F. Borton Co., Hibernian Bldg., L. A. Contract price, \$50,000.

BANKS.

OHIO, BUTTE CO., CAL.—Bank alteration, 2 story and base, brick. Cost not stated. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, People's Savings and Commercial Bank. The present building, occupied as a store, will undergo extensive alteration. The work will require new interior finish, bank fixtures, plumbing, heating, electric work, ornamental plaster work and ornamental iron and bronze. Bank vaults will also be installed. Plans are now being prepared.

BRIDGES AND DAMS.

SAN FRANCISCO—Pier No. 15, crescent pile construction. Cost not stated. Engineer, Jerome Newman, Union Ferry Bldg., S. F. Owners, State of California. Bids opened for the construction of Pier No. 15 on the San Francisco water front by the State Board of Harbor Commissioners show the San Francisco Bridge Co. low on one proposition at \$68,760, and the Healy-Tibbitts Construction Co. low on

the other proposition at \$75,557. A complete list of the bids will be found under the heading of San Francisco in this issue.

MARYSVILLE, YUBA CO., CAL.—Levee construction. Cost not stated. Engineer, James R. Meek, Marysville. Owners, Reclamation District No. 10, Yuba County. Plans have been completed for the constructing of levees and considerable reclamation work. Bids are now being called for and will be opened on May 15th. Plans can be secured from the engineer at Marysville. An official proposal appears in another column of this issue.

Contracts Awarded.

FAIRFIELD, SOLANO CO., CAL.—Bridge abutments, reinforced concrete. Cost not stated. Engineer, County Surveyor, Fairfield. Owners, Solano County. Contractors, Brann & Freitas, Rio Vista. Contract price, \$2,500.

SPOKANE, WASH.—Bridge, steel and concrete, \$100,000. Engineer, Engineering Department Oregon-Washington Railroad and Navigation Co. Owners, Oregon-Washington Railroad and Navigation Co. Contractor, Robert Wakfield, Worcester Bldg., Portland. Contract price, \$100,000.

VICTORIA, B. C.—Piers, etc. Cost not stated, \$250,000. Engineer's name not given. Owners, Canadian Government. Contractors, Grant Smith and McDonnell, Vancouver. These contractors have awarded a subcontract for the structural steel to E. G. Prior & Co., Vancouver, for \$250,000.

CHURCHES.

SAN FRANCISCO, CAL.—1 story and base, frame. Cost not stated. Architect, Edgar A. Mathews, Phelan Bldg., S. F. Owners, Christian Science Church. This building, the third to be erected in San Francisco, will be located on Haight street near the Park and will cover a large ground area. There will be several reading rooms and study rooms besides the main auditorium. Interior finish will be of pine throughout. Plans provide for a central heating system. Exterior will be faced with cement plaster. Plans are nearly complete.

NAPA, NAPA CO., CAL.—Church, 1 story and base, brick or reinforced concrete, \$20,000. Architect, L. M. Turton, Napa. Owners, Methodist Church of Napa. The building will probably be designed in the classic style, although details have not been settled. The architect is now engaged on preliminary studies. There will be a large main auditorium, Sunday school rooms and pastor's study. Interior finish will be of pine. There will be a central heating system and art glass windows. Exterior will be faced with cement plaster or pressed brick. Further mention will be made of this work shortly.

HOLLYWOOD, LOS ANGELES CO., CAL.—Church, 1 story and base, frame and plaster, \$25,000. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, Hollywood Methodist Church Congregation. No details of the building have been given out, but it is understood that the design will be in the Mission style with exterior covered with cement plaster on metal lath. There will be a main auditorium, Sunday school rooms and pastor's study. Interior finish will be of pine. Art glass windows will be installed. Plans are now being prepared. Further men-

tion will be made of the work.

MARSHFIELD, ORE.—Church, 2 story and base, reinforced concrete, \$30,000. Architect, Benjamin Ostlund, Marshfield. Owners, St. Monica Roman Catholic Church. The building has been designed in the Gothic style and will cover a large area. There will be the main auditorium, Sunday school rooms and several smaller rooms. Interior will be finished in pine with ornamental plaster. Plans provide for a vapor system of heating. There will be art and leaded glass. Exterior of the building will be faced with cement plaster. Working drawings are complete and figures will be called for at once.

FACTORIES & WAREHOUSES.

SEATTLE, WASH.—Cold storage warehouse, 5 story and base, reinforced concrete, \$400,000. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. This work is known as Project No. 4 of the Port of Seattle. The building will cover a large area and will be fireproof throughout. The Commission's plans are complete and they are calling for figures to be opened on May 25th. Contractors are also invited to submit plans and specifications containing alternate methods of construction with their figures. Plans can be secured from the Port of Seattle Commission, General Bldg., Seattle. An official proposal appears in this issue.

PORTLAND, ORE.—Laundry, 2 story and base, \$20,000. Architects, Emil Schacht & Son, Commonwealth Bldg., Portland. Owner, C. A. Wagner. The building will be erected at a corner and will cover an area of 80 by 193 feet. The entire structure will be occupied by the laundry. Interior finish will be of pine. Special machinery will be installed. Exterior will be faced with stock brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Tank house, reinforced concrete, \$5,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, J. Allee. This work will be done at the large plant of J. Allee, 248 Folsom street. The tank house will be 30 by 33 feet. Steel columns and roof trusses are specified. Metal lath and plaster will be used. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

MARSHFIELD, ORE.—Factory, 1 story and base, reinforced concrete, \$14,000. Architect, Benjamin Ostlund, Marshfield. Owners, Jones Bros. The building will cover a large ground area and will be practically fireproof throughout. There will be reinforced concrete walls, floors and roof. Interior finish will be of pine. Plans provide for metal window sash and frames. Special laundry machinery will be required. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

LOS ANGELES, CAL.—Stable, 1 story, brick, \$5,000. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, Davis Standard Breed Co. The building will be erected at the corner of First and Beaudry streets, covering an area of 50 by 150 feet. Interior will be finished in rough plaster and pine. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

FIRE HOUSES AND JAILS.

OAKLAND, CAL.—Police station, 1 story, frame, \$5,000. Architect's name not given. Owners, City of Oakland. Bids were opened on Thursday last by the City Council for constructing a branch police station. The lowest figures were submitted by W. C. Thornally at \$5,450. No award of contract was made. A list of the bids received will be found under the heading of Oakland and Alameda County in this issue.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Emil Nelson, 580 Jersey street, S. F. The building will be erected on the north side of Rivoili east of Stanyan street, and will cover an area of 25 by 52 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by day labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 3 story and base, frame, \$10,000. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Edward E. Young. The building will be erected on the north side of Pine street west of Hyde, covering an area of 25 by 96 feet. There will be six modern flats of four, five and six rooms. Interiors will be finished in pine, hardwood veneer and oak floors. Each living room will have an open fire place and tile mantel. There will be automatic water heaters installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are being purchased.

SAN FRANCISCO—Flats, 3, 2 story and base, frame, \$4,000 each. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster street, S. F. These buildings will be erected on the west side of 14th avenue near California. Each has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine and redwood with some elm panels and beam ceilings. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters are specified. Bath rooms will have tile wainscot and composition floors. Exterior will be covered with shiplap and rustic with a brick veneer base. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 14th avenue. The building will be erected on the east side of 9th avenue near Balboa, and will have a frontage of 30 feet by a depth of 65 feet. There will be two flats of five and six rooms. Interior

finish will be of pine and redwood with some hardwood floors. Open fire places and tile mantels will be used. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base. Class A construction. Architect, none. Owner, H. A. Schroeder, 3151 Sacramento street, S. F. The building will be erected on the north side of Green street east of Octavia, and will have a frontage of 55 feet and a depth of 137½ feet. Construction will be fireproof with reinforced concrete foundation, brick exterior walls and steel roof trusses. There will be the usual storage space, office and a completely equipped machine shop. Interior will be finished in pine with a cement floor. Special gasoline storage tanks will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Garage, 1 and 2 story and base. Class A construction, \$10,000. Architect, Sylvain Schnaitacher, First National Bank Bldg., S. F. Owner, G. P. W. Jensen. The building will be erected for the Taxi Cab Company of California, and will occupy the northeast corner of Bush and Larkin streets, covering an area of 137½ by 137½ feet. Construction will be fireproof throughout with a steel frame, reinforced concrete walls, floors and roof slabs. There will be steel roof trusses. Plans provide for a large amount of storage space and a machine shop. Metal window sash and frames will also be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HALLS & SOCIETY BLDGS.

SAN FRANCISCO—City Hall, 4 story, dome and base. Class A construction, \$450,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday afternoon meeting of the Board of Public Works for the metal lath and furring and plastering for the new city hall. Three propositions were asked for: First, the plastering; second, for the metal lath and furring; and third, for both metal lath and furring and plastering. Gustave Johnson was low on proposition three at \$171,000. A complete list of the bids received will be found under the heading of San Francisco in this issue.

Contracts Awarded.

KLAMATH FALLS, ORE.—City Hall, 2 story and base, brick and stone, \$36,884. Architects, Veghte & Co., Klamath Falls. Owners, City of Klamath Falls. Contractors, Cofer Bros., Klamath Falls. Contract price, \$36,884.

COLUSA, CAL.—Hall of Records, 2 story and base, reinforced concrete, \$50,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Colusa County. Con-

tractors, Williams Bros. & Henderson, Holbrook Bldg., S. F. Contract price, \$145,585. A complete list of these figures will be found under the heading of Sacramento, Stockton and Northern California.

HOSPITALS

NAPA, NAPA CO., CAL.—Hospital dairy buildings, frame and concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans have been completed by the State Department of Engineering for a new dairy building and a concrete silo to be erected at the Napa State Hospital. Plans are now out for figures and may be secured from the State Department of Engineering at Sacramento. Bids will be opened on June 3rd. An official proposal appears in another column of this issue.

TALMAGE, MENDOCINO CO., CAL.—Gas holder and tank. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened on June 1st for constructing a gas holder, framing and tank at the Mendocino State Hospital at Talmage. Plans can be secured from the State Department of Engineering, Sacramento. An official proposal appears in another column of this issue.

STOCKTON, SAN JOAQUIN CO., CAL.—Dairy buildings, frame and concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened on June 4th for constructing new dairy buildings at the Stockton State Hospital. Plans can be secured from the State Department of Engineering, Sacramento. An official proposal appears in another column of this issue.

SACRAMENTO, CAL.—Hospital group, 1, 2 and 3 story and base, reinforced concrete or brick. Cost not stated. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Sacramento County. Architect Herold has just been commissioned to prepare plans for a large group of modern hospital buildings to be erected on the old infirmary site. The cost and nature of construction have not been determined as yet. Further mention will be made of the work as the plans progress.

SAN FRANCISCO—Hospital yard work and lighting fixtures. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened for the yard work, brick walls, fence work, etc., at the San Francisco Hospital show C. L. Wold low on the four propositions. He will probably be awarded the work. The Ickelheimer Bros. were low on the lighting fixtures at \$12,780. A complete list of these figures appears under the heading of San Francisco in this issue.

Contracts Awarded.

NAPA, NAPA CO., CAL.—Pay cottage, 1 story, frame and concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Contractors McSheehy Bros., S. F. Contract price not stated.

HOTELS.

SAN FRANCISCO—Hotel, 7 story and base, brick and steel, \$70,000. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. O. Stewart. The building will be erected on the north side of O'Farrell street east of Taylor, having a frontage of 27½ feet and a depth of 137½ feet. There will be one store besides the hotel office and lobby in the first floor. Upper floors will contain a total of 66 rooms, all of which will have private baths. Interior finish will be of pine with some ornamental plaster in the lobby. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with red pressed brick trimmed with white terra cotta. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel, 3 story and base, frame, \$14,000. Architects, Phillip Schwerdt & Co., Phelan Bldg., S. F. Owners, Hyman and Isaac Wolf. The building will be erected on the west side of Sixth street south of Howard, covering an area of 25 by 108 feet. Interior will be arranged for a total of 60 rooms and a number of public baths. Trim will be of pine and redwood. There will be hot and cold running water in each room. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and bids have been taken under advisement.

LOS ANGELES, CAL.—Hotel, 3 story and base. Class C construction. Cost not stated. Architect, Joseph F. Central Bldg., L. A. Owner, Michael Kiely. The building will be erected on Kohler street near 6th, covering an area of 37½ feet by 131 feet. There will be stores besides the hotel office and lobby on the first floor. Upper two floors will contain a total of 66 rooms and six baths. Interior finish will be of pine throughout. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared and when complete the work will be done by Day Labor.

VENICE, LOS ANGELES CO., CAL.—Hotel, 5 story and base, brick and steel. Cost not stated. Architects, C. H. Russell & Co., Union League Bldg., L. A. Owners, C. W. Holbrook and C. Minotti. The building will be erected on windward avenue and will have a frontage of 50 feet by a depth of 102 feet. There will be a store, office and hotel lobby on the first floor. Upper four floors have been arranged for a total of 65 rooms and 20 baths. Interior finish will be of pine and birch. Bath rooms will have tile wainscot and composition floors. Plans provide for steam heat, elevator service and a hot water supply. Patent store fronts are specified. Exterior of the building will be faced with pressed brick with tile inlays. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base. Class C construction. Cost not stated. Architects, The Western Building Co., Lankershim Bldg., L. A. Owner, G. A. Thiele. The building will be erected on Wall street, covering an area of 50 by 113 feet. There will be

a total of 76 guest rooms, eight private baths and eight public baths besides the office and lobby. There will be steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Entrance and lobby will be finished in marble. Plans are complete and figures are being taken.

SEATTLE, WASH.—Hotel, 10 story and base. Class A construction, \$250,000. Architects, Howell & Stokes, Henry Bldg., Seattle. Owners, Kennedy Hotel Co. The building will be erected at the southeast corner of 4th avenue and University and will cover a large area. Construction will be of the Class A type throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Only preliminary sketches have been prepared and the number of rooms, interior finish and other matters have not been determined upon as yet. Further information will be given of the building as the plans progress.

BIG CREEK, FRESNO CO., CAL.—Hotel, 1 story and base, frame, \$20,000. Architect, Carl Thayer, Forsythe Bldg., Fresno. Owners, Sierra Basin Hotel Co. Work has been started by Day Labor on the big resort hotel to be erected at Big Creek in the Sierra Basin, Fresno County. Plans were prepared by Architect Carl Thayer, Forsythe Bldg., Fresno. The building will be of frame construction and will cost in the neighborhood of \$30,000. M. Zucardi has been placed in charge of the work. James G. Bass of Fresno holds controlling interest in the project. The building has been designed in the shape of the letter H and will contain 69 guest rooms nearly all of which will have private baths. There will be a large lobby and office, dining room and completely equipped kitchen. A huge rock fire place will be a feature of the building. Exterior will be covered with rustic.

LIBRARIES.

SAN FRANCISCO—Library, 3 story and base. Class A construction, \$1,000,000. Architect, George William Kelham, Sharon Bldg., S. F. Owners, City and County of San Francisco. The judges in the San Francisco Library Competition last Friday announced the selection of George William Kelham, Sharon Bldg., as the architect for the new million dollar library to be erected in San Francisco's Civic Center. Cass Gilbert of New York, Paul Cret of the University of Pennsylvania and Hon. James D. Phelan acted as judges. The decision was reached after nearly a week of deliberation. The competition was invitational and was limited to San Francisco architects. Six architects were invited, including George William Kelham, Edgar A. Mathews, Albert Pissis, Ward & Blohme, Reid Bros., and G. Albert Lansburgh. As a reward for his design Mr. Kelham will be commissioned by the Library Trustees to complete the work while the five other contestants will be awarded \$1,000 each. Plans were placed on exhibit in the Assembly Hall of the Phelan Building and attracted a large number of visitors, many of whom were among the leading architects of the city. An expression of general

satisfaction with the selection of the winning design was heard from all sides. Drawings on exhibition show the principal elevations and floor plans. There is a ground floor, the main or second floor and a third floor. The winning design is an exceptionally meritorious piece of work in the classic style, while the rendering is beautifully done. This is true of nearly all of the designs submitted. The library building will be erected on property bounded by Larkin, Hyde, McAllister and Fulton streets. Hyde street will be cut through to what is now City Hall avenue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO — Railroad construction, \$142,000. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for the construction of the new Municipal Railroad out Potrero street, between Eaton & Smith low men at \$124,767.50. They will probably be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

SAN FRANCISCO—Boring wells for Municipal water works. Cost not stated. Engineer, City Engineer, Temporary City Hall. Owners, City and County of San Francisco. W. H. Haley submitted the lowest figure for boring wells for the city. His figures were \$8.40 per foot on both propositions asked.

RESIDENCES.

SAN FRANCISCO—Bungalows, 2, 1½ story and base, frame, \$2,250. Architect, none. Owner, B. J. Hooper, 450 12th avenue, S. F. These two houses will be erected on the west side of 19th avenue north of Balboa street. Each will contain six rooms and bath. Interiors will be finished in pine and redwood with some hardwood floors. There will be an open fire place in each living room. Mantels will be of tile. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the houses will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Costello and Feerick, 83 College avenue, S. F. The house will contain six rooms and bath and will be erected on 19th avenue north of Anza. Interior will be finished in pine and redwood. Hardwood floor will be used in the living room. There will be an open fire place and tile mantel. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect George Anderson, 6046 Lawton avenue, Oakland. The dwelling has been designed for an eight-room house with bath and sleeping porch and will be

erected on Lawton avenue east of Broadway. Interior will be finished in pine and elm with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete work will be carried on by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, F. H. Dailey, 2139 Broadway, Oakland. The dwelling has been designed for a seven-room house with bath and will be erected on Richmond Boulevard, south of Moss avenue. Interior finish will be of pine, redwood and elm. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater is specified. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, E. F. Muller. The dwelling has been designed to contain six rooms, bath and sleeping porch, and will be erected in Claremont. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Theo. Fenn, 749 61st street, Oakland. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected in the Footbille Boulevard Tract. Pine, redwood and some hardwood veneer will be used for interior finish. Hardwood and inlaid floors are also specified. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, Caroline Wolbold. The dwelling will be erected in the Claremont Tract, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine, redwood and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans pro-

vide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owners, Fedt Bros., 528 25th street, Oakland. The dwelling will be erected on the west side of Santa Ray avenue near Rosal avenue and will contain seven rooms, bath and sleeping porch. Interior finish will be of pine, redwood and elm. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot and composition floor will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Teaghran avenue, Berkeley. Owner, W. J. Brownlee. The dwelling will be erected at the corner of Arch and Virginia streets, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine, redwood and elm. Hardwood floors and beam ceilings will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

CORTE MADERA, MARIN CO., CAL.—Bungalow, 1½ story and base, frame, \$3,500. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mr. Dehne. The dwelling will be erected on property 100 by 100 feet, which will be terraced and laid out in formal gardens. The dwelling will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and figures are being taken by the architect.

SAN JOSE, SANTA CLARA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, H. C. Brunkamp, 750 North 19th street, San Jose. The dwelling will be erected on North 11th street, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath.

Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

WOODLAND, YOLO CO., CAL.—Residence, 1½ story and base, frame, \$3,500. Architect, Chester H. Miller, Dalmiel Bldg., Oakland. Owner's name withheld. The dwelling has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile and will have composition floor. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

SEATTLE, WASH.—Residence, 2 story and base, hollow tile construction, \$50,000. Architect, Carl F. Gould, Boston Block, Seattle. Owner, J. H. Blodell. The dwelling will be erected on Harvard avenue near Aloha avenue on a large estate. Besides the dwelling plans provide for a large garage of a similar type of construction. The house will contain in the neighborhood of twenty rooms, several baths and servants' rooms. Interior finish will be of hardwood throughout. Hardwood and inlaid floors will be used. All bath rooms will have tile floors and wainscot. Plans provide for a central heating system, probably steam heat. There will be open fire places, tile mantels and a vacuum cleaning system. Exterior of the dwelling and garage will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

SOUTH BELLINGHAM, WASH.—Residence, 2 story, attic and base, semi-fireproof, \$50,000. Architect, Carl F. Gould, Boston Block, Seattle. Owner, C. X. Larabee. The dwelling has been designed to contain twelve rooms and a number of baths. A garage will also be erected on the property. Interior finish will be of pine and hardwood with hardwood and inlaid floors. There will be steam heat, a hot water system and vacuum cleaning. Baths will be finished in tile and will be equipped with showers. Exterior of the dwelling will be faced with cement plaster. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Residence, 2 story and base, frame, \$7,000. Architect, Harvey Partridge Smith, Blake Bldg., Oakland. Owner, M. Marks, 2122 Hearst avenue, Berkeley. The dwelling has been designed for an eight-room house with two baths and sleeping porch, and will be erected in West Clay Park. Interior finish will be of pine and redwood with some oak veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architects, Wright & Rushforth, 571 California street, S. F. Owner, W. H. McGill. The dwelling will

be erected on Mabel street between Russell and Oregon streets, and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

SACRAMENTO, CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owner, R. E. Stubbe, 3712 Palm avenue, Sacramento. The dwelling will be erected in Casa Loma Heights, and will contain five rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with a tile or brick mantel. Bath rooms will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Contracts Awarded.

HOLLISTER, SAN BENITO CO., CAL.—Residence, 2 story and base, frame and plaster, \$18,000. Architect, W. H. Weeks, 75 Post street, S. F. Owner, George A. Sykes. Contractor, O. A. Christenson, Watsonville. Contract price, \$18,000.

PANAMA — PACIFIC EXPOSITION WORK.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster, \$40,000. Architect, A. F. Heide, 46 Kearny street, S. F. Owners, State of Washington. Architect Heide has completed details for this building and bids will be called for at once. Besides providing space for the state's industries there will be a large auditorium, social halls, a moving picture theatre and governor's quarters. Exterior will be faced with cement plaster. An official proposal will be published in these columns.

SAN FRANCISCO—Street work, Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and figures are now being called for street paving at the Exposition grounds. The roadways are to be covered with asphaltic oil or asphalt wearing surface. Bids will be opened on May 21st. An official proposal for the work appears in another column of this issue. Plans and specifications can be secured from the Director of Works.

POST OFFICES.

HANFORD, KINGS CO., CAL.—Post office, 1 story, mezzanine floor and base, brick and stone. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans have been completed for the new post office to be erected in Hanford. The structure will be of semi-fireproof construction, covering a ground area of approximately 4,515 square feet. There will be steam heat, oil burning equipment, modern plumbing and elec-

tric work. Interior will be finished in pine and hardwood. Exterior of the building will be faced with cut stone, pressed brick and stucco. Bids are now being taken and will be opened on June 18th. Plans and specifications can be secured from either the Supervising Architect or from the Custodian of the site at Hanford. An official proposal appears in another column of this issue.

GRASS VALLEY, NEVADA CO., CAL.—Post office, 1 and 2 story and base, brick, stone and terra cotta. Cost not stated. Architect, Supervising Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids opened in Washington on May 6th for the construction of this building show Welch Bros., of Oakland low at \$42,475. They will probably be awarded the contract. A complete list of the bids received will be found under the heading of Sacramento, Stockton and Northern California in this issue.

SAN FRANCISCO—Subtreasury, 2 story and base, Class A construction. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids are being called for on furnishing the lighting fixtures for this building. Bids will be opened on June 10th. Complete information can be secured from the Supervising Architect. An official proposal appears in another column of this issue.

SCHOOLS.

SANGER, FRESNO CO., CAL.—School clocks and gas generator sets. Cost not stated. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Sanger Union High School District. Bids will be opened on May 16th for furnishing and installing program clocks and gas generator sets in the Sanger High School building. Plans and specifications can be secured from the architects.

OAKLAND, CAL.—Dormitory building, 2 story and base, brick. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans have been completed for a new dormitory building to be erected at the Industrial Home for the Adult Blind in Oakland. The building has been arranged to contain dormitories and a mess hall, kitchen and office. Interior will be finished in pine. Plans provide for modern plumbing, steam heat and a hot water system. Exterior will be covered with rustic and cement plaster. Plans are now out for figures and bids will be opened on June 2nd. An official proposal appears in another column of this issue.

LOS GATOS, SANTA CLARA CO., CAL.—Convent, 4 story and base, brick. Cost not stated. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owners, Sacred Heart Novitiate Convent. The building will be erected on the grounds of the present institution and will cover a large ground area. There will be dormitories and private rooms, class rooms, chapel, study halls and departments of domestic science. Plans also provide for dining rooms and a large kitchen. Interior finish will be of pine throughout. There will be steam heat, modern plumbing and a hot water system. Exterior of the building will be faced with pressed

brick. Plans are complete and figures are being taken.

ORANGE, ODANGE CO., CAL.—School, 2 story and base, brick, \$45,000. Architect, J Flood Walker, 303 East Fourth street, Santa Ana. Owners, Orange Grammar School District. The building has been designed in the Italian style and will contain eight standard sized class rooms, office, teachers' rooms and assembly hall seating 400 people and manual training and domestic science rooms. Interior will be finished in pine. There will be pine and maple floors. Plans provide for modern school plumbing, electric work and a plenum system of heating. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on May 14th. Plans and specifications can be secured from the architect.

SAN MATEO, SAN MATEO CO., CAL.—School heating system. Cost not stated. Architects, Stone & Wright, 24 South California street, Stockton. Owners, Homestead School District. Plans have been completed and figures are now being taken for the installation of a hot water heating system in the new school building in the Homestead District. Bids will be opened on May 21st. Plans can be secured from the architects or from the principal of the school at San Mateo.

Contracts Awarded.

CHICO, BUTTE CO., CAL.—School, 2 story and base, brick, \$30,000. Architect, Chester Cole, Chico. Owners, Oakdale School District. The Chico Board of Education has rejected all bids received for the construction of the Oakdale School and will readvertise the work. The lowest bid received was for \$34,500, while but \$50,000 is available for construction. Architect Chester Cole will revise the plans. At the same meeting of the Board contracts were awarded for a four-room addition to the Chico Velino School, the contract going to C. A. Crippen for \$5,394.85. The contract for work at the Rose-dale School was awarded to Moore & Cluse for \$7,394.50.

SEWERS, STREET WORK AND WATER SYSTEMS.

CALIFORNIA—State Highways. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids were opened at the last meeting of the State Highway Commission for constructing highways in the following counties: Sonoma, Shasta, Siskiyou, Butte, Glenn and Tehama. In several of the counties figures ran over the engineer's estimate and bids will probably be rejected. A complete list of the figures together with the materials furnished by the State and the engineer's estimate will be found under the heading of Sacramento, Stockton and Northern California in this issue.

STORES.

LOS ANGELES, CAL.—Stores and offices, 6 and 7 story and base, Class A construction, \$800,000. Architects, Frederick Noonan and William Richards, Brockman Bldg., 1. A. Owners, J. W. Robinson Co. The building will be erected on 7th street, extending from Grand avenue to Hope street. It

has a frontage of 333 feet on 7th street and 140 feet on each of the other streets. The structure will be of reinforced concrete construction. The exterior will probably be faced with terra cotta on all three street fronts. The interior finish and equipment will be complete and modern in every respect, and will include ten passenger elevators, two freight elevators, conveyors, spiral chutes, sprinkler system, steam heat, etc. The lease provides that the building be completed and occupied within two years, but it is expected this can be accomplished in twelve months. Working drawings are being prepared.

LONG BEACH, LOS ANGELES CO., CAL.—Bank and offices, 5 story and base, brick and steel. Cost not stated. Architects, Krempel & Erkes, Henne Bldg., L. A. Owner, Mrs. L. Hauerwas. The building will be erected at the corner of Pine and Broadway streets and will cover an area of 50 by 150 feet. The first floor will be occupied by the Marine Commercial and Savings Bank. Each of the upper floors will contain twenty offices. Interior finish will be of pine and hardwood. Plans provide for steam heat and elevator service. Special interior finish, ornamental plaster and bronze and bank vaults will be installed in the first floor. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SACRAMENTO, CAL.—Stores and offices, 4 or 5 story and base, brick and steel or reinforced concrete, \$100,000 to \$140,000. Architect not selected. Owners, Sacramento Chamber of Commerce. Architects E. C. Hennings, John W. Woollett and John P. Hill have submitted plans for a large commercial building to be erected on 7th street between I and J streets in Sacramento by the Chamber of Commerce. Plans are being considered for both a five and an eight story building. If the five story is erected it will cost about \$100,000, if the eight story is erected the cost will exceed \$140,000. A selection of the architect will be made in a week or ten days.

Contracts Awarded.

BAKER CITY, ORE.—Stores and offices, 3 story and base, brick, \$27,000. Architect, M. P. White, Baker City. Owner, Louis Sommers. Contractor, D. Lyson, 204 Columbia street, Portland. Contract price, \$27,000.

THEATRES.

FRESNO, FRESNO CO., CAL.—Theatre and offices, 4 story and base, brick and steel, \$80,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, T. C. White, Fresno. The building will be erected on I street and will have a frontage of 100 feet by a depth of 150 feet. Construction will be fireproof with a complete steel frame, brick walls, concrete floors and stairways. Interior partitions will be of metal lath and plaster. Interior finish will be of pine and hardwood with some metal trim. Metal window sash and frames are specified. The theatre will have a seating capacity of 1500. There will be two stores besides the main body of the theatre on the first floor. Upper floors will be arranged for a number of offices. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

Contracts Awarded.

SEATTLE, WASH.—Theatre and offices, 6 story and base. Class A construction, \$300,000. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owner, Alex. Pantages. Contractor, Hans Pederson, Madison Bldg., Seattle. Contract price, \$300,000.

SEALED PROPOSALS.

PROPOSALS FOR COLD STORAGE BUILDING.

NOTICE is hereby given that the Port and Waterfront Commission of the Port of Seattle, State of Washington, will receive sealed proposals up to 1:30 o'clock, May 25, 1914, at its office, 443 Central Building, Seattle, Washington, for the construction of the following subdivision of what is known as the Central Waterfront Improvement of the Port of Seattle, State of Washington, to be done in accordance with the plans and specifications for the same, now on file in the office of the said Port Commission, which said plans and specifications are now subject to public inspection.

COMBINED OFFICE, WARM AND COLD STORAGE WAREHOUSE.

Bidders are also invited to submit alternative bids upon designs of their own for accomplishing the purposes of the plans and specifications prepared by said Port Commission, such alternative bids must be essentially in as full detail, both as to specifications, drawings and plans as are those prepared by the Port Commission said alternative bids to be subject to the provisions of this proposal, general specifications and forms of contract attached to and made part of the specifications prepared by the Port Commission.

Each bid must be accompanied by a certified check payable to the order of the Port Commission of the Port of Seattle, for a sum not less than five per cent of the amount bid.

The Port Commission reserves the right to reject any and all bids. The sealed proposals must be received by the Port Commission, this 1st day of May, 1914.

PORT COMMISSION OF THE PORT OF SEATTLE.

C. E. BEMSEBERG, Secretary.

NOTICE TO BIDDERS.

NOTICE is hereby given that the High School Board of Education of the City of Sacramento, California, sealed bids for electric motors for the Manual Arts Department of the Sacramento High School. Bidders for this equipment can obtain specifications for the same at the office of the Secretary of the High School Board of Education, Room 300, City Hall, Sacramento, California.

The equipment shall be delivered at the High School Building in Sacramento within ten days of the awarding of the contract.

A certified check in the sum of ten (10) per cent of the amount of the bid must accompany the bid, which will be forfeited to the Board should the bidder fail to comply with his bid if required to do so by the Board. All bids must be filed with the Secretary of the High School Board of Education, Room 300, City Hall, Sacramento, not later than 10:30 a. m. Friday, May 22nd, 1914. The High School Board of Education reserves the right to reject any and all bids.

CHAS. C. HUGHES, Secretary High School Board of Education.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213 in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 9:30 A. M., Thursday, May 21, 1914, for Certain Macadam Roadways to be treated with asphalt oil or Sheet Asphalt Wearing Surface,

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

BRODE IRON WORKS

Established 1886—Incorporated 1913

Tel. Kearney 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office & Works: 31-37 Hawthorne St., bet. Howard & Folsom Sts., San Francisco, Cal.

in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (\$10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidder except with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee:

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

PROPOSALS FOR CONSTRUCTING DREDGE.

DREDGE.—Sealed proposals for constructing the steel sea-going hydraulic hopper dredge San Pablo will be received at this office until 11 o'clock a. m., June 18, 1914, and there to be opened. Information on application. THOMAS H. REES, lieutenant colonel, engineers, custom house, San Francisco.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m., May 29, 1914, for the construction, complete (including mechanical equipment, plumbing, lighting fixtures and approaches), of the United States post office at Casper, Wyo. One story, basement and mezzanine, first floor respectively, and brick facing and tin roof. Drawings and specifications may be obtained from the custody of site at Casper, Wyo., or at this office, in the discretion of the supervising architect. O. WENDEROTH, supervising architect.

PROPOSALS FOR STEEL REINFORCEMENT AND LUMBER.

STEEL REINFORCEMENT, LUMBER, ETC.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 12 o'clock, noon, May 20, 1914, for earthwork and structures on the Second Unit of Vandalia South Canal, involving about 145,000 cubic yards of excavation and 200 cubic yards of reinforced concrete, the placing of 18,000 pounds of steel reinforcement and

the placing in wooden structures of 135,000 feet, B. M. of lumber. The work is situated on the south side of Milk River in the vicinity of Glasgow and Ashland, Mont. For particulars address the United States Reclamation Service, Washington, D. C. Great Falls, Mont., or Malta, Mont. MORRIS BIEN, acting director.

PROPOSALS FOR BUILDING.

BUILDING—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the envelope "Proposals for Hospitals, Cheyenne River Reservation and Standing Rock Indian Reservation, North and South Dakota," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m. of May 21, 1914, for furnishing materials and labor for the construction of a frame hospital on the Standing Rock Reservation, North Dakota, and brick hospitals on the Cheyenne River and Standing Reservations, South Dakota, in strict accordance with the plans, specifications and instructions to the bidders, which may be examined at the Indian Indian warehouse, San Francisco, Cal. and at the several schools. For further information apply to the superintendents of the Cheyenne River and Standing Rock Indian Agency, South Dakota; Rosebud Indian School, Rosebud, South Dakota, and the Standing Rock Indian School, Fort Yates, North Dakota. CATO SEAS, commissioner.

STATE OF CALIFORNIA.

DEPARTMENT OF ENGINEERING.

CALIFORNIA HIGHWAY COMMISSION.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 315 Forum Bldg., Sacramento, Cal., until 3 o'clock p. m. hereinafter noted, at which times they will be publicly opened and read, for consideration in accordance with the specifications therefor to which special reference is made portions of State highway as follows:

Section A, M. May 25, 1914.
Tehama County from Reno to the Northern Boundary (H-Teh-3-C), about 13.7 miles in length, to be built of Portland cement concrete.

Solano County from Benicia to a point 2 1/2 miles south of Cordelia (H-Sol-1-A), about 9.0 miles in length, to be built of Portland cement concrete.

Marin County from Larkspur to Sausalito (IV-Mrn-1B), about 6.0 miles in length, to be graded and part surfaced with gravel.

Santa Clara County from Gilroy to Sarcent (IV-S, Cl-2-C2) about 6.0 miles in length, to be built of Portland cement concrete.

Kern County from Sections 3 and 6, T 32 S, R 28 E, M.D.B.M. to Bakersfield (VI-Ker-1-A), about 13.0 miles in length, to be built of Portland cement concrete.

Section 2, M. May 25, 1914.
Humboldt County from Dyersville to Shively (I-Hum-1-D), about 7.5 miles in length, to be graded.

Colusa County from Hershey to Berkeley (II-Col-1-A), about 8.0 miles in length, to be built of Portland cement concrete.

Alameda County from Fairfield to Vacaville (III-Sul-7-C), about 8.5 miles in length, to be built of Portland cement concrete.

Los Angeles County from Tulare to Tazewell (VI-Tul-4-C), about 8.0 miles in length, to be built of Portland cement concrete.

San Diego County from Liebre Mountain to the northern boundary (VII-L, A-4-D) about 12.7 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained at the said office and may be seen at the office of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at the following: Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to adding quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,
CHIEF CLERK D. DARLINGTON,
CHIEF ENGINEER,
California Highway Commission.
AUSTIN B. FLETCHER,
Highway Engineer.
WILSON R. CLINE, Secretary. (*)
Date April 22, 1914.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C. April 28, 1914.—**SEALED PROPOSALS** will be opened in this office at 3 P. M. on June 9, 1914, for the construction (including mechanical equipment, lighting fixtures and approaches) of a two-story and basement (with a one-story rear extension) stone and brick building of 6,000 square feet ground area; nonfireproof construction (except first floor); composition and tile roof, for the United States post office at Chico, Cal. Drawings and specifications may be obtained from the custodian at Chico, Cal., or at this office, in the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C. April 24, 1914.—**SEALED PROPOSALS** will be opened in this office at 3 P. M. June 1, 1914, for the construction (including mechanical equipment, interior lighting fixtures and approaches) of the United States post office at Brigham City, Utah. Two-story building; ground area, 3,700 square feet first floor; composition stone and brick facing; composition roof. PROPOSALS FOR HEATING AND VENTILATING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 26th day of May, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit: The installation of a heating and ventilating system in the Cooper School Building.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within three hundred (300) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$1,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect and the proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, RICHARD J. CLINE, Secretary.

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 26th day of May, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit: The General Construction of the Cooper School Building, to be situated at the southwesterly corner of Jones and Lombard streets.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within three hundred (300) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$20,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works, RICHARD J. CLINE, Secretary.

PROPOSALS FOR BOILERS, OIL BURNERS, ETC.

BOILERS, OIL BURNERS, ETC.—Sealed proposals, including "Proposals for Heating Plant, Boilers, and Accessories," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. May 23, 1914, and then and there publicly opened for furnishing and installing boilers, oil burners, piping, etc., in the heating plant at the naval hospital, U. S. navy yard, Mare Island, Cal. Plans and specifications can be obtained from the commandant of the navy yard named, H. R. STANFORD, chief of bureau.

BUILDING NOTES.

The average number of stories in buildings on Manhattan is 4.8. In the downtown district, where most of the skyscrapers are, the average is but 6.4 stories.

The most expensive apartment in the world is a certain floor of the twelve-story building at Eighth-first street and Fifth avenue, the rental of which is close to \$25,000 a year. The building stands on the most costly land available for such houses, and contains every known device to render it safe and comfortable. Land on Fifth avenue is worth about \$100 a square foot, and the site of No. 998, which is the number of the apartment house, contains 12,800 square feet. No other building of equal size in the metropolis has so heavy a ground charge to carry. The property represents an investment close to \$5,000,000. Divided between the twelve floors give \$250,000 a floor.

Fifteen nations have officially adopted the new standard carat of 200 milligrams for use in weighing precious stones.

Slabs of natural cork, expanded to more than twice their original size, has been invented in England for cold storage insulation.

Plans desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fare part of the news department, under different headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

BUNGALOWS—2, 1½ story and base, frame, \$2,250. San Francisco. Architect, none. Owner, B. J. Hooper, 450 12th avenue, S. F. These two houses will be erected on the west side of 19th avenue north of Balboa street. Each will contain six room and bath. Interiors will be finished in pine and redwood with some hardwood floors. There will be an open fire place in each living room. Mantels will be of tile. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the houses will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story ann base, frame, \$2,500. San Francisco. Architect, none. Owners, Costello and Fee-lick, 83 College avenue, S. F. The house will contain six rooms and bath and will be erected on 19th avenue north of Anza. Interior finish will be of pine and redwood. Hardwood floor will be used in the living room. There will be an open fire place and tile mantel. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

STATE EXHIBIT BUILDING—2 story, frame and plaster, \$40,000. San Francisco. Architect, A. F. Heide, 46 Kearny street, S. F. Owners, State of Washington, Architect Heide has completed details for this building and bids will be called for at once. Besides providing exhibit space for the state's industries, there will be a large auditorium, social halls, a moving picture theatre and governor's quarters. Exterior will be faced with cement plaster. An official proposal will be published in these columns.

STREET WORK—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and figures are now being called for street paving at the Exposition grounds. The roadways are to be covered with asphaltic oil or asphalt wearing surface. Bids will be opened on May 21st. An official proposal for the work appears in another column of this issue. Plans and specifications can be secured from the Director of Works.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, Herbert Maggs, 125 Alpine street, S. F. Owner's name withheld. The building will be erected on the north side of Sutter street east of Broderick, having a frontage of 27½ feet and a depth of 120 feet. Interior will be arranged for a number of two and three room suites, which will be finished in pine and elm. Hardwood floors will be used in the living rooms. There will be steam heat and a hot water supply. All suites

will have private baths and wall beds. Bath rooms will be finished in tile with composition floors. Entrance will be wainscoted with tile and marble. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, Thomas McGrath. The building will be erected at the southeast corner of Larkin and Vallejo streets, and has been designed to contain three large suites of from six to seven rooms. Interiors will be finished in pine and hardwood with some oak floors. There will be a hot water supply and open fire places. Mantels will be of tile. Bath rooms will be finished in tile and will have composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and figures are being taken.

PIER NO. 15—Crested pile construction. Cost not stated. San Francisco. Engineer, Jerome Newman, Union Ferry Bldg., S. F. Owners, State of California. Bids opened for the construction of Pier No. 15 on the San Francisco water front by the State Board of Harbor Commissioners show the San Francisco Bridge Co low on one proposition at \$68,760, and the Healy-Tibbitts Construction Co. low on the other proposition at \$75,337. A complete list of the bids will be found under the heading of San Francisco in this issue.

CHURCH—1 story and base, frame. Cost not stated. San Francisco. Architect, Edgar A. Mathews, Phelan Bldg., S. F. Owners, Christian Science Church. This building, the third to be erected in San Francisco, will be located on Haight street near the Park, and will cover a large ground area. There will be several reading rooms and study rooms besides the main auditorium. Interior finish will be of pine throughout. Plans provide for a central heating system. Exterior will be faced with cement plaster. Plans are nearly complete.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, Emil Nelson, 550 Jersey street, S. F. The building will be erected on the north side of Rivington east of Stanyan street and will cover an area of 25 by 52 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

FLATS—3 story and base, frame, \$10,000. San Francisco. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Edward E. Young. The building will be erected on the north side of Pine street west of Hyde, covering and are of 25 by 96 feet. There will be six modern flats of four, five and six rooms. Interiors will be finished in pine, hardwood veneer and oak floors. Each living room will have an open fire place and tile mantel. There will be automatic water heaters installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are being purchased.

GARAGE—2 story and base. Class A construction. Cost not stated. San Francisco. Architect, none. Owner, H. A. Schroeder, 3151 Sacramento street, S. F. The building will be erected on the north side of Green street east of Octavia, and will have a frontage of 35 feet and a depth of 137½ feet. Construction will be fireproof with reinforced concrete foundation, brick exterior walls and steel roof trusses. There will be the usual storage space, office and a completely equipped machine shop. Interior will be finished in pine with a cement floor. Special gasoline storage tanks will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

HOTEL—7 story and base, brick and steel, \$70,000. San Francisco. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. O. Stewart. The building will be erected on the north side of O'Farrell street east of Taylor, having a frontage of 27½ feet and a depth of 137½ feet. There will be one store besides the hotel office and lobby in the first floor. Upper floors will contain a total of 65 rooms, all of which will have private baths. Interior finish will be of pine with some ornamental plaster in the lobby. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with red pressed brick trimmed with white terra cotta. Plans are complete and figures are being taken.

HOTEL—3 story and base, frame, \$14,000. San Francisco. Architects, Philip Schwerdt & Co., Phelan Bldg., S. F. Owners, Hyman and Isaac Wolf. The building will be erected on the west side of Sixth street south of Howard, covering an area of 25 by 168 feet. Interior will be arranged for a total of 80 rooms and a number of public baths. Trim will be of pine and redwood. There will be hot and cold running water in each room. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and bids have been taken under advisement.

RAILROAD CONSTRUCTION—\$142,000. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for the construction of the new Municipal Railroad on Potrero street showed

Eaton & Smith low men at \$134,767.80. They will probably be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

BORING WELLS FOR MUNICIPAL WATER WORKS—Cost not stated. San Francisco, Engineer, City Engineer, Temporary City Hall. Owners, City and County of San Francisco. W. H. Haley submitted the lowest figure for boring wells for the city. His figures were \$3.40 per foot on both propositions asked.

CITY HALL—4 story, dome and base, \$4,500,000. San Francisco, Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday afternoon meeting of the Board of Public Works for the metal lath and furring and plastering for the new city hall. Three propositions were asked for: First, the plastering, second the metal lath and furring and third for both metal lath and furring and plastering. Gustave Johnson was low on proposition three at \$171,000. A complete list of the bids received will be found under the heading of San Francisco in this issue.

HOSPITAL YARD WORK AND LIGHTING FIXTURES—Cost not stated. San Francisco, Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened for the yard work, brick walls, fence work, etc., at the San Francisco Hospital show C. L. Wold low on the four propositions. He will probably be awarded the work. The Ickelheimer Bros. were low on the lighting fixtures at \$12,780. A complete list of these figures appears under the heading of San Francisco in this issue.

LIBRARY—3 story and base. Class A construction, \$1,000,000. San Francisco, Architect, George William Kelham, Sharon Bldg., S. F. Owners, City and County of San Francisco. The judges in the San Francisco Library Competition last Friday announced the selection of George William Kelham, Sharon Building, as the architect for the new million dollar library to be erected in San Francisco's Civic Center, Cass Gilbert of New York, Paul Cret of the University of Pennsylvania and Hon. James D. Phelan acted as judges. The decision was reached after nearly a week of deliberation. The competition was invitational and was limited to San Francisco architects. Six architects were invited, including George William Kelham, Edgar A. Mathews, Albert Plissis, Ward & Blohme, Reid Bros., and G. Albert Lansburgh. As a reward for his design Mr. Kelham will be commissioned by the Library Trustees to complete the work, while the other five contestants will be awarded \$1,000 each. Plans were placed on exhibit in the Assembly Hall of the Phelan Building, where they at once attracted a large number of visitors, many of whom were among the leading architects of the city. An expression of general satisfaction with the selection of the winning design was heard from all sides. Drawings on exhibition show the principal elevations and floor plans. There is a ground floor, the main or second floor and a third floor. The winning design is an exceptionally meritorious piece of work in the classic style, while the rendering is beautifully done. This is

true of nearly all of the designs submitted. The library building will be erected on property bounded by Larkin, Hyde, McAllister and Fulton streets. Hyde street will be cut through to what is now City Hall avenue.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco, Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mrs. Bertha Overfeld. The building will be erected at the corner of Green and Fillmore streets and will cover a considerable ground area. There will be a number of two and three room suites, all of which will have private baths and wall beds. Interiors will be finished in pine and redwood with hardwood veneer. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

TANK HOUSE—Reinforced concrete, \$3,000. San Francisco, Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, J. Allee. This work will be done at the large plant of J. Allee at 248 Folsom street. The tank house will be 30 by 33 feet. Steel columns and roof trusses are specified. Metal lath and plaster will be used. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

SUBTERRANEAN—2 story and base. Class A construction. Cost not stated. San Francisco, Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids are being called for on furnishing the lighting fixtures for this building. Bids will be opened on June 10th. Complete information and specifications can be secured from the Supervising Architect. An official proposal appears in another column of this issue.

RESIDENCE—2 story and base, frame, \$7,000. San Francisco, Architect, Harvey Partridge Smith, Blake Bldg., Oakland. Owner, M. M. Marks. 2122 Hearst avenue, Berkeley. The dwelling has been designed for an eight-room house with two baths and sleeping porch, and will be erected in West Clay Park. Interior finish will be of pine and redwood with some oak veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

FLATS—3, 2 story and base, frame, \$4,000 each. San Francisco, Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster street, S. F. These buildings will be erected on the west side of 13th avenue near California. Each has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine and redwood with some elm panels and beam ceilings. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters are specified. Bath rooms will have tile wainscot and composition floors. Interiors will be covered with shiplap

and rustic with a brick veneer base. Plans are complete and in the hands of the owners who will do the work by day labor.

FLATS—2 story and base, frame, \$5,000. San Francisco, Architect, E. E. Young, 251 Kearny street, S. F. Owner, Thomas Scobie, 363 14th avenue. The building will be erected on the east side of 9th avenue near Balboa, and will have a frontage of 30 feet by a depth of 65 feet. There will be two flats of five and six rooms. Interior finish will be of pine and redwood with some hardwood floors. Open fire places and tile mantels will be used. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

GARAGE—1 and 2 story and base. Class A construction, \$40,000. San Francisco, Architect, Sylvain Schnaitacher, First National Bank Bldg., S. F. Owner, G. P. W. Jensen. The building will be erected for the Taxi Cab Company of California, and will occupy the northeast corner of Bush and Larkin streets, covering an area of 137½ by 137½ feet. Construction will be fireproof throughout with a steel frame, reinforced concrete walls, floors and roof slabs. There will be steel roof trusses. Plans provide for a large amount of storage space and a machine shop. Metal window sash and frames will also be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

State Highway Bids In Seven Counties.

Complete List of Figures Opened at
the Last Meeting of the State Highway
Commission.

Bids were opened by the State Highway Commission at their last meeting for constructing highways in the following counties: Sonoma, Shasta, Siskiyou, Butte, Glenn and Tehama. A complete list of these bids together with a list of the materials furnished by the State and the engineer's estimate for the job follow:

SONOMA CO. DIV. 4 ROUTE 1 SEC. A.	
W. J. Schmidt, Berkeley.....	\$53,305.50
James H. Smith, S. F.....	41,572.00
Tieslaus Bros., Berkeley.....	59,231.50
J. D. Niman & Son, Turlock.....	42,059.40
Hard Bros., Sacramento.....	38,699.20
O'Brien Bros., S. F.....	44,711.00
Berry, Mackie & Co., S. F.....	39,256.00
G. W. Conners, Eureka.....	48,270.50
H. L. Petersen, S. F.....	43,738.00
Fred Leffler, S. F.....	40,748.00
The Daniel O'Day Co., S. F.....	56,030.00
Moffett & Mead, S. F.....	51,478.20
Fairbanks & Baechtel, Willits	46,234.40

Engineer's Estimate, \$42,294.47

Materials furnished by State: Pipe railing, reinforcing steel, corrugated iron pipe, and Portland cement. Total \$3,691.

SHASTA CO. DIV. 2 ROUTE 3 SEC. D.
Perry, Mackie & Co., S. F.\$66,714

Engineer's Estimate, \$53,436.13.

Materials furnished by State: Pipe

railings, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$6,458.55.

SISKIYOU CO, DIV 2 ROUTE 3 SEC. C.
W. H. Macon, Klamath Falls, \$29,342
Berry, Mackie & Co., S. F., 47,546
John W. Sweeney, Portland, 34,907

Engineer's Estimate, \$29,805.47.

Materials furnished by State: Pipe railings, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$5,802.26.

BUTE CO, DIV 3 ROUTE 3 SEC. D.
Fred Leffler, S. F., \$62,307.00
Clarke & Henery Constr. Co., Sacramento, 66,331.70
Chico Constr. Co., Chico, 58,647.40

Engineer's Estimate, \$51,109.71.

Materials furnished by State: Pipe railings, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate for concrete. Total, \$5,240.80.

GLENN CO, DIV. 3 ROUTE 7 SEC. C
Clarke & Henery Constr. Co., Sacramento, \$48,865
M. Jacinto, Sacramento, 40,996

Engineer's Estimate, \$36,603.51.

Materials furnished by State: Pipe railings, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$22,225.84.

TEHAMA CO, DIV. 2 ROUTE SEC. A.
Clarke & Henery Constr. Co., Sacramento, \$71,451.80

Engineer's Estimate, \$49,615.60.

Materials furnished by State: Pipe railings, reinforcing steel, corrugated iron pipe and Portland cement. Total \$28,173.04.

City Bids Opened.

Board of Public Works Receives Figures For a Large Amount of Work. Another City Line.

An unusual number of bids were opened at the Wednesday afternoon meeting of the Board of Public Works. Included in these were the plastering, metal lath and furring for the new City Hall; construction of the Potrero Municipal Railroad line; boring wells for the Municipal Water Works; yard work at the San Francisco Hospital and furnishing lighting fixtures for the same institution. Following is a complete list of the bids as opened:

Potrero Street Municipal Line.

Eaton & Smith, \$134,767.80
Mahoney Bros., 137,432.50
F. Rolandi, 145,476.50
R. C. Storrie & Co., 138,474.00
Healy-Tibbitts Con. Co., 151,210.00

Engineer's Estimate, \$142,200.

Bids for boring wells for the Municipal Water Works were received on the lineal foot basis with two propositions considered.

Boring Wells for Water Works.
W. H. Haley Prop. (1) \$8.40; Prop. (2) \$3.40.
E. R. Bacon Co. Prop (1) \$18.40; Prop. (2) \$13.00.
A. E. Clark Prop. (1) \$18.50; Prop. (2) \$15.60.

Yard Work, San Francisco Hospital.
Elmer Carlson Prop. (1) \$88,600; (2) \$86,600; (3) \$83,000; (4) \$81,000.

C. L. Wold (1) \$79,618; (2) \$77,000; (3) \$75,418; (4) \$72,800.

H. A. Klyce (1) \$94,890; (2) \$91,916; (3) \$90,890, (4) \$87,920.

T. W. McClenahan Co. (1) \$88,230; (2) \$86,320; (3) \$83,320; (4) \$81,320.

Grant Fee (1) \$94,900; (2) \$91,900; (3) \$89,900; (4) \$87,900.

Newsom & Kohn (1) \$88,472 (2) \$86,472; (3) \$86,746; (4) \$84,746.

Reed & White (1) \$88,000; (2) \$86,000 (3) \$83,000; (4) \$82,000.

McSheehy Bros. (1) \$86,652; (2) \$85,077; (3) \$82,032; (4) \$80,457.

Monson Bros. (1) \$81,762; (2) \$79,462; (3) \$76,161; (4) \$—

O. C. Holt (1) \$94,440; (2) \$92,640; (3) \$89,960; (4) \$87,840.

Lighting Fixtures, S. F. Hospital.
Ickelheimer Bros. \$12,750
Thomas Day Co., 14,775
A. G. Krauss, 16,873
Leo J. Meyerberg Co., 13,250

Three propositions were considered in connection with the plastering and metal furring for the New City Hall. Proposition (1) was for the plastering; Proposition (2) for the furring, and Proposition (3) included both plastering and metal furring.

Plastering and Metal Furring, City Hall.

Bidder	Prop. 1	Prop. 2	Prop. 3
Cornelius Collins	\$61,518	\$—	\$—
Sound Constr. & Eng. Co.	75,600	175,500	251,100
A. Knowles	120,000	—	—

Open Bids For Pier On Waterfront

Bids for Pier No. 15 Submitted on Two Propositions. Four Sets of Bids Were Received.

Bids were opened at Thursday's meeting of the State Board of Harbor Commissioners for constructing Pier No. 15. Four bids only were received. That of the San Francisco Bridge Co. was low on Proposition 1 and Healy-Tibbitts Constr. Co. was low on Proposition 2 at \$75,327. Following is a list of the figures:

Pier No. 15.

Bidders	Prop. 1	Prop. 2
Thomson Bridge Co.	\$72,500	\$80,000
Hyde-Harjes & Co.	75,000	83,000
San Francisco Bridge Co	68,760	77,259
Healy-Tibbitts Con. Co.	73,372	75,327

After opening the bids the Board of Commissioners adjourned until three o'clock, May 8th.

Architect Kelham To Design Library.

Judges in Library Competition Announce Their Selection For Million Dollar Building.

The judges in the San Francisco Library Competition yesterday announced the selection of George William Kelham, Sharon Bldg., as the ar-

chitect for the new million dollar library to be erected in San Francisco's Civic Center. Cass Gilbert of New York, Paul Cret of the University of Pennsylvania and Hon. James D. Phelan acted as judges. The decision was reached after nearly a week of deliberation.

The competition was invitational and was limited to San Francisco architects. Six architects were invited including George William Kelham, Edgar A. Mathews, Albert Pissis, Ward & Blohme, Reid Bros. and G. Albert Lansburgh. As a reward for his design Mr. Kelham will be commissioned by the Library Trustees to complete the work while the five second prizes will be awarded \$1,000 each. Plans were placed on exhibit in the Assembly Hall of the Phelan Bldg. yesterday at noon and at once attracted a large number of visitors, many of whom were among the leading architects of the city. An expression of general satisfaction with the selection of the winning design was heard from all sides.

Drawings on exhibition show the principal elevations and floor plans. There is a ground floor, the main or second floor and a third floor. The winning design is an exceptionally meritorious piece of work in the classic style, while the rendering is beautifully done. This is true of nearly all of the designs submitted.

The library building will be erected on property bounded by Larkin, Hyde, McAllister and Fulton streets. Hyde street will be cut through to what is now City Hall avenue.

BUILDING CONSTRUCTION SINCE FIRE.

Building operations from May 1906, to April 30, 1914, as reported by the Bureau of Building Inspection of the Board of Public Works, show that 50,277 buildings have been erected at a cost of \$252,761,742. The following is a list of figures as compiled by the bureau:

Class	No. of Bldgs.	Amount
Class "A"	167	\$ 33,072,954
Class "B"	198	14,669,186
Class "C"	2705	80,505,334
Alterations	22373	17,836,143
Exposition Bldgs.	29	8,014,000
Public Bldgs.	8	4,277,663
Frames	21797	94,386,462
Total	50277	\$252,761,742

Building Contracts Awarded.

SAN FRANCISCO COUNTY.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base.
 frame, \$5,000. Oakland, Cal. Archi-
 tect, George Anderson, 6046 Lawton
 avenue, Oakland. The dwelling has
 been designed for an eight-room
 house with bath and sleeping porch,
 and will be erected on Lawton avenue
 east of Broadway. Interior will be
 finished in pine and elm with hard-
 wood floors in the living room, dining
 room and reception hall. There will
 be furnace heat and open fire places.
 Mantels will be of tile. An automatic
 water heater will be installed. Bath
 room will have tile wainscot and com-
 position floor. Exterior of the dwell-
 ing will be covered with cement plaster
 on metal lath. Plans are being
 prepared and when complete work
 will be carried on by Day Labor.

RESIDENCE — 2 story and base.
 frame, \$3,000. Oakland, Cal. Archi-
 tect, none. Owner, F. H. Dailey, 2130
 Broadway, Oakland. The dwelling has
 been designed for a seven-room house
 with bath, and will be erected on
 Richmond Boulevard south of Moss
 avenue. Interior finish will be of pine,
 redwood and elm. Hardwood floors
 will be used in the living room and
 dining room. There will be furnace
 heat and open fire places. Mantels
 will be of tile or brick. Bath room
 will have tile wainscot and composi-
 tion floor. An automatic water heater
 is specified. Exterior of the house will
 be covered with cement plaster on
 metal lath. Plans are in the hands of
 the owner who will do the work by
 Day Labor. Materials are now being
 purchased.

BUNGALOW — 1 story and base,
 frame, \$2,000. Oakland, Cal. Archi-
 tect, Clay N. Burrell, Albany Bldg.,
 Oakland. Owner, E. F. Muller. The
 dwelling has been designed to contain
 six rooms, bath and sleeping porch,
 and will be erected in Claremont.
 Interior finish will be largely of pine
 with some hardwood veneer. Oak
 floors will be used in the living room,
 dining room and reception hall. There
 will be furnace heat and open fire
 places. Mantels will be of tile or
 brick. An automatic water heater
 will be installed. Bath room will have
 tile wainscot and composition floor.
 Exterior of the house will be covered
 with cement plaster on metal lath.
 Plans are complete and work will be
 done by Day Labor. Materials are
 now being purchased.

RESIDENCE — 2 story and base,
 frame, \$3,000. Oakland, Cal. Archi-
 tect, none. Owner, Theo. Fenn, 749
 61st street, Oakland. The dwelling
 has been designed for a seven-room
 house with bath and sleeping porch,
 and will be erected in the Foothill
 Boulevard Tract. Pine, redwood and
 some hardwood veneer will be used
 for interior finish. Hardwood and in-
 lair floors are also specified. Plans pro-
 vide for furnace heat and open fire
 places. Mantels will be of tile. Bath
 room will have tile wainscot and com-
 position floor. An automatic water
 heater will be installed. Exterior of
 the dwelling will be covered with ce-
 ment plaster on metal lath. Plans are
 complete and in the hands of the own-
 er who will do the work by Day Labor.

RESIDENCE — 2 story and base,
 frame, \$5,000. Berkeley, Alameda Co.,

POLICE STATION—1 story, frame, \$5,000. Oakland, Cal. Architect's name not given. Owners, City of Oakland. Bids were opened on Thursday last by the City Council for constructing a branch police station. The lowest figures were submitted by W. C. Thornally at \$5,150. No award of contract was made. A list of the bids received will be found under the heading of Oakland and Alameda County in this issue.

DORMITORY BUILDING — 2 story and base, brick. Cost not stated. Oakland, Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans have been completed for a new dormitory building to be erected at the Industrial Home for the Adult Blind in Oakland. The building has been arranged to contain dormitories and a mess hall, kitchen and office. Interior will be finished in pine. Plans provide for modern plumbing, steam heat and a hot water system. Exterior will be covered with rustic and cement plaster. Plans are now out for figures and bids will be opened on June 2nd. An official proposal appears in another column of this issue.

BUNGALOW — 1 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architects, Wright & Rushforth, 571 California street, S. F. Owner, W. H. McGill. The dwelling will be erected on Babel street between Russell and Oregon streets, and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

The building will be erected at the southwest corner of Macdonald avenue and 17th street, covering an area of 50 by 160 feet. There will be three stores on the first floor, thirteen apartments of two rooms each and two single rooms on the upper floor. Interior will be finished in pine throughout. There will be steam heat and a hot water supply. All suites will have wall beds and private baths. Patent store fronts are specified. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

CHURCH—1 story and base, brick or reinforced concrete, \$20,000. Napa, Napa Co., Cal. Architect, L. M. Turton, Napa. Owners, Methodist Church of Napa. The building will probably be designed in the classic style, although details have not been settled. The architect is now engaged on preliminary studies. There will be a large main auditorium, Sunday school rooms and pastor's study. Interior finish will be of pine. There will be a central heating system and art glass windows. Exterior will be faced with cement plaster or pressed brick. Further mention will be made of this work shortly.

HOSPITAL DAIRY BUILDINGS—Frame and concrete. Cost not stated. Napa, Napa Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans have been completed by the state Department of Engineering for a new dairy building and a concrete silo to be erected at the Napa State Hospital. Plans are now out for figures and may be secured from the State Department of Engineering at Sacramento. Bids will be opened on June 3rd. An official proposal appears in another column of this issue.

Contracts Awarded.

BRIDGE ABUTMENTS—Reinforced concrete. Cost not stated. Fairfield, Solano Co., Cal. Engineer, County Surveyor, Fairfield. Owners, Solano Solano County. Contractors, Brann & Freitas, Rio Vista. Contract price, \$2,500.

HALL OF RECORDS—2 story and base, reinforced concrete, \$50,000. Colusa, Colusa Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Colusa County. Contractors, Williams Bros. & Henderson, Holbrook Bldg., S. F. Contract price, \$45,585. A complete list of these figures will be found under the heading of Sacramento, Stockton and Northern California.

PAY COTTAGE—1 story, frame and concrete. Cost not stated. Napa, Napa Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Contractors, McSheehy Bros., S. F. Contract price not stated.

Bids For Colusa Hall of Records.

Williams Bros. & Henderson of This City Awarded the Contract. Two Bids Received Late.

(By Special Wire.)

COLUSA, Colusa Co., Cal., May 6th, 1914.—Bids opened by the Board of Supervisors for the construction of the

SCHOOL CLOCKS AND GAS GENERATOR SETS—Cost not stated. Sanger, Fresno Co., Cal. Architects, Swartz, Hotehkin & Swartz, Rowell Bldg., Fresno. Owners, Sanger Union High School District. Bids will be opened on May 16th for furnishing and installing program clocks and gas generator sets in the Sanger High School building. Plans and specifications can be secured from the architects.

HOTEL—1 story and base, frame, \$30,000. Big Creek, Fresno Co., Cal. Architect, Carl Thayer, Forsyth Bldg., Fresno. Owners, Sierra Basin Hotel Co. Work has been started by Day Labor on the big resort hotel to be erected at Big Creek in the Sierra Basin, Fresno County. Plans were prepared by Architect Carl Thayer, Forsyth Bldg., Fresno. The building will be of frame construction and will cost in the neighborhood of \$30,000. M. Zucardi has been placed in charge of the work. James G. Bass of Fresno holds controlling interest in the project. The building has been designed in the shape of the letter H and will contain 69 guest rooms nearly all of which will have private baths. There will be a large lobby and office, dining room and completely equipped kitchen. A huge rock fire place will be a feature of the building. Exterior will be covered with rustic.

THEATRE AND OFFICES—4 story and base, brick and steel, \$50,000. Fresno, Fresno Co., Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, T. C. White, Fresno. The building will be erected on I street, and will have a frontage of 100 feet by a depth of 150 feet. Construction will be fireproof with a complete steel frame, brick walls, concrete floors and stairways. Interior partitions will be of metal lath and plaster. Interior finish will be of pine and hardwood with some metal trim. Metal window sash and frames are specified. The theatre will have a seating capacity of 1500. There will be two stores besides the main body of the theatre on the first floor. Upper floors will be arranged for a number of offices. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

POST OFFICE—1 story, mezzanine floor and base, brick and stone. Cost not stated. Hanford, Kings Co., Cal. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids opened in Washington on May 6th for the construction of this building show Welch Bros. of Oakland low at \$24,75. They will probably be awarded the contract. A complete list of the bids received will be found under the heading of Sacramento, Stockton and Northern California in this issue.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

RESIDENCE—1½ story and base, frame, \$3,500. Woodland, Yolo Co., Cal. Architect, Chester H. Miller, Daiziel Bldg., Oakland. Owner's name withheld. The dwelling has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile and will have composition floor. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are now being prepared.

BANK ALTERATION—2 story and base, brick. Cost not stated. Chico, Butte Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, People's Savings and Commercial Bank. The present building, occupied as a store, will undergo extensive alteration. The work will require new interior finish, bank fixtures, plumbing, heating, electric work, ornamental plaster work and ornamental iron and bronze. Bank vault will also be installed. Plans are now being prepared.

GAS HOLDER AND TANK—Cost not stated. Talmage, Mendocino Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened on June 1st for the construction of a gas holder, framing and tank at the Mendocino State Hospital at Talmage. Plans can be secured from the State Department of Engineering, Sacramento. An official proposal appears in another column of this issue.

DAIRY BUILDINGS—Frame and concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened on June 4th for constructing new dairy buildings at the Stockton State Hospital. Plans can be secured from the State Department of Engineering, Sacramento. An official proposal appears in another column of this issue.

POST OFFICE—1 and 2 story and base, brick, stone and terra cotta. Cost not stated. Grass Valley, Nevada Co., Cal. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids opened in Washington on May 6th for the construction of this building show Welch Bros. of Oakland low at \$24,75. They will probably be awarded the contract. A complete list of the bids received will be found under the heading of Sacramento, Stockton and Northern California in this issue.

STATE HIGHWAYS—Cost not stated. California, Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids were opened at the last meeting of the State Highway Commission for constructing highways in the following counties: Sonoma, Shasta, Siskiyou, Butte, Glenn and Tehama. In several of the counties figures ran over the engineer's estimate and bids will probably be rejected. A complete list of the figures together with the materials furnished by the state and the engineer's estimate will be found un-

San Francisco

der the heading of Sacramento, Stockton and Northern California in this issue.

BUNGALOW—1 story and base, frame, \$3,000. Sacramento, Cal. Architect, none. Owner, R. E. Stuhbe, 3712 Palm avenue, Sacramento. The dwelling will be erected in Casa Loma Heights, and will contain five rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with a tile or brick mantel. Bath rooms will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

LEVEE CONSTRUCTION—Cost not stated. Marysville, Yuba Co., Cal. Engineer, James R. Meek, Marysville. Owners, Reclamation Dist. No. 10, Yuba County. Plans have been completed for the construction of levees and considerable reclamation work. Bids are now being called for and will be opened on May 15th. Plans can be secured from the engineer at Marysville. An official proposal appears in another column of this issue.

HOSPITAL GROUP—1, 2 and 3 story and base, reinforced concrete or brick. Cost not stated. Sacramento. Architect R. A. Herold, Forum Bldg., Sacramento. Owners, Sacramento County. Herold has just been commissioned to prepare plans for a large group of modern hospital buildings to be erected on the old infirmary site. The cost and nature of construction have not been determined as yet. Further mention will be made of the work as the plans progress.

STORES AND OFFICES—4 or 5 story and base, brick and steel or reinforced concrete, \$100,000 to \$140,000. Sacramento, Cal. Architect not selected. Owners, Sacramento Chamber of Commerce. Architects E. C. Hemmings, John W. Woollett and John P. Hill have submitted plans for a large commercial building to be erected on 7th street between I and J streets in Sacramento by the Chamber of Commerce. Plans are being considered for both a five and an eight story building. If the five story is erected it will cost about \$100,000, if the eight story is erected the cost will exceed \$140,000. A selection of the architect will be made in a week or ten days.

Contracts Awarded.

SCHOOL—2 story and base, brick, \$50,000. Chico, Butte Co., Cal. Architect, Chester Cole, Chico. Owners,

Oakdale School District. The Chico Board of Education has rejected all bids received for the construction of the Oakdale School and will readvertise the work. The lowest bid received was for \$34,500, while but \$20,000 is available for construction. Architect Chester Cole will revise the plans. At the same meeting of the Board contracts were awarded for a four-room addition to the Chien Vecino School the contract going to C. H. Crippen for \$5,994.85. The contract for work at the Rosedale School was awarded to Moore & Cruse for \$7,394.50.

Bids Opened For Grass Valley P. O.

Monson Bros. Low, but Withdraw Their Bid. Welch Bros., of Oakland, will Probably Get Work.

(By Special Wire.)

WASHINGTON, D. C., May 6th, 1914. —Bids were opened in Washington today for the construction of the new Federal Building at Grass Valley, California. Six bids were received. Monson Bros. were low, but withdrew their bid leaving Welch Bros. of Oakland low at \$42,475. A press dispatch gives Schulder of Pasadena low at \$23,000, but this is probably a mistake, the bid probably being \$13,000.

A complete list of the bids follow:

Grass Valley Post Office.

Monson Bros., S. F. (withdrawn)	\$39,888
E. F. Burke, S. F.	48,275
Frank Gallagher, S. F.	51,780
Welch Bros., Oakland	42,475
Kling Co., L. A.	52,600
Eugene Schulder, Pasadena (mistake)	23,000

No award of contract has been made.

LOS ANGELES AND SOUTH-ERN CALIFORNIA.

APARTMENT HOUSE—4 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Washington Bldg., L. A. Owner, A. Jamieson. The building will be erected on Carondelet street near 9th and will cover an area of 88 by 103 feet. There will be 100 rooms, arranged in two and three room suites. Interior finish will be largely of pine. There will be steam heat, elevator service and a hot water supply. All apartments will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

CHURCH—1 story and base, frame and plaster, \$25,000. Hollywood, Los Angeles Co., Cal. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, Hollywood Methodist Church Congregation. No details of the building have been given out, but it is understood that the design will be in the Mission style with exterior covered with cement plaster on metal lath. There will be a main auditorium, Sunday school rooms and pastor's study. Interior finish will be of pine. Art glass windows will be installed. Plans

are now being prepared. Further mention will be made of the work.

HOTEL—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, Joseph F. Rhodes, Central Bldg., L. A. Owner, Michael Kieley. The building will be erected on Kohler street near 6th, covering an area of 37½ feet by 131 feet. There will be stores besides the hotel office and lobby on the first floor. Upper two floors will contain a total of 66 rooms and six baths. Interior finish will be of pine throughout. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared and when complete the work will be done by Day Labor.

HOTEL—5 story and base, brick and steel. Cost not stated. Venice, Los Angeles Co., Cal. Architects, C. H. Russell & Co., Union League Bldg., L. A. Owners, C. W. Holbrook and C. Minotti. The building will be erected on Windward avenue and will have a frontage of 50 feet by a depth of 102 feet. There will be a store, office and hotel lobby on the first floor. Upper four floors have been arranged for a total of 65 rooms and 20 baths. Interior finish will be of pine and birch. Bath rooms will have tile wainscot and composition floors. Plans provide for steam heat, elevator service and a hot water supply. Patent store fronts are specified. Exterior of the building will be faced with pressed brick with tile inlays. Plans are being prepared.

HOTEL—4 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architects, The Western Building Co., Lankershim Bldg., L. A. Owner, G. A. Thiele. The building will be erected on Wall street, covering an area of 50 by 113 feet. There will be a total of 76 guest rooms, eight private baths and eight public baths besides the office and lobby. There will be steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Entrance and lobby will be finished in marble. Plans are complete and figures are being taken.

SCHOOL—2 story and base, brick \$12,000. Orange, Orange Co., Cal. Architect, J. Flood Walker. 393 East 4th street, Santa Ana. Owners, Orange Grammar School District. The building has been designed in the Italian style and will contain eight standard sized class rooms, office, teachers' rooms, an assembly hall seating 400 people, and manual training and domestic science rooms. Interior will be finished in pine. There will be pine and maple floors. Plans provide for modern school plumbing, electric work and a plenum system of heating. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on May 14th. Plans and specifications can be secured from the architect.

STORES AND OFFICES—6 and 7 story and base. Class A construction, \$800,000. Los Angeles, Cal. Architects, Frederick Noonan and William Richards, Prockman Bldg., L. A. Owners, J. W. Robinson Co. The building will be erected on 7th street, extending

from Grand avenue to Hope street. It has a frontage of 333 feet on 7th street and 140 feet on each of the other streets. The structure will be of reinforced concrete construction. The exterior will probably be faced with terra cotta on all three street fronts. The interior finish and equipment will be complete and modern in every respect and will include ten passenger elevators, two freight elevators, conveyors, spiral chutes, sprinkler system, steam heat, etc. The lease provides that the building be completed and occupied within two years, but it is expected this can be accomplished in twelve months. Working drawings are being prepared.

BANK AND OFFICES—5 story and base, brick and steel. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, Krenpel & Erkes, Henne Bldg., L. A. Owner, Mrs. L. Hauerwaas. The building will be erected at the corner of Pine and Broadway streets, and will cover an area of 50 by 150 feet. The first floor will be occupied by the Marine Commercial and Savings Bank. Each of the upper floors will contain twenty offices. Interior finish will be of pine and hardwood. Plans provide for steam heat and elevator service. Special interior finish, ornamental plaster and bronze and brack vaults will be installed in the first floor. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—4 story and base, brick and steel, \$100,000. Los Angeles, Cal. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, G. Rupert Johnson. The building will be erected at the corner of Ingraham and Wither streets and will cover a considerable ground area. Interior will contain a total of 172 rooms arranged in two and three room apartments. Interior finish will be of pine and hardwood. There will be steam heat, two electric elevators and a hot water supply. All apartments will have wall beds and private bath rooms. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick. Plans are complete and the work is being done by Day Labor.

STABLE—1 story, brick, \$5,000. Los Angeles, Cal. Architect, Frank M. Tyler, Black Bldg., L. A. Owners, Davis Standard Bread Co. The building will be erected at the corner of First and Beaudry streets, covering an area of 50 by 150 feet. Interior will be finished in rough plaster and pine. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, brick, \$70,000. Los Angeles, Cal. Architects, C. F. Borton Co., Hibernian Bldg., L. A. Owner, Laura Borton. Contractors, C. F. Borton Co., Hibernian Bldg., L. A. Contract price \$50,000.

PORTLAND AND OREGON.

LAUNDRY—2 story and base, brick, \$20,000. Portland, Ore. Architects, Emil Schacht & Son, Commonwealth Bldg., Portland. Owner, C. A. Wagner. The building will be erected at a corner and will cover an area of 50 by

100 feet. The entire structure will be occupied by the laundry. Interior finish will be of pine. Special machinery will be installed. Exterior will be faced with stock brick. Plans are complete and figures are being taken.

CHURCH—2 story and base, reinforced concrete, \$30,000. Marshfield, Ore. Architect, Benjamin Ostlund, Marshfield. Owners, St. Monica Roman Catholic Church. The building has been designed in the Gothic style and will cover a large area. There will be the main auditorium, Sunday school rooms and several smaller rooms. Interior will be finished in pine with ornamental plaster. Plans provide for a vapor system of heating. There will be art and leaded glass. Exterior of the building will be faced with cement plaster. Working drawings are complete and figures will be called for at once.

LAUNDRY—1 story and base, reinforced concrete, \$14,000. Marshfield, Ore. Architect, Benjamin Ostlund, Marshfield. Owners, Jones Bros. The building will cover a large ground area and will be practically fireproof throughout. There will be reinforced concrete walls, floors and roof. Interior finish will be of pine. Plans provide for metal window sash and frames. Special laundry machinery will be required. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

CITY HALL—2 story and base, brick and stone, \$56,881. Klamath Falls, Ore. Architects, Vegiete & Co., Klamath Falls. Owners, City of Klamath Falls. Contractors, Cofer Bros., Klamath Falls. Contract price, \$36,884.

STORES AND OFFICES—3 story and base, brick, \$27,000. Baker City, Ore. Architect, M. P. White, Baker City. Owner, Louis Summers. Contractor, D. Lyxen, 201 Columbia street, Portland. Contract price, \$27,000.

SEATTLE AND WASHINGTON.

RESIDENCE—2 story and base, hollow tile construction, \$30,000. Seattle, Wash. Architect, Carl F. Gould, Boston Block, Seattle. Owner, J. H. Blodell. The dwelling will be erected on Harvard avenue on a large estate. Besides the dwelling plans also provide for a large garage of a similar type of construction. The house will contain in the neighborhood of twenty rooms, several baths and the servants' rooms. Interior finish will be of hardwood throughout. Hardwood and inlaid floors will be used. All bath rooms will have tile floors and wainscot. Plans provide for a central heating system, probably steam heat. There will be open fire places, tile mantels and a vacuum cleaning system. Exterior of the dwelling and garage will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

RESIDENCE—2 story, attic and base, semi-fireproof, \$50,000. South Fellingham, Wash. Architect, Carl F. Gould, Boston Block, Seattle. Owner, C. X. Larabee. The dwelling has been designed to contain twelve rooms and a number of baths. A garage will also be erected on the property. Interior finish will be of pine and hardwood with hardwood and inlaid floors. There

will be steam heat, a hot water system and vacuum cleaning. Bath will be finished in tile and will be equipped with showers. Exterior of the dwelling will be faced with cement plaster. Plans are complete and figures will be called for at once.

COLD STORAGE WAREHOUSE—5 story and base, reinforced concrete, \$400,000. Seattle, Wash. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. This work is known as project No. 4 of the Port of Seattle. The building will cover a large area and will be fireproof throughout. The Commission's plans are complete and they are calling for plans to be opened on May 25th. Contractors are also invited to submit plans and specifications containing alternate methods of construction with their figures. Plans can be secured from the Port of Seattle Commission, Central Bldg., Seattle. An official proposal appears in another column in this issue.

HOTEL—10 story and base. Class A construction, \$250,000. Seattle, Wash. Architects, Howell & Stokes, Henry Bldg., Seattle. Owners, Kennedy Hotel Co. The building will be erected at the southeast corner of 4th avenue and University and will cover a large area. Construction will be of the class A type throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Only preliminary sketches have been prepared, and the number of rooms, interior finish and other matters have not been determined upon as yet. Further mention will be given of the building as the plans progress.

Contracts Awarded.

THEATRE AND OFFICES—A story and base. Class A construction, \$300,000. Seattle, Wash. Architect, B. Marcus Pretina, Empire Bldg., Seattle. Owner, Alex Pantages, Contractor, Hans Pederson, Madison Bldg., Seattle. Contract price, \$300,000.

BRIDGE—Steel and concrete, \$400,000. Spokane, Wash. Engineer, Engineering Department Oregon-Washington Railroad and Navigation Co. Owners, Oregon-Washington Railroad and Navigation Co. Contractor, Rob. Wakefield, Worcester Bldg., Portland. Contract price, \$400,000.

PIERS, ETC.—Cost not stated, \$250,000. Victoria, B. C. Engineer's name not given, Owners, Canadian Government. Contractors, Grant Smith and McDonnell, Vancouver. These contractors have awarded a subcontract for the structural steel to E. G. Prior & Co., Vancouver for \$250,000.

THE LIABILITY LAW.

Cause For Resistance To The Act Discussed By John Miller White.

A Reason and Builder's Analysis of Existing Conditions in Our Courts of Justice.

The action that is being taken in the courts to overthrow the employers liability law of this state, is one that was to be expected. There is a deep and far reaching reason for it. It appears to me that there is a meaning, both in the law and in the opposition to it, that has not yet, so far as I have seen, been called to public attention. The Liability law is in effect a court

created for the purpose of determining the justice of causes which it is fitted to decide because it is informed of the nature of the cases on which it is called to act. It is only one of many such courts for the purpose of administering justice, that in recent times have been created, and in many states, for the purpose of determining only such cases as they are constituted to understand; and they are able to be just not only because they are free to act on the merits of the causes brought before them, but because they may act promptly, and that is the half of justice.

So all of these commissions are courts. They are prophetic of the courts of the future, and it is the principle of such a court, free and untrammelled, and thus having power to do justice, that is opposed by the interests that are against them. They see, as we all may see if we will, that the courts that we have known, and the system of jurisprudence that they represent, is passing away; by evolution and not by revelation. The cold arm of technicality that is reaching its clammy fingers out of the darkness of the middle ages, and extending over our modern enlightenment, is dying as it should, and a new system of jurisprudence is taking its place.

The old system, or the courts as we have been taught to know them, and in fact our entire system of law and court procedure, grew up in the decaying days of Rome, fittingly constructed in harmony with the spirit of their life. In an age of great wealth in the hands of a few and with millions of struggling poor; constructed so that it worked, by its quibbles and delays, continual injustice just in proportion to the poverty of the litigant. And so it has continued till now with but slight variations of outward shape, in all the nations of modern Europe as well as ours, to automatically amass the wealth of the people in the hands of the rich and powerful. This advantage has continued in favor of the rich for eighteen centuries, and may truthfully be said that it was made so intuitively by the spirit of its creators, as every work must partake of the nature of its authors. And this work has operated, and does so operate now as the most cunning instrument of inequality and injustice that could be conceived in the mind of man. And so it is that the powers in the world that profit by inequality, and who have so long profited through the operation of this system, are to be expected to resist the forces of higher civilization that are sweeping it away.

The higher idea of justice of our recent times, which regards the right of every man to have his cause judged without unnecessary expense or delay, has at last found a way to change our system of law procedure by gradually creating a new system to take its place, and it seems like something of a mockery for the old and dying court to pass on the question of the right of the new to exist or to come into being. It seems as if a dead branch on a tree would claim a right to deny the parent tree the right to grow green branches, but time will rapidly pass, and it will not be long till all civil cases will be tried by tribunals fitted to understand their nature, and which, because of

power to understand the evidence, will be able to do justice.

But while the subject cannot be more than sketched here, this appears to be the true essence of the growing system of adjudication by commissions. We have among us, and particularly here in California, some men who, in recent times have been diligent workers in the cause of equality, and neither are they who preach near violence from street corners, but they are those who have fought every form of corruption, and who are creating this system that will, by its operation, tend to bring about more perfect equality of right. And there are among these some who have been singled out for particular vilification and abuse, by those who profit by protracted litigation and delay. But they are in truth not disturbers but benefactors, and California owes honor and not abuse to her leaders in this march of progress. Such names as Roosevelt, Heney, and Johnson, will long be remembered with honor for their struggle against the entrenched past. There is no question that a great change is working in the hearts of the people, and for what reason we do not know, but we do know that it is true that California is now influencing economic thought and action far beyond her own borders. It will become her to remember that her work is progress, and that honor comes to her now on account of it, and the more will come to her in the future. And the history of all progress will unite to teach her that any failure on her part to maintain the example already given will be charged to her discredit.

JOHN MILLER WHITE.

The California Railroad Commission has taken up the question of the Pullman car rates with reference to the tipping system that is forced upon the public by the employees of that company. And as it has dealt with the Southern Pacific Company and the Wells Fargo Express Company it may be expected to deal with like effect in the case of this monopoly.

The Commission has given the company thirty days in which to remedy the evils complained of or the Commission will start an investigation itself on its own initiative and see where the trouble is. It rightly says that the company should either pay its employees a living wage or if it is too poor to do this that it should have its rates and charges raised.

Commenting upon the practice of the company the Commission states that "It is impossible for this Commission to reach a conclusion other than that the Pullman Company deliberately attempts to pay the employees which it hires from the gratuities given by the public.

While this Commission is not attempting to reform the common inclination of humanity to get a little better treatment by tipping, and does not feel called upon to discuss the propriety of gratuities, still we do believe we are compelled to consider the duty of this company with reference to turning to its own advantage the tipping habit."

The Commission further states that women travelers receive less attention than men, because the tips are less and tourist car passengers receive inferior service to those of the pullman cars.

Commenting further the Commission says:

"Complaints have come from the employees of the company themselves to the effect that under the wages paid them they must get tips to live, and that they are expected by their employers to get such tips. It is impossible for the Commission to reach a conclusion other than that the Pullman Company deliberately attempts to pay its employees from the gratuities of the public.

"This Commission does not feel called upon to question the propriety of gratuities, but we do believe that we are compelled to consider the duty of this company with reference to turning to its own advantage the tipping habit.

"It certainly is a commentary on modern business that a company as rich and powerful as this one in question should feel inclined to stoop to the disreputable practice to which it feels called upon to resort.

"It is our opinion that the time has passed in this State and in this Nation when institutions such as the Pullman Company can be, or should be, permitted by public authority or indulgence which requires the traveling public to be generous in giving tips, whether it wants to or not, and which requires the employees of this company from necessity to resort to whatever means they have in their power to secure the necessary amount which, added to their salary, will enable them to live."

"This report is a commentary on the progress of the country since the time of Grover Cleveland. In 1893 the town of Pullman, Illinois, was owned completely by the Pullman Company. The employees lived in the company's houses or were buying them from the corporation. They traded at the company's store. In fact they were the servants, body and soul, of the corporation. Labor conditions became so bad that the employees went out on strike. The first thing the Pullman Company did was to run a mail car into the town and when the train to which it was attached was stopped by the strikers the company's officials appealed to the President of the United States that the strikers were interfering with the mail. Cleveland promptly sent the federal troops to the place, the trains were permitted to run and the strike was over. The Strikers had no rights that the company was bound to respect and they were compelled to make their living the best way they could.

Now things have changed. Even the porter is considered a citizen, he is entitled to a living wage and the corporation is not allowed to hog his earnings and pay dividends on watered stock and money that was never invested. No wonder the Chronicle howls about too many commissions. It is the Railroad Commission and U. S. Board of Control that has hit its masters, the beneficiaries of special privilege and these are the commissions it would like to abolish.

The present administration shows what really competent men can do when they are placed in charge of governmental affairs when they have the back bone to do it. Never again will the Southern Pacific and Wells Fargo and the Pullman Company and all others make people believe that all

the wisdom if the world is lodged in their corporate heads. And it is to be hoped that never again will a majority of the people pull blindly the juggernaut of special privilege harnessed by political prejudice and beelieving as gospel truth the floundering of a lot of political hirelings.

THE LAKE WASHINGTON CANAL LOCKS.

An important work now nearing completion is the great locks of the Government canal at Salmon Bay, by means of which shipping will be able to pass from Puget Sound at Seattle to Lakes Washington and Union. The works are so far advanced that the first ship is expected to pass through the waterway early in 1915.

The public mind has been so filled with the story of the construction of the Panama Canal and its great locks at Gatun and elsewhere, that it is apt to overlook the fact that several other works of this character of great magnitude are also being carried out. The Lake Washington canal and locks are a case in point. The lock is 825 feet long, 80 feet wide on the inside and 56 feet high. The walls of concrete are 33 feet in thickness at the bottom and 8 feet at the top. This structure is known as the Big Lock. The Small Lock is 30 feet wide and 160 feet long. The latter is being built for the use of small boats, and, of course, it will result in the saving of much expense, since a large part of the traffic is of such size as not to call for the use of the greater structure.

When the locks are finished the level of Lake Union will be raised to twenty-one feet above the high water mark, and both this lake and Lake Washington with the factories along their shores, of which there are many today with the prospect of a great many more in the future, will be in direct water communication with the Pacific. Our great advantage of the new works is that since the water in the lakes is fresh, ships will be able to pass through the locks and relieve themselves of barnacles and other marine growths which will drop off from their bottoms, leaving them clean for the next voyage. Also, the canals will have a distinct value to the Navy, whose ships of the medium and smaller sizes—all ships, in fact, except the larger dreadnoughts—will be able to enter the fresh water lakes if emergency or other causes should render it desirable.

The first estimate for this work was \$2,275,000 for the locks, \$1,000,000 for the dredging. The cost of the locks is being paid by the United States Government and that of the canal by the city and county.

INDUSTRIAL ACCIDENT DECISION.

The Industrial Accident Commission has just handed down a noteworthy decision, Ruth vs. Southern Pacific Company, in which it has held that the Workmen's Compensation Act covers certain classes of the employees of that railroad.

The applicant was the widow of Chas. B. Ruth, who was accidentally killed on January 17, 1914, while employed by the Southern Pacific Company as a truck builder and repairer of trucks for locomotives in its roundhouse at

Roseville. Ruth was repairing a switch engine which had been withdrawn temporarily from service in the Operating Department, and which had been used in handling both interstate and intrastate commerce.

The Southern Pacific Railroad maintained that the accident did not come under the Workmen's Compensation Act, but that it was governed by the United States Employers' Liability Law. In making its decision, the Industrial Accident Commission held that the Congressional Act covered injuries only to those working-men employed by interstate railroads while such employees were actively engaged in interstate commerce. On the other hand, if the railroads were not engaged in interstate commerce at the time and the place of injury, and if the accident occurred while the employee was not engaged in interstate commerce, then the Southern Pacific Company will undoubtedly appeal the case in the higher courts.

HUNDREDS OF MILLIONS OF WASTE SAVED.

At the first annual banquet of the National Association of Waste Material Dealers, held in New York city this week, it was brought out that by collecting and utilizing waste products the members of the association transact an annual business of \$700,000,000. The utilization of cotton-seed oil and of cotton seed, until very recent years a mere waste product of the cotton crop, is now pointed out, is now valued in the United States alone at \$50,000,000 a year. Curtis Guild, ex-ambassador to Russia, noted that we are now exporting sisal strings to Europe to be turned into tooth brushes; that we are using the worn-out painter's brush, soaked with white lead, by cleansing and using the worn bristles to provide inexpensive and durable scrubbing brushes, while exporting American cotton stockings to Europe, where they are unraveled and used as a cheap packing in the manufacture of graphophones and electrical machinery, while the patched and darned European stockings, not having any other use, are exported from Europe to this country for their only possible use as paper stock. The exports and imports of waste material are not yet thoroughly reported by the department, although even the commencement of their appearance in the official publications of the United States Government dates back but a few years. For the calendar year 1912 we exported cotton rags to the value of over \$700,000, paper stock other than cotton rags to the value of over \$800,000, woolen rags to the value of \$1,000,000, scrap iron to the value of \$1,200,000, old and reclaimed rubber to the value of \$1,600,000, and scrap brass to the value of over \$2,000,000. The figures of the imports of waste materials from foreign countries are even more striking. In the year 1913 we imported scrap iron to the value of \$500,000, old copper to the value of \$1,000,000, silk waste to the value of \$3,000,000, old rubber to the value of more than \$3,000,000, cotton rags to the value of \$3,000,000, and other paper stock which was neither cotton rags nor wood pulp to the value of nearly \$5,000,000.—Bradstreet's.

Juuction Market, Mason and Turk Streets

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

CALL Douglas 2944

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT

Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires
Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London
The Ritz, London

The Hyde Park, London
The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hostelrys with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

OTIS ELEVATOR COMPANY

Editorial Comment.

Out of a list of about 75 cities reporting to the American Contractor, Chicago, a loss of about 13 million dollars or something more than 16 per cent. In New York the loss was comparatively small, in Chicago the decrease was greater, while in the large building centers there was a general decrease in building operations. While we may think things are quiet here on the coast the figures show that conditions here are as good or better than anywhere else. Seattle at least, shows a substantial increase. Particulars are found in the following table:

	April, 1914.	April, 1913.

Joseph Knowles, a Boston artist, entered the Maine woods last year absolutely naked and came out at the end of sixty days clothed and apparently in good health. He demonstrated that civilized man with any knowledge of woodcraft could exist as his barbaric ancestors had done and gain a living from the wilds of nature.

Bill Elliott, a Maine Woods guide, has an interview in the New York World in which he has an idea to enter the city, the brick and mortar wilderness as he calls it, without a shave or a hair cut, without a thing in the world except some ragged clothes to cover the bare pelt. His idea is to demonstrate that the average man has a better show to make a living in the country than in the city.

In other words that the lands holds out the squarest deal to the man that has the right kind of stuff in him and is willing to depend upon himself. That there is always a living to be gained from the soil. And that while one may have to endure physical hardships to the average person there is more opportunity than in the city.

THE MERCHANT TONNAGE OF THE WORLD.

The latest figures showing the tonnage of the merchant fleets of the principal maritime powers, prove that Great Britain still holds her commanding lead, with a tonnage nearly one-third greater than that of all the other maritime powers combined. Thus Great Britain possesses 20,275,791 tons; Germany, 4,998,746; United States, 2,189,736 tons, the greater part of which is domestic shipping; Norway, 2,475,323 tons; France, 2,216,501 tons; Japan, 1,700,062 tons, and Italy, 1,571,761 tons.

Landscape Architect and His Profession.

Expert Services, Training, the Character of Work Charges,
Planting and Principles.

Howard Evans Weed.*

Reprinted from Pacific Builder and Engineer.

Landscape gardening is a comparatively new profession, which may be said to have had its birth in America with the formation of Central Park in New York City. In the growth of the metropolis a large tract of land situated in what was then the upper portion of the city was given for the formation of a public park, largely owing to the fact that the land was so rocky that building operations were considered too costly. No one unfamiliar with the detailed history of this famous park can realize the enormity of the task so successfully carried out by the late Frederick Law Olmstead. This park is the pleasure resort of thousands annually and with many of these persons it is the only touch of nature which they ever see. The Centennial Exposition in Philadelphia marked a step forward in the development of landscape art, and it was here for the first time that the public saw what results could be obtained when flowers, shrubs and trees are blended in harmony.

In the years following the Centennial considerable interest was taken in gardening in the eastern states, more especially in the vicinity of Boston, where a series of public parks was established. But it remained for the World's Fair of 1893 to awaken the people of the west to the fact that there existed such a thing as outdoor art. What visitor does not remember with pleasure the delights of the gracefully curved walks and drives of the White City, the touch of wilderness of the wooded island, or the blending of the formal exposition buildings with their surroundings? These features of the exposition remain in memory long after the exhibits have been forgotten.

Present and Future Interest.

We thus see that it is only in the past few years that much general interest has been taken in landscape gardening. Now, however, the public are taking more interest in things of beauty and works of art. Examples of good landscape art have called attention to the artistic effects which may be produced by the flowering shrubs. But the present interest has only begun.

As the country becomes older greater wealth enables the establishment of country estates developed by special artists who devote their lives to the study of flowers, shrubs and trees, and how they can best be placed in their relation to each other and their surroundings to make an harmonious and effective landscape.

The beauty and attractiveness of a home lies not alone in the house, for however beautiful or costly this feature may be, it cannot be considered alone, but as a part of its surroundings. A framework of flowers, shrubs and trees is needed in order to blend the whole in harmony. It will pay anyone contemplating the planting of even a few trees and shrubs to employ a landscape architect for this work. He will then be reasonably sure of a

good job well done, and as the landscape architect obtains wholesale rates on the purchase of nursery stock, this saving alone will generally more than pay for his services. At the present time no one thinks of building a house without engaging an architect to draw a plan of the building and supervise its construction. Yet it is only in recent years that this has been done. But in the future the importance of a planting plan of the surrounding grounds will be recognized just as surely as the importance of a building plan is recognized today.

Function of a Landscape Expert.

At first thought it may seem an easy matter to plant out the grounds surrounding a building to trees and shrubs. And so it is. A child can place the roots of a flower or shrub in the ground and have it grow. In the same manner it is an easy matter to hang works of art upon the walls of an exhibit room. The paintings being at hand, with the proper number of hooks in the wall, all that is needed is a step ladder and a helper to hand up the works of art and the job is soon over. I have never seen an art exhibit arranged in this way, so do not know how it would look. But I notice that at every art exhibit a committee of connoisseurs is appointed to properly arrange the exhibit. It seems that some paintings show up best with a certain amount of light, others with the light coming from a certain direction, and so on. Upon this account the hanging committee will spend days and even weeks in considering the proper placing upon the wall of a few paintings.

If all this trouble is important in the placing of a few landscape pictures in order to please the eye for the passing moment, how much more important is the placing of the individual specimens of nature in the making of landscape. Here we deal with the real things, the creation and representation of God, and not simply with a few colors put upon a canvas by a man in imitation of nature. We are also making an arrangement, not for the passing moment, but practically for all time. Some flowers and shrubs do their best in shady and others in sunny places; some will not grow at all in a sandy soil; while others will succeed only with wet feet. A knowledge and appreciation of all these facts is necessary for the successful arrangement of the details of outdoor art. As the public comes to know these facts, there is an increasing demand for the services of the landscape architect.

Making a Landscape Architect.

The work of the landscape architect is complex. To make it a success one must first love outdoor work. He must have an eye for the artistic in nature, for landscape gardening consists in the making of new scenery along natural and artistic lines. Nature is the great example from which we copy. He should have a scientific education wherein general agriculture, horticulture, entomology and soil

physics are the leading subjects. In his college course he should also receive particular instruction in surveying, mechanical and free-hand drawing. After completing a college course of this character, the future landscape architect should spend one or two years at some large nursery where ornamentals are made a specialty in order that he may become familiar with the leading flowers and shrubs used in the landscape work. He should then spend a full year as an undergardener upon a country estate or at a botanic garden. Here he will receive practical training in the care and management of such places, in pruning, spraying, the management of greenhouses, the care of potted plants, and the thousand and one other lessons in this line which only experience can teach. Then after two years' association with a good landscape architect, where experience may be had in the making of the planting plans and the planting out from his own plans, the young landscape architect may fairly hope to make a success of his chosen profession.

One engaged in this work, however, must not lag. Each new job is a new problem unlike any he has ever had before. There can be no duplication. The planting arrangement which will make one place beautiful will produce anything but a pleasing effect upon another. The circumstances of soil, climatic surroundings all require study in order to obtain best results. New varieties of plants are being constantly introduced and one must know these thoroughly in order to make use of any which prove hardy and acceptable.

Class of Executed Work.

There is a general lack of knowledge as to what constitutes the work of a landscape architect. In order to more fully illustrate just what this work is, let us take an actual case now in hand and trace the various steps in the development of a country estate.

Some years ago I received a call from a gentleman who stated he had heard of me through a friend. He stated that he had eighty acres of land which he desired to make into a farm with a ten-acre apple orchard, and upon which he expected to live himself for nine months of the year. He inquired as to my methods of business and terms, past work and experience, and engaged me to make the plans and develop his estate. With this client, I visited the place and selected the proper location for the house, the farm cottage, barn, garden and orchard. Upon one side and near the front of the farm occurs a low, marshy place, and here I advised the formation of an artificial lake. From a topographical survey I have now prepared a planting plan of the whole place, showing the location of the building, walks, drives, orchard, kitchen garden, lake, trees and shrubbery. The apple orchard, trees, evergreens and most of the shrubs will be planted out in the next few weeks. During the coming sum-

mer the walks and drives will be laid out, the artificial lake formed, and the house and other buildings erected. Next fall the planting around the buildings and the lake will be put out, so that when the house is occupied a year hence, the trees and shrubs will have been planted long enough to give the whole a reasonably home-like appearance.

The Charge for Services.

Landscape architects differ so widely in the charge made for their services that only a general statement on this subject can be made. Some work on a percentage and others on a per diem basis. The charge, however, will vary according to the amount of study necessary in the development of each place. The charge for the planting plan is usually a stated sum, depending upon the amount of field work necessary in the location of the existing trees and shrubbery. The charge for the plan, however, is often at a given amount per acre.

Occasionally the work of the landscape architect may end with the making of the planting plan, but in most cases he also supervises the planting out of the nursery and this work is generally undertaken on a per diem basis. Each landscape architect has a number of competent foremen who do the planting out. As the season for this work lasts only for six weeks in the fall and eight weeks in the spring, it cannot be expected that the landscape architect will personally supervise the planting out. As he will have many jobs on hand at different places, he will do well if he gets around to see every job two or three times a week during the planting out of the nursery stock.

Value of Confidence.

It is unfortunate that there are at the present time so many men engaged in the work of planting trees and shrubs who are entirely without training and whose knowledge of nursery stock is limited to the names of a few flowers. These gardeners can necessarily see no professional side to their work. Lacking any artistic training or appreciation of the beautiful, they look upon their work simply as a business proposition. Too often this may be said of nurserymen who attempt to do landscape work. The time is coming when a discriminating public will be very careful into whose hands they place the making of their surrounding landscape. The average estate owner knows practically nothing about trees and shrubs and has no means of knowing whether his landscape architect is giving him his money's worth or holding him up. The landscape architect should thus be selected with considerable care and one should be confident not only of his ability but of his business integrity. Personally, I always talk over the full situation with my clients and where they are not limited as to means I like them to say: "Develop my place as you think best," or where they feel like they can afford to spend only a certain amount, I like for them to tell me to "Do what you can for this sum." I then feel that it is up to me to do my best, well knowing that a pleased client is my best advertisement. One job well done, involving only a reasonable expenditure, has often led to a dozen others.

Planting Trees.

A planting plan consists of a map drawn to a scale showing the location thereon of just what trees, shrubs and flowers are to be planted. The plan may have thereon the name of the trees and groups of shrubbery, or it may contain numbers which refer to a planting list giving a key to these numbers. In this way we are able to tell somewhat as to how a place will look when planted out. We also have a list of the nursery stock to be used in the planting and we can thus know what the whole will cost. We thus see why even a small place should be planted from a planting plan. We then know before the work is begun what is to be done and its cost.

The nursery stock is ordered by the landscape architect, generally from various nurseries, depending upon where the best stock of the different varieties can be obtained for the money. The landscape architect should make it his business to keep in touch with the stock of all the nurseries, paying each an annual visit. In this way he is able to save his clients considerable in the purchase of the nursery stock and especially to guard against the shipment of small or poorly grown stock.

Some General Principles.

There are many objects to be considered in landscape work. Except in what is known as formal gardening we aim to imitate nature as far as possible; the object being to produce a pleasing scene of grace and beauty restful to the eye. This is best done by planting the flowers and shrubs in masses, by having many plants of the same variety together. We aim to produce a mass effect of foliage or flower, and an individual plant will not give this effect. It is generally best to have an open center lawn with plantings of flowers and shrubs along the border lines with a sky-line of trees. This will give the effect of increasing the area of a place even on a city lot. The shrubbery groups should be so arranged that all of a place does not appear from any one point of view, thus giving the appearance of "more beyond." Except in extreme formal gardening a building should have a few shrubs planted close against its foundations in order to make it appear as a part of its surroundings. On residence grounds especially it is important that a few shrubs be planted just next to the front porch. The varieties to be used will depend upon the height of the porch.

After Supervision.

It should be understood that an attractive landscape cannot be made in a day. It must be a thing of growth. It takes time for the flowers, shrubs and trees to become fully grown and attain their full perfection. It is thus important that the landscape architect should supervise the after-care of a place. He will then notice spots which need a rounding out of the masses of shrubbery or places wherein the planting of a few additional flowers will bring a color scheme into perfect harmony. He can then see that the trees and shrubs are properly pruned to remove dead wood or to keep the flowering shrubs in a young and vigorous growth that they may produce a maximum of flowers. Insects and plant diseases at time play havoc with some plants, and if the landscape architect

has a place under supervision, he can give the gardener instructions as to how prevent these enemies.

*Landscape architect, proprietor of the Beaverton Nursery, 623 Worcester Building, Portland, Oregon.

AN INVESTIGATION OF QUANTITY SURVEYING.

Criticism of Architect, Business Brigandry, Cost of Estimating, and Answers.*

Sullivan W. Jones,**

From the Pacific Builder and Engineer.

Much justification but, under the existing difficult conditions of practice, unjust criticism has been directed against the architect for the general deficiency and obscurity of the drawings and specifications he issues for the purpose of estimate. The essential function of the drawings and specifications in the contract is to define and limit the character and amount of work to be included in the bid and the subsequent contract, with such precision and clearness that they are capable of only one definite interpretation. Their failure to do function, with the consequent injection into the situation of many elements of uncertainty, transforms competitive bidding into reckless gambling with quantities of labor and materials, and with the future chances of recouping possible and probable losses through securing inordinate profitable extras and through the sandbagging of the sub-contractors.

The Fate of Competitive Bidding.

Competitive bidding is fast degenerating into a disgraceful scramble from which the contractor who will take the longest chances generally emerges as the successful bidder. These conditions are undermining the contractor's moral stamina and are fostering and encouraging business brigandry in the field of building instead of honesty and efficiency.

We are all more or less familiar with the manifestations of this form of decadence; and indeed we are all finding it increasingly more difficult to secure thoroughly honest work under the lump sum contract awarded through competitive bidding. Some architects, and the number is constantly increasing, have tried the cure of eliminating the general contractor, and have succeeded in overcoming at least a part of the trouble. But this treatment alleviates the symptoms only; it does not reach the roots of the evil. We now face a situation demanding that a sound and positive basis be provided for fair and equitable competitive bidding with which honesty, ingenuity, knowledge and efficiency shall be the factors of success.

In approaching a discussion of the economics of competitive bidding under existing conditions, we have merely scratched the surface of a subject of vast proportions and far reaching in its intimate relation to the whole question of the high cost of building and to certain contributing causes of the high cost of living.

The Cost of Estimating.

The cost of estimating to the general contractor and his sub-contractor

tors collectively, according to statistics compiled upon data collected from a great number of contractors in all of the trades, is slightly over 1 per cent of the amount of the estimate. There is a wide variation between the costs of estimating as stated by the various contractors. Some have kept careful cost data and others have not. The result given is obtained by fixing the average cost in each trade expressed as a percentage of the value of the work under the trade, and reducing this average to a percentage of the cost of the entire work. To illustrate: We find that there is an average of nine bidders on structural steel. The average cost of estimating structural steel is one-sixth of one per cent of the amount of the estimate. Therefore, the total cost of estimating the structural steel for one building is nine times one-sixth per cent, or one and one-half per cent of the value of the steel. The structural steel item averages about ten per cent of the cost of the building, and the cost of estimating the steel expressed as a percentage of the cost of the building would, therefore, be ten per cent of one and one-half per cent or fifteen one-hundredths per cent. A similar extension is made for each trade and the result column totaled. Generous allowances are then made for the submission of estimates by the same sub-contractors to a number of the general contractors bidding, which is usual. There is an average of ten bids taken on each building and each contractor receives an average of seven sub-bids in each trade. Re-estimating is frequently resorted to, but no consideration has been given to this further source of waste in computing the net results.

The general contractor usually estimates the mason work and rough carpentry, and occasionally the plastering and the erection of structural steel. But even if the general contractor is eliminated, the situation does not change for the same duplication of the work of estimating then occurs in the trades usually handled by him.

The cost to the contractor of all estimates is charged to "overhead" and must eventually be distributed pro rata over the cost of work actually secured and executed. Under the law of averages each contractor secures one of every ten jobs on which he submits tenders. The accuracy of this reasoning is verified by the statement secured from various contractors. It therefore becomes evident that each owner pays the cost of estimating ten jobs of the same value as his own, in nine of which he has not the slightest interest. In other words, 10 per cent of the amounts of all estimates represents estimating cost under the inefficient methods now employed. Conversely, it is evident that by doing away with the duplication of the work of estimating, and allowing for the sake of argument, 3 per cent of the cost of the work for the preparation of complete bills of quantities and estimating data and the cost to the bidders of pricing such bills we may certainly effect a reduction of 7 per cent in the cost of building generally. This reduction expressed in dollars reaches the appalling figure of \$1,000,000,000 for the United States for the year 1912, and

this figure is safely conservative. This loss is suffered on the one item of estimating. An equal, if not greater, amount is lost to the owner annually as the result of illegitimate profits accruing to the contractor through inordinate extras, substitutions and evasions made possible by basing the contract on loose and deficient drawings and specifications. A further loss results from accumulated interest charges on payments improperly withheld both from the general contractor and from the sub-contractor.

All losses must ultimately be absorbed by the business and offset by the profits. The losses above enumerated are therefore charged against the building. The effect of this super cost are accumulative; rents and taxes are increased correspondingly, and the increase is paid year after year until the accumulated aggregate loss passes into figures outside the sphere of human comprehension.

Reflecting upon these conditions, we reach the conclusion that the duplication of work in estimating should be done away with by adopting the system of estimating on bills of quantities prepared and issued with the drawings and specifications, and that the bill of quantities be made the basis of the contract. We believe the owner should pay the cost of preparing the bills of quantities and that he should assume responsibility for their accuracy.

ANSWERS TO OBJECTIONS.

In connection with these beliefs, we would briefly answer the objections which are usually raised against them. The owner's objection to being asked to pay the quantity surveyor's fee is completely satisfied by the statements on the actual money wasted resulting from the present method. By making this further direct payment, the owner actually saves a very considerable amount and is assured of receiving full value for money spent. The objection to the owner's assuming responsibility for the bill of quantities is met by submitting that a bill of quantities prepared by a competent surveyor in free and interested co-operation with the architect can only result in the production of a complete bill and of drawings and specifications closely approaching perfection. All questions as to the true intent and meaning of the drawings and specifications will arise before bids are taken. Instead of after the contract is let as is now the case. Furthermore, the length of the quantity surveyor's business life will depend entirely upon the accuracy with which he does his work and with which his bills co-ordinate with the drawings and specifications in the construction of the work. It will be incumbent upon the quantity surveyor to see to it that not only his bills but also the drawings and specifications are clear and complete before issue. We believe that the quantity surveyor in this country must be an organization composed of experts in each trade. This will overcome the objection that much valuable time would be lost in preparing the bills.

The determination of the most expedient method of procedure for inaugurating such a radical change is an extremely difficult problem, and we are

not prepared at this time to make any definite proposals. We believe the establishment of uniform standards and rules for the measurement of materials incorporated in the structure is a condition precedent and essential to the successful operation of the system in this country; thus avoid confusion such as results in England from the use of three standards or systems.

*Abstract of report of the committee of the American Institute of Architects on quantity surveying.

**Architect and chairman of the committee, which included Leon Coquard and C. L. Borie, Jr., The Octagon, Washington, D. C.

THE LIFE OF THE FAIRER.

From the Country Gentleman.
I think that the life of a husbandman of all others is the most delectable. It is honorable, it is amusing, and, with judicious management, it is profitable.

In indulging these feelings, I am led to reflect how much more delightful to the undebauched mind is the task of making improvements on the earth than all the vainglory that can be acquired from ravaging it by the most uninterrupted career of conquest.

I know of no pursuit in which more real and important service can be rendered to any country than by improving its agriculture, its breeds of useful animals, and other branches of a husbandman's care.

MODEL OF PANAMA CANAL IN CANADA.

An interesting and instructive model of the Panama Canal, on exhibition at one of the large department stores in Vancouver, is attracting much attention. The model, which is constructed of wood and papier-mache, shows the system of lifting ships to a sufficient height to overcome the difference in the level of the waters of the Atlantic and Pacific Oceans. Pictures of the model appear in the local papers and photographs of the same are being distributed. Large crowds are attracted daily to the exhibit, which has caused much comment, resulting in a more general and intimate knowledge of the great work than could be gained from reading descriptions of the canal. The inspector of the Vancouver public schools has been so impressed with the educational value of this working model that an arrangement has been made permitting the pupils to take the time during school hours to visit the exhibition.

The rights for exhibiting the model are controlled in Portland, Ore., and the Vancouver company making the display have been six months negotiating for the privilege of placing the plan on exhibition in this city.

A FACE WE ALL LOVE.

There are faces we love and faces we hate.
And some that would make you boiler.

But the face worth while
And that makes you smile
Is the face on the silver dollar.

—Jacksonville Times-Union

Plans desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mrs. Bertha Overfield. The building will be erected at the corner of Fillmore and Green streets, and will cover a considerable ground area. Interior has been arranged for a number of three and four room suites, all of which will have private bath and wall beds. Interior finish will be of pine and hardwood veneer. There will be steam heat, portable vacuum cleaners and a hot water system. Bath rooms will be finished in tile and will have composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. A pressed brick veneer base will be used. Plans are complete and figures are being taken.

Exhibit of Steel Corporation.

The announcement is made that the United States Steel Corporation and its subsidiary companies propose to have a comprehensive exhibit of its operations at the Panama-Pacific Exposition in San Francisco in the year 1915. It will begin with the ore fields and carry on an educative picture of its operations in ore mining, rail and water transportation, dock operations, coal, coke, and pig iron production, steel manufacturing in its various lines, and will also present in a materially displayed way the processes of manufacturing of many of its subsidiary companies' products, including "National" pipes; also how it utilizes its by-products and the display of many uses in which its general products are employed, typifying the advancement in the uses of this country's resources.

In addition to the material exhibits before mentioned, the corporation intends to exhibit in a comprehensive manner by moving pictures its operations throughout all departments, showing the ramifications of the processes of the corporation's operations. It is proposed, as well, to set forth to the world the work which the United States Steel Corporation has done towards the social welfare of its employees and those depending upon them. Also it will exhibit many forms of safety devices that have been conceived by the corporation officials and its employees and in the installation of which large sums have been and

are being expended by the corporation.
SAN FRANCISCO—Concession building, 1 story, frame and plaster. Cost not stated. Architect, Carl Werner, Phelan Bldg., S. F. Owners, The Neptune Amusement Co. The work will include a large swimming tank besides many unique features. There will also be a large auditorium with a seating capacity of 1,000 people. Interior will be finished in plaster. Special mechanical equipment will be required. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are now being taken.

SAN FRANCISCO—Live stock building, 1 story, frame and plaster. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for the Live Stock Exhibit building to be erected on the Exposition grounds. Bids are now being taken by the Buildings and Grounds Committee of the Exposition Co. Plans can be secured from the office of the Director of Works. An official proposal appears in another column of this issue. Bids will be opened on May 21.

SAN FRANCISCO—Spraying exhibition palace with cold water paint. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on May 19th for spraying the principal exhibition palace on the grounds with cold water paint. All particulars can be secured from the office of the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster, \$35,000. Architect's name not given. Owners, State of Massachusetts. Bids opened for this work show W. D. Henderson of San Francisco low at \$52,975. A complete list of these figures will be found under the heading of San Francisco in this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Power station, 1 story and base, reinforced concrete, \$30,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. The building will be erected on the south side of Commercial street east of Montgomery, covering an area of 49 feet 9 inches by 59 1/2 feet. Construction will be fireproof with reinforced concrete walls, floors and roof slabs. Interior will be finished in pine and metal. Metal window sash and frames and fireproof doors will be used. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Railroad construction, \$20,000. Engineer, Constructing Quartermaster's Office, Fort Mason, Owners, United States Government. Plans are now being completed for the construction of a railroad connecting the Fort Mason tunnel with the Transport Ducks. Specifications are now in the hands of the printer and bids will be called for within a few days. An official proposal will appear in this issue. The work will require 114-

pound rails, 127-pound guard rails, redwood ties and rock ballast.

SCHOOLS.

LANDDALE, MARIN CO., CAL.—School, 1 story and base, frame, \$10,000. Architect, J. W. Dolliver, Royal Insurance Bldg., S. F. Owners, Landdale School District. The building will contain four rooms and an assembly hall. Interior finish will be of pine throughout. There will be a warm air system of heating. Black boards and modern school plumbing will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

MCMINNVILLE, ORE.—School, 2 story and base, brick, \$30,000. Architect, Ernest Kroner, Worcester Bldg., Portland. Owners, McMinville School District. The building has been designed to contain six class rooms, principal's office and an assembly hall. Interior will be finished in pine throughout. Maple floors will be used in the class rooms. Plans provide for furnace heat and modern school plumbing. Exterior will be faced with pressed brick. Plans are now being prepared and figures will be called within the next three weeks.

STOCKTON, SAN JUAN CO., CAL.—School, 2 story and base, brick and steel. Cost not stated. Architects, Stone & Wright, 21 California street, Stockton. Owners, City of Stockton. Bids opened at the last meeting of the Board of Education for the construction of the West Side School show Daniels & Green of Stockton low at \$71,841. They will probably be awarded the contract. A complete list of the bids as opened appears under the heading of Sacramento, Stockton and Northern California in this issue.

LANCASTER, LOS ANGELES CO., CAL.—School, 2 story and base, reinforced concrete, \$30,000. Architect, E. L. Hopkins, Delta Bldg., L. A. Owners, Lancaster School District. A one-story building to contain four class rooms, besides laboratory rooms, study rooms, etc., and a dormitory to accommodate 30 students, will be erected. Both will be of reinforced concrete construction with pine finish and floors infurnace heat, composition roofs and plumbing. Plans are being prepared.

FRESNO, FRESNO CO., CAL.—School, 2 story and base. Cost not stated. Architects, Swartz, Hotchkiss & Swartz, Roswell Bldg., Fresno. Owners, City of Fresno. Preliminary plans have been prepared under the direction of W. D. Coates, Supervising Architect, for the Emerson School. No details of the building have been made public, but it is understood that it will be one of the largest of the new schools to be erected in Fresno. All modern school appliances will be installed. Further details will be given as the work progresses.

FRESNO, FRESNO CO., CAL.—School, 2 story and base, brick. Cost not stated. Architects, Glass & Butler, Fresno. Owners, City of Fresno. The building has been designed for a seven-room school with an assembly hall. Interior finish will be of pine throughout. Maple floors will be used in the class rooms. There will be steam heat, an oil burning plant and vacuum cleaning. Exterior of the building will be faced

with pressed brick. Plans will be completed shortly.

SEWERS, STREET WORK AND WATER SYSTEMS.
